One. The leased machinery shall at all times remain and be the sole and exclusive property of the lessor, and the lessee shall have no right of property therein, but only the right to use the same, upon the conditions herein contained. The leased machinery shall be used only by the lessee himself or by operatives in his direct employ, and only in the factory now occupied by him at in the State of . The leased machinery shall not be transferred or delivered or sublet to any other person or corporation, and neither

this agreement nor the lease nor the license hereby granted can be assigned by the lessee by his own act or by operation of law. If the lessee becomes insolvent or bankrupt, or has a receiving order made against him, or makes or executes any bill of sale, deed of trust or assignment for the benefit of his creditors, or if a sale, mortgage, lease or removal of the leased machinery, or any part thereof, be made or attempted, or if any distress or execution or attachment be levied thereon, then and in each such case any or all leases of or licenses to use machinery then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, shall at the option of the lessor cease and determine, and the possession of and full right to and control of all machinery the leases or licenses of which are so terminated, shall thereupon revest in the lessor free from all claims or demands whatsoever. The lessor and its agents and employees shall at all times be given access to the leased machinery for the purpose of inspecting it or watching its use and operation, or of altering, repairing, improving, or adding to it, or determining the nature or extent of its use, and the lessee shall afford all reasonable facilities therefor.

Two. The lessee shall at all times and at his own expense keep the leased machinery in good and efficient working order and condition, and shall not permit any one to injure or deface or remove any plate, or dates, numbers, or other inscriptions now or hereafter impressed on or affixed to the leased machinery by the lessor. The lessee shall obtain from the lessor exclusively, and shall pay therefor at the regular prices from time to time established by the lessor, all the tree legs, tree feet, tree backs, irons, duplicates, parts, extras, mechanisms and devices, of every kind needed or used in operating, repairing, or renewing the leased machinery, and the same shall form part of the leased machinery, and the lessee shall not otherwise make or allow to be made any addition, subtraction or alteration to, from, or in the leased machinery, without the consent in writing of the lessor, nor interfere with the proper operation of the same.

Three. The lessee shall pay all taxes and assessments which shall be assessed in respect to the leased machinery or other machinery

of the lessor held by the lessee under lease or license upon whomsoever assessed. All taxes or assessments in respect to leases, licenses or agreements covering machinery, or the rights to payments thereunder, shall be construed, for the purposes of this article, to be assessed in respect to the machinery itself. In case at any time any unapportioned tax or assessment shall be assessed to the lessor in respect in part but not wholly to machinery of the lessor in the possession of the lessee the lessee shall pay to the lessor such proportionate part of the total amount of said unapportioned tax or assessment as the fair valuation, to be determined by the lessor, of said machinery of the lessor in the possession of the lessee bears to the fair valuation, to be determined by the lessor, of all machinery (excepting machinery, if any, in the lessor's own possession) in respect to which the unapportioned tax or assessment has been assessed; provided, however, that if such unapportioned tax or assessment includes any tax or assessment in respect to tangible property in the lessor's own possession the amount thereof, based, at the established rate, upon the fair valuation, to be determined by the lessor, of such property, shall first be deducted and the lessee shall pay his proportionate part as aforesaid of the balance only of said unapportioned tax or assessment after such deduction has been made.

Four. The leased machinery shall not nor shall any part thereof be used in the manufacture of any welted boots, shoes, or other footwear which have been or shall be welted or the soles stitched by the aid of any welt sewing or sole stitching machinery not held by the lessee under lease from the lessor or in the manufacture of any turn boots, shoes or other footwear the soles of which have been or shall be attached to their uppers by the aid of any turn sewing machinery not held by the lessee under lease from the lessor, or in the manufacture of any boots, shoes, or other footwear which have been or shall be lasted, pegged, slugged, heel seat nailed, or otherwise partly made by the aid of any lasting or pegging or "Metallic" machinery or mechanisms not held by the lessee under lease from the lessor.

Five. The lessee shall pay to the lessor immediately after the execution hereof, as a lease premium, the sum of dollars.

Six. The lessor may attach to the leased machinery or any thereof an indicator or indicators to register the number of revolutions or movements of any part or parts thereof, and the lessee shall not allow any person (other than the lessor or its agents) to disturb or interfere with any such indicator or indicators. In case any indicator thus attached shall from any cause cease to correctly indicate or register, or shall be disturbed or out of repair, or if the glass covering any such indicator shall be removed or broken or injured, then and as often as the same shall happen the lessee shall immediately by writing notify the lessor and at the same time explain the circumstances under which the same has happened.

And that the following stipulations and provisions are agreed to:

Seven. The term of this agreement shall be seventeen years from the date hereof. The lease of the leased machinery and license to use the same hereby granted shall continue, unless sooner terminated by the lessor because of breach thereof on the part of the lessee, or otherwise as herein provided, for the full term of this agreement. But if any breach or default shall be made in the observance of any one or more of the conditions in this agreement contained or contained in any other lease or license agreement subsisting between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise and expressed to be obligatory upon the lessee, the lessor shall have the right by notice in writing to the lessee to terminate forthwith any or all leases of or licenses to use machinery then in force between the lessor and the lessee, and this notwithstanding that previous breaches or defaults may have been unnoticed, waived, or condoned by or on behalf of the lessor. If, upon the expiration of the full term of this agreement, the lessor does not request the return of the leased machinery, then the leased machinery shall continue to be held and used under and in accordance with the conditions, stipulations and provisions in this agreement contained and this agreement and the lease and license herein contained shall thereupon be extended indefinitely as to term; but thereafter either the lessee or the lessor,

upon sixty days' notice in writing to the other, may terminate this agreement and the lease and license herein contained, whereupon the leased machinery shall be delivered forthwith to the lessor, as herein provided. Upon the expiration or termination of the lease hereby granted or any extension thereof by notice or by reason of any default on the part of the lessee as to the terms of this agreement or of any other lease or license agreement from the lessor or otherwise, in any manner whatsoever, the lessee shall forthwith at his own expense deliver the leased machinery to the lessor at Beverly, Massachusetts, complete and in good order, reasonable wear and tear alone excepted; and the lessee for himself, his heirs, executors and administrators, hereby grants to the lessor, its successors and assigns, full right, power and authority to enter upon the premises and into any factory, room, or any place where the leased machinery, or any part thereof, may be, and take possession thereof, and take away the same; and the lessee shall have no claim for the repayment of any sum or sums or any part thereof which shall have been paid as consideration for the grant of this lease and license or for rent or royalty or otherwise in respect to the leased machinery.

Eight. A notice in writing, signed by the president, a vice-president, the treasurer or an assistant treasurer of the lessor or by any assignee of the lessor's rights hereunder, and posted by prepaid letter, addressed to the lessee or delivered at his usual or last known place of abode or business, that the lease and license hereby granted is terminated or shall be terminated at the expiration of a certain period, shall be a sufficient termination of the lease and license from the time of posting or delivering such notice, or from the expiration of the period therein mentioned, as the case may be. Any termination of this agreement or of the lease and license hereby granted shall not release the lessee from his obligation to pay rent or royalty for the period prior to such termination and shall be without prejudice to any other rights or remedies which the lessor may have for violation of contract, use of machines without right or use of patented inventions without license.

Nine. The lessee admits the validity for the full term expressed

in the grant thereof (and every extension and renewal thereof) of each and every of the Letters Patent of the United States of America, owned by the lessor or under which it is licensed, any of the inventions of which are or hereafter may be embodied in the leased machinery. The lessee also agrees that he will not directly or indirectly infringe or contest the validity for the full term expressed in the grant thereof or of any extension or renewal thereof, of any of the Letters Patent referred to in the Schedule of Patents hereto annexed or the title of the lessor thereto. The expiration of this agreement or any extension thereof or the termination or cesser of the lease and license hereby granted shall not in any way affect the provisions of this clause, or release or discharge the lessee from the admissions and estoppels herein set forth.

Ten. None of the conditions, stipulations or provisions of this agreement shall be held to have been waived by any act or knowledge of the lessor, its agents or employees, but only by an instrument in writing, signed by the president, a vice-president or the treasurer of the lessor.

Eleven. The term "lessor" shall include the said United Shoe Machinery Company and its successors and assigns. All the conditions, stipulations and provisions binding on the lessee shall be binding on and enforceable against his legal representatives. In the construction of this instrument, words relating to the number and gender of the parties shall be read according to their real number and gender.

In witness whereof, the parties hereto have duly executed this instrument in duplicate, the day and year first above written.

PLAINTIFF'S EXHIBIT 58.

[Put in Evidence, page 406.]

Lease and License Number . [2901]

This Lease and Agreement made at Boston, in the State of Massachusetts, this day of 19 , between the United-Xpedite Finishing Company, a corporation organized under the laws of the State of Maine, having an office in said Boston, hereinafter referred to as the lessor, of the one part, and of in the State of , hereinafter referred to as the lessee, of the other part:

Witnesseth, that the lessor, in consideration of the covenants and agreements on the part of the lessee herein contained, does hereby lease to and license the lessee under its patents to use Xpedite Finishing Machine No. now or hereafter delivered to the lessee, and also for use in connection with said machine or other like machines held by the lessee under lease and license from the lessor but not otherwise all tools, brushes, brush rolls, beads, duplicates, parts, extras, mechanisms and devices relating to said machine or for use in connection therewith, now attached to or delivered with the said designated machine or which may at any time hereafter be obtained from the lessor, or be added thereto by or with the con-

sent of the lessor and especially does lease to and does license the lessee under its patents to use in connection with said machine or other like machines held by the lessee under lease from the lessor, but not otherwise Xpedite Finishing Tool(s) No(s). (which machine together with all tools, brushes, brush rolls, beads, duplicates, parts, extras, mechanisms and devices, held by the lessee under these presents, whether now or hereafter delivered to or in the possession of the lessee, including said designated Xpedite Finishing Tool(s) is hereinafter referred to as the "leased machinery"), subject to the conditions hereinafter contained.

And that the following are agreed to as conditions of the lease and license of the leased machinery, all of which the lessee covenants and agrees to keep and perform:—

One. The leased machinery shall at all times remain and be the sole and exclusive property of the lessor, and the lessee shall have no right of property therein, but only the right to use the same, upon the conditions herein contained. The leased machinery shall be used only by the lessee himself, or by operatives in his direct employ, and only in the factory now occupied by him at in the State of . The leased machinery shall not be transferred or delivered or sublet to any other person or corporation, and neither the lease nor the license hereby granted can be assigned by the lessee by his own act or by operation of law. If the lessee becomes insolvent or bankrupt, or has a receiving order made against him, or makes or executes any bill of sale, deed of trust or assignment for the benefit of his creditors, or if a sale, mortgage, lease or removal of the leased machinery, or any part thereof, be made or attempted, or if any distress or execution or attachment be levied thereon, then and in each such case this lease and license and any other lease or license then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, shall at the option of the lessor cease and determine, and the possession of and full right to and control of all the leased machinery, and any machinery held by the lessee under any other lease or license from the lessor, whether as the result of assignment to the lessor or otherwise, shall thereupon revest in the lessor

free from all claims and demands whatsoever. The lessor and its agents and employees shall at all times be given access to the leased machinery for the purpose of inspecting it or watching its use and operation, or of altering, repairing, improving, or adding to it, or determining the nature or extent of its use, and the lessee shall afford all reasonable facilities therefor.

Two. The lessee shall at all times and at his own expense keep the leased machinery in good and efficient working order and condition, and shall not permit any one to injure or deface or remove any plate, or dates, numbers, or other inscriptions now or hereafter impressed on or affixed to the leased machinery by the lessor. The lessee shall obtain from the lessor exclusively and shall pay therefor at the regular prices from time to time established by the lessor, all finishing tools, beads, duplicates, parts, extras, mechanisms and devices of every kind needed or used in operating, repairing, or renewing the leased machinery, and the same shall form part of the leased machinery with the same force and effect as if the same had been delivered to the lessee upon the execution of these presents, and the numbers of any additional Xpedite Finishing Tools hereafter delivered to or in the possession of the lessee may be inserted herein by the lessor, and the lessee shall not otherwise make or allow to be made any addition, subtraction or alteration to, from, or in the leased machinery, without the consent in writing of the lessor, nor interfere with the proper operation of the same.

Three. The leased machinery shall at all times, until the expiration or termination of the lease and license hereby granted and the re-delivery of the leased machinery into the possession of the lessor as hereinafter provided, be held at the sole risk of the lessee from injury, loss or destruction, and in case the Xpedite Finishing Machine hereby leased shall be lost or destroyed by fire or otherwise before such expiration or termination and re-delivery, the lessee shall pay to the lessor the sum of Seventy-five (75) Dollars as partial reimbursement to the lessor for such loss or destruction, and the lessee shall forthwith return whatever remains of the leased machinery to the lessor at Beverly, Massachusetts.

Four. The lessee shall pay all taxes and assessments which shall

be assessed in respect to the leased machinery or other machinery of the lessor held by the lessee under lease or license upon whomsoever assessed. All taxes or assessments in respect to leases, licenses or agreements covering machinery, or the rights to payments thereunder, shall be construed, for the purposes of this article, to be assessed in respect to the machinery itself. In case at any time any unapportioned tax or assessment shall be assessed to the lessor in respect in part but not wholly to machinery of the lessor in the possession of the lessee the lessee shall pay to the lessor such proportionate part of the total amount of said unapportioned tax or assessment as the fair valuation, to be determined by the lessor, of said machinery of the lessor in the possession of the lessee bears to the fair valuation, to be determined by the lessor, of all machinery (excepting machinery, if any, in the lessor's own possession) in respect to which the unapportioned tax or assessment has been assessed; provided, however, that if such unapportioned tax or assessment includes any tax or assessment in respect to tangible property in the lessor's own possession the amount thereof, based, at the established rate, upon the fair valuation, to be determined by the lessor, of such property, shall first be deducted and the lessee shall pay his proportionate part as aforesaid of the balance only of said unapportioned tax or assessment after such deduction has been made.

Five. The leased machinery shall be used for no other purpose than for polishing or finishing the heels of boots, shoes and other footwear made by the lessee and no Xpedite Finishing Tool held by the lessee shall be used separately or in any manner otherwise than in combination with and as a part of the Xpedite Finishing Machine hereby leased or other like machine held by the lessee under lease from the lessor.

Six. The lessee shall use the leased machinery to its full capacity for polishing and finishing the heels of all boots, shoes, and other footwear made in his factory in the manufacture of which it can be used.

Seven. The lessee shall pay to the lessor on the last day of each calendar month as rent or royalty the sum of one-sixth of one cent

for each pair of heels polished or finished or manufactured or prepared during the next preceding calendar month in any way, whether wholly or in part, by the aid of the leased machinery or any part thereof: **provided, however, that in all cases when the lessee shall pay to the lessor on or before the fifteenth day of the calendar month the rent or royalty due for the use of the leased machinery for the next preceding calendar month, the lessor will in consideration of such prompt payment grant a discount of fifty per cent. from such rent or royalty due for such preceding calendar month.** The lessee guarantees that the rent or royalty herein provided (less all abatements) shall amount to at least Fifty (50) Dollars during each calendar year embraced by this lease and at the end of each calendar year the lessee shall pay to the lessor the amount, if any, by which the rent or royalty paid for said year is less than such guaranteed rent or royalty; provided, however, that if in any calendar year the factory of the lessee remains wholly idle for any entire calendar month, then the amount of rent or royalty guaranteed for that year shall be reduced by one-twelfth for each such month that the factory thus remains wholly idle.

Eight. The lessor may attach to the leased machinery, or any thereof, an indicator or indicators to register the number of revolutions or movements of any part or parts thereof, and the lessee shall not allow any person (other than the lessor or its agents) to disturb or interfere with such indicator or indicators. In case any indicator thus attached shall from any cause cease to correctly indicate or register, or shall be disturbed or out of repair, or if the glass covering any such indicator shall be removed or broken or injured, then, and as often as the same shall happen, the lessee shall immediately, by writing notify the lessor, and at the same time explain the circumstances under which the same has happened. In case any such indicator ceases to indicate, or becomes or remains inaccurate, or the glass covering becomes or remains removed, broken or injured, because of any fault of the lessee or any one in his employ, or because of the failure of the lessee to give promptly the notice hereinbefore provided for, then, without prejudice to any other rights of the lessor hereunder, the lessee shall pay the lessor as

rent or royalty, without the right to any discount, one-fourth of one cent per pair for each pair of heels in finishing or polishing or manufacturing or preparing which the leased machinery or any part thereof shall have been used. The lessee shall keep full and accurate accounts, independently of any indicators that may be placed upon the leased machinery, showing the number of heels in finishing or polishing or manufacturing or preparing which the leased machinery or any part thereof shall have been used, and shall allow the lessor at all times, by its agents or attorneys, to examine and to take copies of such accounts and entries of the lessee as may serve to determine the total number of heels finished or polished or manufactured or prepared by the aid of the leased machinery or any part thereof, and the lessee shall produce all such accounts and entries upon request. The lessee shall require each of his operators upon the leased machinery or any part thereof to keep upon blanks or blank books, to be furnished by the lessor, accurate daily records of the number of heels, in polishing or finishing or manufacturing or preparing which he has used the leased machinery or any part thereof, and shall require his operators to sign such records, and, if requested so to do by the lessor, shall verify the same under oath. The lessee shall send to the office of the lessor in Boston, on or before the fifth day of each calendar month, the original records for the next preceding calendar month kept by his operators as above provided for; and, in case in any calendar month, none of the leased machinery has been used, the lessee shall notify the lessor in writing of that fact, on or before the fifth day of the next succeeding calendar month. The lessee shall also furnish any further information which may be called for in relation to the leased machinery or the use thereof.

And that the following agreements, stipulations, and provisions are agreed to: —

Nine. If at any time the lessee shall fail or cease to use exclusively finishing machinery, tools and devices held by him under lease from the lessor for finishing the heels of all boots, shoes and other footwear made by or for him, the lessor, although it may have waived or ignored prior instances of such failure or cessation,

may, at its option, terminate forthwith, by notice in writing this lease and license and any or all other leases or licenses then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and the possession of and full right to and control of all the leased machinery, and all machinery, tools and devices held by the lessee under lease or license from the lessor shall thereupon revest in the lessor free from all claims and demands whatsoever.

Ten. This lease and license shall continue, unless sooner terminated by the lessor by notice or because of breach thereof on the part of the lessee, or otherwise as herein provided, for seventeen years from the date hereof. If any breach or default shall be made in the observance of any one or more of the conditions herein contained or contained in any other lease or license agreement subsisting between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise and expressed to be obligatory upon the lessee, the lessor shall have the right, by notice in writing to the lessee, to terminate forthwith this lease and license, and also if the lessor so elects any or all other lease or license agreements then in force between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and this notwithstanding that previous breaches or defaults may have been unnoticed, waived, or condoned by or on behalf of the lessor. If, upon the expiration of the full term of this lease, the lessor does not request the return of the leased machinery, then the leased machinery shall continue to be held and used under and in accordance with the conditions of this lease and license, which shall thereupon be extended indefinitely as to term; but thereafter either the lessee or the lessor, upon sixty days' notice in writing to the other, may terminate this lease and license, whereupon the leased machinery shall be delivered forthwith to the lessor, as herein provided. Upon the expiration of this lease and license or any extension thereof or its termination by notice or by reason of any default on the part of the lessee as to the terms of this lease and license or any other lease or license from the lessor or otherwise in any manner whatsoever, the lessee shall forthwith deliver the

leased machinery to the lessor at Beverly, Massachusetts, in good order, reasonable wear and tear alone excepted; and without prejudice to any other rights and remedies of the lessor hereunder, shall thereupon pay to the lessor the sum of Fifty (50) Dollars as compensation for setting up the leased machinery in his factory, for instructing operators and for deterioration of the leased machinery; and the lessee for himself, his heirs, executors and administrators, hereby grants to the lessor, its successors and assigns, full right, power and authority to enter upon the premises and into any factory, room, or any place where the leased machinery, or any part thereof, may be, and take possession thereof, and take away the same.

Eleven. A notice in writing, signed by the president, a vice-president, or the treasurer of the lessor or by any assignee of the lessor's rights hereunder and posted by prepaid letter, addressed to the lessee or delivered at his usual or last known place of abode or business, that the lease and license hereby granted is determined or shall be determined at the expiration of a certain period, shall be a sufficient determination of the lease and license from the time of posting or delivering such notice, or from the expiration of the period therein mentioned, as the case may be. Any termination of this lease and license shall not release the lessee from his obligation to pay rent or royalty for the period prior to such termination, and shall be without prejudice to any other rights or remedies which the lessor may have for violation of contract, use of machines without right, or use of patented inventions without license.

Twelve. The lessee admits the validity for the full term expressed in the grant thereof (and every extension and renewal thereof) of each and every of the Letters Patent of the United States of America owned by the lessor or under which it is licensed, any of the inventions of which are or hereafter may be embodied in the leased machinery or which cover any process in the carrying out of which the leased machinery is intended or adapted to be employed. The lessee also agrees that he will not directly or indirectly infringe or contest the validity for the full term expressed in the grant

thereof or of any extension or renewal thereof, of any of the Letters Patent referred to in the "Schedule of Patents" hereto annexed or the title of the lessor thereto. The expiration of this agreement or any extension thereof or the termination or cesser of the lease and license hereby granted shall not in way affect the provisions of this clause, or release or discharge the lessee from the admissions and estoppels herein set forth.

Thirteen. None of the terms or conditions of this lease and license shall be held to have been waived by any act or knowledge of the lessor, its agents or employees, but only by an instrument in writing, signed by the president, a vice-president or the treasurer of the lessor.

Fourteen. The term "lessor" shall include the said United-Xpedite Finishing Company and its successors and assigns. All the conditions and agreements binding on the lessee shall be binding on and enforceable against his legal representatives. In the construction of this instrument, words relating to the number and gender of the parties shall be read according to their real number and gender.

In witness whereof, the parties hereto have duly executed this instrument, the day and year first above written.

☞ If lessee is a corporation, add corporate seal.

[Put in Evidence, page 409.]

Lease No.

Transfer from Lease No.

This Lease and Agreement made the *24th* day of *May* A. D. 1897, by and between the Eppler Welt Machine Company, a corporation organized under the laws of the State of Maine, having a place of business at Boston, Massachusetts, Lessor, the party of the first part, and *P. W. Kane of Geneva N. Y.* Lessee, the party of the second part, witnesseth:

Whereas, the Lessor is now the owner of the following Letters Patent of the United States, viz.: —

No. 325,063, dated Aug. 25, 1885;
No. 387,059, dated July 31, 1888;
No. 487,011, dated Nov. 29, 1892;
No. 409,281, dated Aug. 20, 1889;
No. 507,873, dated Oct. 31, 1893.
No. 387,058, dated July 31, 1888;
No. 447,872, dated March 10, 1891;
No. 487,214, dated Nov. 29, 1892;
No. 498,017, dated May 23, 1893;

And whereas the Lessee desires to use the hereinafter described machines belonging to the Lessor;

Now, therefore, the Lessor, in consideration of one dollar to it paid by the said Lessee, the receipt whereof is hereby acknowledged, and of the stipulations and conditions hereinafter contained on the part of the Lessee to be kept and performed, doth lease unto the said party of the second part the machines designated by their numbers in the following schedule: —

one Eppler Inseam Sewing Machine , No. *111*
one Eppler Outsole Lock Stitch Machine , No. *117*
one Eppler Insole Channeler , No. *70*
~~one~~ Eppler Outsole Channeler , No.

one Eppler Welt Groover and Beveler , No. *96*
one Eppler Welt Splitter , No. *55*
one Eppler Welt Beater , No. *60*
~~Eppler Channel Lip Turner , No.~~
~~Eppler Shank Skiver , No.~~
one Eppler Bobbin Winder , No. *77*

It is understood that said machines are and shall remain the property of said Eppler Welt Machine Company, and subject to the conditions of this lease and agreement.

And the Lessor doth hereby license the Lessee, and the operatives in his employment, to use said machines, upon the terms and conditions hereinafter set forth ; provided, however, and this lease is made and this license is granted on the express condition, that the Lessee shall faithfully keep and perform all the conditions and stipulations herein contained on his part to be kept and performed ; and upon breach of the same or of any of them by the Lessee, the Lessor, its successors or assigns, may, at their option, cancel and terminate this lease and license ; and upon written notice thereof by the Lessor, its successors or assigns, to the Lessee, or to any one in the possession or apparent control of the said machines, or any of them, this lease and license shall terminate, and possession of said machines shall thereupon be transferred to said Lessor, its successors or assigns. And the said party of the second part hereby agrees to keep and perform all the following conditions of this lease and license : —

First. The Lessee is by this lease and license authorized to use the machines hereby leased only in said *Geneva N. Y.* he shall not add to nor subtract from the said machines any mechanism whatever, now or hereafter organized or connected therewith by the Lessor, nor make, nor allow to be made, any change or alteration in the same, without the consent thereto in writing by the Lessor, nor interfere with the proper operation of the machines, or any mechanism forming a part thereof, or attached thereto, nor remove nor deface any dates, numbers, or inscriptions now or hereafter impressed thereon or affixed thereto by the Lessor.

Second. It shall be lawful for the Lessor, or its duly authorized

agent, at all reasonable times to have convenient access to the machines, to examine and inspect the same and the use thereof, and to verify the operator's reports, and to improve the machines, and to affix indicators thereto, as it may see fit; and the covenants, stipulations and conditions herein contained shall apply to all improvements which the Lessor shall hereafter add to the machines, to indicators now or hereafter affixed thereto, and to all patents hereafter embodied therein, with the same effect as if said patents were included in the list herein set forth.

Third. The following is the schedule of rents or royalties hereinafter referred to, and which it is understood and agreed is to be paid on each pair of shoes or boots respectively made by the aid of these machines or any of them, or by the use of the said patents or any of them, viz.: —

SCHEDULE OF RENTS AND ROYALTIES.

Children's . .	3 cents.	Youths' . .	4 cents.
Misses' . .	4 "	Boys' . . .	6 "
Women's . .	6 "	Men's . .	8 "

Fourth. The Lessee hereby agrees to keep an account of all boots and shoes sewed by him or by any other person for him or for others, by the aid of the machines hereby leased, or by the use of the patents aforesaid and to render an account thereof to the Lessor, its successors or assigns, on or before the tenth day of each month; which account shall specify the number of pairs of boots and shoes, made under this lease and license during the calendar month next preceding, and the class to which they belong according to the above schedule; and the said Lessee agrees that he will require the operator or operators on said machines to keep a daily account of all boots and shoes sewed on said machines, upon the printed forms to be furnished by the Lessor, in duplicate; one copy of which, containing such reports for the calendar month preceding, the Lessee agrees to send, on or before the tenth day of each month, to the Lessor; and whenever required by the Lessor, its successors or assigns, to make oath to the correctness of said returns; and to allow the Lessor, its successors, assigns, or authorized agents to

examine the original books and accounts of the Lessee, in order to verify the returns aforesaid, and the Lessee agrees to send to the Lessor, on or before the tenth day of each month, in case the machines, or any of them, hereby leased have not been run during the month next preceding, one of the aforesaid printed forms furnished by the Lessor, for each such machine, signed by the Lessee, and marked across the face with the words "not running" or "not in use."

Fifth. The Lessee agrees to pay unto the Lessor, as rent for the machines hereby leased, the rent or royalty specified in the schedule forming part of Section Third herein, on each pair of boots or shoes of the respective kinds mentioned or described in said schedule made by the aid of said machines or of any of them, or by the use of said patents or of any of them; the rents and royalties for all such boots and shoes made as aforesaid during one calendar month, to be due on the first day of the calendar month next following, and to be paid within three months from that day; but the Lessor hereby agrees that **if the rents and royalties due on the first day of any month shall be paid for on or before the fifteenth day of that month, it will, in consideration thereof, grant a discount of fifty per cent. from the rents and royalties specified in the schedule aforesaid; and the Lessee further agrees to pay, while he shall retain possession of the machines hereby leased, all taxes thereon, to whomsoever laid or assessed.** The Lessee hereby further agrees that the rents or royalties actually paid by the Lessee for each sewing or stitching machine herein leased shall, in each and every year, during the continuance of this lease, amount in the aggregate to at least one hundred dollars. The Lessee shall also pay the expense of transportation of the machines herein leased from and to the Lessor's premises, and also the expense of keeping said machines in repair; and shall keep said machines and all of them fully insured in the amounts hereinafter mentioned against loss by fire, and in case of loss of or damage to said machines or any of them shall pay to the Lessor or its order upon demand the full amount of such insurance. The insurance upon said machines shall be in the following amounts, to wit: —

Eppler Inseam Sewing Machine	$250.00
Eppler Outsole Lock Stitch	190.00
Eppler Insole Channeler	50.00
Eppler Outsole Channeler	50.00
Eppler Welt Groover and Beveler	15.00
Eppler Welt Splitter	10.00
Eppler Welt Beater	25.00
Eppler Channel Lip Turner	25.00
Eppler Shank Skiver	35.00
Eppler Bobbin Winder	25.00

Sixth. The Lessee hereby agrees that he will not in any way violate or infringe, or contest the validity of any of the patents he is hereby licensed to use, or the sufficiency of their specifications, or the validity of the title of the Lessor, or of its successors or assigns, to said patents, or either or any of them.

Seventh. This lease and license is not assignable by the Lessee, by his own act or by operation of law.

Eighth. The following are also agreed to by the parties to this instrument as the terms of lease and license of the machines which the Lessee is hereby licensed to use: —

1st. That the power conveyed by this lease and license is only the right to use the said machines, and not the right to make or sell any machine embodying the patents aforesaid, or any of them; and that a transfer or removal of the machines hereby leased, or any of them, can only be made with the consent of the Lessor, its successors or assigns; and that if the Lessee is, or becomes at any time, insolvent or bankrupt, or makes an assignment for the benefit of creditors, or if a sale, lease, transfer, or removal of said machines, or any of them, shall be made or attempted by the Lessee, or by operation of law, or by any legal officer, representative, or assignee, as the property of the Lessee, without the written consent of the Lessor, or its successors or assigns, this lease and license shall thereupon terminate and expire; and the Lessor, its successors or assigns, may take possession of said machines without the Lessee having any claim for the repayment of any part of the sum or sums

which he may have paid as consideration for the delivery of this lease and license, or for rent or license under this instrument.

2d. The Lessee agrees that the machines hereby leased shall be used only in the manufacture of boots and shoes known in the trade as "Eppler Welts," and that he will not use or permit the use of said machines, or either or any of them, upon boots or shoes in the manufacture of which any sole or welt sewing machine not leased to him by the Lessor is employed, or for any other purpose, unless the consent in writing of the Lessor shall first have been obtained.

3d. That in case the Lessee refuses or neglects to perform, or violates any of the terms or conditions of this lease and license, the Lessor, its successors or assigns, shall have the right to terminate this lease and license by giving written notice as aforesaid that it has elected so to do; and upon the giving of such notice this lease and license shall be terminated, and the possession of said machines shall thereupon be transferred to the lessor, its successors or assigns, free and discharged of this lease and license; and the Lessor, its successors or assigns, or its authorized agent or agents, may thereupon enter the premises where said machines may be, and may take and remove the same without being deemed guilty of any trespass; and the Lessee shall have no claim whatever on account of any sum or sums he may have paid for or under this lease or license.

4th. That this lease and license shall continue (provided the Lessee complies with the terms and conditions thereof) until the expiration of all the Letters Patent which the Lessee is hereunder licensed to use, or any extensions or renewals of the same, or additional patents; and upon the expiration thereof, the Lessee shall deliver to the Lessor, its successors or assigns, the machines hereby leased, in good order; natural wear and tear alone excepted.

Ninth. In case any other machines than these hereby leased and licensed, embracing any of the inventions patented in the aforesaid Letters Patent, or any of them, or any inventions or improvements for which Letters Patent shall be granted or assigned to the Lessor, shall hereafter come into possession of the Lessee, by exchange or otherwise, without lease or license from the Lessor,

its successors or assigns, then in case the Lessor, its successors or assigns, shall so elect, all the covenants herein contained shall apply to such machines, inventions or improvements; and shall govern the parties respectively to the same extent as if the said machines, inventions or improvements had been expressly included in this lease and license. The Lessor shall give written notice of its election as aforesaid within thirty days after it shall have received written notice from the Lessee of the possession of such machines; but may give such notice without having received notice from the Lessee of the possession of such machines.

Tenth. The Lessee agrees that he will not disturb or interfere with, nor permit any one else to disturb or interfere with, any indicator which now is, or which may be hereafter, placed upon the machines as aforesaid.

Eleventh. All the rights and interests which under this instrument and by reason of the ownership of said machines and patents and patent rights belonging to the Lessor shall be deemed to belong to, and may be enforced in, the names of the Lessor and its successors and assigns, and all the stipulations binding on the Lessee shall be binding on his executors or administrators.

Twelfth. It is agreed that the numbers of the machines named in this lease may be entered herein by the Lessor after signing; and in case the Lessee shall require more than one machine, it is agreed that the termination to words relating to the machines shall be construed and considered as written in the singular or plural, as the number of machines entered in the lease and license may require; and also that this instrument may be used in cases where the party of the second part shall consist of more than one person, and in that case the termination of the words relating to the said party shall be considered as plural or singular, as the sense may require; and that when the party of the second part so consists of several persons, and they sign this lease, either individually or by their firm signature, such signature or signatures shall bind them both jointly and severally to the terms and agreements herein contained.

In Witness whereof, the parties aforesaid have hereunto put

their hands and seals; the said parties of the second part binding themselves to all the foregoing agreements, both jointly and severally.

PLAINTIFF'S EXHIBIT 60.

[Put in Evidence, page 454.]

This Agreement made this first day of March, A. D., 1899 by and between Louis Goddu, Louis H. Goddu, George Goddu, William Goddu, Napoleon Goddu, and Eloie Goddu, all of Winchester in the County of Middlesex and Commonwealth of Massachusetts, parties of the first part; and the United Shoe Machinery Company, a corporation duly organized and existing under the laws of the State of New Jersey, party of the second part; Witnesseth:

That whereas the said Goddus are the owners either jointly or severally of a majority of the shares of the capital stock of the Goddu Sons Metal Fastening Company, a corporation duly organized and existing under the laws of the State of Maine; and,

Whereas the said Goddus have heretofore jointly or severally invented certain useful improvements and devices relating to shoe machinery and to the manufacture of boots and shoes; and,

Whereas there have been granted to some or all of the said Goddus either jointly or severally Letters Patent of the United States and various foreign countries for certain of the said inventions and improvements; and,

Whereas applications in the names of some or all of the said Goddus either jointly or severally for Letters Patent of the United States and various foreign countries for certain others of the said inventions and improvements are now pending; and,

Whereas the United Shoe Machinery Company is desirous of purchasing all the said shares of capital stock of the said Goddu Sons Metal Fastening Company owned by the said Goddus jointly or severally, and all the said inventions, Letters Patent, and applications therefor, whether of the United States or of any foreign country, and all inventions which the said Goddus may hereafter make either jointly or severally relating to shoe machinery or the manufacture of boots and shoes, or the production or preparation of fastenings or other materials or things used or useful in connection with the manufacture of boots or shoes, for the period of ten (10) years from the date of the execution hereof; and,

Whereas the United Shoe Machinery Company has entered into an agreement with the said Goddus to purchase the stock in the said Goddu Sons Metal Fastening Company and to deliver to the said Goddus certificates of shares of stock of the United Shoe Machinery Company in exchange for the said shares of capital stock of the Goddu Sons Metal Fastening Company owned by the said Goddus at the rate of one dollar in value of the common stock of the United Shoe Machinery Company (each share of the common stock having an agreed value of thirty-five (35) dollars), and one dollar in value of the preferred stock of the United Shoe Machinery Company (each share of the preferred stock having an agreed value of (30) dollars) for each share of the capital stock of the said Goddu Sons Metal Fastening Company; and,

Whereas the United Shoe Machinery Company has further agreed to purchase the said inventions jointly and severally made by the said Goddus by placing in the hands of Sidney W. Winslow, as trustee, an amount of the common and preferred stock of the

United Shoe Machinery Company equal to the preferred and common shares to be issued to the said Goddus in exchange for their shares of capital stock in the Goddu Sons Metal Fastening Company, as recited in the preceding paragraph, such shares of stock to be held by the said Winslow as trustee under the terms of a declaration of trust of even date herewith and annexed hereto;

Now therefore, in consideration of the respective promises and agreements herein contained and of one dollar and other good and valuable considerations to each of the parties hereto by the others in hand paid, the receipt whereof is hereby respectively acknowledged, the said parties covenant and agree as follows, viz.: —

1. The said several Goddus hereby jointly and severally sell, assign, transfer and set over unto the United Shoe Machinery Company, its successors and assigns, all the shares of the capital stock of the said Goddu Sons Metal Fastening Company owned by them either jointly or severally; and they do jointly and severally covenant and agree each for himself and for the others that they are the lawful owners jointly or severally of the number of shares of the said capital stock of the said Goddu Sons Metal Fastening Company set opposite their respective signatures to this instrument, and that the said shares are free from all incumbrances and that they have good right to sell the same, and that the said shares so sold and assigned constitute a majority of the shares of the issued capital stock of the said Goddu Sons Metal Fastening Company and that the total number of shares of the said Goddu Sons Metal Fastening Company is not in excess of fifty thousand of a total par value of five hundred thousand (500,000) dollars; and the said Goddus further covenant that the said Goddu Sons Metal Fastening Company is altogether free from debt and is under no contract or other liability for services heretofore or hereafter to be rendered, or for any other cause or relating to any subject matter whatever;

And for the same consideration the said Goddus have jointly and severally sold, assigned, transferred, and set over, and do hereby jointly and severally sell, assign, transfer, and set over to the United Shoe Machinery Company, its successors and assigns, all inventions and improvements for any and all countries relating in

any way to shoe machinery or to mechanisms or appliances or devices of any sort or kind used or useful in connection with the adaptation of leather to or the manufacture of boots or shoes, or relating in any way to the manufacture of boots and shoes, or to the fastenings or any other materials or things used in the manufacture of boots or shoes, or useful in connection with the manufacture of boots or shoes, or relating to the production or preparation of such machinery, mechanism, appliances, devices, fastenings, materials, or other things heretofore made by any or all of the said Goddus jointly or severally, and all Letters Patent of the United States and of all foreign countries for such inventions or improvements, and all applications for any Letters Patent of the United States and of foreign countries, and all renewals, reissues and extensions of such Letters Patent of the United States and of any and all foreign countries.

And for the same consideration the said Goddus have jointly and severally sold, assigned, transferred, and set over, and do hereby jointly and severally sell, assign, transfer, and set over to the said United Shoe Machinery Company, its successors and assigns, all claims and demands whether at law or in equity which any or all of them jointly or severally now have or may hereafter acquire for any infringement of any or all of the said Letters Patent prior to the date hereof; and the said Goddus hereby jointly and severally authorize the United Shoe Machinery Company to sue for and collect the same, using any or all of their names if need be.

To have and to hold the said inventions, improvements, Letters Patent, applications for Letters Patent, reissues, renewals, and extensions of the said Letters Patent, claims and demands, to the said United Shoe Machinery Company, its successors and assigns, to its and their own use and behoof forever.

But the said Goddus except from the above sale and assignment of inventions and Letters Patent therefor of the United States and of any and all foreign countries, all such inventions and Letters Patent as they have jointly or severally heretofore sold and assigned by written assignments duly recorded to either the trustees of the McKay Metallic Fastening Association, or to the McKay Shoe

Machinery Company, or to the Goddu Sewing Machine Company, or to the Goddu Sons Metal Fastening Company, or to the Goddu Improvement Company, and they also except from the above sale and assignment of claims and demands, all claims and demands for the infringement prior to the date hereof of any and all of the above excepted Letters Patent.

And for the same consideration the said Goddus have jointly and severally sold, assigned, transferred, and set over, and do hereby jointly and severally sell, assign, transfer, and set over to the said United Shoe Machinery Company, its successors and assigns, all right, title and interest in and to any and all inventions which they may jointly or severally hereafter make during the term of ten (10) years from the date hereof, or which, during the same term, they jointly or severally do now or hereafter may have in their possession or control, or in or to which, during the same term, they may jointly or severally have any right, title or interest whatever, whether direct or indirect, which may be necessary or convenient to or for or which relate in any way to shoe machinery or to mechanisms or appliances or devices of any sort or kind used or useful in connection with the adaptation of leather to or the manufacture of boots or shoes or relating in any way to the manufacture of boots and shoes, or to fastenings or any other materials or things used in the manufacture of boots or shoes or useful in connection with the manufacture of boots or shoes, or relating to the production or preparation of such machinery, mechanism, appliances, devices, fastenings, materials, or other things.

And for the same consideration the said Goddus do jointly and severally covenant and agree each for himself and for the others that they and each of them, so far as he is able, will at all times promptly and as often as requested by the said United Shoe Machinery Company, its successors or assigns, communicate to the United Shoe Machinery Company and its patent solicitors and attorneys by means of descriptions, drawings and writings, and exhibit, explain, and describe freely and fully all inventions, improvements, processes, discoveries, and applications for patents

which are or may become subject to the terms of this contract, and will do and perform all acts and give to the United Shoe Machinery Company and its solicitors and attorneys all the information and execute and deliver to the said United Shoe Machinery Company any and all assignments and applications for patents of the United States and all foreign countries, and for reissues, extensions, and renewals thereof, and all other instruments which may be necessary or proper or convenient to permit the said United Shoe Machinery Company, its agents, solicitors and attorneys, conveniently and properly to prepare and file and prosecute applications for and secure to and vest in the said United Shoe Machinery Company the entire right, title and interest in and to, and the enjoyment of, patents of the United States and all foreign countries for and upon all inventions, improvements, processes or discoveries which under and pursuant to the terms of this agreement the said Goddus have conveyed or may hereafter be bound to convey to the said United Shoe Machinery Company, and will execute and deliver all further instruments and do all further acts requested by the said United Shoe Machinery Company, its successors and assigns, which may be necessary or proper or convenient to secure to and vest in the said United Shoe Machinery Company and give it the full benefit and enjoyment of all the inventions, applications for Letters Patent, Letters Patent, renewals, reissues and extensions thereof, and all claims and demands, and all other rights whatsoever, conveyed to it by the terms of this instrument or intended to be hereby conveyed.

And for the same consideration, in order that the United Shoe Machinery Company may derive and secure the fullest benefit and enjoyment from the ownership and control of the inventions and Letters Patent hereby sold and assigned to the said company, the said Goddus hereby jointly and severally covenant and agree each for himself and for the others that for the term of ten (10) years from the date hereof they will not and none of them shall, jointly or severally, directly or indirectly, become financially interested in or engage in the business of making and selling any inventions or improvements relating in any way to shoe machinery or to mechan-

isms or appliances or devices of any sort or kind used or useful in connection with the adaptation of leather to or the manufacture of boots or shoes, or relating in any way to the manufacture of boots and shoes, or to fastenings or any other materials or things used in the manufacture of boots or shoes or useful in connection with the manufacture of boots or shoes or relating to the production or preparation of such machinery, devices, mechanism, appliances, fastenings, materials, or other things, either on their own account or as the employees of any person, firm, or corporation, or as the members of any partnership, or stockholders or officers in any corporation other than the United Shoe Machinery Company, or in any other way, without the consent in writing of the United Shoe Machinery Company; and that they will not and none of them shall do anything either jointly or severally, directly or indirectly, to injure in any way or in any way to threaten injury to the business of the United Shoe Machinery Company relating to the making, use, sale, lease, or exploitation of shoe machinery or relating to methods or processes or devices of any sort for or connected with or incidental to the manufacture of boots and shoes, or relating to any of the inventions sold and assigned to it by virtue of this instrument, or intended so to be sold and assigned to it.

2. The United Shoe Machinery Company covenants and agrees that within five days of the execution of this instrument it will cause to be issued or transferred to each of the said several Goddus fully paid up stock of the United Shoe Machinery Company in exchange for the shares of the capital stock of the Goddu Sons Metal Fastening Company sold, assigned, and transferred by the said several Goddus to the United Shoe Machinery Company at the rate of one dollar in value of the common stock of the United Shoe Machinery Company (each share of the common stock having an agreed value of thirty-five (35) dollars), and one dollar in value of the preferred stock of the United Shoe Machinery Company (each share of the preferred stock having an agreed value of thirty (30) dollars,) for each share of the capital stock of the Goddu Sons Metal Fastening Company.

The United Shoe Machinery Company further covenants and

agrees that in order to pay for the inventions and improvements purchased from the Goddus in accordance with the terms of this instrument, it will issue or caused to be transferred to Sidney W. Winslow, to be by him held in trust, under the terms of the declaration of trust annexed hereto, to secure the faithful performance on the part of the said several Goddus of the agreements, covenants, and guarantees herein made by the said Goddus, an amount of the common and preferred stock of the United Shoe Machinery Company equal to the preferred and common shares of the capital stock of the United Shoe Machinery Company issued or transferred by the United Shoe Machinery Company to the said Goddus in exchange for the shares of the capital stock of the Goddu Sons Metal Fastening Company.

3. As soon as this agreement shall have been duly executed by all the parties and delivered to the United Shoe Machinery Company, the preliminary agreement dated February 24, 1899, entered into between these same parties shall be rescinded and annulled, and shall be destroyed by the United Shoe Machinery Company.

In Witness Whereof the said United Shoe Machinery Company has caused its corporate name and seal to be hereto affixed, and the said Louis Goddu, Louis H. Goddu, George Goddu, William Goddu, Napoleon Goddu, and Eloie Goddu have hereunto set their hands and seals this first day of March, A. D. 1899.

UNITED SHOE MACHINERY COMPANY

[SEAL] By Geo. W. Brown, Treasurer.

10 Cent Revenue Stamp.

Commonwealth of Massachusetts.

Suffolk, ss. Boston, 1st March, 1899.

Then personally appeared the above-named Louis Goddu, Louis

H. Goddu, George Goddu, William Goddu, Napoleon Goddu, and Eloie Goddu, all well known to me, and jointly and severally acknowledged the foregoing instrument to be their free act and deed, before me,

Edward Russell Coffin, Notary Public.

Know all Men by these Presents:

That Whereas, one thousand sixty-five (1065) fully paid shares of the common stock of the United Shoe Machinery Company, a corporation duly organized and existing under the laws of the State of New Jersey, and twelve hundred forty-six (1246) fully paid shares of the preferred stock of the said Company have been issued to me, Sidney W. Winslow, of Beverly, Massachusetts, in accordance with the vote of the directors of the said United Shoe Machinery Company, to hold as trustee for the benefit of Louis Goddu, Louis H. Goddu, George Goddu, Napoleon Goddu, William Goddu, and Eloie Goddu, all of Winchester, Massachusetts, in accordance with and under the provisions of an agreement annexed hereto and of even date herewith, between the said United Shoe Machinery Company and the said Goddus:

Now, therefore, in consideration of the sum of one dollar and other good and valuable considerations to me paid by the said several Goddus, the receipt whereof is hereby acknowledged, I, the said Sidney W. Winslow, do hereby ackowledge and declare that I will and my heirs, executors, administrators and assigns shall hold the said one thousand sixty-five (1065) shares of common stock and the said twelve hundred forty-six (1246) shares of preferred stock of the said United Shoe Machinery Company in trust for the said Goddus; but this trust is nevertheless intended to secure and is conditioned upon the true and faithful observance and performance by the said several Goddus and their respective representatives of all the promises, agreements, covenants, and guarantees contained in the annexed agreements of even date herewith, by the said several Goddus to be observed and performed either jointly or severally; and in case of any default or breach in or of the true and faithful observance or performance by any of

the said Goddus of any such promises, agreements, covenants, or guarantees, the said United Shoe Machinery Company shall, upon its election communicated to me in writing, be entitled to receive from me to its own use and behoof, discharged and free from any trust or condition, one third of each class of the said shares, both common and preferred, held by me as trustee under this instrument, together with all the dividends accruing upon such third of each class of the said shares after the date of such default or breach; and in case of a second or any further or continuing breach or default in or of the true and faithful performance by any of the said Goddus of any such promises, agreements, covenants, or guarantees, the said United Shoe Machinery Company, irrespective of whether or not it has waived the first or any subsequent defaults or breaches, or any part of a continuing breach or default, may entirely and finally determine the trust hereby declared and acknowledged, upon its election so to do, communicated to me in writing; and in event of such an election communicated to me in writing, the said United Shoe Machinery Company shall be entitled to receive from me to its own use and behoof, discharged and free from any trust or condition, all the shares both common and preferred, held by me as trustee under this instrument at the date when its election shall be so communicated to me, together with all the dividends accruing after the date of any such default or breach committed by any of the said Goddus upon which the United Shoe Machinery Company shall elect to determine the said trust.

For the above consideration I do hereby for myself and for my heirs, executors, administrators and assigns, covenant and agree with the said Goddus, their heirs, executors, administrators and assigns, subject to the right of the said United Shoe Machinery Company, as hereinbefore provided, to elect to receive from me, discharged and free from any trust or condition, one third of each class of shares held by me as trustee under this instrument in case of any default or breach committed by any of the said Goddus in or of the true and faithful observance or performance of any promises, agreements, covenants, or guarantees contained in the annexed

agreement of even date herewith by the said Goddus to be observed and performed whether jointly or severally, and subject to the further right of the United Shoe Machinery Company, as also hereinbefore provided, to elect finally and wholly to determine the said trust in case of any second or further or continuing default or breach by any of the said Goddus, I will and my heirs, executors, administrators and assigns shall immediately upon the receipt of any and all dividends on the said shares, both common and preferred, of the capital stock of the said United Shoe Machinery Company, pay over the said dividends to the said Goddus, their heirs, executors, administrators and assigns; and the amount which any one of the said Goddus or his representatives shall be entitled to receive of the total amount of any one dividend paid on the shares so held by me in trust, shall bear the same proportion to the total amount of said dividend as the number of shares of the said United Shoe Machinery Company, issued to him in accordance with and under the provisions of the annexed agreement of even date herewith, bears to the total number of shares so issued to all the said Goddus.

And for the same consideration, I, the said Sidney W. Winslow, do further for my heirs, executors, administrators and assigns, covenant and agree with the said Goddus, their heirs, executors, administrators and assigns, that subject to the right of the said United Shoe Machinery Company, as hereinbefore provided, to elect to receive from me, discharged and free from any trust or condition, one third of each class of shares held by me as trustee under this instrument, in case of any default or breach committed by any of the said Goddus in or of the true and faithful observance or performance of any promises, agreements, covenants, or guarantees contained in the annexed agreements of even date herewith by the said Goddus to be observed and performed whether jointly or severally, and subject to the further right of the United Shoe Machinery Company, as also hereinbefore provided, to elect finally and wholly to determine the said trust in case of any second or further or continuing default or breach by any of the said Goddus, I will or my heirs, executors and administrators shall at the expira-

tion of ten (10) years from the date hereof, transfer and convey, free from any trust or condition, the said shares, both common and preferred, of the capital stock of the said United Shoe Machinery Company to the said Goddus or their representatives as aforesaid, in the same proportions in which the dividends on the said shares of capital stock are to be paid to the said Goddus; and execute and deliver any and all papers which may be necessary or convenient to secure to and vest in the said Goddus or their representatives as aforesaid, in the same proportions, all my right, title and interest which I hold personally or as said trustee in and to the said shares, both common and preferred, of the capital stock of the said United Shoe Machinery Company.

In witness whereof, I, the said Sidney W. Winslow, have hereunto set my hand and seal this first day of March A. D. 1899.

SIDNEY W. WINSLOW. [SEAL]

PLAINTIFF'S EXHIBIT 61.

[Put in Evidence, page 456.]

This Agreement made at Boston in the Commonwealth of Massachusetts, United States of America, this eighth day of June, A.D. 1899, between Marshall Henry Pearson and Charles Bennion, both of Leicester, England, parties of the first part; and the United Shoe Machinery Company, a corporation organized under the laws of the State of New Jersey, party of the second part, Witnesseth:

That Whereas the parties of the first part own or control all of the capital stock of Pearson & Bennion, Limited, a corporation duly organized under the laws of Great Britain, and having a place of business at the Union Works, Belgrave Road, Leicester, England; and

Whereas the party of the second part is engaged in the manufacture and sale of shoe machinery, a large portion of which is protected by British patents;

Now therefore, in consideration of one dollar and other valuable considerations by each of the parties hereto to the other in hand paid, the receipt of which is hereby acknowledged by each of the

parties hereto, said parties of the first part and the said party of the second part do hereby Covenant and Agree with each other as follows, viz. : —

1. The party of the second part shall form or cause to be formed a corporation organized under the laws of Great Britain for the especial purpose of taking over and carrying on the shoe machinery business now carried on respectively by the parties of the first part and the party of the second part. The said corporation shall be organized with common or ordinary shares and preference shares of the par value of £10 each. The common shares shall amount to 20,000 shares of a total par value of £200,000. The preference shares shall amount to 25,000 shares of a total par value of £250,000. The preference shares shall be entitled in each year to a dividend out of the earnings of that year equal to six per cent per annum, and the preference shares shall be preferred as to assets to the extent of their par value, any balance of the assets to belong wholly to the common stock, and said preferred stock shall be redeemable at par at the option of the corporation at any time after the expiration of five (5) years from the date of organization of the corporation.

2. The party of the second part covenants and agrees as soon as said Company shall have been formed, that upon the receipt of 5,000 shares of the preference stock of the said Company of the total par value of £50,000., and also the receipt of 16,000 shares of the ordinary stock of the said Company amounting to a total par value of £160,000., that it will assign, transfer and convey to the said corporation all its British patents (not including, however, the patents of any English colonies or any other countries outside of England, Ireland and Scotland), together with all its accounts receivable and all its leases and all its assets of every sort and kind located in Great Britain at the time of such transfer, except that any accounts due from Pearson & Bennion, Limited, to the Consolidated & McKay Lasting Machine Company shall be still due and payable to that Company, together with the entire goodwill of its English business.

It is further agreed that the new English Company shall have

the option upon paying the expenses of taking out British patents of securing British patents for all inventions belonging to the party of the second part, though the party of the second part does not bind itself to protect the rights of such English patents but only to place such matters in the hands of reputable solicitors and to endeavor to use due care.

3. The parties of the first part hereby covenant and agree that within thirty (30) days after the organization of the corporation hereinbefore provided for, and the transfer to the said corporation of the English business of the said United Shoe Machinery Company, in accordance with the provisions set forth in the section numbered 2 hereof, the said parties of the first part will assign, transfer and convey to the said new corporation in exchange for 4,000 shares of the preference stock of said new corporation of the total par value £40,000, and 4,000 shares of the common or ordinary stock of said new corporation of the total par value of £40,000, the entire right, title and interest in and to the total issued or allotted capital stock of the said Pearson & Bennion, Limited; and the said parties of the first part also agree that at the same time and for the same consideration they will assign, transfer and convey to the said new corporation all Letters Patent for Great Britian and all other countries, and all inventions and all pending applications for patents of Great Britain and all other countries, together with all drawings, models, or experimental machines belonging to the said parties of the first part or either of them, together with their joint or several right, title and interest in any and all contracts or agreements relating to the business carried on by Pearson & Bennion, Limited, or relating in any way to shoe machinery, and the said parties of the first part, for the same consideration, covenant and agree to assign, transfer and convey to the said new corporation any and all inventions which they may hereafter make and which relate in any way to shoe machinery, or to the manufacture of boots or shoes, or to materials used in the manufacture of boots or shoes.

And the said parties of the first part jointly and severally covenant and agree with the said party of the second part that at the time of such transfer to the new corporation of the capital stock of

the said Pearson & Bennion, Limited, the assets of the said Pearson & Bennion, Limited, shall not be less than the assets set forth in the "Schedule of Assets and Liabilities, Pearson & Bennion, Limited," which is annexed to this agreement and made a part hereof, and that the liabilities of the said Pearson & Bennion, Limited, shall not be greater than the liabilities set forth in the said "Schedule of Assets and Liabilities;" and furthermore the said parties of the first part covenant and agree that until said corporation shall have been formed and said assignments made to said corporation, as hereinbefore provided, no profits shall be withdrawn from the said Pearson & Bennion, Limited, but that the said business of the said Pearson & Bennion, Limited, shall be carried on as a going company for the benefit of the said new corporation, which is to own all the capital stock thereof.

4. It is understood and agreed between the parties of the first part and the party of the second part that the free hold property of Pearson & Bennion, Limited, situate at Blue Boar Lane, Leicester, England, which is not included in the said annexed "Schedule of Assets and Liabilities," but which still belongs to Pearson & Bennion, Limited, shall be sold to the said parties of the first part for £4,300, payment of said £4,300 to be made at the time when the parties of the first part assign and transfer the capital stock of said Pearson & Bennion, Limited, according to the terms of section numbered 3 hereof. And it is further understood and agreed that the free hold property known as the Union Works, Belgrave Road, Leicester, England, where the manufacturing of Pearson & Bennion, Limited, is now carried on, and which is referred to in the above schedule of assets but which has not yet been transferred to Pearson & Bennion, Limited, shall be transferred to Pearson & Bennion, Limited prior to the purchase of the capital stock of Pearson & Bennion, Limited hereinbefore provided for. And it is understood that the free hold property, the said Union Works, shall be transferred to Pearson & Bennion, Limited free from all liabilities except that Pearson & Bennion, Limited, shall assume at the time of the transfer of said property the personal liability which Messrs. Pearson and Bennion have jointly

incurred at the Stamford, Spaulding & Boston Bank, Leicester, England, amounting to not more than £17,250, in order to secure said new factory, and that Pearson & Bennion, Limited will also pay to the said Pearson and the said Bennion £1,000 each for cash which they have personally advanced towards the purchase of the said factory and free hold.

5. It is further agreed that the said new corporation shall pay to Messrs. Pearson and Bennion £4,300, it being understood that said payment shall be made at the time that the said parties of the first part assign and transfer the capital stock of said Pearson & Bennion, Limited to said new corporation, in accordance with the terms of the section numbered 3 hereof.

In Witness Whereof on the day and year first above written the said parties of the first part have hereunto set their respective names and seals, and the said corporation, the United Shoe Machinery Company, has caused its corporate name and seal to be hereto affixed by its Treasurer, thereunto duly authorized.

PLAINTIFF'S EXHIBIT 62.

[Put in Evidence, page 457.]

This Memorandum of Agreement made this 30th day of June 1899 between Silas Pierce and John M. Kingsbury, being the owners of a majority of the stock of the Corrugated Wire Fastening Company, parties of the first part, and Edward P. Hurd, party of the second part, Witnesseth:

That the parties of the first part agree to sell and deliver to the party of the second part all the stock in said Company owned or controlled by them as follows, viz: — the said Pierce two thousand nine hundred and sixty-four (2964) shares and the said Kingsbury

five thousand (5000) shares, for which the said party of the second part agrees to pay the sum of eighty-five cents per share on the delivery of certificates for said stock endorsed in blank and properly stamped, at any time on or before August 10, 1899.

And in consideration of the premises, the party of the second part further agrees that he will purchase any part or the whole of the balance of the stock of said Company, the certificates for which, endorsed in blank and properly stamped, may be tendered to him at the office of Charles M. Reed, 704 Exchange Building Boston at any time on or before August 10, 1899 and that he will pay for the same at the rate of eighty-five cents per share.

In witness whereof the said parties have hereunto and to a duplicate hereof set their hands and seals the day and year above written.

SILAS PIERCE [SEAL]
J. M. KINGSBURY
EDWD. P. HURD

PLAINTIFF'S EXHIBIT 63.

[Put in Evidence, page 458.]

Agreement made this thirty-first day of July, A. D., 1899, by and between the Breach Manufactureing Company, a corporation organized and existing under the laws of the State of Maine (hereinafter called the Breach Company), party of the first part, and United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey (hereinafter called the United Company), party of the second part.

Whereas the Breach Company is the owner of the entire interest in and to Letters Patent of the United States:

No. 318,539 dated May 26, 1885, originally granted to James J. Breach;

No. 318,540, dated May 26, 1885, originally granted to James J. Breach;

No. 589,409, dated September 7, 1897, originally granted to James J. Breach,

and is entitled to the entire interest, within and for the United States of America and the Territories thereof, and foreign countries, in all inventions or improvements made or hereafter to be made by said Breach in machines for rounding or cutting soles for boots or shoes or for cutting patterns;

Now this Agreement Witnesseth:

1. The Breach Company, in consideration of the sum of ten thousand dollars ($10,000) to it paid by the United Company, the receipt of which is hereby acknowledged, and in consideration of the agreements of the United Company herein contained, has granted and by these presents doth grant to the United Company an exclusive license, under the above recited Letters Patent of the United States of America and under such Letters Patent of the United States and of other countries as shall hereafter be granted or assigned to it for inventions or improvements made by said Breach, or in which said Breach Company shall own or acquire the entire or any less interest, to make, use, and sell to others to vend and use during the term or terms for which said Letters Patent No. 589,409 have been or shall hereafter be granted, machines embodying the inventions patented or to be patented in the Letters Patent above recited or referred to, or either or any of them, except that the United Company shall not be licensed hereby to sell, but only to make and use, itself, or by its agents, machines for cutting patterns.

2. The Breach Company agrees that, if it shall neglect or refuse to cause applications for Letters Patent of the United States to be filed for any inventions or improvemants made by said James J. Breach, which said Breach is legally bound to convey to the Breach Company, the United Company, during the term of this license, shall have the right to cause such applications to be filed by said Breach and to prosecute the same. Any and all Letters Patent of the United States obtained upon such applications shall be assigned to the Breach Company; and the United Company, by virtue of this instrument shall be the exclusive licensee thereunder, as if the numbers and dates of such patents were recited in the granting clause of this instrument; but the Breach Company agrees, if

requested so to do by the United Company, to execute and deliver to the United Company, from time to time, as such patents shall be issued, supplemental instruments which shall grant to the United Company an exclusive license under each such patent, describing it by its number and date of grant, subject to the terms and provisions of this instrument.

3. The United Company agrees to keep proper books, in which shall be entered all sales, leases, or other dispositions of machines and parts hereof, and of patterns cut by the aid of pattern-cutting machines made by it under this license, and agrees, in the months of January and July of each calendar year while this license remains in force, to render an account in writing to the Breach Company which shall state all such sales, leases, or other dispositions made of such machines, parts, and patterns, and the gross proceeds thereof received by the United Company during the six calendar months next preceding the month in which such account shall have been rendered, and agrees to pay to the Breach Company in each January and July, beginning with January, 1900, a sum equal to ten per cent (10%) of the gross proceeds of such sales, leases, or other dispositions of such machines, parts thereof, and patterns which shall have been received by the United Company.

4. The United Company agrees not to dispose of or sell patterns made by the aid of the pattern-cutting machines under the above patents for less than seven cents ($.07) apiece, or rounding machines made under the above patents for less than Three Hundred Dollars ($300) apiece, without the written consent of the Breach Company.

5. In the event that the United Company shall fail, after written demand therefor, to render accounts or make payments to the Breach Company as provided in Section Three of this instrument, the Breach Company may (upon reimbursing the United Company for the actual cost to the United Company, without interest, of all Letters Patent which shall have been granted or assigned to the Breach Company under the provisions of section two hereof, and, if the United Company shall so request, upon purchasing from the United Company at cost without interest all patterns and special

jigs and tools procured by the United Company for the manufacture of machines under this license) cancel and terminate this license by giving sixty days' written notice to the United Company of its intention so to do.

6. The United Company may cancel and terminate this license at any time by giving sixty days' written notice to the Breach Company of its intention so to do.

7. In the event of the termination and cancellation of this license by either party, the United Company shall nevertheless be thereafter licensed to complete any and all machines in process of construction at the date of such termination; to make and furnish parts for machines, to repair and replace parts of machines which it shall have disposed of prior to the date of such termination, or shall have completed subsequent to the date of such termination under the provisions of this license; and to use all pattern cutting machines made or which are in process of construction at the date of such termination; but the United Company shall account and pay royalty as aforesaid to the Breach Company upon all such machines and parts thereof, and patterns, made and disposed of subsequent to the termination of this license, as if the same had not been terminated.

8. The Breach Company hereby agrees without further consideration to loan to the United Company all drawings, patterns, special tools and jigs which the Breach Company now has, or which while this license remains in force, it shall hereafter acquire, the same to be retained and used by the United Company so long as it shall desire to retain the same or any of them for the purpose of making machines or parts of machines under this license.

9. The provisions of this instrument incumbent upon or for the benefit of the parties hereto shall be incumbent upon and for the benefit of their respective successors and assigns.

In witness whereof, the said Breach Manufacturing Company has caused its corporate seal to be hereto affixed and these presents to be signed by Elmer Loring, its President and James J. Breach, its Treasurer, and the said United Shoe Machinery Company has caused its corporate seal to be hereto affixed and these presents to

be signed by George W. Brown, its Treasurer, the day and year first above written.

[Put in Evidence, page 458.]

Agreement made this first day of August, 1899, by and between Peter A. Coupal, of Boston, in the County of Suffolk, and State of Massachusetts, of the one part and United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, of the other part.

Whereby it is agreed as follows: —

1. The said Coupal agrees to enter the employment of said Company in its tool department and that he will, while he remains in

the employment of said Company, give his exclusive time, services and skill to said Company in the manufacture of shoe machinery and tools and appliances for the same.

2. The said Company, while said Coupal shall remain in its employ, agrees to pay him the sum of thirty dollars ($30) per week as compensation for his services.

3. In consideration of said employment and of the purchase by said Company from said Coupal of his interests in certain Letters Patent of the United States this day conveyed by him, the said Coupal agrees without further consideration to convey to said Company all improvements or inventions in or relating to shoe machinery, leather working, tools, appliances and methods for the manufacture of shoes or shoe machinery or leather working which he has invented but not patented, and which he shall hereafter, while he remains in the employment of said Company, invent, except his interest in Letters Patent and applications for Letters Patent for the inventions of Edward F. White, for improvements in randing and trimming devices, and to disclose and explain to said Company or its counsel, all such inventions or improvements.

4. And said Coupal, for himself, his executors and administrators, agrees from time to time, and at any time hereafter, if the said Company shall request him so to do, to do all such acts and to execute and make oath to all such applications, specifications, assignments and other written instruments as in the opinion of the counsel of said Company shall be necessary and proper to obtain the grant of Letters Patent for such inventions or improvements both for the United States and for other countries and to vest the legal title to all such applications and patents in said Company, the cost of all such applications and patents to be borne by said Company.

In Witness Whereof the said Coupal has set his hand and seal hereto and said United Shoe Machinery Company has caused its corporate seal to be hereto affixed and these presents to be signed in its name and behalf by George W. Brown its Treasurer, the day and year first above written.

Agreement, made this first day of August 1899 by and between William Gordon, of Boston, in the State of Massachusetts, of the one part and United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey of the other part

Whereby it is agreed as follows: —

1. Said Gordon agrees with said Company that he will enter its employment in the management of a department to be organized for the sale of finishing machinery for boots and shoes and such other machines, tools and articles as shall be put in his charge, and that while he remains in the employment of said Company he will render and give his exclusive time and services to said Company under the supervision of its President and General Manager, to the management of said department.

2. The said Company while said Gordon remains in its employment agrees to pay him at the rate of One Hundred and Twenty five Dollars ($125.) per month, and a commission to be hereafter agreed upon, upon the gross proceeds of the sales in the department under his charge.

3. In consideration of said employment and of the purchase by said Company from said Gordon of his interest in certain Letters Patent of the United States and certain machines, and tools this day conveyed by him and Peter A. Coupal, to said Company, the said Gordon agrees to convey to said Company all inventions or improvements in or relating to shoe machinery, leather working, and tools, appliances and methods for the manufacture of shoes and shoe machinery or leather working, which he now owns or which he has invented, or which he shall hereafter, while he remains in the employment of said Company, invent (except his interest in Letters Patent and applications for Letters Patent for the inventions of Edward F. White for improvements in randing and trimming devices) and to promptly disclose and explain to said Company all such inventions or improvements.

4. And the said Gordon for himself, his executors and administrators agrees from time to time hereafter and at all times whenever the Company shall request him so to do, to do all such acts and to execute and make oath to all such applications, specifications, assignments and other written instruments as shall, in the opinion of the counsel of said Company, be necessary and proper to obtain a grant of Letters Patent both for the United States and for other countries for such inventions as the said Gordon has hereby agreed to convey to said Company, and to vest the legal title to all such applications or patents in said Company; the cost of all such applications and patents to be borne by said Company.

In witness whereof the said Gordon has set his hand and seal hereto, and the United Shoe Machinery Company has caused its corporate seal to be hereto affixed and these presents to be signed in its name and behalf by George W. Brown, its Treasurer, the day and year first above written.

PLAINTIFF'S EXHIBIT 67.

[Put in Evidence, page 458.]

Agreement made this sixteenth day of August, 1899, between Timothy A. Bresnahan, of Boston, in the State of Massachusetts, of the first part and United Shoe Machinery Company a corporation organized and existing under the laws of the State of New Jersey, hereinafter called the United Company, of the second part.

1. Said Bresnahan agrees to sell and the United Company to purchase a certain piece or parcel of land with the buildings thereon situated on the Westerly side of Boston Street in that part of said Boston called South Boston, bounded and described as follows:

Beginning at a point at the Southerly corner of the granted premises and the Easterly corner of land formerly of Pratt and running thence Northwesterly on said land formerly of said Pratt 125.72 feet to land formerly of the Boston Wharf Company, thence turning and running Northeasterly on said land formerly of the Boston Wharf Company 51 feet to land formerly of Sanborn,

thence turning and running Southeasterly on said land formerly of Sanborn 122.17 feet to Boston Street, thence turning and running Southwesterly on said Boston Street 61.65 feet to land formerly of Pratt and the point begun at, and containing 6792 square feet, being the same premises conveyed to said Bresnahan by deed of John J. Merrill, dated May 23, 1892, recorded with Suffolk Deeds Libro 2061, page 550.

Said premises are to be conveyed within ten days from this date by a good and sufficient warranty deed of the said Bresnahan, conveying to said United Company or to such person or corporation as the United Company shall in writing designate as grantee a good and clear title to the same free from all incumbrances. Full possession of the said premises subject to the rights of the Boston Shoe Tool Company as tenant is to be delivered to the grantee at the time of the execution of this agreement. The deed is to be delivered to the grantee and the consideration, hereinafter mentioned, paid at the office of said United Company, 111 Lincoln Street, Boston, Mass.

2. The said Bresnahan agrees to sell, and the said United Company to purchase, the machines, tools and other chattels specified in an account of stock of T. A. Bresnahan, taken June 10, 1899, a copy whereof is hereto annexed marked "Schedule A" (said machines, tools and chattels being situated in the machine shop on the real estate hereinbefore described), and all other machines, tools or chattels owned by said Bresnahan, which are in said shop.

3. Said Bresnahan agrees to sell and the said United Company to purchase, the entire capital stock of the Boston Shoe Tool Company, a corporation organized and existing under the laws of the State of Maine, of Portland, in said State, said capital stock being divided into 5000 shares of the par value of $10.00 each.

The transfer of the certificates of said stock shall be made as of August 1st, 1899, and said Bresnahan warrants that said corporation is free from debt except the indebtedness incurred or contracted since July 31st 1899, and that the property of said corporation is free from all liens or incumbrances. It is understood and agreed that said Boston Shoe Tool Company shall pay to said

Bresnahan a sum equal to the cash in its treasury on August 1st 1899 and all accounts and bills receivable and claims payable to it, which were outstanding on August 1st 1899.

Said Bresnahan also warrants and represents that the machines, tools and personal property specified in Schedule B annexed hereto were consigned by said Boston Shoe Tool Company to Thomas Turner of Leicester, England, and if not disposed of by him are in his possession at No. 9 Newark Street, in said Leicester, and that said Boston Shoe Tool Company is the owner of said consigned goods, or if the same have been sold or otherwise disposed of, that it is entitled to the proceeds thereof, less the proper charges and commissions of said Turner, as its consignee or agent.

4. Said Bresnahan agrees for the term of two years from the date hereof to give the United Company the benefit of his services in the management of the business of the said Boston Shoe Tool Company, and in developing and increasing its business, and in devising and perfecting improvements in its products, and in tools and methods for the manufacture of the same, and during that period, to give to the United Company, or to said Boston Shoe Tool Company, as the said United Company shall elect, the benefit of any improvements or inventions which he shall devise or make in or relating to boot and shoe or leather working machinery, machines, tools and appliances made or dealt in by the United Company, or by either or any of the corporations controlled by the United Company, and to promptly disclose and explain to the officers of said United Company all such inventions and improvements and from time to time and at all times whenever the Company shall request him so to do, to do all such acts and to execute and make oath to such applications, specifications, assignments and other written instruments as shall in the opinion of the counsel of said Company be necessary to obtain the grant of Letters Patent both for the United States and for other countries for such inventions or improvements, and to vest the legal title to all such applications and patents in the United Company, or in such persons or corporations as it shall direct; the cost of all such applications and patents to be borne by the United Company.

5. Said Bresnahan is to covenant and agree that he will not hereafter engage in, nor directly or indirectly aid, assist or encourage anyone to engage in the manufacture of heel trimming, edge trimming or edge setting machines and tools, cutters or irons for heel or edge trimming or edge setting or of any of the machinery, machines, tools and products now made by him or by said Boston Shoe Tool Company, and that he will do no act directly or indirectly to aid, assist or encourage any competition with said Boston Shoe Tool Company or its business or any infringement of its trade marks, trade names or patents; and that he will do everything in his power to promote the interests of the United Shoe Machinery Company.

6. Said Bresnahan as an officer of said Boston Shoe Tool Company agrees to use his best efforts to purchase on terms and at prices approved by said United Company, the business of any persons, firms or corporations engaged in a like or similar business to that now carried on by said Boston Shoe Tool Company, and the patterns, special tools, parts of machines used by them in the manufacture of cutters, trimmers, and edge trimming and edge setting and heel trimming machines or tools, and the stock of such machines, cutters, trimmers or tools on hand, or in process of construction, together with the goodwill of such businesses and Letters Patent, trade marks and trade names employed by them in carrying on such businesses.

7. Said United Company upon the delivery to the grantee designated by it of a deed of said real estate as hereinbefore provided for, and upon the delivery to it of certificates for 4997 shares of the stock of said Boston Shoe Tool Company duly endorsed for transfer, and an agreement to cause to be delivered certificates for the other three shares of the capital stock of said Company, duly endorsed, when the same can be found; and upon the execution and delivery to it or to a vendee designated to it by said Bresnahan of a bill of sale of the machines, tools and other chattels referred to in paragraph 2 of this agreement; and upon the execution and delivery by said Bresnahan to it of an agreement containing the covenants and agreements on his part to be performed mentioned

in paragraphs 4, 5, and 6 of this instrument, agrees to issue and deliver or cause to be issued and delivered to said Bresnahan 1960.78 shares of the Preferred Capital Stock of said United Shoe Machinery Company, together with a bond or agreement of said United Company agreeing to pay to said Bresnahan, or his order, the sum of $23,000. in instalments of $2875. each, quarterly, as follows:—

On the first day of November 1899	$2875.
On the first day of February 1900	2875.
On the first day of May 1900	2875.
On the first day of August 1900	2875.
On the first day of November 1900	2875.
On the first day of February 1901	2875.
On the first day of May 1901	2875.
On the first day of August 1901	2875.

In Witness Whereof said Bresnahan has set his hand and seal hereto and said United Shoe Machinery Company has caused its corporate seal to be affixed hereto and these presents to be signed by George W. Brown, its Treasurer, the day and year first above written.

TIMOTHY A. BRESNAHAN [SEAL]

[SEAL] UNITED SHOE MACHINERY COMPANY

By Geo. W. Brown Treasurer.

Schedule A removed and affixed to agreement betw. Bresnahan and Boston Shoe Tool Co.

PLAINTIFF'S EXHIBIT 68.

[Put in Evidence, page 463.]

Indenture made this ninth day of October, 1899, by and between Edwin Theophilus Freeman, of Halifax, in the Province of Nova Scotia, Dominion of Canada, party of the first part, and United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey and having an office and usual place of business in Boston, in the Commonwealth of Masschusetts, (hereinafter called the United Company) party of the second part,

Whereas: The said Freeman has invented certain improvements in nailing machines, designed for use in the manufacture of boots and shoes, but adapted also for leather work and for other uses, and has been and is now engaged in manufacturing machines embodying said improvements and in developing and perfecting improvements in shoe and leather working machinery, and has obtained the grant to him of certain Letters Patent,

And Whereas, the said United Company desires to purchase said Letters Patent, and the business established by said Freeman together with all machines, machinery and other property appurtenant to said business, and all improvements in or relating to shoe and leather working machinery which said Freeman now has, or

which he shall hereafter invent, and to secure the aid and co-operation of said Freeman in perfecting and developing improvements in said art.

Now this Indenture Witnesseth

First. In consideration of Five Hundred Dollars to him paid by the said United Company, the receipt of which is hereby acknowledged, and of the agreements of the United Company hereinafter contained, the said Freeman has sold, assigned and conveyed to said United Company, by his deed of even date herewith, to be recorded in the Patent Office of the United States, the entire interest in the following described Letters Patent of the United States, namely: —

Letters Patent, numbered 607,924, dated July 26th, 1898

Letters Patent, numbered 615,481, dated December 6th, 1898

Letters Patent, numbered 618,082, dated January 24th, 1899,

and in and to an application for the grant of Letters Patent of the United States, filed by him September 30th, 1898, Serial No. 692,324.

Second. For the consideration aforesaid, the said Freeman has sold, transferred and conveyed, and does hereby sell, transfer and convey to said United Company all his boot and shoe and leather working machinery constructed or in process of construction, and parts of such machinery, all his machines, tools, jigs, patterns, models, situate in the premises occupied by him on Columbia Street, in said Boston, or wherever else situated, and, in particular, five completed nailing machines and one machine for making or forming wire for use in said machines, which are now in said premises on said Columbia Street, and does agree to deliver all said chattels to said United Company, at the factory of the McKay Shoe Machinery Company in Winchester, Massachusetts;

And said Freeman has sold, transferred and conveyed to said United Company all Letters Patent and rights and interests in or under Letters Patent, both of the United States and of other countries, for improvements in or relating to boot and shoe and leather working machinery, machines, tools and appliances which he has, or is entitled to have, other than the Letters Patent above referred

to by number and date, the good will of his said business, and the exclusive right to the use of his name and of any and all trade marks or trade names to which he is entitled, in connection with such machinery.

And the said Freeman doth hereby covenant with the said United Company that he is the lawful owner of the chattels and interests hereby conveyed; that they are free from all incumbrances; that he has good right to sell the same as aforesaid; and that he will warrant and defend the same as against the lawful claims and demands of all persons.

Third. And for the consideration aforesaid, said Freeman agrees to convey to said United Company any and all improvements or inventions in or relating to boot and shoe or leather working machinery, machines, tools and appliances which he had made, but has not patented, or which he shall hereafter make; and agrees to promptly disclose and explain to the officers or counsel of said United Company all such inventions or improvements in such manner as to enable the said United Company to have applications prepared for the grant of Letters Patent therefor and to practice such inventions or improvements; and agrees from time to time hereafter and at all times, when said United Company shall request him so to do, to do all such acts and to execute and make oath to all such applications, specifications, assignments and other written instruments as shall, in the opinion of the counsel of said United Company be reasonable and proper or necessary to obtain the grant of Letters Patent, both for the United States and for other countries, for such inventions or improvements, and to vest the legal title to all such applications and patents in said United Company, or in such persons or corporations as it shall direct; the cost of all such applications, patents, assignments or other instruments to be borne by said United Company.

Fourth. And said Freeman for the consideration aforesaid doth further agree with said United Company and its successors and assigns that he will not hereafter engage in the manufacture of, or deal in, or directly or indirectly aid, assist or encourage anyone to engage in the manufacture of or to deal in boot and shoe or leather

working machinery, machines, tools or appliances in competition with said United Company, the corporations owned or controlled by it and its or their successors or assigns; and that he will not infringe or aid, assist or encourage anyone to infringe the trade marks, trade names or letters patent now owned or which shall hereafter be owned by said United Company or by corporations owned or controlled by it, and its or their successors and assigns, in connection with the business of manufacturing and dealing in boot and shoe and leather working machinery; and that he will use his influence to promote the interests of said United Company in the prosecution of such business and of the corporations owned or controlled by it, and its and their successors and assigns.

Fifth. And said Freeman further agrees to execute, acknowledge and deliver from time to time hereafter, (but at the expense of the United Company its successors or assigns) such other deeds, assignments, disclaimers, applications for reissues or extensions of letters patent, or other written instruments and to do such acts as, in the opinion of the counsel for said United Company are reasonable and proper or necessary to confirm to the United Company, its successors or assigns or any or all the chattels, rights and interests hereby conveyed or intended to be conveyed.

Sixth. The said United Company, in consideration of the premises agrees upon the delivery of the machines and other goods sold and conveyed by said Freeman in paragraph "Second" hereof at the factory of the McKay Shoe Machinery Company in Winchester and upon the delivery to it of assignments of the said Letters Patent of the United States, Nos. 607,924, 615,481 and 618,082, and said pending application, Serial No. 692,324 which convey the entire interest in and to said Letters Patent and said pending application, free and clear of all incumbrances or licenses, to pay to said Freeman the sum of ten thousand five hundred Dollars ($10,500.00) in addition to the five hundred dollars paid by it mentioned in paragraph "First" hereof; and further agrees, that so long as the said Freeman faithfully performs his agreements contained in paragraphs "Third" and "Fourth" hereof, and is not in default in respect to the same or any thereof, it will,

(*a*) during the term of eight years from the date of this instrument, pay to said Freeman the sum of ten dollars for each nailing machine made and sold, leased or otherwise disposed of, in the United States of America by it, or by any persons, firms or corporations controlled by it, which embodies in its construction one or more of the inventions or improvements heretofore made or to be hereafter made by said Freeman, for which Letters Patent of the United States have been granted to said Freeman and assigned to said United Company as aforesaid, or for which Letters Patent of the United States shall hereafter be granted upon his application and assigned to the United Company, its nominee or successors or assigns, under the provisions of this instrument:

(*b*) And will keep or cause to be kept an accurate account of the number of such nailing machines made and sold, leased or otherwise disposed of in the United States of America by it, or by any persons, firms or corporations controlled by it, which shall be open at all reasonable times to the inspection of said Freeman or his authorized agent, or attorneys:

(*c*) And will in the months of April and October of each calendar year during said term render, or cause to be rendered to said Freeman a statement in writing showing the number of such nailing machines made and sold, leased or otherwise disposed of, in the United States of America by it, or by any persons, firms or corporations controlled by it, in the six calendar months preceding the month in which such statement is rendered, and will simultaneously with the rendering of any such statement, in April and October of each year, pay or remit to said Freeman, or cause to be paid or remitted to him the sum of ten dollars for each such nailing machine made and sold, leased or otherwise disposed of, as shown by such statement.

(*d*) And, in case the sum paid or to be paid to said Freeman under the terms of this paragraph "Sixth", in any year ending September 30th, is less than Five Hundred Dollars ($500) will, in rendering the statement of account and in making the payment required hereby to be made in October of each such year, pay or cause to be paid to said Freeman such sum in addition to that

called for by the statement, as shall make the amount paid to him for that year the sum of Five Hundred Dollars, the said United Company hereby agreeing to pay to said Freeman the sum of, at least, Five Hundred Dollars per year, during the term of eight years from the date of this instrument, provided that said Freeman shall, in good faith, perform all his agreements in this instrument contained.

In Witness Whereof, the said Freeman has set his hand and seal hereto, and said United Company has caused its corporate seal to be hereto affixed and these presents to be signed by George W. Brown its Treasurer the day and year first above written.

PLAINTIFF'S EXHIBIT 69.

[Put in Evidence, page 466.]

Agreement made this tenth day of October 1899 by and between George W. Freeman of Boston in the Commonwealth of Massachusetts, party of the first part, and United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, having an office and place of business in said Boston (hereinafter called the United Company) of the second part.

Whereas by an indenture of even date herewith, Edwin T. Freeman, the father of said George W. Freeman has sold and the said United Company has purchased the business, of manufacturing nailing machinery designed for use in boot and shoe or leather work heretofore carried on by said Edwin, and his machines, machinery, tools, Letters Patent and other property, rights and interests:

And Whereas, the said George W. Freeman is and has been associated with his father in said business and as a part of the consideration for said purchase the said United Company has agreed to take the said George W. Freeman into its employ;

Now it is Agreed as follows:

1. The said George W. Freeman agrees with said United Company that he will, for one year from October 1st, 1899, render and give to said Company, or the corporations controlled by it, his exclusive time, services and skill, in such employment as shall be assigned to him by the General Manager of said United Company.

2. The said United Company agrees to employ said George W. Freeman for at least one year from October 1st, 1899, and during the said term to pay him at the end of every calendar month thereof, the sum of Sixty Six and 66/100 Dollars ($66.66) the first of such payments to be made on the 31st day of October, 1899.

3. In consideration of said employment and of the said purchase from Edwin T. Freeman, the said George W. Freeman agrees with said United Company and its successors and assigns that he will not hereafter engage in the manufacture of, or deal in, or directly or indirectly aid, assist, or encourage anyone to engage in the manufacture of or to deal in boot and shoe and leather working machinery, machines, tools or appliances in competition with said United Company, the corporations owned or controlled by it, and its or their successors or assigns; and that he will not infringe, or aid, assist or encourage anyone to infringe the trade marks, trade names or letters patent, now owned, or which shall hereafter be owned by said United Company, or by the corporations owned or controlled by it, and its or their successors or assigns in connection with the business of manufacturing and dealing in boot and shoe and leather working machinery, and that he will use his best efforts and influence to promote the interests of said United Company, and of the corporations owned or controlled by it, in the prosecution of such business.

4. And said George W. Freeman, for the consideration above mentioned further agrees to convey to said United Company any and all improvements or inventions in or relating to boot and shoe or leather working machinery, machines, tools and appliances which he has made, but has not patented, or which he shall hereafter make; and agrees to promptly disclose and explain to the officers or counsel of said United Company all such inventions or improvements in such manner as to enable the said United Com-

pany to have applications prepared for the grant of Letters Patent therefor and to practice such inventions or improvements; and agrees from time to time hereafter and at all times, when said United Company shall request him so to do, to do all such acts and to execute and make oath to all such applications, specifiations, assignments and other written instruments as shall, in the opinion of the counsel of said United Company be reasonable and proper or necessary to obtain the grant of Letters Patent, both for the United States and for other countries, for such inventions or improvements, and to vest the legal title to all such applications and patents in said United Company, or in such person or corporations as it shall direct; the cost of all such applications, patents, assignments or other instruments to be borne by said United Company.

In Witness Whereof, said George W. Freeman has set his hand and seal hereto, and said United Company has caused its corporate seal to be affixed hereto, and these presents to be signed by George W. Brown, its Treasurer, the day and year first above written.

PLAINTIFF'S EXHIBIT 70.

[Put in Evidence, page 466.]

This Agreement, made this eleventh day of October, A. D. 1899, by and between Albert G. Brewer, of Hopkinton, in the Commonwealth of Massachusetts, party of the first part, and the United Shoe Machinery Company, a Corporation duly organized under the Laws of the State of New Jersey, and having a place of business at No. 111 Lincoln Street, in Boston, Massachusetts, hereinafter called the United Company, party of the second part,

Witnesseth, That whereas the said Brewer has made application for Letters Patent of the United States, Ser. No. 714,671, filed April 27th, 1899, for an improvement in Heel Breasting Machines; and

Whereas, the United Company is desirous of acquiring said application and the invention therein shown and described;

Now, therefore, the said Brewer and the said United Company do mutually covenant and agree as follows:

The said Brewer shall concurrently with the execution of this instrument, execute and deliver to the United Company an assignment in proper form of said application and said invention. The United Company shall, upon the execution and delivery of said assignment, pay to the said Brewer the sum of Two Hundred and Fifty ($250.00) Dollars.

The United Company further covenants and agrees that it will, until the expiration of the United States Letters Patent which may be granted on said application, pay to the said Brewer, or his legal representatives or assigns, the sum of Five Dollars ($5.00), for each and every Heel Breasting Machine embodying any of the inventions described and claimed in the claims of the Letters Patent which may be granted on the said application, and put out by the United Company into any Shoe Factory.

The said Brewer hereby sells, assigns, and delivers to the United Company all machines already constructed by said Brewer, and embodying the said invention, in particular one machine now in the factory of Cloutman & Dunham, at said Hopkinton, together with all models, patterns, jigs, and special tools used in, or adapted for the manufacture of said machines.

The said Brewer also assigns to the United Company any and all inventions which he may hereafter make relating to machines for breasting heels "on the last"; and the said Brewer covenants and agrees that he will, and his legal representatives shall, fully disclose all such inventions to the United Company, its successors or assigns, and that he will, and they shall, sign any and all applications, or other papers, which may be necessary to enable the United Company, its successors or assigns, to obtain Letters Patent of the United States, or any other countries, for the said inventions.

The United Company hereby covenants and agrees to render an account to the said Brewer, or his legal representatives, once in

every six months, of all machines put out into shoe factories from the date of the last settlement to the end of the preceding calendar month, and embodying any of the inventions described and claimed in the claims of the Letters Patent which may be granted on said application, and agrees to pay to the said Brewer, at the same time, the amount then due to said Brewer under the terms of this agreement, as shown by said account.

In Witness Whereof the said Brewer has hereunto set his hand and seal, and the said United Shoe Machinery Company has caused this instrument to be signed, and its Corporate seal to be hereunto affixed by Edwd. P. Hurd, its Asst. Tres., thereunto duly authorized, in duplicate, the day and year first above written.

PLAINTIFF'S EXHIBIT 71.

[Put in Evidence, page 467.]

This Indenture, made this twenty-fourth day of October, A. D. 1899, by and between James H. Reed and Alfred L. Barrett, both of Brookline, Henry M. Loomer, of Boston, Ward Perkins, of Saugus, and Ralph W. Burnham, of Ipswich, all in the Commonwealth of Massachusetts, co-partners doing business in said Boston under the firm name and style of Globe Shoe Tool Co., as manufacturers of edge cutters and irons for use in the manufacture of boots and shoes, shoe machinery and special parts of such machinery, parties hereto of the first part, and United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, of Paterson in said State, having an office and usual place of business in said Boston, party hereto of the second part, Witnesseth:

First. The said parties of the first part, in consideration of the sum of thirty thousand dollars ($30,000) to them in hand paid this day, the receipt of which is hereby acknowledged, have sold, transferred, conveyed and delivered, and by these presents do sell,

transfer, convey and deliver to said party of the second part all the stock in trade, manufactured and in process of manufacture, raw or unworked material, machinery, machines, tools, jigs, patterns, models, drawings, blue prints, shafting, hangers, pulleys, benches, and furniture and all the goods, chattels and fixtures situate in the factory at No. 124 to 134 Pearl Street in said Boston, occupied by said Globe Shoe Tool Co., or wherever else situated, which belongs to said Globe Shoe Tool Co., including all goods and chattels in the hands of any other person or persons whether under lease, on trial or consignment or otherwise held which belong to said Globe Shoe Tool Co.

Also all letters patent or rights to obtain letters patent, or interests in or licenses under letters patent owned by said Globe Shoe Tool Co., or to which it is or may be entitled, and in particular the beneficial interest of said Globe Shoe Tool Co., in and under a certain indenture of license under Letters Patent of the United States of America numbered 625,068, granted May 16, 1899 to Charles A. Squire for an improvement in sole edge trimming machines, which indenture is dated June 14th, 1899, and was made by and between said Squire of the one part and said Globe Shoe Tool Co., of the other part, together with the right to use and exercise the said license in the name of said Globe Shoe Tool Co., the said party of the second part assuming and agreeing to pay all royalties accruing after the date of this instrument.

Also the exclusive right to use all trade marks and trade names employed by said Globe Shoe Tool Co., and the good will of the business heretofore carried on by said Globe Shoe Tool Co.

And said parties of the first part do also hereby assign, transfer, convey and set over the lease or leases under which said Globe Shoe Tool Company is entitled to occupy the premises now used by it as an office and factory at Nos. 124 to 132 Pearl St., in said Boston — the said party of the second part assuming and agreeing to pay all rent accruing for the said premises after the date of this instrument until the expiration of the existing lease or leases thereof:

Also all accounts, bills receivable, and choses in action of said

Globe Shoe Tool Co., and its books of account and records of every nature and description.

To Have and to Hold all and every the said goods, chattels, fixtures, choses in action and other rights and interests to the said party of the second part and its successors and assigns forever.

Second. And said parties of the first part do covenant with said party of the second part that all and every the premises hereby conveyed or intended to be conveyed are free from all incumbrances, that they have good right to sell and convey the same as aforesaid and that they will warrant and defend the same against the claims of all persons; and said parties of the first part hereby jointly and severally covenant and agree with said party of the second part to assume and pay any and all liabilities and undertakings of said Globe Shoe Tool Company existing at the date of this instrument, and to indemnify and hold harmless the said party of the second part against the same.

Third. And for the consideration aforesaid the said parties of the first part hereby jointly and severally covenant and agree with the party of the second part and its successors and assigns from time to time and at all times hereafter, to execute such deeds or other instruments and to do such acts as, in the opinion of the counsel of said party of the second part, shall be necessary or proper to confirm and vest in said party of the second part, its successors or assigns, a clear title to the premises hereby conveyed or intended to be and secure to it and them the beneficial interests hereby sold.

Fourth. Said party of the second part further agrees to assume and pay the rent of the premises now occupied by said Globe Shoe Tool Company at Nos. 124 to 132 Pearl St. in said Boston until the expiration of the existing lease or leases under which said Globe Shoe Tool Co. is tenant, and also agrees to assume and pay royalties to said Squire, under the terms of said license granted by him as aforesaid for such trimming sleeves as it shall sell after the date of this instrument and while said license shall remain in force.

Fifth. Said party of the second part further covenants and agrees

to use reasonable diligence in collecting the accounts, bills receivable, and choses in action outstanding at the date of this instrument and hereby conveyed, and to pay over to said Reed for the benefit of said parties of the first part the proceeds thereof from time to time, as the same shall be collected, after deducting any and all legal expenses which it shall incur in the collection of the same, but otherwise without deduction.

In Witness Whereof the said parties of the first part have set their hands and affixed their seals hereto, and said party of the second part has caused these presents to be sealed with its corporate seal and to be signed in its name by George W. Brown, its Treasurer, the day and year first above written.

[Put in Evidence, page 468.]

Indenture made this twenty-fourth day of October A. D. 1899 by and between Henry M. Loomer of Boston, in the Commonwealth of Massachusetts, as party of the first part, and United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, having an office and usual place of business in Boston, in said Commonwealth (hereinafter called the United Company) as party of the second part.

Whereas, the said United Company, by an indenture of even date herewith, has purchased the business of manufacturing edge cutters and irons for use in the manufacture of boots and shoes, shoe machinery and special parts of such machinery, including (heel trimming machines and cutters and) fore part trimming ma-

chines and cutters, established and carried on by the Globe Shoe Tool Company, a co-partnership, of which said Loomer is a member, and has purchased the goodwill of said business;

And whereas, it was agreed as an inducement to the United Company to take over said business and to purchase the property and assets of said partnership, that said Loomer should make and enter into an agreement of the tenor following, and that said United Company should take the said Loomer into its employ;

Now this Indenture Witnesseth: —

First. Said Loomer agrees with said United Company that he will for one year from the date hereof render and give to said United Company, or to the firms and corporations controlled by it, his exclusive time, services and skill in such employment as shall be assigned to him by the General Manager of said United Company.

Second. Said United Company agrees to employ said Loomer for at least one year from the date hereof, and during said term to pay him at the end of every calendar week thereof the sum of Twenty-five Dollars ($25.00), the first of said payments to be made on the thirty-first day of October 1899.

Third. In consideration of said employment and of the purchase from said Globe Shoe Tool Company by said United Company said Loomer agrees with said United Company, and its successors and assigns, that he will not hereafter engage in the manufacture of or deal in or directly or indirectly aid, assist or encourage anyone to engage in the manufacture of or to deal in boot and shoe or leather working machinery, machines, tools and appliances in competition with said United Company, and the firms or corporations owned or controlled by it, and its or their successors or assigns; and that he will not infringe or aid, assist or encourage anyone to infringe the trade marks, trade names or Letters Patent now owned, or which shall hereafter be owned by said United Company or by the firms or corporations owned or controlled by it and its or their successors or assigns, in connection with the business of manufacturing, selling or leasing any boot and shoe or leather working machinery, and that he will use his best efforts and influence to promote the

interests of said United Company, and of the firms or corporations owned or controlled by it, in the prosecution of said business.

Fourth. And said Loomer for the consideration above mentioned further agrees to convey to said United Company any and all improvements or inventions in or relating to boot and shoe or leather working machinery, machines, tools and appliances, which he has made, but has not patented, or which he shall hereafter make; and agrees to promptly disclose and explain to the officers or counsel of said United Company all said inventions or improvements in such manner as to enable said United Company to have applications prepared for the grant of Letters Patent therefor, and to practice such inventions and improvements; and agrees from time to time hereafter, and at all times, when said United Company shall request him so to do, to do all such acts and to execute and make oath to all such applications, specifications, assignments and other written instruments, as shall in the opinion of the counsel for said United Company be reasonable and proper or necessary to obtain a grant of letters patent both for the United States and for other countries for such inventions and improvements, and to vest the legal title for all such applications and patents in said United Company, or in such persons or corporations as it shall direct, the cost of all such applications, assignments and other written instruments to be borne by said United Company.

In witness whereof said Henry M. Loomer has set his hand and seal hereto and said United Company has caused its corporate seal to be hereto affixed and these presents to be signed by George W. Brown, its Treasurer, the day and year first above written.

PLAINTIFF'S EXHIBIT 73.

[Put in Evidence, page 468.]

Indenture made this twenty-fourth day of October A. D. 1899, by and between Ward Perkins of Saugus, in the Commonwealth of Massachusetts, as party of the first part, and United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, having an office and usual place of business in Boston, in said Commonwealth (hereinafter called the "United Company") as party of the second part,

Whereas, the said United Company by an indenture of even date herewith has purchased the business of manufacturing edge cutters and irons for use in the manufacture of boots and shoes, shoe machinery and special parts of such machinery, including heel trimming machines and cutters and fore part trimming machines and cutters, established and carried on by the Globe Shoe Tool Company, a co-partnership of which said Perkins is a member, and has purchased the good-will of said business,

And whereas, it was agreed as an inducement to the United Company to take over the said business and to purchase the property and assets of said partnership, that said Perkins should make and enter into an agreement of the tenor following, and that said United Company should take the said Perkins into its employ;

Now this Indenture Witnesseth:—

First. Said Perkins agrees with said United Company that he will for one year from the date hereof render and give to said United Company, or to the firms and corporations controlled by it, his exclusive time, services and skill in such employment as shall be assigned to him by the General Manager of said United Company.

Second. Said United Company agrees to employ said Perkins for at least one year from the date hereof, and during said term to pay him at the end of every calendar week thereof the sum of Twenty Dollars ($20.00) the first of said payments to be made on the thirty first day of October 1899.

Third. In consideration of said employment and of the purchase

from said Globe Shoe Tool Company by said United Company said Perkins agrees with said United Company and its successors and assigns that he will not hereafter engage in the manufacture of or deal in or directly or indirectly aid, assist or encourage anyone to engage in the manufacture of or to deal in boot and shoe or leather working machinery, machines, tools and appliances in competition with said United Company, and the firms or corporations owned or controlled by it, and its or their successors or assigns; and that he will not infringe or aid, assist or encourage anyone to infringe the trade marks, trade names or Letters Patent now owned, or which shall hereafter be owned by said United Company or by the firms or corporations owned or controlled by it and its or their successors or assigns, in connection with the business of manufacturing, selling or leasing any boot and shoe or leather working machinery, and that he will use his best efforts and influence to promote the interests of said United Company and of the firms or corporations owned or controlled by it, in the prosecution of said business.

Fourth. And said Perkins, for the consideration above mentioned, further agrees to convey to said United Company any and all improvements or inventions in or relating to boot and shoe or leather working machinery, machines, tools and appliances, which he has made, but has not patented, or which he shall hereafter make; and agrees to promptly disclose and explain to the officers or counsel of said United Company all said inventions or improvements in such manner as to enable said United Company to have applications prepared for the grant of Letters Patent therefor, and to practice such inventions or improvements; and agrees from time to time hereafter and at all times when said United Company shall request him so to do, to do all such acts and to execute and make oath to all such applications, specifications, assignments and other written instruments as shall in the opinion of the counsel for said United Company be reasonable and proper or necessary to obtain a grant of letters patent both for the United States and for other countries for such inventions and improvements, and to vest the legal title for all such applications and patents in said United Company, or in such persons or corporations as it shall direct, the cost

of all such applications, assignments, and other written instruments to be borne by said United Company.

In witness whereof said Ward Perkins has set his hand and seal hereto and said United Company has caused its corporate seal to be hereto affixed and these presents to be signed by George W. Brown, its Treasurer, the day and year first above written.

WARD PERKINS [SEAL]

[SEAL] UNITED SHOE MACHINERY COMPANY

By Geo. W. Brown, Treasurer.

PLAINTIFF'S EXHIBIT 74.

[Put in Evidence, page 469.]

This Agreement made this second day of November eighteen hundred and ninety-nine, between the United Shoe Machinery Company, a corporation organized under the laws of the State of New Jersey (hereinafter called the United Company) party of the first part and the John Ritchie Company, a corporation having its principal place of business at Quebec, Province of Quebec, Dominion of Canada; and John Ritchie, of Quebec, parties of the second part; Witnesseth:

That in consideration of One Dollar and other good and valuable considerations by each of the parties hereto, to the other in hand paid, the receipt whereof the several parties hereto severally acknowledge, the said parties do hereby jointly and severally covenant and agree with each other as follows, viz.:

1. The parties of the second part jointly and severally hereby assign, transfer, and deliver the entire right, title and interest, possession, and control, except as hereinafter provided for, in all the standard screw machines, slugging machines, tacking machines, and machines, mechanism, and appliances for inserting, or for manufacturing metallic fastenings, including standard screw wire, slugger wire, and tacker wire, which are owned, or controlled, by the parties of the second part, or either of them, or which heretofore have been used by the said John Ritchie, or the said Ritchie

Company, in the manufacture of the standard screws, slugging, or tacking wire heretofore used in the manufacture of boots or shoes in the factory of the said John Ritchie Company, and which are still under the control of the said John Ritchie Company.

The parties of the second part also jointly and severally agree that the said John Ritchie Company shall duly execute and deliver to the United Company the regular shoe machinery lease, or license, which shall be adopted by the United Company for its Canadian licenses, or by such subsidiary Company as the United Company may utilize for carrying on its Canadian business, said lease or license to embrace the machines assigned by this instrument to the United Company, and other machines of the United Company that may be adopted by the John Ritchie Company, and the said parties of the second part jointly and severally covenant and agree that the said John Ritchie Company shall observe and perform all the conditions and agreements to be contained in the said lease and license, in so far as the same are not inconsistent with any of the conditions of the present instrument.

The said parties of the second part further severally and jointly covenant and agree that they or either of them will not at any time hereafter manufacture, or sell, or become directly or indirectly, interested in any wire fastening shoe machinery, or machines for making the same, or parts thereof, or any standard screw wire, slugger wire, tacker wire, or any other metallic fastening, or other fastening materials now or hereafter manufactured or dealt in by the said United Company, or any of its subsidiary companies (a majority of the stock of which is directly or indirectly owned or controlled by the United Company) and the said parties of the second part further agree that they will jointly and severally do all in their power to promote the success and prosperity of the business of the United Company, and its subsidiary companies, and will not in any way compete with said Company, or its subsidiary companies, in any wire fastening or wire making machinery, and where the parties of the second part see that it will be to their advantage, they agree to adopt the other machines controlled by the United Company, on the same terms and conditions as other

manufacturers; and the parties of the second part agree to afford the United Company every facility for demonstrating the advantages of any of its machines, in the factory of the John Ritchie Company, provided always that the John Ritchie Company is not put to any expense in such demonstration of new machinery; but nothing in this agreement, or in any lease or license to be signed by the parties of the second part can be construed into binding them to take such machine, or machines from the United Company, unless it is demonstrated as aforesaid that said machines will do the work for which they are designed cheaper, and better than the machines of others, and that the John Ritchie Company requires in its business machines to do the class of work for which these machines are designed.

The said John Ritchie Company shall have the right to use the Standard Screw Machines, slugging machines, and tacking machines, hereby assigned to the United Company upon the terms hereinafter set forth.

2. The United Company agrees, provided the said John Ritchie, and the John Ritchie Company, continue to observe and perform all the covenants and conditions of this agreement, and so long as the John Ritchie Company continues to observe and perform all the conditions and agreements (in so far as the same are not inconsistent with the terms and conditions of this agreement as aforesaid) to be contained in the lease, or license, of the United Company, or its local Canadian Company, which is to be hereafter presented to the John Ritchie Company for execution, in accordance with the terms hereof, that it, the said United Company will permit the John Ritchie Company to continue to use the Standard Screw Machines, sluggers, and tackers, which are hereby assigned to the United Company until the said lease or license is presented to the said John Ritchie Company, and for such time thereafter as the John Ritchie Company continues to observe and perform all the conditions and agreements (not actually inconsistent herewith) contained in the said lease or license.

The United Company further agrees to sell, and deliver, to the John Ritchie Company at the actual cost manufacture, to the United

Company or any subsidiary Company controlled by them such quantities of its standard screw, slugging, and tacking wire as the John Ritchie Company may need for use in its own factory, it being understood and agreed, that the John Ritchie Company is to pay all the expenses incurred by the United Company in the production of said wire, including especially all freight, express, or other carriage, and also all Canadian duties on said wires which may be paid by the United Company; and the John Ritchie Company agrees to pay the United Company for said wire in cash, at such place as the United Company may designate, on the fifteenth day of the calendar month next ensuing after the calendar month during which the said wires were delivered; but should the United Company, or any of its subsidiary companies manufacture wire in Canada, at any future time, it is hereby agreed that they will deliver all, or any, of said wires from the Canadian factories at actual cost, free of any Canadian duties, except the duties on the crude material.

3. The said United Company further agrees that during the continuance of this agreement, provided the said John Ritchie, and the John Ritchie Company, observe and perform each and every condition and agreement, on their several parts to be observed and performed, and herein contained and contained in said lease, or license, to be hereafter executed in so far as said lease or license does not conflict with the terms of this agreement, that it, the said United Company, will pay the said John Ritchie Company the sum of seven hundred and fifty dollars ($750) per annum, the first payment of the said seven hundred and fifty dollars to be made on the first day of January nineteen hundred; but, should the said United Company desire to discontinue the annual payments of seven hundred and fifty dollars, it shall be at its option to pay to the said John Ritchie Company fifteen thousand dollars ($15,000) within three months after any annual payment has been made, or it may make such other arrangements as may be mutually agreed upon between the parties to this agreement.

4. The United Company further agrees to loan to the John Ritchie Company, during such period as the said John Ritchie

Company shall wish to use the same in the manufacture of boots and shoes, such standard screw, slugging and tacking machines of the best type now manufactured by the United Company, or by the McKay Metallic Fastening Association (which is an association controlled by the United Shoe Machinery Company), or by any other company controlled by the United Shoe Machinery Company, as the John Ritchie Company shall require to replace the machines at present in use in their factory for the manufacture of its boots and shoes, and the United Company agrees to loan such machines to the said John Ritchie Company for use as aforesaid free of all charge, and to supply wire to be used in the same on the terms specified in paragraph two of this agreement, but otherwise such machines are to be loaned to said John Ritchie Company subject to the terms and conditions contained in the regular lease and loan agreements then in use by the United Company, or by any other association or company controlled by the United Company which owns the machines so loaned; but it is agreed, nevertheless, that the United Company shall only be bound hereby to supply tacking machines for the purposes for which tacking machines are now being used in the factory of John Ritchie Company, and not for sole laying or fastening soles.

In case the John Ritchie Company desires to tack or lay or fasten soles, then it agrees to take additional machines therefor under the regular lease or license of the United Company, paying for the tacker wire used therein upon the regular terms and prices given to other licensees of the United Company in the Dominion of Canada.

5. It is agreed that the John Ritchie Company shall be permitted by the United Company to retain and use the wire screwing machine now in its possession until such time as they shall have finished the stock of wire which the John Ritchie Company has on hand at the date of this instrument; and further the John Ritchie Company is permitted to sell screw wire of its own make until such time as it shall be notified in writing by the United Company to discontinue doing so.

6. It is further agreed between the parties hereto that this agree-

ment shall prevail wherever there is any actual inconsistency between the terms thereof and the lease or license, which is to be hereafter adopted by the United Company and signed by the John Ritchie Company.

7. This agreement shall continue in force so long as the John Ritchie Company Limited shall exist as a corporation, and shall continue to manufacture boots and shoes.

In Witness Whereof the said United Shoe Machinery Company and the said John Ritchie Company have caused their respective corporate names and seals to be hereto affixed, and the said John Ritchie has hereunto set his name and seal on the day and year first above written.

[SEAL] UNITED SHOE MACHINERY COMPANY
By Geo. W. Brown, Treas.

[SEAL] JOHN RITCHIE COMPANY
By John Ritchie, Pres.
A. R. Drysdale, Secy.

[SEAL] JOHN RITCHIE

At a special meeting of the Executive Committee of the Directors of the United Shoe Machinery Company duly called and held at the office of the Company, No. 111 Lincoln Street, Boston, Mass. on the second day of November, 1899, the foregoing agreement between United Shoe Machinery Company of the first part and the John Ritchie Company and John Ritchie, parties of the second part, was submitted to the Committee and it was thereupon unanimously

Voted: That George W. Brown, the Treasurer of this Company, be and he is hereby authorized and directed to sign said agreement in duplicate in the name of this Company and to affix its corporate seal thereto.

A true copy from the records of the Executive Committee of the Directors of United Shoe Machinery Company.

Attest: Louis H. Baker, Secretary.

[CORPORATE SEAL]

At a meeting of the Directors of the John Ritchie Company, Limited, held at the office of the Company No. 183 St. Helene St. St. Rochs, Quebec, on the seventh day of November 1899, the foregoing agreement between the United Shoe Machinery Company, of the first part, and the John Ritchie Company, Limited, and John Ritchie, parties of the second part, was laid before the Directors, and it was unanimously resolved,

"That John Ritchie, President, and Alexander Ritchie Drysdale, Secretary, of this Company are hereby authorized and instructed to sign the said agreement in duplicate in the name of this Company and to affix its corporate seal thereto."

A true copy from the minutes of Directors meetings of the John Ritchie Company Limited.

A. R. Drysdale Secretary.

PLAINTIFF'S EXHIBIT 75.

[Put in Evidence, page 469.]

This Agreement made this 13th day of January, 1900, between Edward B. Seaver, of Boston in the State of Massachusetts, and Louis H. Baker, of said Boston.

Whereas the said Seaver is the owner of thirty-one thousand, seven hnndred and forty-one (31,741) shares of the capital stock of the Seaver Process Lasting Company a corporation organized under the laws of Maine, hereinafter called the Seaver Company; and,

Whereas the said Seaver Company is indebted to the said Seaver in the sum of thirty thousand, one hundred and twenty-five dollars and fifty-three cents ($30,125.53) for cash advanced to the Company, and interest thereon, and the sum of nine thousand, one hundred and fifty dollars ($9,150.) for services; and,

Whereas, the said Seaver Company is insolvent and is unable to continue its business or to pay its debts; and,

Whereas the said Baker is willing to purchase all the assets of the corporation upon the terms and conditions hereinafter set forth;

Now Therefore, in consideration of the mutual covenants herein

contained, and the sum of one dollar by each of the parties hereto to the other paid, the receipt of which the said parties respectively acknowledge, the said parties hereby Covenant and Agree with each other as follows: —

(1) The said Seaver hereby sells and assigns to the said Baker all his claims and demands against the Seaver Company of every sort and kind, including the said indebtedness of the Seaver Company to him for $39,275.53, together with every other claim he may have against the Seaver Company, and appoints the said Baker his true and lawful attorney in the name of the said Baker, or of him, the said Seaver, to do all acts and to bring all actions either at law or in equity which may be necessary or desirable to secure the payment of the said claim, and for the said purpose to appoint a substitute or substitutes, and at pleasure to revoke such appointment.

The said Seaver hereby warrants that the said indebtedness of $39,275.53, hereby assigned, is a good and valid liquidated debt for $39,275.53 due from the Seaver Company for cash loaned to and services rendered that Company by the said Seaver and the said Seaver warrants that he has good right to assign the same to the said Baker. And the said Seaver further warrants that the Seaver Company has no debts except the said debt of $39,275.53, hereby assigned, and no other liability, direct or contingent, of any sort whatever; and he covenants and agrees with the said Baker that he will assume and pay any valid claims and demands, should any be found to exist besides the said debt of $39,275.53, and that he will forever hold harmless and keep indemnified the said Baker and his executors, administrators, and assigns from any loss or damage, direct or indirect, arising from any such claims or demands, including counsel fees incurred in defending or resisting any such claims and demands if such claims are sustained.

And the said Seaver further warrants that the said company is the owner of the following property, viz: —

Good accounts to the value of	$843.50
Furniture, estimated value, ...	40.00

Tools and Machinery, estimated value, ... 3,000.00
Amount due from the Seaver Process Lasting Syndicate, Limited, ... 300.00

Besides eighty-eight (88) lasting machines in the hands of lessees of the Company, the title to which machines belongs to the Seaver Company, and two (2) sewing machines in the hands of lessees, and also fifty (50) completed lasting machines in the factory of the Seaver Company, except that of this number twenty-five (25) are not assembled; and duplicate parts, needles, drawings, patterns, and other equipment stock and materials in the factory at 40 Stanhope Street, Boston, where the machines of the Seaver Company are made, and also the entire right, title, and interest to the following Letters Patent of the United States:—

484,958	October 25, 1892.	Charles S. Gooding and Thomas K. Keith.
467,743	January 26, 1892.	Augustus Seaver.
488,523	December 20, 1892.	Thomas K. Keith
487,023	November 29, 1892.	Augustus Seaver
489,945	January 17, 1893.	Charles S. Gooding
537,767	April 16, 1895.	William S. Hamm
559,311	April 28, 1896.	Augustus Seaver
559,617	May 5th, 1896.	Augustus Seaver
559,618	May 5th, 1896.	Augustus Seaver
564,015	July 14, 1896.	William S. Hamm
570,252	October 27, 1896.	William S. Hamm
596,308	December 28, 1897.	Augustus Seaver
590,639	September 28, 1897.	Fred P. Bullard and William S. Hamm
583,674	June 1st, 1897.	Arthur W. Eaton and William S. Hamm
596,325	December 28, 1897.	William S. Hamm
596,323	December 28, 1897.	Arthur W. Eaton
635,129	October 17, 1899.	Arthur W. Eaton
635,124	October 17, 1899.	Fred P. Bullard

Also Letters Patent of Great Britain No. 1559, dated January 26, 1892.

Also Letters Patent of Switzerland No. 4460, dated February 2, 1892.

And the said Seaver agrees that until the assets, business, and good-will of the Seaver Company have been sold at public auction, or to the said Baker, as hereinafter provided for, the assets of the Company shall not be decreased in any way, and that no lasting machines shall be sold or leased, and that no liabilities shall be incurred; and, further, that the present assets of the Seaver Company are not less than said assets were on the 23rd day of December, 1899.

(2) The said Seaver also hereby sells, assigns, and transfers to the said Baker all shares of the capital stock of the said Seaver Company belonging to the said Seaver, and warrants that the shares in the capital stock of the said Company owned by him and hereby sold and transferred, are not less than thirty-one thousand, seven hundred and forty-one (31,741) shares out of a total capital stock of the Company of not more than sixty thousand (60,000) shares, of which 60,000 shares twelve thousand, two hundred and sixty-three (12,263) shares are in the Treasury of the Company free from any claim and available for the future purposes of the Company.

(3) It is agreed that the said stock shall continue to stand in the name of the said Seaver until the said Baker shall request the said Seaver Company or the said Seaver to transfer the same to him or his assignee, and the said Seaver agrees that the treasury stock shall not be disposed of or encumbered in any way without the consent in writing of the said Baker.

(4) The said Seaver also sells, assigns, and transfers unto the said Baker all shares in the Lasted Toe Cap Company, a corporation duly organized in accordance with the laws of the State of Maine, owned or controlled by him or in which he has any interest, either alone or jointly with others, and he warrants that he is the owner of the same, and that he does hereby transfer to the said Baker a majority of the issued capital stock of the Lasted Toe Cap Company, not including, however, a majority of or any of the treasury stock hereinafter referred to. And it is agreed that the

said stock shall continue to stand in the name of the said Seaver until the said Baker shall request the said Seaver or the Lasted Toe Cap Company to transfer the same to him; and the said Seaver agrees that any reissued stock or the treasury stock shall not be issued or disposed of or encumbered by the said Lasted Toe Cap Company except with the consent of the said Baker, and that no patents shall be sold or licenses granted or agreements entered into by the Lasted Toe Cap Company except with the consent of the said Baker; and the said Seaver covenants and agrees that he will at any time within twenty days of a request by the said Baker cause to be elected such officers for the Lasted Toe Cap Company, in place of the present officers, as the said Baker shall request; and he covenants that the present officers will resign or peaceably surrender their offices and the custody of all the property of the Company to such new officers.

(5) The said Seaver for the consideration aforesaid, hereby surrenders and cancels all his claims against the Lasted Toe Cap Company, including especially a claim for fourteen thousand (14,000) dollars which he has against the last said Company, and all other claims and demands of every kind which he has against the Lasted Toe Cap Company; and he warrants that the Lasted Toe Cap Company is free from any debt or liability of any sort to any other person, and agrees that whenever requested he will execute and deliver to the Lasted Toe Cap Company a valid release of every claim on the part of the said Seaver against the Lasted Toe Cap Company.

And the said Seaver also agrees to assign or cause to be assigned to the Lasted Toe Cap Company, without other consideration than herein expressed, the following applications for Letters Patent: —

Great Britain — Communication from Augustus Seaver, case filed October 17, 1899. No. 20,787. Application in the name of Henry Harris Lake,

Germany, filed October 17, 1899, in name of Augustus Seaver: — Both for Machine for Stretching Uppers.

(6) The said Seaver further assigns and transfers to the said Baker his one share in Class A of the Seaver Process Lasting Syn-

dicate, Limited, a corporation duly organized in accordance with the Companies Acts of Great Britain, and all the shares in the Seaver Process Lasting Syndicate, Limited, owned or controlled by him, or in which has any interest.

(7) The said Seaver appoints the said Baker his true and lawful attorney in his name or in the name of the said Seaver to do all acts and bring all actions at law or in equity which may be necessary to secure to himself the full benefit of all the property and rights hereby conveyed and intended so to be, and for such purposes to appoint a substitute or substitutes, and at pleasure to revoke such appointment.

(8) Said Seaver covenants and agrees to call a meeting of the shareholders of the said Seaver Company within ten (10) days from the date hereof, and to explain to the shareholders the situation of the Seaver Company, and to give the shareholders the option of voting to sell the assets, business, and good-will of the Seaver Company at public auction, subject to a covenant on the part of the bidder to pay all the debts of the Seaver Company before receiving a conveyance, or at private sale to the said Baker for a covenant on the part of the said Baker to pay the debts of the Seaver Company to an amount not exceeding thirty-eight thousand (38,000) dollars; and in case the said Baker shall purchase at said auction or at such private sale, will cause to be executed proper transfers to convey all the said property to the said Baker or such persons as he shall direct; but in case at any such public auction some other person than the said Baker or his agents shall bid a greater sum than the debts of the corporation, then the said Seaver shall see that before any conveyance is made to the said purchaser, the said bidder shall pay to the said Baker the entire debt and claims due to the said Seaver and hereby assigned to the said Baker, and from the sum so received the said Baker shall pay to the said Seaver the sum of thirty-eight thousand (38,000) dollars and shall retain for himself one thousand, two hundred and seventy-five dollars and fifty-three cents ($1,275.53) and the proportion of the remainder of the purchase price above thirty-nine thousand two hundred and seventy-five dollars and fifty-three cents

$39,275.53) to which the said Baker is entitled, by reason of the stock in the Seaver Company hereby conveyed to him. But it is understood and agreed that the said Seaver will vote in favor of a transfer to the said Baker of the property of the corporation at private sale, unless the said Baker shall be convinced that it is the desire of a number of the stockholders, holding a substantial minority of the stock, to sell the property of the Company at public auction.

(9) The said Seaver further covenants and agrees that within seven (7) days of any request on the part of the said Baker, he will cause the resignations of all the officers of the Seaver Company to be tendered to and accepted by the Seaver Company, and will cause the election of such persons for the officers of the Company as the said Baker shall in writing request of the said Seaver.

(10). Provided the said Seaver observes and performs all the agreements and undertakings on his part hereinbefore contained, and provided the said Baker, his representatives and assigns, secure and enjoy the property, assets, and good-will of the said Seaver Company herein referred to, the said Baker covenants and agrees that the United Shoe Machinery Company, a corporation organized under the laws of the State of New Jersey, (hereinafter called the United Company) shall pay to the said Seaver, or his legal representatives and assigns, on the twenty-fifth day of each calendar month, beginning with the twenty-fifth day of March, 1900, a sum of money which shall be equal to half the amount of money received during the preceding calendar month, by the United Company, as royalty for the use of its lasting machines, of whatever kind, from the George E. Keith Company, a corporation organized under the laws of Massachusetts; and from the Charles A. Eaton Company, a corporation organized under the laws of said State; and the Preston B. Keith Shoe Company, a corporation organized under the laws of said State; these payments to continue until the said Seaver shall have received the sum of thirty-eight thousand dollars ($38,000) without interest. And in case the said monthly payments shall cease before the said $38,000 has been paid in full, because of the discontinuance of the use of the

lasting machines leased by the said shoe manufacturers from the United Company, then the United Shoe Machinery Company shall continue to make monthly payments to the said Seaver at such rate as shall equal the average monthly payment paid to the said Seaver in accordance with the terms hereof during the six months proceding the cessation of such payments until the said Seaver shall have received the said sum of $38,000.

In case the property of the said Seaver Company shall be sold at public auction to some other person than the said Baker, and the said bidder shall pay to the said Baker the claims of the said Seaver against the Seaver Company, hereby assigned to the said Baker, then, from the sums thus received by the said Baker, the said Baker shall pay $38,000 to the said Seaver, retaining the remainder to his own use.

And the said Seaver, for the consideration aforesaid, covenants and agrees that he will, upon request, do all further acts and execute all further instruments which the said Baker or his representatives and assigns shall deem necessary or desirable to secure to him or them the full benefit and enjoyment of all the property and rights hereby conveyed or intended to be conveyed.

In Witness Whereof, the said Edward B. Seaver and the said Louis H. Baker have hereto respectively set their names and seals on the day and year first above written.

EDWARD B. SEAVER [SEAL]
LOUIS H. BAKER [SEAL]

In consideration of one dollar and other good and valuable considerations, the receipt of which is hereby acknowledged, the United Shoe Machinery Company hereby guarantees the faithful and due performance by the said Baker of all the promises on his part set forth in the above agreement dated the 13th day of January, 1900.

In Witness Whereof, the United Shoe Machinery Company has caused its corporate name and seal to be hereto affixed by Edwd. P. Hurd its Asst. Tres. on the day and year first above written.

[SEAL] UNITED SHOE MACHINERY CO.
by Edwd. P. Hurd, Asst Tres.

PLAINTIFF'S EXHIBIT 76.

[Put in Evidence, page 469.]

An Agreement made at Boston, Massachusetts, this fifteenth day of February, 1900, between the United Shoe Machinery Company, a corporation duly organized under the laws of the State of New Jersey, having a place of business at 111 Lincoln Street, in said Boston, party of the first part; and Frank N. Stackpole of said Boston, George D. Pike of Brookline, Massachusetts, Joseph H. Ordway of said Brookline, and John R. Stuart, Junior of Roxbury, Massachusetts, parties of the second part; and Sidney W. Winslow of Beverly, Massachusetts, and also George W. Brown, Edward P. Hurd, and James J. Storrow of said Boston, parties of the third part;

Whereas, the parties of the second part are engaged in the business of manufacturing and selling blacking, cement, stains, and other products chiefly intended for polishing, staining, cementing, filling or otherwise dressing or preparing leather, boots, shoes, and other articles made in whole or in substantial part of leather, and carry on said business as partners under the firm name of the Boston Blacking Company, having a place of business at 96 Beverly Street, in said Boston; and

Whereas, the party of the first part has agreed to purchase one half interest in said business, or substantially one-half thereof, for eleven thousand, two hundred (11,200) shares of the preferred stock of the said United Shoe Machinery Company of the par value of twenty-five (25) dollars each; and

Whereas, as an incident to the purchase of a one-half interest in said business it has been agreed by the several parties hereto that a corporation shall be formed under the laws of the State of Maine, to be called the Boston Blacking Company, for the purpose of taking over the said business;

Now Therefore this Agreement Witnesseth;

That in consideration of one dollar and other good and valuable consideration by each of the above-mentioned parties to the other in hand paid, the receipt whereof each of the parties hereto hereby

acknowledges, the said parties do hereby covenant and agree each with the other as follows, viz: —

One. There shall be formed forthwith by Franklin C. Payson of Portland, Maine, under the laws of the state of Maine, a corporation having a capital stock of Six Hundred Thousand (600,000) Dollars, divided into six thousand (6,000) shares of the par value of One Hundred (100) Dollars each, and having Articles of Agreement and Bylaws in the form set forth hitherto agreed to and now in the hands of Franklin C. Payson of Portland, Maine.

The name of said new corporation shall be the "Boston Blacking Company", and the Board of Directors at the time of its organization shall be the said Stackpole, Pike, Ordway, Stuart, Winslow, Brown, Hurd and Storrow. And at the time of the organization of the said corporation the said Stackpole, Pike, Ordway and Stuart shall each subscribe and pay for two (2) shares of the capital stock in cash and the said Brown, Hurd, Winslow and Storrow shall each subscribe and pay for one (1) share in cash.

Two. As soon as the said corporation shall have been organized the parties of the second part agree to duly execute and deliver to the said new corporation instruments which shall properly assign and convey to the said new corporation the entire right, title and interest in all the partnership, property and partnership assets of every kind of the parties of the second part, including especially all property whatever whether real or personal which is being utilized in conducting the said business carried on under the name of the Boston Blacking Company and including especially the following instruments, viz: — (1) Bill of Sale; (2) Deed of Real Estate; (3) Assignment of Leases to the said new corporation in the form set forth in "Schedule B" hereto annexed, and the said Stackpole, Pike, Ordway, Stuart, Brown, Hurd, Winslow and Storrow agree that as Directors of said new corporation they will cause to be issued in full payment of the property thus to be transferred to the said new corporation five thousand nine hundred and eighty-eight (5988) fully paid up shares of the capital stock of said new corporation of a total par value of Five Hundred Ninety Eight Thousand and Eight Hundred (598,800) Dollars, said five thousand nine hundred and

eighty-eight (5,988) shares to be divided among the parties of the second part as follows: —

To Frank N. Stackpole one thousand four hundred and ninety-seven (1,497) shares of a total par value of One Hundred and Forty-Nine Thousand Seven Hundred (149,700) Dollars.

To George D. Pike one thousand four hundred and ninety-seven (1,497) shares of a total par value of One Hundred and Forty-Nine Thousand Seven Hundred (149,700) Dollars;

To Joseph H. Ordway one thousand four hundred and ninety-seven (1,497) shares of a total par value of One Hundred and Forty-Nine Thousand Seven Hundred (149,700) Dollars;

To John R. Stuart, Jr., one thousand four hundred and ninety-seven (1,497) shares of a total par value of One Hundred and Forty-Nine Thousand Seven Hundred (149,700) Dollars.

Three. The parties of the second part jointly and severally covenant and agree that they are the lawful owners of said business heretofore carried on under the name of the Boston Blacking Company and that they will transfer and convey the same as herein provided to the said new corporation free from debt and from any encumbrance whatsoever except an existing indebtedness not exceeding Thirteen Thousand Thirty-four and 70/100 (13,034.70) Dollars which the said new corporation is to assume and pay; and they further covenant and agree that the gross sales of merchandise made by them in carrying on said business have been as follows: —

Gross sales July 1, 1896 to July 1, 1897,	$457,593.79
Gross sales July 1, 1897 to July 1, 1898,	$560,717.12
Gross sales July 1, 1898 to July 1, 1899,	$605,776.30
Gross sales July 1, 1899 to Jan. 1, 1900,	$382,183.63

and that the net profits after making all proper allowances for all losses, depreciations and expenses of every sort and after deducting salaries paid to the parties of the second part, amounting to Thirty Thousand (30,000) Dollars per year, have been as follows: —

Net profits July 1, 1896 to July 1, 1897,	$78,672.61
Net profits July 1, 1897 to July 1, 1898,	$91,887.72

Net profits July 1, 1898 to July 1, 1899,	$104,860.47
Net profits July 1, 1899 to Jan. 1, 1900,	$51,989.02

and, further, that the assets on the first day of February, 1900, (and which are to be assigned and transferred to the new corporation, together with such increase in assets as are represented by the profits of the American business since February 1, 1900, and the profits of the foreign business since January 1, 1900) amount to not less than the following: —

Accounts including English account,	$120,879.79
Cash on hand	16,513.47
Merchandise, estimated,	65,000.00
Real Estate,	5,130.71
Chelsea Machinery,	2,274.71
Boston Machinery,	1,759.07
Furniture,	113.26
	$211,671.01
Assets of English Branch,	34,287.30
	$245,958.31
Less 10% of profits of English business for the year ending July 1, 1899,	2,386.25
	$243,572.06

Four. Inasmuch as the said new corporation is to be organized with a majority of its stock owned by the parties of the second part, therefore the parties of the second part expressly covenant and agree with the party of the first part and with the parties of the third part that they will faithfully, diligently, and efficiently manage the affairs and business of the said new corporation, and, furthermore, that they, the said parties of the second part, for the period of six (6) years from the date hereof will continue to devote their entire knowledge of the business and time and attention to promoting the business and welfare of said new corporation, serving the corporation in such capacity as may be necessary to efficiently carry on its business, and will transfer to said new corporation any inventions, discoveries, or secret processes, or com-

positions of matter which they may make, own, or acquire at any time during said term, and any Letters Patent or applications for Letters Patent of the United States or any foreign countries which they may own or make or in which they may acquire any interest, legal or equitable, during said period; and that they will take as their total compensation for such exclusive services and for such Letters Patent, applications, inventions, discoveries, processes, and compositions of matter (except for such dividends as shall be declared pro rata to all the stockholders of the said new corporation) salaries not in excess of six thousand (6,000) dollars per annum for each of them.

They further agree that for the period of (10) years from the date hereof (unless the one hundred shares of the new corporation which are to be placed in escrow are offered to the party of the first part for cash, as herein provided) they will not permit any salaries or compensations for services to be paid to anyone else in excess of two thousand (2,000) dollars per annum without getting the assent of the party of the first part and that they will not permit any contract for services for more than one year to be made by the said new corporation with any person or corporation except with the consent of the party of the first part. And inasmuch as the parties of the second part have built up the said business by their personal skill and attention and as the value of the business and goodwill to be conveyed to the said new corporation is dependent on the skill, knowledge, and attention of the parties of the second part, they covenant and agree that for the period of fifteen (15) years from the date hereof they will not whether jointly or severally or directly or indirectly, or as owner, agent, or employee or as stockholder of any corporation (except as they may be shareholders and employees of the said new corporation) engage in or become interested in any way in the business of buying or making or selling or dealing in blacking, or stains or cement or inks or wax or any other supplies intended primarily for use in manufacturing or finishing leather or boots or shoes or other articles made in chief part of leather in that portion of the United States east of the Mississippi or Missouri Rivers, or any portion of Missouri, Louisiana, Nebraska,

Kansas, or California, or any portion of Canada to the eastward of the Albany River, Lake Nipigon and Lake Superior, or any portion of Europe excepting Spain, Portugal, Turkey, Greece, Servia, and Bulgaria; and will not directly or indirectly sell any such materials or supplies to manufacturers carrying on business in the above-defined territory or manufacture or sell any such materials or supplies to be dealt in or used by others within such territory; and will transfer to said new corporation without further consideration any inventions, discoveries, or secret processes, or compositions of matter which they may make, own, or acquire at any time during said term, and any Letters Patent or applications for Letters Patent of the United States or any foreign countries which they may own or make or in which they may acquire any interest legal or equitable during said period. The said parties of the second part further agree that they will permit the President of the party of the first part, or such representatives as he may appoint, to have free access at all times to all premises occupied by or on behalf of the said new corporation and complete opportunity to familiarize himself with all details of the business of the corporation, and also at all times when requested by the President or his representative to furnish the President or his representative with any knowledge he may desire in regard to the business, including a knowledge of all secret processes and methods of manufacture employed by the said new corporation; and furthermore, the said parties of the second part covenant that the said new corporation shall keep full and accurate books of account which shall show at all times the condition of the corporation and its business, and that such books shall be open at all times to the inspection of the officers of the party of the first part or such experts as it may employ, with full liberty to make copies thereof in case of the party of the first part shall so desire.

Five. The parties of the second part agree that of the stock of the new corporation thus to be issued to them, certificates for two thousand, nine hundred and ninety-two (2,992) shares shall be at once duly endorsed in blank and delivered to Charles W. Lamb of Stoneham, to be held by him in escrow upon the terms that when the party of the first part shall deliver to the said Charles W. Lamb

eleven thousand, two hundred (11,200) fully paid up shares of the preferred stock of the party of the first part said eleven thousand two hundred (11,200) shares to be issued as follows: —

Two thousand, eight hundred shares in the name of the said Stackpole;

Two thousand, eight hundred shares in the name of the said Pike;

Two thousand, eight hundred shares in the name of the said Ordway;

Two thousand, eight hundred shares in the name of the said Stuart;

then the said Charles W. Lamb shall simultaneously deliver the certificate or certificates for the said two thousand, nine hundred and ninety-two (2,992) shares in said new corporation to the party of the first part, and the certificates for the said eleven thousand, two hundred (11,200) shares to the several parties of the second part, the last said certificates being delivered to the several parties of the second part according as they have been issued to the different parties of the second part.

Said parties of the second part further agree that besides the two thousand nine hundred and ninety-two (2,992) shares of the new corporation which are to be held as above provided for, they will also, as soon as the certificates for the said five thousand, nine hundred and eighty-eight (5,988) shares of the new corporation are delivered to them, duly indorse and deliver to the said Charles W. Lamb and to William R. Dresser of Waban, one hundred (100) of said shares, the said one hundred (100) shares to be held in trust by them, the said Lamb and Dresser and the survivor of them and his successor in said trust upon the following terms, but the parties of the second part may vote on said 100 shares of stock until it is transferred to the parties of the first part as hereinafter provided.

Whenever the total sales or transfers of the stock of the new corporation made by the parties of the second part, or any of them, excepting transfers of stock to each other, shall have amounted to seven hundred and fifty (750) shares, then the said trustees, the survivor or successor of them, shall offer in writing to the party of the first part to sell, transfer, and assign to the party of the first part the said one hundred (100) shares for the sum of ten thousand

(10,000) dollars, and if the party of the first part shall not accept said one hundred (100) shares and pay for the same the sum of ten thousand (10,000) dollars within ninety days from the date of such offer in writing, then the said one hundred (100) shares shall be divided equally among the parties of the second part or their assigns; and if the party of the first part shall purchase the said one hundred (100) shares, then the said trustees, the survivor of them or his successor, shall distribute the said sum of ten thousand (10,000) dollars thus received equally among the four parties of the second part, their successors and assigns. And if at the end of twenty (20) years from the date hereof the total sales of shares made by the parties of the second part as aforesaid shall not amount to seven hundred and fifty (750) shares, then the said trustees, the survivor of them or his successor, shall divide the said one hundred (100) shares equally among the parties of the second part, and their assigns. No shares shall be sold or transferred by the parties of the second part except to the party of the first part, or to each other, except after first offering said shares to the party of the first part as hereinafter more fully provided.

Six. The said parties of the second part furthermore agree as an essential part of the consideration furnished by them for the said eleven thousand, two hundred (11,200) shares of the preferred stock of the party of the first part, that they will and their representatives and assigns shall always vote all stock in said new corporation owned or controlled by them, or any of them, in favor of four (4) Directors who shall be representatives of the party of the first part, the said four Directors to consist of the President, the Treasurer, the Assistant Treasurer, and the Assistant Manager of the party of the first part unless the party of the first part shall notify the parties of the second part, their representatives or assigns, that the party of the first part desires to be represented by four persons named in such notice, in which event the said stock shall be voted in favor of the four persons thus named.

The parties of the second part further agree for themselves and their executors, administrators, and assigns, that the three thousand and four (3004) shares which are to be issued to them in accord-

ance with the terms hereof shall not nor shall any part thereof be sold at any time within twenty-one (21) years from the date hereof except as regards sales of the parties of the second part to each other, without first notifying the party of the first part of the price and terms offered for the stock and giving the party of the first part sufficient information to establish the bona fide character of the offer and then permitting the party of the first part to purchase the stock for its own benefit at the price and upon the terms offered. And they further agree that the certificates for the said three thousand and four (3004) shares shall have written on the face thereof the words: "Not to be sold unless first offered to the United Shoe Machinery Company, According to Agreement of February 1900".

Seven. The parties of the second part further agree for themselves, their administrators, executors and assigns that they will not except with the assent of the party of the first part, permit the said new corporation to mortgage its franchise or its property or any portion thereof, or make or give any notes or incur any indebtedness except such regular accounts for merchandise as the business may require.

Eight. The parties of the second part further covenant and agree for themselves, their executors, administrators and assigns, that the said new corporation shall sell the different products, supplies and materials made or dealt in by it to the United Shoe Machinery Company of Canada, the British United Shoe Machinery Company and such other subsidiary corporations, agents or branches as the party of the first part may establish or appoint to carry on the business of the party of the first part in foreign countries at prices which shall be as low as such products, supplies and materials can be procured from other makers thereof or dealers therein (proper allowance being made for all differences in quality), and also as low as the said new corporation sells such products, materials and supplies to any other person, firm or corporation.

Nine. Each of the parties hereto covenants and agrees to execute and deliver such instruments and to do all such things as may be

necessary or proper in order to carry out so far as he is concerned the spirit and terms of this agreement.

In Witness Whereof the said United Shoe Machinery Company has hereto affixed its corporate seal by its and the said several parties have hereto affixed their several names and seals on the day and year first above written.

FRANK N. STACKPOLE
GEORGE D. PIKE
JOHN R. STUART, Jr.
JOSEPH H. ORDWAY
SIDNEY W. WINSLOW
GEO. W. BROWN
EDWARD P. HURD
JAMES J. STORROW
UNITED SHOE MACHINERY COMPANY
By Geo. W. Brown, Treasurer.

Commonwealth of Massachusetts.

Suffolk, ss. Boston, March 15, 1900.

Then personally appeared the above named Frank N. Stackpole, George D. Pike, Joseph H. Ordway, John R. Stuart, Jr., Sidney W. Winslow, George W. Brown and James J. Storrow, and acknowledged the foregoing instrument to be their free act and deed, and the said George W. Brown acknowledged that he executed the foregoing instrument on behalf of the United Shoe Machinery Company and that it is the free act and deed of the United Shoe Machinery Company. Before me

Guy Cunningham, Notary Public.

Commonwealth of Massachusetts.

Suffolk, ss. Boston, March 16, 1900.

Then personally appeared the above named Edward P. Hurd and acknowledged the foregoing instrument to be his free act and deed. Before me,

William H. Walker, Notary Public.

SCHEDULE B.

BILL OF SALE.

Know all Men by these Presents:

That we, Frank N. Stackpole of Boston, Massachusetts, George D. Pike and Joseph H. Ordway, both of Brookline, Massachusetts and John R. Stuart, Junior, of Roxbury, Massachusetts, copartners doing business under the firm name and style of the Boston Blacking Company, and having a usual place of business at 96 Beverly Street in said Boston, in consideration of Five Thousand Nine Hundred and Eighty-eight (5,988) shares of the capital stock of the Boston Blacking Company, a corporation duly organized under the laws of the State of Maine, a new corporation formed to succeed to the business of the said partnership and hereinafter called the new corporation, to us paid by the said new corporation, the Boston Blacking Company, the receipt of which is hereby acknowledged, do hereby give, grant, bargain, sell and convey unto the said new corporation, the Boston Blacking Company, its successors and assigns, the following property, to wit: —

All the property and assets, real and personal, of the said partnership, including the interest of Edward F. Wilder therein which has been transferred by an instrument dated the seventeenth day of February, A. D. 1900, to the said Frank N. Stackpole, including the real estate, buildings, improvements, appurtenances, easements, plant, engines, boilers, motors, machinery, tools, drawings, models, patterns, blacking, cement, wax, stock on hand manufactured and unmanufactured, books of account, office furniture and fixtures, trade-marks, trade rights, prescriptions, recipes, labels, brands, trade names, inventions, formulas, trade secrets, rights, privileges and advantages, accounts and notes receivable, cash on hand or on deposit in banks or elsewhere, whether situated at our place of business, 96 Beverly Street in said Boston, or at Chelsea, Massachusetts, or elsewhere in the United States, or in England, Germany, France or elsewhere, including the good-will of the said partnership it being the intention of this instrument to convey to the said new corporation, the Boston Blacking Company, every

right, privilege and asset of every name and nature to which the partnership, the Boston Blacking Company, has any right, title and interest, legal or equitable, including the said share of the said Wilder therein; subject however to debts of the said partnership not in excess of Thirteen Thousand and Thirty-four Dollars and Seventy Cents ($13,034.70) which debts not in excess of Thirteen Thousand and Thirty-four Dollars and Seventy Cents ($13,034.70) the said new corporation hereby assumes and agrees to pay.

To Have and to Hold the premises, together with all the privileges and appurtenances, to the said new corporation, the Boston Blacking Company, and its successors and assigns, to their own use and behoof forever.

And for the consideration aforesaid we and each of us do hereby covenant and agree that we will execute, acknowledge and deliver all deeds necessary or desirable to convey to the said new corporation, the Boston Blacking Company, all our right and interest and the interest of the said partnership in, to and under all the assets hereby conveyed or intended so to be; and we and each of us do hereby appoint the said new corporation, the Boston Blacking Company, its successors and assigns, the true and lawful attorney of us and each of us, in the names of us or either of us or in its own name, to bring such action at law or in equity, and do such other acts as it may deem necessary or desirable to secure to it the full benefit and advantage of the rights hereby conveyed or intended so to be, and for such purposes to appoint a substitute or substitutes and at pleasure to revoke such appointment.

And inasmuch as we have built up the business of the partnership, the Boston Blacking Company, by our personal skill and attention, and inasmuch as the value of the business and good-will conveyed to the said new corporation, the Boston Blacking Company, is largely dependent on our skill, knowledge and attention, we and each of us do covenant and agree that for the period of six years from the date hereof we will continue to devote our entire knowledge of the business and our entire time and attention to the service of the new corporation, the Boston Blacking Company, and to the promotion of its business and welfare, serving the corpora-

tion in such capacity as may be necessary to efficiently carry on its business, receiving as our total compensation for such exclusive services (except for such dividends as shall be declared pro rata to all the stockholders of the said new corporation) salaries not in excess of six thousand dollars ($6,000) per annum for each of us.

And for the consideration aforesaid we and each of us do covenant and agree that for the period of fifteen years from the date hereof neither we nor any of us jointly or severally, directly or indirectly, or as owner, agent or employee, or as stockholder of any corporation (except as we may be shareholders or employees of the new corporation) will engage in or become interested in any way in the business of buying or making or selling or dealing in blacking, or stains, or cement, or inks, or wax, or any other supplies intended primarily for use in manufacturing or finishing leather, or boots, or shoes, or other articles made in chief part of leather, in that portion of the United States east of the Mississippi or Missouri Rivers, or in Missouri, Louisiana, Nebraska, Kansas or California, or any portion of Canada to the eastward of the Albany River, Lake Nipigon and Lake Superior, or any portion of Europe except Spain, Portugal, Turkey, Greece, Servia and Bulgaria, and will not directly or indirectly sell any such materials or supplies to persons carrying on business in the above-defined territory, or manufacture or sell any such materials or supplies to be dealt in or used by others within such territory.

In Witness Whereof we the said Frank N. Stackpole, George D. Pike, Joseph H. Ordway and John R. Stuart, Junior, have hereunto set our hands and seals this day of A. D. 1900.

Commonwealth of Massachusetts,

Suffolk, ss. Boston, 190 .

Then personally appeared the above named
and acknowledged the foregoing instrument to be their free act and deed, before me,

Know all men by these presents: That we, Frank N. Stackpole, of Boston, Massachusetts, George D. Pike and Joseph H. Ordway, both of Brookline, Massachusetts, and John R. Stuart, Junior, of Roxbury, Massachusetts, copartners doing business under the firm name and style of the Boston Blacking Company and having a usual place of business in said Boston, in consideration of one dollar and other valuable considerations to us paid by the Boston Blacking Company, a new corporation duly organized according to the laws of the State of Maine, to succeed to the business of the said partnership, the Boston Blacking Company, the receipt whereof is hereby acknowledged, do hereby remise, release, and forever quitclaim unto the said new Corporation, the Boston Blacking Company, its successors and assigns, the following described parcels of land with the buildings thereon, all situated in Chelsea, in Suffolk County, in said Commonwealth. The first of said parcels comprises the whole of lot of land numbered fifty-nine (59) situated on the corner of Third and Cypress Streets, as seen on a plan of Winnisimmet Lands and containing 6,900 square feet more or less and bounded northeasterly by Third Street 60 feet; northwesterly by Cypress Street 115 feet; southwesterly by Lot No. 60 on said plan 115 feet; southeasterly by Lot No. 57 on said plan 60 feet. Said plan may be found at end of Vol. 616 in Registry of Deeds for Suffolk County.

The second of said parcels comprises the whole of Lot No. 60 on Summer Street as seen on Shearer's Plan of Winnisimmet Company's land, containing 6,900 square feet more or less, bounded northwesterly by Cypress Street 115 feet; northeasterly by Lot No. 59 Third Street 60 feet; southeasterly by Lot No. 58 Summer Street 115 feet; southwesterly by Summer Street 60 feet, be measurements more or less; being the same premises conveyed to George D. Pike and others by deed of Matilda C. Morse and others, dated May 22, 1894, and recorded with Suffolk Deeds book 2201, page 526, and the premises conveyed to George D. Pike and others by deed of Mary S. Page, dated July 24, 1891, and recorded with Suffold Deeds book 2011, page 557. This instrument includes also the interest conveyed to Edward F. Wilder in said deeds, the

interest of said Edward F. Wilder under said deeds having been conveyed to said Frank N. Stackpole by deed dated February 21, 1900, and intended to be recorded herewith, the interest of the said Edward F. Wilder in the said premises being included in this conveyance.

To have and to hold the granted premises, with all the privileges and appurtenances thereto belonging, to the said new corporation, the Boston Blacking Company, and its successors and assigns to its and their own use and behoof forever.

And we do hereby, for ourselves and our heirs, executors and administrators, covenant with the said grantee and its successors and assigns that the granted premises are free from all incumbrances made or suffered by us; and that we will and our heirs, executors, and administrators shall warrant and defend the same to the said grantee and its successors and assigns forever against the lawful claims and demands of all persons claiming by, through, or under us, but against none other.

And for the consideration aforesaid, we, Minna J. Stackpole, wife of Frank N. Stackpole, and Mabel F. Pike, wife of George D. Pike, and Grace Ordway, wife of Joseph H. Ordway, and Helen D. Stuart, wife of John R. Stuart, Junior, do hereby release unto the said grantee and its successors and assigns all right of or to both dower and homestead in the granted premises.

In Witness Whereof, we the said Frank N. Stackpole and Minna J. Stackpole, George D. Pike and Mabel F. Pike, Joseph H. Ordway and Grace Ordway, and John R. Stuart, Jr., and Helen D. Stuart, hereunto set our hands and seals this day of in the year one thousand nine hundred.

Signed, sealed, and delivered in the presence of:

Commonwealth of Massachusetts.

Suffolk, ss. Boston, 1900.

Then personally appeared the above named and acknowledged the foregoing instrument to be their free act and deed before me,

Justice of the Peace.

This indenture, made this day of A. D. 1900, between George D. Pike, Joseph H. Ordway, John R. Stuart, Junior, and Frank N. Stackpole, copartners doing business under the firm name and style of Boston Blacking Company, and having a usual place of business in Boston, Massachusetts, and the Boston Blacking Company, a new corporation formed to succeed to the business of the said partnership; witnesseth:

That the said parties, in consideration of the mutual covenants herein contained, covenant and agree as follows:

The said George D. Pike, Joseph H. Ordway, John R. Stuart, Jr., and Frank N. Stackpole do assign, transfer and set over unto the said new corporation, the Boston Blacking Company, its successors and assigns, a lease dated the twenty-first day of November, 1894, between Frank W. Boles, Trustee, and the said partnership, the Boston Blacking Company, relating to the building numbered 94, 96, 98 and 100 Beverly Street, Boston, together with the advantage of all the covenants contained in said lease.

To have and to hold the said indenture of lease to the said new corporation the Boston Blacking Company and its successors and assigns forever.

And for the consideration aforesaid, the said corporation, the Boston Blacking Company, does covenant and agree that it will perform all the covenants to be performed by the partnership, the Boston Blacking Company, under the terms of the said indenture of lease.

In witness whereof the said George D. Pike, Joseph H. Ordway, John R. Stuart, Jr., and Frank N. Stackpole have hereunto set their hands and seals and the corporation, the Boston Blacking Company, has caused this instrument to be signed and its corporate seal to be hereto affixed on the day and year first above written.

PLAINTIFF'S EXHIBIT 77.

[Put in Evidence, page 470.]

Indenture made this sixteenth day of March, A. D., 1900, by and between Erastus E. Winkley and Benjamin Phillips, both of Lynn, in the Commonwealth of Massachusetts, parties hereto of the first part and the United Shoe Machinery Company, a corporation established under the laws of the State of New Jersey, of Paterson, in said State (hereinafter referred to as the "United Company"), party hereto of the second part.

Whereas the said Winkley and Phillips did, on the seventeenth day of January, 1896 enter into a certain written agreement dated that day with the Goodyear Shoe Machinery Company, a corporation established under the laws of the State of Maine (hereinafter referred to as the "Goodyear Company");

And whereas, in pursuance of said agreement with said Goodyear Company, the said Winkley and Phillips have sold, assigned and transferred to said Goodyear Company the entire interest in and to the following described Letters Patent of the United States of America, namely:

No. 549,471, dated November 5, 1895, granted to said Winkley for Improvements in Forms for Sole Laying Machines;

No. 553,948, dated February 4, 1896, granted to said Winkley and Phillips for Improvements in Sole Laying Machines;

No. 553,949, dated February 4, 1896, granted to said Winkley and Phillips for Improvements in Sole Laying Machines;

No. 557,744, dated April 7, 1896, granted to said Goodyear Company for Improvements in Sole Laying Machines.

No. 573,069, dated December 15, 1896, granted to said Goodyear Company for Improvements in Pressing Forms for Sole Laying Machines.

No. 579,205, dated March 23, 1897, granted to said Goodyear Company for Improvements in Jacks for Sewing Machines;

No. 579,206, dated March 23, 1897, granted to said Goodyear Company for Improvements in Forms for Sole Laying Machines;

No. 627,034, dated June 13, 1899, granted to said Winkley and Phillips for Improvements in Sole Pressing Machines;

Also, application for Letters Patent of the United States Serial No. 721,317, filed June 21, 1899 by said Winkley for Improvements in Sole Pressing Machines (allowed November 21, 1899);

And whereas in pursuance of said agreement with said Goodyear Company the said Winkley and Phillips have, at the request and by the direction of said Goodyear Company conveyed to the British United Shoe Machinery Company, Limited, a corporation duly organized in Great Britain under the Companies Act 1862 to 1898 and having its registered office at Leicester, England, a majority of the capital stock of which is owned by said United Company, their beneficial interest in

British Letters Patent No. 2537, dated February 4, 1896, granted to James Grieve Lorrain for an Improvement in Sole Layers:

British Letters Patent No. 7417, dated April 7, 1896, granted to said Lorrain for an Improvement in Sole Layers;

And whereas said Winkley and Phillips under the terms of said agreement are to convey or cause to be conveyed to said Goodyear Company or to such person or corporations as it shall nominate to be the assignee or assignees thereof, the following Letters Patent, namely: —

Letters Patent of France, No. 287,920, dated April 17, 1899, granted to said United Company;

Application for Letters Patent of Great Britain, No. 6990, dated April 1, 1899, filed by A. G. Brookes as a communication from the said United Company;

Application for Letters Patent of Germany, filed April 19, 1899, No. U. 1442 1/72 Kassenbuch No. 2459, filed by the said United Company.

And whereas, in and by said agreement with said Goodyear Company, the said Winkley and Phillips reserve to themselves and their executors, administrators and assigns an exclusive license and the exclusive right, free of royalty or license fee, to use in the United States or elsewhere any and all of the inventions or im-

provements patented in the several Letters Patent referred to in said agreement or to be patented in pursuance of said agreement in machines other than Sole Laying Machines, which exclusive license the said United Company is desirous of acquiring.

Now this Indenture Witnesseth:

1. That in consideration of the covenants and agreements of the United Company hereinafter contained, the said Winkley and Phillips hereby jointly and severally covenant and agree to sell, assign and convey, or to cause to be assigned and conveyed to the said United Company and its successors or assigns, or to such persons or corporations as the United Company shall designate to be assignee or assignees thereof; the exclusive license and right, free of royalty or license fee reserved by and to said Winkley and Phillips in said agreement dated January 17, 1896 with said Goodyear Company to use in the United States or elsewhere in machines other than sole laying machines, the inventions or improvements patented in the several Letters Patent of the United States and of other countries referred to in said agreement or to be patented in pursuance of said agreement;

2. That in consideration of these presents, the said United Company hereby covenants and agrees with the said Winkley and Phillips to pay in due course after bill rendered, all the expenses of building the first machine for sole levelling embodying the inventions patented in said Letters Patent and applications hereby agreed to be conveyed; provided, however, that such expenses shall not exceed the sum of two thousand dollars ($2,000);

3. That in consideration of these presents, the said United Company hereby covenants and agrees to pay to each of said parties of the first part the sum of twenty dollars ($20.) as royalty for each sole levelling machine for boots and shoes embodying the improvements patented or to be patented as aforesaid or either or any of them which shall be made and sold, leased or otherwise disposed of by it in the United States or elsewhere from the date hereof until the expiration of the term of that Letters Patent of the United States which shall be the latest in date of the United States patents granted or which shall hereafter be granted to said Winkley and

Phillips or either of them at the request of said United Company and assigned to or by the direction of the said United Company in pursuance of this indenture.

4. The said United Company further agrees to make full and true reports to the said Winkley and Phillips in the months of January and July of each year while this ageeement remains in force, showing all sole levelling machine made and sold, leased or otherwise disposed of by it in the United States or elsewhere which embody the improvements or either or any of them patented in said Letters Patent and applications hereby agreed to be conveyed, or which shall be patented and conveyed to said United Company in pursuance of this indenture and agrees to keep in its books an account which shall show the number of such machines made by it and the names and addresses of those to whom it shall have sold, leased or otherwise disposed of such machines and agrees to allow said Winkley and Phillips or their attorneys to inspect the same at all reasonable times;

5. The said United Company further agrees to pay to said Winkley and Phillips in the months of January and July in each year during the continuance of this agreement, the royalties above mentioned for each such machine made and sold, leased or otherwise disposed of by it as stated in the account to be rendered under the provisions of section 4 hereof, it being understood and agreed, however, that it is to pay no royalty for parts of such machines which it shall furnish, sell or lease to keep in repair the machines which it shall have sold, leased or otherwise disposed of;

6. And said Winkley and Phillips further covenant and agree that if said United Company shall at any time within eighteen months from the first day of July, A. D. 1899 pay to them the sum of eight thousand dollars ($8,000.) less an amount equal to the royalties which shall have been paid to them up to that time under this indenture, they will jointly and severally release and discharge in writing and under their respective seals the said United Company from all and every obligation, covenant and agreement herein made incumbent upon the said United Company.

7. The said Winkley and Phillips further covenant and agree

from time to time hereafter to promptly communicate to the officers or counsel of the said United Company all inventions or improvements in sole levelling or sole pressing machines which they or either of them shall hereafter made (except such inventions and improvements in sole levelling machines as they are bound to communicate and convey to said Goodyear Company in pursuance of a written agreement dated October 19th, 1895, and such inventions and improvements in sole laying machines as they are bound to communicate and convey to said Goodyear Company in pursuance of said agreement dated January 17th, 1896) and to explain the same in such manner that the said United Company may have applications prepared for the grant of Letters Patent therefor both of the United States of America and of other countries, and from time to time hereafter and whenever requested by said United Company so to do, and without further consideration paid to them, to execute such applications, specifications, assignments and other written instruments and to do such acts as shall be reasonable and proper or necessary to secure the grant of Letters Patent for such inventions or improvements (except such as are to be conveyed to the said Goodyear Company as aforesaid) and to vest the entire interest in such inventions or improvements and patents therefor in said United Company or in such persons, or corporation as it shall designate to be assignees thereof the entire expense attendant upon all such applications, patents, assignments or other instruments or proceedings to be borne by the said United Company;

8. The covenants, agreements and provisions in this instrument which are incumbent upon or for the benefit of said Winkley and Phillips shall be incumbent upon and for the benefit of their executors, adminstrators and assigns; and those which are incumbent upon or for the benefit of said United Company shall be incumbent upon and for the benefit of its successors and assigns.

In Witness Whereof, the said Winkley and Phillips have hereunto set their hands and seals and the said United Shoe Machinery Company has caused its corporate seal to be hereto affixed and

these presents to be signed by its Treasurer, the day and year first above written.

Executed in duplicate.

ERASTUS E. WINKLEY [SEAL]
BENJAMIN PHILLIPS [SEAL]
[SEAL] UNITED SHOE MACHINERY CO.
By Geo. W. Brown, Treasurer

PLAINTIFF'S EXHIBIT 78.

[Put in Evidence, page 471.]

This Agreement made this nineteenth day of March, A. D. 1900, by and between the United Shoe Machinery Company of Paterson, a corporation under the laws of New Jersey, hereinafter called the United Company, and the Stanley Manufacturing Company, a corporation under the laws of Maine, hereinafter called the Stanley Company: Witnesseth:

That the said United Company shall purchase from the said Stanley Company the stock of machines, parts and supplies which it now has on hand at Frankfurt, Germany, and in transit to Frankfurt, and all accounts and bills owing to the said Stanley Manufacturing Company in Germany, whether overdue or not, which the United Company shall approve as collectable.

The Stanley Manufacturing Company guarantees all of the accounts thus taken over to represent machines, parts and supplies actually sold to responsible persons, firms or corporations, debtors, and the said Stanley Manufacturing Company hereby agrees to reimburse to the said United Shoe Machinery Company so much of the amount from said accounts as may be uncollectable by reason of the insolvency of any of the said debtors occurring during a period of six months from May 1st, 1900.

That the said United Company shall pay for the property and accounts thus taken over by the issue to the said Stanley Company of its preferred stock at par, taking the machines, parts and supplies at a price which shall be the cost to the said Stanley Company of such machines, parts and supplies laid down in Frankfurt, less a proper deduction for anything obsolete, imperfect, unsaleable, or

second-hand, and taking the accounts and bills at their face value, less such discounts as have been usually allowed by the said Stanley Company. If parties disagree as to the value of any of the machines, parts or supplies, such machines, parts or supplies shall be withdrawn from the operation of this contract and shipped by the Stanley Company to the United States.

The said United Company further agrees, if requested by the said Stanley Company, to undertake the collection of any existing accounts of the said Stanley Company which are not assigned as aforesaid, and to use its best care and diligence in collecting the same, and to charge the said Stanley Company only with the actual expense of making such collection.

That the said Stanley Company will at once give up its branch office in Germany, so far as relates to the sale or disposal of shoe machinery or shoe manufacturers supplies, and that the Stanley Company will not in the future establish an office, or maintain an agent or representative of any kind to solicit orders for the sale of such machinery and supplies outside of the United States of America, and will not export, or sell or dispose of to others for export, any boot or shoe machinery or supplies therefor outside of the United States except through the United Company, and except further as hereinafter provided.

That the said United Company shall use its best endeavors to sell in foreign countries, machines made by the said Stanley Company, but in common with such other machines for a like purpose, as it may desire to sell.

That the said United Company shall not copy, or purchase, or deal in any way in imitations of the styles of machines used by the Stanley Company so long as such machines made by the Stanley Company continue to be sold in foreign countries through the United Company.

That should the said United Company at any time after one year from the first day of May, 1900, desire to discontinue the purchase and sale of any of the machines, parts or supplies made by the said Stanley Company, then and in that case it shall be privileged to do so, and the said Stanley Company may then and thereafter sell such

machines, parts or supplies thus discontinued to any and all persons without respect to the country to which they are to be sent.

That the said Stanley Company may advertise and create and maintain in all proper business ways a demand for its machines in any and all countries in the world.

That this agreement shall go into effect May first, 1900.

In Witness Whereof the said United Shoe Machinery Company and the said Stanley Manufacturiug Company have caused these presents to be duly executed on the day and year first above written.

STANLEY MANUFACTURING CO.
F. F. Stanley, Treasurer.

[SEAL] UNITED SHOE MACHINERY COMPANY
by Sidney W. Winslow, President.

Whereas the Stanley Manufacturing Company of Massachusetts, an unincorporated association, of which Frank F. Stanley is principal trustee, is engaged in the manufacture of machines, parts and supplies for the Stanley Manufacturing Company of Portland, Maine, party to the above agreement, the said Association, in consideration of one dollar and other valuable considerations to be paid by the United Shoe Machinery Company, the receipt whereof is hereby acknowledged, and in consideration of the execution of the foregoing contract by the said United Shoe Machinery Company, hereby agrees during the continuance of the foregoing contract not to export or knowingly sell for export to countries outside the United States any boot and shoe machines, parts or supplies therefor except at the times and to the countries when and where like sales are permitted to said Maine corporation under the terms of the above agreement.

Witness my hand and seal this nineteenth day of March, A. D. 1900.

PLAINTIFF'S EXHIBIT 79.

[Put in Evidence, page 501.]

Agreement made this first day of November, 1897 between The Lincoln Sewing Machine Company, a corporation organized and existing under the laws of the State of New Hampshire, hereinafter called the "Lincoln Company", as party hereto of the first part, and the Goodyear Shoe Machinery Company, a corporation organized and existing under the laws of the State of Maine, hereinafter called the "Goodyear Company", as party hereto of the second part.

The Lincoln Company agrees to sell and the Goodyear Company agrees to purchase all the property of the Lincoln Company (except its shares of capital stock), including all its machinery, tools, jigs, patterns, drawings, machines under lease or in stock or in process of construction, materials raw, wrought or in process, bills and accounts receivable and choses in action, Letters Patent of the United States and foreign countries, pending applications for Letters Patent and interests in inventions or claims against infringers of any and all Letters Patent owned by the Lincoln Company or in which it has an interest, leases of machines and licenses under Letters Patent, together with the good will of the business of the Lincoln Company and all its assets of every name and nature, except its shares of capital stock above mentioned.

The Lincoln Company covenants and agrees with the Goodyear Company that it has good right to sell and convey the property above referred to, and agrees to convey the same forthwith to the Goodyear Company by good and sufficient deeds conveying a good and clear title to the same, free from all encumbrances.

The Goodyear Company covenants and agrees with the Lincoln Company to pay it for the property to be conveyed to it as aforesaid, in the manner following:

The Goodyear Company agrees to pay to the Lincoln Company each year a sum equal to three per cent (3%) per annum on sixty thousand dollars, the present capital of the Lincoln Company, if the total dividends of the Goodyear Company in that year (from

Nov. 1st of one year to Oct. 31st of the next year, both inclusive) shall equal three per cent (3%) or more but less than six per cent (6%) on three million dollars, the present capital of the Goodyear Company; but if the total dividends of the Goodyear Company in any year (from Nov. 1st of one year to Oct. 31st of the next year, both days inclusive) shall equal six per cent (6%) or more but less than nine per cent (9%) on three million dollars, then the payment for that year shall be four per cent (4%) on sixty thousand dollars; and if the total dividends of the Goodyear Company in any year (reckoned as above) shall equal nine per cent (9%) or more but less than eighteen per cent (18%) on three million dollars, then the payment for that year shall be five per cent (5%) on sixty thousand dollars; and if the total dividends of the Goodyear Company in any year (reckoned as above) shall equal eighteen per cent (18%) or more but less than twenty-five per cent (25%) on three million dollars, then the payment for that year shall be six per cent (6%) on sixty thousand dollars; and if the total dividends of the Goodyear Company in any year (reckoned as above) shall equal twenty-five per cent (25%) or more on three million dollars, then the payment for that year shall be seven per cent (7%) on sixty thousand dollars.

The first payment by the Goodyear Company on account of the annual payments above agreed upon shall be made on the day the first dividend of the Goodyear Company after the date hereof is payable, and the amount of that payment on account shall be determined by computing the percentage per annum of that dividend on three million dollars, reckoning as the time to be taken in that computation, the time between that day and the day on which the next preceding dividend of the Goodyear Company was payable; and the percentage per annum thus computed shall determine what percentage shall be used, and the time thus taken shall be the time used in determining the amount of payment to the Lincoln Company due that day. The next payment on account shall be made on the day the second dividend of the Goodyear Company after the date hereof is payable, and the amount of that payment on account shall be determined as above; and so on as to every dividend of

the Goodyear Company after the date hereof. But, as under this agreement as to partial payments on account, it may happen that the total payments to the Lincoln Company during any year, reckoning from November 1st, to October 31st, both inclusive, may be more or less than the annual payment due that year, the accounts shall be adjusted at the end of each October by computing the percentage on three million dollars of the total dividends paid during that year; and any balance due to the Lincoln Company shall be paid on the fifteenth day of November of each year; but any balance due from the Lincoln Company shall be applied in reduction of the next payment on account; and no interest shall be reckoned as to any balance found under such annual adjustment.

The foregoing agreements of the Goodyear Company in respect to a payment to the Lincoln Company, whenever a dividend is paid by the Goodyear Company to its stockholders shall remain in force for forty-nine years from November 1, 1897, but, if at any time within that period, the Goodyear Company shall be duly dissolved and a final distribution of its assets and property shall be made, then, in such case, the Lincoln Company agrees that, after deducting from the assets and property of the Goodyear Company the amount of any additions to the capital of the Goodyear Company made subsequent to November 1st, 1897, which have been paid in cash, or in property at a fair valuation, it will receive in lieu of further payments to it under this agreement one-sixtieth of the remaining assets and property of the Goodyear Company.

The Lincoln Company agrees that all its income and collections after October 19th, 1897, until the delivery of its assets and property to the Goodyear Company in pursuance of this agreement, shall be applied to the payment of its unsecured indebtedness or shall be turned over to the Goodyear Company at the time of the delivery of said property.

The Lincoln Company covenants and agrees that it shall and will not at any time or times within forty-nine years from November 1, 1897, directly or indirectly engage in the manufacture or sale of shoe machinery or wax thread sewing machines, within any of the several States and Territories of the United States of America or

within the district of Columbia, excepting the States of Florida, Montana and Nevada, and further covenants and agrees not to engage in any business, or do any act, which shall injure or impair the good will of the business to be conveyed to the Goodyear Company as aforesaid.

The Lincoln Company agrees, from time to time hereafter, to execute all such deeds, assignments and other written instruments and to do all acts necessary or proper to vest the legal title to the property, Letters Patent and interests above referred to in the Goodyear Company, its successors and assigns.

The provisions of this agreement incumbent on, or for the benefit of either of the parties hereto shall be incumbent on and for the benefit of their respective successors and assigns.

In Witness Whereof, the Lincoln Sewing Machine Company has caused these presents to be signed in its name and its corporate seal to be hereto affixed by Daniel McNiven, its President and the Goodyear Shoe Machinery Company has caused these presents to be signed in its name and its corporate seal to be hereto affixed by John H. Hanan, its President, the day and year first above written.

[SEAL] LINCOLN SEWING MACHINE COMPANY
By Daniel McNiven, President.

[SEAL] GOODYEAR SHOE MACHINERY COMPANY
By John H. Hanan, President.

Pawtucket, R. I., November 9th, 1897.

At a meeting of the board of directors of the Campbell Machine Company, held October 30th, 1897, it was voted "that the president be and he is hereby authorized and instructed to cancel the contract of the Campbell Machine Company with the Lincoln Sewing Machine Company, dated April 9th, 1895, as soon as the stockholders of the Campbell Machine Company shall have approved the contract which has been negotiated with the Goodyear Shoe Machinery Company."

A true copy from the records
Attest DANIEL MCNIVEN, Secretary.

Pawtucket, R. I., November 9th, 1897.

Referring to the above recited vote, and the stockholders of the Campbell Machine Company having this day approved the contract with the Goodyear Shoe Machinery Company above referred to, I hereby, in pursuance of instructions as above, declare the contract of the Campbell Machine Company with the Lincoln Sewing Machine Company, dated April 9th, 1895, to be cancelled.

President of Campbell Machine Company,
GEORGE B. CHAMPLIN.

COPY OF VOTE OF DIRECTORS OF LINCOLN SEWING MACHINE COMPANY, OCTOBER 27th, 1897.

Pawtucket, R. I., October 27th, 1897.

A special meeting of the directors of the Lincoln Sewing Machine Company was held at the office of Julian A. Chase on above date. Three members were present, Messrs. Chase, McNiven and Warren, being a quorum.

It was voted unanimously that the contract with the Campbell Machine Company, dated April 9th, 1895, be cancelled, and it was also voted that the following contract with the Goodyear Shoe Machinery Company be approved, provided the Campbell Machine Company agrees to the cancellation of said contract of April 9th, 1895, and that it be submitted to the stockholders of the Lincoln Sewing Machine Company.

Meeting then adjourned. GEO. E. WARREN,
Clerk of Board Directors.

Exeter, N. H., Oct. 29, 1897.

A special meeting of the stockholders of the Lincoln Sewing Machine Co., was held at the office of John A. Brown, Exeter, N. H., in accordance with a call to that effect. The meeting was called to order, and on motion of Geo. E. Warren, it was adjourned until 4 o'clock in the afternoon.

At that time the meeting again came to order, with the following stock represented: Geo. E. Warren, 367 shares; Geo. E. Warren,

as trustee, 675 shares; Daniel McNiven, by his proxy Arthur O. Fuller, 406 shares; Julian A. Chase, by his proxy, John A. Brown, 392 shares.

The call for the meeting was read by the clerk. The proposed contract between the Lincoln Sewing Machine Co. and the Goodyear Shoe Machinery Co., was read.

Voted, that the proposed contract between the Goodyear Company and this Company, which has been submitted to the board of directors and approved by them be and is hereby approved to take effect Nov. 1, 1897, and that Daniel McNiven, president of the Lincoln Sewing Machine Co. be and is hereby authorized to execute, seal and deliver said contract in behalf of said Company.

Adjourned.

A true copy Attest. JOHN A. BROWN, Clerk.

Pawtucket, R. I., Oct. 21, 1897.

John A. Brown, Clerk Lincoln Sewing Machine Co.: —

We the undersigned stockholders of the above company desire a special meeting to see if the stockholders will approve of certain contracts submitted to the directors.

PLAINTIFF'S EXHIBIT 80.

[Put in Evidence, page 501.]

This Agreement made at Boston this sixth day of April, 1900, between the United Shoe Machinery Company, a corporation organized under the laws of the State of New Jersey, hereinafter called the United Company; and the Lincoln Sewing Machine Company, a corporation organized under the laws of the State of New Hampshire, hereinafter called the Lincoln Company; Witnesseth:

That Whereas the Goodyear Shoe Machinery Company, a corporation organized under the laws of the State of Maine, herein-

after called the Goodyear Company, has heretofore entered into an agreement with the Lincoln Company dated the first day of November, 1897, and whereas there remain certain payments and obligations on the part of the Goodyear Company to be made or performed to or toward the Lincoln Company in accordance with the terms of said agreement of the first day of November, 1897:

Now Therefore, the parties hereto in consideration of one dollar and other good and valuable considerations each to the other paid, the receipt of which the parties hereto severally acknowledge, do hereby Covenant and Agree each with the other as follows, viz.: —

First. The Lincoln Company hereby sells, transfers, and assigns to the United Company all rights and interests of every kind and nature to which it is or may be entitled from the Goodyear Company under the said agreement of November first 1897, and especially assigns to the United Company all right which the Lincoln Company has or may have to any payments of any sort or kind under the terms of the said agreement, and the Lincoln Company hereby authorizes the United Company to bring suit in the name of the Lincoln Company and to perform any other acts which may be necessary or proper to assert its rights as assignee of the Lincoln Company under said agreement of November first, 1897, but at the expense of the United Company, and the United Company shall indemnify and hold the Lincoln Company harmless from all expenses and losses in consequence thereof.

Second. The United Company agrees to issue to the Lincoln Company or to such persons as the Lincoln Company may in writing direct, twelve hundred and twenty-five (1225) shares of the fully-paid, non-assessable common stock of the United Company; and the United Company further agrees to pay immediately after the execution and delivery of this agreement the sum of twenty-four hundred and fifty (2,450) dollars in cash to the Lincoln Company.

In Testimony Whereof the parties hereto have interchangeably caused their respective corporate seals to be hereto affixed and these

presents to be signed by their respective officers for this purpose duly authorized, the day and year first above written.

[SEAL] LINCOLN SEWING MACHINE CO.
Geo. E. Warren, Treas.

[SEAL] UNITED SHOE MACHINERY COMPANY
By S. W. Winslow, President.

The Lincoln Sewing Machine Company hereby directs the United Shoe Machinery Company to issue the twelve hundred and twenty-five shares of its common capital stock referred to in the foregoing agreement to the following shareholders of the Lincoln Company giving to each the number of shares set opposite his name.

PLAINTIFF'S EXHIBIT 81.

[Put in Evidence, page 503.]

This Agreement made at Boston, Massachusetts, this 30th day of June, A. D. 1900 by and between Theophilus King of Quincy, Massachusetts, and Henry Tolman and Eleazer Kempshall, both of Newton in said state, parties of the first part, and the United Shoe Machinery Company, a corporation duly organized in accordance with the laws of the state of New Jersey, and having a usual place of business in said Boston, hereinafter called the United Company, party of the second part; Witnesseth: That

Whereas, the parties of the first part have represented to the United Company that the said King is owner of 145,635 shares of

the capital stock of the Boston Fast Color Eyelet Company, a corporation duly organized in accordance with the laws of the state of Maine, and having a usual place of business at said Boston, hereinafter called the Boston Company, said shares being held in trust for the said King, Tolman and Kempshall; and that the said Tolman is the owner of 9,163 shares of the capital stock of the said Boston Company, as trustee for the said King, Kempshall and Tolman; and that the said King owns 50 shares, the said Tolman 1 share, the said Kempshall 1 share, and Delcevare King 2 shares free from any trust; and that the entire capital stock of the said Boston Company consists of 200,000 shares of the par value of $1,000,000, so that the parties of the first part are together the owners of 154,852 shares, being more than three-fourths of the total capital stock of the said Boston Company, and the said King, Tolman and Kempshall are Directors in the said Boston Company, the said Kempshall being President of said Boston Company and the said Tolman Treasurer of said Boston Company, and the said King being Vice-President of said Company: and

Whereas the parties of the first part have represented that the Boston Company has, for the calendar year 1899, manufactured and sold over fifty million eyelets covered with celluloid, called plastic covered eyelets, and that the net profit from the manufacture and sale of such eyelets by it in the United States for said year has amounted to a sum in excess of $13,000; and

Whereas the said parties of the first part represent that the said King is the owner of six shares of the capital stock of the National Fast Color Eyelet Company, a corporation duly organized under the laws of the State of Maine and having an office in said Boston, hereinafter called the National Company, which is engaged in the purchase and sale of eyelets under the provisions of an agreement dated May 29, 1897, between the said National Company, the said Boston Company, the Scoville Manufacturing Company, a corporation duly organized under the laws of the State of Connecticut and having a usual place of business in Waterbury, Connecticut, Marenus J. Goodenough and Arthur Mathison, co-partners doing business under the name and style of the Fast Color Eyelet Company,

631

having a usual place of business at Springfield, in said State of Massachusetts, hereinafter called the Fast Color Company, and John M. McFetheries, William E. Wright, and Charles E. Van Norman, co-partners doing business under the name and style of the Springfield Covered Eyelet Company, having a usual place of business in said Springfield, hereinafter called the Springfield Company; and A. D. Cutler, as trustee for himself and M. O. Parenteau and William H. Force, formerly co-partners doing business under the name and style of the Bay State Manufacturing Company, having their usual place of business in said Springfield, hereinafter called the Bay State Company, acting also through and by said Theophilus King, under the terms of which the National Company is the sole selling agent of the parties and purchases the covered eyelets needed to fill its orders from the parties in proportions set forth in said contract of May 29, 1897, by which the Boston Company is entitled to supply the said National Company with thirty per cent. of all covered eyelets sold in the United States of America by said National Company at the price of forty cents per thousand, and fifty per cent. of all covered eyelets sold by the said National Company in foreign countries at said price of forty cents per thousand, as more fully set forth in said contract of May 29, 1897, the profit upon all eyelets sold by the said National Company being divided between the parties to the said agreement, as more fully set forth in said contract of May 29, 1897; and

Whereas the parties of the first part represent that the said King has purchased from the said Springfield Company its entire right to supply the National Company with covered eyelets, being twenty per cent. of all the eyelets required by the National Company, as set forth more fully in said agreement of May 29, 1897; and

Whereas the parties of the first part represent that the Boston Company has purchased the entire rights of the Bay State Company under said agreement of May 29, 1897, to be held, however, only so long as the said Boston Company shall make certain payments to the Bay State Company not exceeding the sum actually received by the Boston Company monthly under said agreement of May 29, 1897, according to the monthly returns of the National

Company, on account of the net profits received by the National Company on the purchase at forty cents per thousand and sale of 50,000 eyelets per day for twenty-five days in each month at the average net selling price for the month, it being further understood that the Boston Company does not in any way guarantee that the National Company shall make a profit or undertake to control the prices at which the eyelets are to be sold by the National Company or the distribution of profits by the National Company; and that the Boston Company is entitled to retain all of said profit paid it by the National Company in excess of said profit on fifty thousand eyelets per day for twenty-five days in each month; and

Whereas, the said parties of the first part represent that the said King for himself and as agent for the Boston Company, and the said Mathison as agent for the Fast Color Company, own a plant for the manufacture of covered eyelets in England, and have entered into a contract giving an exclusive agency for the sale of covered eyelets in all countries except the United States and Canada to the Fast Colour Eyelet Company Limited of Brighton Chambers, Denman Street, London Bridge, S. E., and the entire profit from said foreign business is divided equally between the said Mathison and said King, the said King by an agreement with the Boston Company having acquired for himself a third interest in said half of the foreign business as consideration for advancing money and services in connection with said business, and holding the remaining two-thirds of the half of said business held by him as agent for the Boston Company; and

Whereas, the said parties of the first part desire to transfer their entire interest of every sort and kind in the manufacture of covered eyelets, including their stock in the said Boston Company, to a new corporation to be formed under the laws of the State of Maine, with a capital of one million five hundred thousand (1,500,000) dollars, divided into preferred and common stock, as more fully set forth hereafter; and,

Whereas, the United Company is willing to join in the formation of the said Company and give it the benefit of its good-will relating to the manufacture and sale of celluloid covered eyelets (though

not as to other kinds of eyelets), in reliance on said representations :

Now, Therefore, this agreement witnesseth that the said parties. in consideration of the respective covenants herein contained, do Covenant and Agree as follows :—

First: The said United Company shall cause to be formed a corporation under the laws of the State of Maine, with an authorized capital of one million five hundred thousand (1,500,000) dollars, divided into fifteen thousand shares of the par value of one hundred (100) dollars each, of which five thousand shares, having a total par value of five hundred thousand (500,000) dollars shall be preferred stock, and ten thousand shares having a total par value of one million (1,000,000) dollars shall be common stock. The preferred stock shall be entitled to a cumulative preferred dividend from the net profits of the company at the rate of six per cent. per year. After the payment in any year of the six per cent. dividend upon the preferred stock, and all dividends at said rate upon the preferred stock unpaid in previous years, a dividend of six per cent. for that year may be paid upon the common stock from any net profits then remaining, and after the payment of six per cent. in any one year on both the preferred and the common stock, any net profits still remaining may be divided among all the shares without preference until a total dividend for that year of ten per cent. on all the stock shall have been paid, after which any remaining net profits may be divided among the common stockholders.

The name of the Company shall be The United Fast Color Eyelet Company, and it is hereinafter referred to as the "New Company". Sidney W. Winslow shall be elected President of the New Company, but the position may be held temporarily by some other person.

The New Company shall be empowered to manufacture and sell eyelets, hooks, rivets, lacing studs, and similar articles, and to acquire and hold stock in any corporation or corporations doing a similar business, and deal in Letters Patent and inventions and rights therein and all machinery, processes and products used or useful in connection therewith, and the powers may be made broader

than the terms of this agreement in case the incorporators shall deem it wise; but the New Company shall not be bound to extend its business beyond the manufacture and sale of plastic covered eyelets.

Upon the organization of this New Company, the parties of the first part shall transfer to said New Company the following property:

1. One hundred and fifty-four thousand eight hundred and fifty-two shares of the capital stock of the said Boston Company, of which one share each shall be held in the name of the said Kempshall, King, and Tolman until they cease to be Directors of the Boston Company, when said shares shall be transferred to the New Company.

2. All the right of the said King, Kempshall, and Tolman or any of them, to any part in the profit of said Boston Company relating to foreign business, or of the National Company relating to foreign business, either by virtue of a vote of the said Boston Company, passed April 13, 1898, or by reason of any other contracts relating thereto, subject to the payment to said King of $5,000 for his rights therein.

3. All the rights of the said Springfield Company under the terms of said contract of May 29, 1897, or otherwise, relating to the manufacture of eyelets which the said King, Kempshall, and Tolman, or any of them, has heretofore acquired.

4. An agreement on the part of the said King to take such active part as may be assigned to him by the said New Company in carrying on the foreign and other business of the Boston Company and the New Company, for a period of fifteen years.

5. An agreement of the said Tolman and of the said Kempshall, whenever requested by the United Company, within the period of fifteen years from the date hereof, to assist the New Company and the Boston Company, receiving for such services reasonable compensation.

6. The entire right, title and interest which the said King, Kempshall, and Tolman and each of them may now have or may hereafter within fifteen years from the date hereof acquire as the result of

invention, purchase, or otherwise, in, to, and under all inventions, applications for Letters Patent, and Letters Patent of the United States and foreign countries relating to covered eyelets or relating to any machinery, plant, processes or products used or intended for use or useful in the manufacture thereof or the application thereof to or the insertion thereof into the material into which they are to be inserted. Also a joint and several agreement on the part of the said King, Kempshall, and Tolman that they will, upon request of the New Company or the United Company or either of them, assign and convey to the New Company all such inventions, applications for Letters Patent, and Letters Patent of the United States or foreign countries except such inventions and applications for Letters Patent and Letters Patent as have been heretofore conveyed by them or either of them to some other persons or corporations; and that they will execute proper applications for Letters Patent of the United States and foreign countries for any such inventions, and sign all papers necessary to desirable to enable the said New Company, or such person or corporation as it may choose, to make, in its own name, such applications if it desires, and that they will do all other acts necessary or desirable to cause full title to such Letters Patent and applications for Letters Patent and any Letters Patent which may be issued upon such applications, or for such inventions, to be vested in the New Company or such persons or corporations as it may desire, subject to the right of Sidney W. Winslow under three agreements of even date herewith to patents and inventions not adapted for use in the covered eyelet business, and to a license to use any patents or inventions which are adapted for use in the covered eyelet business in the business of making, selling, or applying enamel or japanned or plain eyelets or rivets or lacing studs of any kind to boots, shoes, or other materials.

Also a joint and several agreement on the part of the said King, Kempshall, and Tolman that they will not, jointly or severally, at any time prior to July first, 1915, enter the employ or become interested in the business of any person, corporation, partnership, or association, the business of which is hostile to the development and prosperity of the business relating to covered eyelets carried

on by the said New Company (either directly or through the Boston Company) except with the consent of the United Company.

7. The agreement of the said King to transfer to the New Company, or such person or corporation as it may request, as soon as he may legally do so, the shares held by him in the said National Company personally or for others.

8. The agreement by the said King, Kempshall, and Tolman to transfer on demand to the said New Company every right or interest whatsoever which they have relating to the production or sale of covered eyelets, and especially all right, title and interest in stock of any corporation (except such stock in the New Company as they are to retain in accordance with the terms hereof) or any business relating to covered eyelets or machinery used or to be used in the manufacture thereof or the application thereof to the material in which they are to be inserted, or in connection therewith.

Second: The said Tolman shall forthwith present his resignation as Treasurer of the Boston Company to the Directors of the Boston Company, and Charles H. Willson shall be elected Treasurer in his place. The said Kempshall shall forthwith place his resignation as President in the hands of the United Company, and the said King, Kempshall, and Tolman shall forthwith place their resignations as Directors in the hands of the United Company and will cause them to be accepted and such persons elected in their places as the United Company shall request.

Third: After the issue for cash of shares in the New Company necessary to qualify the officers there shall be issued jointly to the said King, Kempshall, and Tolman in payment for the property and rights transferred by them to the New Company above mentioned, one million dollars in par value of the common stock of the said New Company, and three hundred thousand dollars in par value of the preferred stock, as hereinafter provided,

Upon the issue of the said stock to the said King, Kempshall, and Tolman, they shall at once transfer the said stock as follows:—

(a) Fifty thousand dollars ($50,000) in par value of said pre-

ferred shares, being 500 shares of the par value of one hundred dollars ($100) each, shall be transferred to the said King.

(b) Fifty thousand dollars ($50,000) in par value of said preferred shares, being 500 shares of the par value of one hundred dollars ($100) each, shall be transferred to the said Kempshall.

(c) Fifty thousand dollars ($50,000) in par value of said preferred shares, being 500 shares of the par value of one hundred dollars ($100) each, shall be transferred to the said Tolman.

(d) Five thousand dollars ($5,000) in par value of said preferred shares, being 50 shares of the par value of one hundred dollars ($100) each, shall be transferred to the said King, Kempshall, and Tolman in such proportions as they shall agree.

(e) One million dollars ($1,000,000) in par value of said common shares of said Company, being 10,000 shares of the par value of one hundred dollars ($100) each, shall be transferred to the United Company as its absolute property and for its sole benefit.

(f) One hundred and forty-five thousand dollars ($145,000) in par value of said preferred shares of said Company, being 1450 shares of the par value of one hundred dollars ($100) each, shall be transferred to the United Company.

Fourth: The remainder of the authorized capital shall not be issued at once but shall be held unissued until the New Company shall find it desirable to use it to acquire further businesses or property or cash for carrying on its business.

Fifth: The United Company shall pay in cash to the said King the sum of Thirty-five thousand dollars ($35,000), for which sum the said King shall assign to the said United Company a debt of Twenty thousand dollars ($20,000) due from the said Boston Company to the said King; and five promissory notes of Four thousand dollars ($4,000) each, dated July 2nd, 1900, and given to the said King for said debt, which notes the said King shall endorse to the said United Company without recourse to him; and the said King, Kempshall, and Tolman shall also assign to the United Company all other debts due to them or either of them from said Boston Company except the sum of Five thousand dollars ($5,000) due from the said Boston Company to the said King by virtue of two

promissory notes for $2,500 each, dated July 2nd, 1900, and payable ; and the said King, Kempshall, and Tolman covenant and agree that, except for the debts due to them and hereby agreed to be transferred to the United Company, and the further debt of $5,000 due from the Boston Company to the said King upon said two notes of $2,500 each, and current debts amounting to $6,-138.88, and certain liabilities to Latham & Nourbourn and the Florence Manufacturing Company not now due but contingent under certain written contracts, the said Boston Company is free from all debts whatsoever.

They further jointly and severally covenant and agree that they will at once pay any just claims and demands which shall be found to exist against the said Boston Company outside of the claims hereby agreed to be transferred and outside of the said other indebtedness above expressly excepted.

Sixth: In case at any time within five years from the date hereof, the said King, Kempshall, and Tolman, or either of them, shall willfully or knowingly fail to perform any of their joint or several covenants herein contained, or any of those covenants to be made with the New Company pursuant to the terms hereof; then, the individual thus failing to carry out his said covenants, shall forfeit all right to dividends upon the preferred and common stock of the New Company which he is to receive in accordance with the terms of this instrument.

Seventh: The term "covered eyelets" wherever used in this agreement shall include the kind of covered eyelets referred to in said agreement of May 29, 1897, with the National Company, and all eyelets covered with celluloid or similar material, but shall not include enamelled eyelets or japanned eyelets or uncovered eyelets.

Eighth: The said King, Kempshall, and Tolman covenant and agree that they will do all acts and sign all instruments which may be necessary or desirable to fully carry out the intent of this instrument and vest in the New Company and the United Company the full benefit and advantage of the rights hereby agreed to be conveyed to the said New Company or the said United Company, or intended so to be, and they and each of them appoint the United

Company and its successors and assigns their true and lawful attorneys in the name of them or either of them, or in its own name, to do all acts necessary or desirable to secure to the New Company or to the United Company the full benefit and advantage of the rights hereby conveyed or intended so to be, and for said purpose authorize it to appoint a substitute or substitutes and at pleasure to revoke such appointment.

The reasonable expenses relating to the formation of the Company and the transfer to it of the property and rights herein provided for shall be borne by the New Company.

In Witness Whereof, the said Theophilus King, Henry Tolman, and Eleazer Kempshall have hereunto set their hands and seals, and the said United Shoe Machinery Company has caused this instrument to be signed and its corporate seal to be hereto affixed on the day and year first above written.

THEOPHILUS KING [SEAL]
ELEAZER KEMPSHALL [SEAL]
HENRY TOLMAN [SEAL]
[SEAL] UNITED SHOE MACHINERY CO.
by Sidney W. Winslow, President.

PLAINTIFF'S EXHIBIT 82.

[Put in Evidence, page 504.]

This agreement made at Boston, Massachusetts, this 30th day of June, 1900, by and between Theophilus King, of Quincy, Massachusetts, and Henry Tolman and Eleazer Kempshall, both of Boston, Massachusetts, and the United Shoe Machinery Company, a corporation duly organized in accordance with the laws of the State of New Jersey, and having a usual place of business in Boston, Massachusetts, hereinafter called the United Company, and Sidney W. Winslow, of Beverly, Massachusetts, hereinafter called the Trustee; Witnesseth: That

Whereas, certain inventions relating to the manufacture and sale of lacing studs, japanned eyelets and plain eyelets, or a license under the same, are to be transferred by the Boston Fast Color

Eyelet Company to the said Sidney W. Winslow, as trustee, to be held by him under the terms of this instrument, especially including the Letters Patent included in the list hereinafter given; and

Whereas, the parties desire to provide for the ownership and conduct of the business of manufacturing and selling lacing studs, or japanned or plain eyelets, or all of them, in case it is deemed wise to enter upon the said business, or to dispose of it if it is deemed desirable;

Now Therefore in consideraton of the covenants of the respective parties herein contained, the parties covenant and agree as follows: —

The said King, Kempshall and Tolman covenant and agree that they will cause to be transferred to Sydney W. Winslow of Beverly, Massachusetts, as trustee, for the purposes hereinafter stated, the following Letters Patent of the United States and foreign countries to wit: —

UNITED STATES OF AMERICA.

No. 552,841	Jan. 7, 1896.	No. 595,482	Dec. 14, 1897.
553,165	Jan. 14, 1896.	599,906	Mar. 1, 1898.
569,971	Oct. 20, 1896.	532,204	Jan. 8, 1898.
569,968	Oct. 20, 1896.	569,969	Oct. 20, 1896.
571,596	Nov. 17, 1896.	599,905	Mar. 1, 1898.
579,112	Mar. 16, 1897.	599,904	Mar. 1, 1898.
	548,316	Oct. 22, 1895	

DESIGN PATENTS.

No. 25,836	July 28, 1896.	No. 25,863	Aug. 4, 1896.
25,837	July 28, 1896.	25,864	Aug. 4, 1896.
	25,939	Aug. 18, 1896.	

DOMINION OF CANADA.

No. 51,825 of April 1, 1896. No. 54,735 of Jan. 23, 1897.
License under No. 54,732 of Jan. 22, 1897.

GREAT BRITAIN.

No. 2923 and No. 5924 of Mar. 17, 1896. No. 10,918 of Feb, 24, 1897.
17,163 of July 20, 1897.

BELGIUM.

No. 120,485 Mar. 17, 1896. License under No. 120,486 of
128,809 May 6, 1897. Mar. 17, 1896.
120,488 Mar. 17, 1896.

GERMANY.

No. 96,736 Oct. 7, 1897.

FRANCE.

No. 254,815 Mar. 17, 1896. No. 268,896 July 20, 1897.
266,648 May 5, 1897. 254,817 Mar. 17, 1896.
License under No. 254,816 Mar. 17, 1896

also all other inventions, applications for Letters Patent and Letters Patent of the United States or foreign countries owned or controlled by the Boston Fast Color Eyelet Company, or in which it has any interest relating exclusively to lacing studs, japanned eyelets or plain eyelets, and an exclusive license to use, so far as the manufacture or insertion of lacing studs, japanned eyelets and plain eyelets are concerned, for the full term of the patents, inventions or improvements which do not relate exclusively to the manufacture of lacing studs, japanned eyelets or plain eyelets, but may be useful in the manufacture thereef.

And the said King covenants and agrees that he will pay to the said Boston Company for its rights in said patents the sum of twenty-five hundred dollars ($2500), to be paid by the surrender to said Boston Company of an indebtedness of said Boston Company of twenty-five hundred dollars ($2500), which sum the United Company shall pay the said King on said surrender in return for the interest in said Letters Patent and inventions, and the other rights acquired by the United Company under this instrument.

The said King, Kempshall and Tolman jointly and severally covenant and agree that, in consideration of the covenants of the said Winslow herein contained, they will assign to the said Winslow all Letters Patent and applications for Letters Patent of the United States and foreign countries and all inventions which they or either of them own or control, or in which they or either of them have any interest, or which they or either of them shall make or

acquire or control or obtain any interest in within fifteen years from the date hereof which relate to lacing studs, japanned eyelets or plain eyelets, and all inventions, patents, and applications for Letters Patent of the United States and all foreign countries, relating to eyelets of any kind, or the manufacture or insertion thereof, except such inventions, applications for patents, and patents as are expressly reserved to the United Fast Color Eyelet Company under the provisions of an agreement of even date herewith between the United Shoe Machiney Company and the said King, Kempshall and Tolman, or to the said Winslow trustee, under the terms of an agreement of even date herewith between the said King, Kempshall and Tolman and the said United Shoe Machinery Company and the said Winslow trustee; and also will secure to the said Winslow, trustee, the exclusive right to use, so far as the manufacture or insertion of lacing studs, japanned eyelets, plain eyelets and eyelets of all kinds (except enamelled eyelets and covered eyelets) are concerned, for the full term of the patents, any inventions or improvements which are to be conveyed to the said United Fast Color Eyelet Company or the said Winslow, trustee, under the terms of one of said agreements of even date herewith, but which do not relate exclusively to the manufacture of lacing studs, japanned eyelets, or plain eyelets, but may be useful in the manufacture thereof.

And the said King, Kempshall and Tolman jointly and severally covenant and agree that they and each of them will do all acts and execute all applications for Letters Patent and all licenses and other instruments which may be necessary or desirable to procure, and to vest in the said Winslow, trustee, the entire right, title and interest in such Letters Patent as are to be conveyed to said Winslow, trustee, under the terms hereof and to secure to the said Winslow, trustee, such licenses under Letters Patent as are to be granted the said Winslow, trustee, in accordance with the terms hereof, it being the understanding of the parties hereto that the rights of the said Winslow, trustee, to said Letters Patent, inventions, and licenses are subject to the rights of the United Company under an agreement of even date herewith, entered into

between the said King, Kempshall and Tolman and the United Company, and the rights of a new corporation to be called the United Fast Color Eyelet Company, which is to be formed as provided for in said agreement.

The said Winslow, trustee, shall have the right to continue to build up and carry on the business of manufacturing and selling, or otherwise disposing of lacing studs, or japanned eyelets, or plain eyelets, and all profits which he shall make in the conduct of the business may be retained in the business as a working capital, or may be by him paid to the United Company as its own property, free and discharged of this trust.

The said Winslow, trustee, may at any time form a corporation and transfer the property held by him in trust hereunder to said corporation for such portion of its capital stock as he shall deem proper, or he may at any time sell the property held by him as trustee hereunder; and when such a sale or transfer of the property held by him hereunder shall be made by the said Winslow, trustee, he shall give to said King two per cent of the net proceeds received from such sale or transfer after the payment of all existing indebtedness and liabilities, and to the said Kempshall two per cent, and to the said Tolman two per cent of the said proceeds. But it is understood and agreed that the said Winslow, trustee, is not bound in any way whatever to make such sale or transfer, but that he can continue to manage the business as said trustee, and to turn over all profits which may be derived therefrom to the United Company so long as he shall desire to do so.

The said Winslow, trustee, shall have authority to borrow money to carry on the business herein provided for, and to pledge the property held by him as trustee hereunder to secure the payment thereof and the United Company may loan money to said Winslow, trustee, for carrying on and developing said business and may acquire from the said Winslow, trustee, security to secure the payment of the money thus loaned.

Nothing in this agreement shall prevent the United Company from undertaking for its own exclusive benefit the manufacture and sale or disposal of lacing studs, or japanned or plain or other eye-

lets, and the manufacture, lease, or disposal otherwise of machines for the insertion of lacing studs or eyelets.

In Witness Whereof, the said Theophilus King, Henry Tolman and Eleazer Kempshall have hereunto set their hands and seals and the said United Shoe Machinery Company has caused its corporate name and seal to be hereto affixed and the said Sidney W. Winslow, trustee, has hereunto set his hand and seal on the day and year first above written.

[SEAL] UNITED SHOE MACHINERY CO.
By Sidney W. Winslow President.

PLAINTIFF'S EXHIBIT 83.

[Put in Evidence, page 506.]

This Agreement, made this 30th day of June, 1900, by and between Theophilus King, of Quincy, Massachusetts, and Henry Tolman and Eleazer Kempshall, of Boston, Massachusetts, and the United Shoe Machinery Company, a corporation duly organized in accordance with the laws of the State of New Jersey, and having a usual place of business in Boston, Massachusetts, hereinafter called the United Company, and Sidney W. Winslow, of Beverly, Massachusetts, hereinafter called the Trustee, Witnesseth: That

Whereas, the said King and Eleazer Kempshall and Henry Tolman are the owners of sixty thousand (60,000) shares in the capital stock of the Enamel Eyelet Company, a corporation duly organized according to the laws of the State of Maine, hereinafter called the Enamel Company, the entire capital stock of said Enamel Company consisting of one hundred thousand (100,000) shares, of which eighty thousand (80,000) shares only are issued; and

Whereas, the said King, Kempshall and Tolman desire the devel-

opment of said business to be taken up by the said Sidney W. Winslow;

Now, Therefore, in consideration of the covenants of the respective parties herein contained, the parties covenant and agree as follows:—

The said King, Kempshall and Tolman covenant and agree that they will cause to be transferred to Sidney W. Winslow, of Beverly, Massachusetts, as trustee, for the purposes hereinafter stated, the entire sixty thousand shares in said Enamel Eyelet Company hereinbefore referred to; the Letters Patent of the Boston Fast Color Eyelet Company, No. 24,867, dated November 12, 1895, relating to enamel eyelets under which the said Enamel Company has a license; and also the entire right, title, and interest in and to all Letters Patent of the Boston Company relating exclusively to enamel eyelets or the manufacture thereof, together with such license for the full term thereof, under any patents and reissues thereof owned by the Boston Company, as shall be necessary to give the said Winslow and his assigns the exclusive right under said patents to manufacture and sell enamel eyelets embodying the inventions of said Letters Patent, and also the right to use for the full term of the patents in the manufacture of enamel eyelets any inventions belonging to the Boston Company which may be useful in the manufacture of such eyelets, together with an assignment to the said Winslow of all its right, title, and interest to any share in the assets or earnings, present or future, of the Enamel Eyelet Company. The said King shall pay to the said Boston Company, for its rights in said patents and said assignment of the share in the assets or earnings of the Enamel Company the sum of $2,500, to be paid by the surrender to said Boston Company of a promissory note of said Boston Company of $2,500, dated pay-able which sum the United Company shall pay the said King on said release in return for the interest in said Enamel Company and patents and other rights acquired by the United Company under this instrument.

The said King, Kempshall and Tolman further jointly and severally covenant and agree that, in consideration of the covenants

of the said Winslow, Trustee, herein contained, they will assign to the said Winslow, Trustee, all Letters Patent and applications for Letters Patent of the United States and foreign countries, and all inventions which they or either of them own or control, or in which they or either of them have any interest, or which they or either of them shall make or acquire or control or obtain any interest in within fifteen years from the date hereof, which relate especially to enamel eyelets or the manufacture thereof; and also will secure the said Winslow, Trustee, the exclusive right to use, so far as the manufacture of enamel eyelets is concerned, for the full term of the patents, any inventions or improvements which may not relate exclusively to the manufacture of enamel eyelets but may be useful in the manufacture thereof.

And the said King, Kempshall and Tolman jointly and severally covenant and agree that they and each of them will do all acts and execute all applications for Letters Patent and all licenses and other instruments which may be necessary or desirable to procure, and to vest in the said Winslow, Trustee, the entire right, title, and interest in such Letters Patent as are to be conveyed to said Winslow, Trustee, under the terms hereof, and to secure to the said Winslow, Trustee, such licenses under Letters Patent as are to be granted the said Winslow, Trustee, in accordance with the terms hereof, it being the understanding of the parties hereto that the rights of the said Winslow, Trustee, to said letters patent, inventions and licenses are subject to the rights of the United Company under an agreement of even date herewith entered into between the said King, Kempshall and Tolman and the United Company, and the rights of a new corporation to be called the United Fast Color Eyelet Company, which is to be formed as provided for in said agreement.

The said King, Kempshall and Tolman further jointly and severally covenant and agree that they and each of them will, without further consideration than is hereinafter provided, use their best endeavors to enable the said Winslow to make the said enamel eyelet business carried on by said Winslow successful; and that for the period of fifteen years from the date hereof neither they or

either of them will enter into any business in competition therewith, except with the consent of the said Winslow in writing.

The said Winslow, Trustee, shall have the right to continue to build up and carry on the business of manufacturing and selling or otherwise disposing of enamel eyelets, and all profits which he shall make in the conduct of the business may be retained in the business as working capital or may be by him paid to the United Company as its own property free and discharged of this trust.

The said Winslow, Trustee, may at any time form a corporation and transfer the property held by him in trust hereunder to said corporation for such portion of its capital stock as he shall deem proper, or he may at any time sell the property held by him as trustee hereunder, and when such a sale or transfer of the property held by him hereunder shall be made by the said Winslow, Trustee, he shall give to said King two per cent. of the net proceeds received from such sale or transfer after the payment of all existing indebtedness and liabilities, and to the said Kempshall two per cent., and to the said Tolman two per cent. of said net proceeds. But it is understood and agreed that the said Winslow, Trustee, is not bound in any way whatever to make such sale or transfer, but that he can continue to manage the business as said trustee and to turn over all profits which may be derived therefrom to the United Company so long as he shall desire to do so.

The said Winslow, Trustee, shall have authority to borrow money to carry on the business herein provided for, and to pledge the property held by him as trustee hereunder to secure the payment thereof; and the United Company may loan money to the said Enamel Company or to the said Winslow, Trustee, for carrying on and developing said business, and may acquire from the Enamel Company or the said Winslow, Trustee, security to secure the repayment of the moneys thus loaned.

Nothing in this agreement shall prevent the United Company from undertaking for its own exclusive benefit the manufacture and sale or disposal of enamel or other eyelets, and the manufacture, lease, or disposal otherwise of machines for the insertion of enamel or other eyelets.

The United Company further covenants and agrees that it will cause to be transferred to the said King, Kempshall and Tolman, after the transfer by them to the said Winslow, Trustee, of the shares in the Enamel Eyelet Company and other rights above provided, twenty-five thousand dollars ($25,000) each in par value of the preferred capital stock of a corporation to be formed under the provisions of an agreement of even date herewith, to be called the United Eyelet Company.

In Witness Whereof the said Theophilus King, Henry Tolman, Eleazer Kempshall and Sidney W. Winslow have hereto set their hands and seals and the said United Shoe Machinery Company has caused its corporate name and seal to be hereto affixed on the day and year first above written.

THEOPHILUS KING [SEAL]

HENRY TOLMAN [SEAL]
SIDNEY W. WINSLOW [SEAL]

[SEAL] UNITED SHOE MACHINERY CO.
By Sidney W. Winslow, President.

PLAINTIFF'S EXHIBIT 84.

[Put in Evidence, page 507.]

This Agreement made this 30th day of June A. D., 1900, by and between Theophilus King, of Quincy, Massachusetts, the United Shoe Machinery Company, a corporation duly organized in accordance with the laws of the State of New Jersey and having a usual place of business in Boston, Massachusetts, hereinafter called the United Company, and Sidney W. Winslow, of Beverly, Massachusetts, hereinafter called the Trustee; Witnesseth: That

Whereas, the said King is the owner of certain machinery, rivets, and other property, Letters Patent, applications for Letters Patent, and inventions relating to rivets:

Now therefore, in consideration of the covenants of the respective parties herein contained, the parties covenant and agree as follows: —

Said King covenants and agrees that he will cause to be transferred to Sidney W. Winslow of Beverly, Massachusetts, as trustee for the purposes hereinafter stated, the following property, to-wit: —

Six (6) rivet-making machines and special tools for making the same; four or more hand setters; thirty to forty bench setters; twenty to twenty-five foot-power setting machines complete; twenty to twenty-five power setting machines, six completed and the others nearly completed; two rattlers; the belting attached to the rattlers and other machines; material for making rivets, in all one or two tons; manufactured rivets, from one to three tons; being the machinery now or recently situated at 133 Oliver Street in said Boston, and being all the rivet-making machinery, rivets, and rivet materials owned by the said Theophilus King, the greater part of said material having been purchased by the said King from the Reversible Rivet and Stud Company.

Also the following Letters Patent of the United States and Applications for Letters Patent of the United States and licenses under the same: —

No. 547,142	October 1, 1895	H. H. Cummings
No. 552,042	December 24, 1895	H. S. Crombie
No. 561,324	June 2, 1896	E. Kempshall
No. 565,855	August 11, 1896	H. H. Cummings
No. 580,638	April 13, 1897	H. S. Crombie
No. 616,729	December 27, 1898	G. L. Reenstierna
No. 628,098	July 4, 1899	E. Kempshall
No. 648,883	May 1, 1900	G. L. Reenstierna

Application Serial Number 641,257 to E. Kempshall for Riveting Machine;

Application Serial Number 656,332 to G. L. Reenstierna for Clutch Mechanism;

Application Serial Number 657,551 to for Feeding Mechanism.

Also all other Letters Patent, applications for Letters Patent and inventions, as well of the United States as of foreign countries, owned or controlled by the said King, relating to rivets or in which he has any interest. Also all the capital stock held by

the said King in the Reversible Rivet and Stud Company, a corporation duly organized according to the laws of the State of Maine and having a usual place of business in being shares, the entire issue of the capital stock of the Reversible Rivet and Stud Company being shares.

The said King further covenants and agrees that in consideration of the covenants of the said Winslow, herein contained, he will assign all other Letters Patent, applications for Letters Patent or inventions of the United States which he owns or controls, or in which he has any interest, relating to rivets or to any machinery or processes for making the same or applying the same to the material in which they are to be inserted. The said King will also convey to said Winslow all future inventions which he shall, for the period of fifteen years, make or acquire or control, or in which he has any interest, and all Letters Patent and applications for Letters Patent for such inventions which he shall own or control, or in which he has any interest for said period of fifteen years from the date hereof. And he covenants and agrees that he will do all acts and execute all applications for Letters Patent and other instruments which may be necessary or desirable to procure Letters Patent for such inventions and upon such applications in the United States and all foreign countries in the name of the said Sidney W. Winslow; and vest in him, the said Winslow, the entire right, title, and interest in said Letters Patent and said inventions and any Letters Patent for the United States or foreign countries which may be issued upon such applications for Letters Patent or for the inventions therein described.

The agreements of the said King herein contained, however, are subject to the rights of the United Company and a proposed corporation, the United Fast Color Eyelet Company, to inventions not relating exclusively to rivets, and the right of the said Winslow under the terms of this agreement to such inventions, Letters Patent and applications shall be confined to a license under such Letters Patent so far as they relate to rivets, or machinery, or processes for making the same or applying the same to the material in which they are to be inserted.

The said King further covenants and agrees that he will, without further consideration than is hereinafter provided, use his best endeavors to enable the said Winslow to make the said rivet business, carried on by said Winslow, successful; and that, for the period of fifteen years from the date hereof, he will enter into no business in competition therewith except with the consent of the said Winslow, in writing.

Said Trustee may take such means as he deems wise to secure a profit from the property hereby conveyed to him, and for that purpose may sell the whole or any part of the property hereby conveyed to him in trust, at public auction or private sale, upon such terms as he may deem wise, and the purchaser shall not be bound to see to the application of the purchase money.

The said United Company shall pay to the said King, on the transfer to the said Winslow, Trustee, of the property above set forth, $25,000 in par value of the preferred stock of the United Fast Color Eyelet Company, a corporation to be hereafter formed, said preferred stock to be of the par value of $100 per share.

The said Winslow, Trustee, shall have the right to continue to build up and carry on the business of manufacturing and selling or otherwise disposing of rivets in such manner as he shall deem wise, and all profits which he shall make in the conduct of the business may be retained in the business as a working capital, or may be by him paid to the United Company as its own property free and discharged of this trust.

The said Winslow, Trustee, may at any time form a corporation and transfer the property held by him in trust hereunder to said corporation for such portion of its capital stock as he shall deem proper, or he may at any time sell the property held by him as trustee hereunder, and when such a sale or transfer of the property held by him hereunder shall be made by the said Winslow, Trustee, he shall give to said King six per cent (6%) of the net proceeds received from such sale or transfer after the payment of all existing indebtedness and liabilities; but it is understood and agreed that the said Winslow, Trustee, is not bound in any way whatever to make such sale or transfer, but that he can continue to manage

the business as such trustee, and to turn over all proceeds which may be derived therefrom so long as he shall desire to do so.

The said Winslow, Trustee, shall have authority to borrow money to carry on the business herein provided for, and to pledge the property held by him as trustee hereunder to secure the payment thereof; and the United Company may loan money to said Winslow, Trustee, for carrying on and developing said business, and may acquire from said Winslow, Trustee, security to secure the payment of the money thus loaned.

Nothing in this agreement shall prevent the United Company from undertaking, for its own exclusive benefit, the manufacture and sale or disposal of rivets and the manufacture, lease or disposal otherwise of machines for the insertion of rivets.

In Witness Whereof, the said King and Winslow have hereunto set their hands and seals and the United Shoe Machinery Company has caused its corporate name and seal to be hereto affixed on the day and year first above written.

THEOPHILUS KING [SEAL]
SIDNEY W. WINSLOW [SEAL]
[SEAL] UNITED SHOE MACHINERY CO.
by Sidney W. Winslow

PLAINTIFF'S EXHIBIT 85.

[Put in Evidence, page 507.]

This agreement, between Theophilus King of Quincy, Massachusetts, and the United Shoe Machinery Company, a corporation duly organized according to the laws of the State of New Jersey, and having a usual place of business in Boston, Massachusetts, hereafter called the United Company; Witnesseth: that

Whereas, by an agreement of even date herewith, to be herewith delivered, between the said King and Henry Tolman and Eleazer Kempshall and the said United Company, it was provided that all the debts due the said King from the Boston Fast Color Eyelet Company should be transferred to the said United Company and that all the rights of the said King, Kempshall and Tolman as to

foreign business should be transferred to a new company, subject to the repayment to the said King of $5,000; and,

Whereas, it is desired by the parties hereto that the said King shall have the benefit of a note for $2,500, signed by the Boston Fast Color Eyelet Company, payable to said King two months from date, dated July 2, 1900, notwithstanding his said agreement of even date herewith to assign all such debts to the United Company; and that the said United Company shall have the sum of $5,000 from the foreign business of the said King, Kempshall and Tolman, which is, by said agreement of even date herewith, to be reserved for said King:

Now Therefore, in consideration of the agreements of the respective parties herein contained, and of the execution of said instrument of even date herewith by the parties, and other valuable considerations, the receipt of which is acknowledged by each of the parties, the parties hereto covenant and agree as follows:—

The said King assigns to the said United Company the right to profits from the foreign business relating to eyelets of the Boston Fast Color Eyelet Company and the National Fast Color Eyelet Company, referred to in said agreement, and now carried on by him, to the extent of $5,000; and will execute all further instruments and do all further acts necessary to secure said sum for the United Company.

The said United Company agrees that said note of $2,500 dated July 2nd, 1900, payable to said King 2 months from date, above referred to, may be retained by the said King for his own use and need not be transferred to the United Company as provided by his said agreement of even date herewith.

In Witness Whereof, the said King has hereunto set his hand and seal, and the United Shoe Machinery Company has caused this instrument to be signed and its corporate seal to be hereto affixed by Sidney W. Winslow, its President, this thirtieth day of June, A. D. 1900.

THEOPHILUS KING [SEAL]

[SEAL] UNITED SHOE MACHINERY CO.
by Sidney W. Winslow, President.

PLAINTIFF'S EXHIBIT 86.

[Put in Evidence, page 512.]

Agreement made this thirtieth day of January 1901 between Willard B. Hosmer, of Boston in the State of Massachusetts, party of the first part, Sidney W. Winslow, of Beverly, in said State, party of the second part, and United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, and having an office in said Boston (hereinafter called the United Company) party of the third part.

Whereas said Hosmer with Joseph E. Bertrand of said Boston as parties of the one part, entered into a certain agreement in writing dated the 15th day of December 1900 with said Winslow as party of the other part, providing for the sale by said Hosmer and Bertrand and for the purchase by said Winslow of all the shares of the capital stock of the Bay State International Shoe Machinery Company, which agreement is hereinafter referred to as the "Option Contract", and which is made a part hereof;

And Whereas the said Winslow has duly and seasonably notified the said Bertrand and Hosmer that he has elected to waive the right to rescind said option contract (which right was conferred upon him by said option contract), and that he will complete the purchase of said shares on or before sixty days from the date of said option contract;

And Whereas the said United Company has this day delivered to said Bertrand a certificate or certificates endorsed for transfer to said Bertrand for six hundred (600) shares of the fully paid up Preferred capital stock of the United Company of the par value of Fifteen Thousand Dollars ($15,000) and has delivered to the said Hosmer a certificate or certificates endorsed for transfer to said Hosmer for four Hundred (400) shares of the fully paid up Preferred capital stock of the United Company of the par value of Ten Thousand Dollars ($10,000) in satisfaction of Twenty-five Thousand Dollars ($25,000) of the purchase money provided to be paid to said Hosmer and Bertrand by Article One of said option contract.

And Whereas, the said Winslow has this day delivered to the

said Hosmer a certificate or certificates for One Thousand (1000) fully paid up shares of the Preferred capital stock of the United Company, of the par value of Twenty-five Thousand Dollars ($25,000) with a duly executed power of attorney for transfer by the holder of record thereof.

Now the parties hereto agree as follows: —

1. The said Hosmer shall if requested so to do within fourteen (14) days from the date of these presents, by said Winslow or the United Company forthwith borrow the sum of Twenty-five Thousand Dollars ($25,000) for a period not exceeding six months, upon his, the said Hosmer's promissory note or notes, and shall deliver the said sum of Twenty-five Thousand Dollars ($25,000) to such person as the said Winslow or the United Company shall designate to receive and apply the same to the cost and expenses of procuring the cancellation by the London Shoe Machinery Syndicate of a certain written agreement, dated the 8th day of October 1900, made between the Bay State International Shoe Machinery Company and said London Shoe Machinery Syndicate (referred to in said option contract) and all contracts existing between said International Company and said Syndicate, and the conveyance and delivery to said International Company of the property of said Syndicate conformably and pursuant to the provisions of Article 4 of said option contract.

2. The United Company promises, on or before six months from the delivery of said sum of Twenty-five Thousand Dollars ($25,000) to the person it or the said Winslow shall designate to receive and apply the same, to pay to said Hosmer the sum of Twenty-five Thousand Dollars ($25,000) plus such amount as the said Hosmer shall have paid as interest or discount on his said promissory note or notes, upon the surrender to said Winslow or his order of the certificate or certificates for One Thousand (1000) shares of the Preferred capital stock of the United Company which have been delivered by said Winslow to said Hosmer as aforesaid.

In Witness Whereof, the parties of the first and second parts have hereto set their hands and seals and the party of the third part has caused its corporate seal to be hereto affixed and these

presents to be signed by its Asst. Treasurer the day and year first above mentioned.

Executed in Duplicate.

WILLARD B. HOSMER [SEAL]
SIDNEY W. WINSLOW [SEAL]
[SEAL] UNITED SHOE MACHINERY COMPANY
By Edwd. P. Hurd, Asst. Tres.

We, the undersigned, Joseph E. Bertrand and Willard B. Hosmer, hereby acknowledge to have received from Sidney W. Winslow a certificate or certificates endorsed for transfer to Joseph E. Bertrand for Six Hundred (600) shares of the fully paid up Preferred capital stock of the United Shoe Machinery Company, of the par value of Fifteen Thousand Dollars ($15,000) and a certificate or certificates endorsed for transfer to Willard B. Hosmer for Four Hundred (400) shares of the fully paid up Preferred capital stock of said United Shoe Machinery Company, of the par value of Ten Thousand Dollars ($10,000) in full satisfaction of Twenty-five Thousand Dollars ($25,000) of the purchase money provided to be paid to us by said Winslow for shares of the capital stock of the Bay State International Shoe Machinery Company by a certain written contract made the 15th day of December 1900 between us, the said Bertrand and Hosmer, of the one part and the said Winslow, of the other part.

Witness our hands this thirtieth day of January 1901.

PLAINTIFF'S EXHIBIT 87.

[Put in Evidence, page 514.]

Agreement made at Boston, Mass., this 20th day of September 1900, between Simon Ross of Cincinnati, Ohio and the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey.

Whereas the United Shoe Machinery Company has agreed to purchase all the shares of the Ross-Moyer Manufacturing Company, including the shares in that Company held by said Ross, and is willing to take the said Ross into its employ, either in the management of said Ross-Moyer Company, or in such other capacity as it shall elect,

Now it is agreed as follows: —

1. The said United Company agrees to employ the said Ross and to pay or cause to be paid to him a salary of not less than four thousand dollars ($4,000.) per year in equal monthly installments, and said Ross agrees during his said employment to give to the United Company his exclusive time, services and skill.

2. In consideration of said purchase by the United Company and of its agreement to employ him as aforesaid, the said Ross agrees with the United Company and its successors and assigns that he will not during the period of ten years from the date of this instrument engage in the manufacture of, or deal in, or directly or indirectly aid, assist or encourage any one to engage in the manufacture of or deal in boot, shoe and leather working machinery, machines, tools or appliances in competition with said United Company, or corporations owned or controlled by it; and that he will not infringe, or aid or assist any one to infringe the trade marks, trade names, or letters patent now owned, or which shall hereafter be owned by said United Company, or by the corporations owned or controlled by it, and its or their successors or assigns in connection with the business of manufacturing and in dealing in boot and shoe and leather working machinery.

3. And said Ross for the consideration above mentioned further agrees to communicate and convey to said United Company any

and all inventions and improvements in or relating to boot and shoe leather working machinery, machines, tools and appliances which he has made but has not patented, and which he now owns, and all inventions or improvements in or relating to said art, which he shall hereafter, during the period of ten years from the date of this instrument, invent; and agrees to promptly disclose and explain to the officers or counsel of said United Company all such inventions or improvements in such manner as to enable the said United Company to have applications prepared for the grant of Letters Patent therefor and to practice such inventions or improvements; and agrees from time to time hereafter and at all times, when said United Company shall request him so to do, to do all such acts and to execute and make oath to all such applications, specifications, assignments and other written instruments as shall in the opinion of the counsel of the said United Company be reasonable and proper or necessary to obtain the grant of Letters Patent, both for the United States and for other countries for such inventions or improvements, and to vest the legal title to all such applications and patents in said United Company, or in such persons or corporations as it shall direct; the cost of all such applications, patents, assignments or other instruments to be borne by said United Company.

4. Inasmuch as said Ross is now interested as a holder of shares in the Consolidated Rotary Rounder Company, and in a certain harness and die business, formerly owned by the Ross-Moyer Company, it is agreed (notwithstanding any provisions in this agreement inconsistent herewith) that said Ross may continue to hold said interest until such time as he shall be able to dispose of the same, he agreeing to use reasonable diligence in disposing of them if the United Company shall request him so to do.

In Witness Whereof the said Simon Ross has set his hand and seal hereto and said United Company has caused its corporate seal to be affixed hereto and these presents to be signed by George W. Brown, its Treasurer, the day and year first above written.

S. Ross.

United Shoe Machinery Co.

By Geo. W. Brown, Treasurer.

[Put in Evidence, page 517.]

Know all Men by these Presents:

That the Swain Fuller Manufacturing Company (hereinafter called "the vendor"), a corporation organized and existing under the laws of the State of Maine, and having an established place of business in Boston, in the State of Massachusetts, in consideration of the sum of Twelve thousand seven hundred and seventy-six dollars and ninety-two cents ($12,776.92) to it paid by United Shoe Machinery Company (hereinafter called "the vendee"), a corporation organized and existing under the laws of the State of New Jersey and having an established place of business in said Boston, the receipt whereof is hereby acknowledged, has sold, transferred and delivered and by these presents does sell, transfer and deliver unto said vendee all the property of every name and nature belonging to the vendor as it stood at the opening of business on Monday the twenty-eighth day of January, 1901, situate in its premises at number 160 to 162 High Street and at number 130 Lincoln Street in said Boston, or wheresoever situate, together with the good-will of its business of manufacturing and dealing in boot and shoe machinery; also the entire interest of the vendor in, to and under all inventions, letters patent and pending applications for letters patent which the vendor now owns or in which it has or is entitled to have an interest and the exclusive right to the use upon or in connection with boot and shoe machinery of all trademarks, and trade names heretofore adopted and used by the vendor. The machinery, goods and chattels hereby sold are described in an inventory, herewith delivered to the vendee by the vendor. All orders for machinery received by the vendor on and after January 1st, 1901, are hereby sold and are to be turned over to the vendee to be filled and the vendee shall have the proceeds of all such orders as have been filled since January 1st, 1901.

The vendor reserves and excepts from this sale the lease of its premises at number 160 to 162 High Street in Boston, Massachusetts, and the lease of its office and ware rooms at number 54 South

Street in said Boston, but it agrees that the vendee shall have the right to occupy and use the said premises on High Street during the month of February, 1901; but the vendee shall pay as rent for that month the sum of eighty-three dollars and thirty-three cents ($83.33).

The vendor also reserves and excepts from this sale bills and accounts receivable outstanding and the cash on hand at the opening of business on the twenty-eighth day of January, 1901; all accounts and bills receivable created and cash received from sales or their disposition of any of the goods and chattels of the vendor made since the opening of business January 28, 1901 are hereby sold.

To Have and to Hold all and singular the premises hereby sold, conveyed and delivered to the vendee, its successors and assigns forever; and the vendor hereby covenants with the vendee that it is the lawful owner of all and singular the premises hereby sold and has good right to sell and dispose of the same as aforesaid; that the same are free from all encumbrances and that it will warrant and defend the same against the lawful claims and demands of all persons.

In Witness Whereof, said Swain Fuller Manufacturing Company has caused its corporate seal to be hereto affixed and these presents to be signed by Arthur Fuller, its Treasurer this 2d day of February 1901.

[Put in Evidence, page 519.]

This instrument made this fifteenth day of February, A.D. 1901, by and between Mellen Bray of Newton in the Commonwealth of Massachusetts, hereinafter called the Vendor, and the United Shoe Machinery Company, a corporation organized under the laws of the State of New Jersey and having a usual place of business in Boston in said Commonwealth, hereinafter called the Purchaser, Witnesseth:

Whereas the Vendor has agreed to sell and assign and to cause to be transferred to the Purchaser fifty-nine thousand and nine hundred and twenty-one (59,921) shares of the capital stock of the Globe Sewing Machine Company, a corporation duly organized and existing under the laws of the State of Maine, hereinafter referred to as the Globe Company, the corporate name of said Company being formerly "Bertrand Sewing Machine Company", the certificates of the shares so to be sold, assigned and transferred

now standing of record on the books of the said Globe Company as follows: —

Mellen Bray	59,901
Mellen N. Bray	10
M. E. Crocker	10
	59,921

Now be it known: —

First. The Vendor hereby warrants and covenants that the total amount of the issued capital stock of the said Globe Company does not exceed one hundred thousand shares each of the par value of ten dollars; and that of said amount of capital stock there is now standing of record in the name of Mellen Bray, Treasurer, Trustee, ten thousand (10,000) shares subject to the disposition and control of the Directors of said Globe Company; that the said Globe Company is free from all indebtedness and direct or contingent obligations, except the indebtedness specifically set forth in the Schedule hereto, amounting at the date of the execution of these presents to $, and except such liabilities as exist or may arise by reason of the following described written agreements or indentures: —

(a) An agreement made the 29th day of June, 1895, between Mellen Bray and Joseph Eli Bertrand, of the one part, and Phipps & Son, of College Street, Northampton, England, Engineers of the other part.

(b) An indenture made the ninth day of October, 1895, between Mellen Bray and Joseph Eli Bertrand, of the one part, and the Bertrand Sewing Machine Company of the other part, wherein and whereby the Bertrand Sewing Machine Company covenanted and assumed to perform all the covenants, agreements and stipulations in said agreement above referred to between said Bray and Bertrand and said Phipps & Son which were to be performed by or on the part of said Bray and Bertrand or either of them.

(c) An agreement of guaranty executed by Mellen Bray in favor of M. C. Dizer & Company, dated June 21, 1895.

(d) An agreement between the Bertrand Sewing Machine Company and M. C. Dizer & Company, contained in a letter dated

March 20, 1897, addressed and delivered to said Company by said Dizer & Company and accepted by said Company under date of April 24, 1897.

(e) An agreement made the 31st day of December, 1896, by and between Alfred B. Fowler of Pawtucket, Rhode Island, of the first part, and the Bertrand Sewing Machine Company of the second part.

(f) An agreement made the 28th day of November, A.D., 1898, by and between said Globe Sewing Machine Company, Alfred B. Fowler and Mellen Bray.

(g) An agreement made the 30th day of June, 1899, by said Globe Sewing Machine Company and Mellen Bray with C. K. Fox.

(h) An agreement made the 27th day of January, 1899, by said Globe Sewing Machine Company and Mellen Bray with E. G. Morrison & Co.

(i) Such agreements as have been given by the said Globe Sewing Machine Company, either alone or jointly, with the Vendor, to protect persons taking machines put out by it against suits for infringements of patents.

Second. The Vendor agrees that, whenever requested so to do by the Purchaser, he will co-operate with the Purchaser to cause the officers and Directors of said Globe Company to resign, and to cause their resignations to be accepted in such order as the Purchaser shall desire, and to cause the several nominees of the Purchaser to be elected as officers and Directors in the place of the present officers and Directors.

Third. The Vendor, in consideration of one dollar and other valuable consideration to him paid, the receipt of which is hereby acknowledged, has sold and assigned and by these presents does sell and assign to the Purchaser the above-mentioned 59,921 shares of the capital stock of the Globe Company, the certificates for which stand of record on the books of the Globe Company in the names of —

Mellen Bray	59,901
Mellen N. Bray	10
M. E. Crocker	10
	59,921

and does agree to deliver on demand to the Purchaser the certificates for said 59,921 shares duly endorsed in blank by the respective holders thereof.

Fourth. And the Purchaser hereby agrees to indemnify and hold harmless the Vendor for and against any loss, cost or damage which he may suffer by reason of any liability which he now is or hereafter may be under to any of the parties named in any of the agreements aforesaid by virtue of the provisions thereof, whether such liability exists or may arise out of anything heretofore done or omitted, or may arise out of future acts or omissions; and the benefit of this covenant shall extend to the representatives of the Vendor.

In Testimony Whereof the parties have hereto set their hands and seals the day and year first above written, the said United Shoe Machinery Company having caused its name and corporate seal to be hereto affixed by its President thereunto duly authorized.

[Put in Evidence, page 521.]

Know all Men by these Presents: That the Boot & Shoe Sole Laying Company, a corporation duly organized under the laws of the State of Maine (hereinafter called the Sole Laying Company) in consideration of the sum of one dollar and other valuable considerations to it paid by the United Shoe Machinery Company, a corporation duly organized under the laws of the State of New Jersey (hereinafter called the United Company), the receipt of which is hereby acknowledged, does hereby grant, sell, assign, transfer, and deliver unto the said United Company, its successors and assigns, all the property real and personal owned or held by the Sole Laying Company, wherever situated, and the entire business of the said Sole Laying Company together with the good-will thereof, including all machines, machinery shafting, tools, special tools, patterns, drawings, models, stock on hand manufactured, unmanufactured, or in process of manufacture, spare parts, all books of entry and account, office furniture and fixtures, and all other property owned by the said Sole Laying Company and now on the premises occupied by the said Sole Laying Company at 205 Lincoln Street, Boston, Massachusetts, or elsewhere; also all shoe machines loaned or held upon lease of which the said Sole Laying Company is the owner or in which it has any right, title or interest, legal or equitable, wherever said machines may now be located, together with all leases, licenses, or contracts relating to said machines, all Letters Patent of the United States or foreign countries, all applications for Letters Patent of the United States or of foreign countries, all inventions for which Letters Patent have not as yet been applied, and all rights in, to or under said Patents, applications or inventions, all cash on hand or on deposit, all choses in action, including all claims and demands for any past infringement of Letters Patent; also all books and accounts receivable, stock of corporations, notes and other evidences of indebtedness, and all contracts, leases and agreements of said Sole Laying Company to which it is a party or in which it has any beneficial interest, and

all property wherever situated owned by the said Sole Laying Company, including the good-will and all trade-marks and trade-names; provided, however, that the record books aud books of entry and account shall remain in the custody of the officers of the Sole Laying Company with full right to use the same until the Sole Laying Company shall be dissolved according to law.

To Have and to Hold the aforesaid property and rights to the said United Shoe Machinery Company, its successors and assigns, to their own use and behoof forever.

And for the consideration aforesaid the said Sole Laying Company does hereby covenant and agree that it will and its successors shall, whenever requested by the said United Company or its successors or assigns, do all acts and execute and deliver all instruments and papers which may be necessary or convenient to carry into effect the terms and intent of this instrument and to vest in the said United Company and its successors and assigns, or such other corporations as it may request, the full and complete title in and to all property and rights hereby conveyed or intended so to be; at the expense, however, of the said United Company.

And for the consideration aforesaid, it does hereby appoint the said United Company, its successors and assigns, its true and lawful attorney in the name of the Sole Laying Company or of the United Company to take such action at law or in equity or otherwise as it may deem desirable to secure to it the full benefit and advantage of the rights hereby conveyed or intended so to be.

In Witness Whereof the said Boot & Shoe Sole Laying Company has caused this instrument to be signed by Louis H. Baker its Treasurer, and its corporate seal to be hereto affixed this 25th day of May 1901.

BOOT & SHOE SOLE LAYING COMPANY

I. R. Stamp Cancelled.

Commonwealth of Massachusetts.

Suffolk, ss. Boston, June 1, 1901.

Then personally appeared the above-named Louis H. Baker, Treasurer, and acknowledged that he executed the foregoing instru-

ment and that the foregoing instrument is the free act and deed of the Boot & Shoe Sole Laying Company, before me

[SEAL] Guy Cunningham, Notary Public.

PLAINTIFF'S EXHIBIT 91.

[Put in Evidence, page 525.]

This Agreement made and entered into this nineteenth day of June, 1901, by and between John C. Rhodes and John B. Rhodes, both of New Bedford, Massachusetts, and doing business under the firm name and title of J. C. Rhodes & Company, parties of the first part (hereinafter called the vendors), and the United Shoe Machinery Company, a corporation duly organized and existing under the laws of the State of New Jersey, having its registered office in Paterson, New Jersey, and its principal place of business in Boston, Massachusetts, party of the second part, (hereinafter called the United Company): Witnesseth, That

Whereas, the vendors are carrying on the business of manufacturing and selling eyelets of various descriptions, but principally for boots and shoes; and

Whereas the vendors desire to sell the said business and all the property owned therein or in connection therewith, both real and personal, together with the goodwill of the said business; and

Whereas the United Company is desirous of purchasing the same for the account of the Eppler Welt Machine Company.

Now, Therefore, in consideration of one dollar by each of the said parties to the other in hand paid (the receipt whereof is hereby respectively acknowledged), and in consideration of the covenants and agreements hereinafter contained, the said parties hereby covenant and agree as follows:

(1) The vendors shall and hereby do convey, transfer and deliver unto the said Eppler Welt Machine Company, its successors and assigns, the entire business of the firm of J. C. Rhodes & Company, of New Bedford, Massachusetts, as a going concern, together with the goodwill thereof and expressly including in the said conveyance, transfer and delivery, all the assets and property pertain-

ing to, used in or connected with the said business, including the factory and the factory site and premises at 123 North Front Street, New Bedford, with all the machine shops, buildings, constructions, engines, boilers, furnaces and fixtures thereon, and easements and appurtenances thereunto belonging, and all machinery, belting, shafting, tools, mechanical devices, patterns, models of every sort and description, japans, and all other chemical mixtures and combinations, all patents and applications for patents, licenses under patents and all other patent rights, all inventions regardless of whether patents have been applied for or not, together with all processes, whether mechanical or chemical or both, expressly including all secret processes and all other trade secrets, known and used by the vendors in the same business or in any way relating thereto, (and the vendors agree to use their best endeavors to persuade any employees in the said business to convey, transfer and deliver all and any such secret processes used or known by them), and all trademarks and trade-names (including the right to continue to do business for three (3) years from the date hereof under the name "J. C. Rhodes & Co." or any similar name and during and after such three years the name of the "Rhodes Eyelet Company" or any other name not including the initial letters "J" or "J. C." or "J. B." or the name "John" in connection with the name "Rhodes"), also the entire stock in trade of the vendors and all goods, whether finished or in process of manufacture, and raw material, all books, journals, ledgers, letters, copybooks and other papers and documents, which books, journals, ledgers, letters, copybooks and other papers and documents shall be open at all reasonable times for the inspection of the vendors, and all book accounts, credits, claims, notes and bills receivable, all contract rights, and all rights of action, either at law or in equity, and all franchises, privileges and other assets of whatever description of the said vendors used in, relating to or intended or adapted for the said business. The said conveyance, transfer and delivery shall take place as of June 1, 1901, and all transactions by the said vendors since that date shall be considered as having taken place on behalf of the said Eppler Welt Machine Company. The said Eppler Welt Machine Company

shall assume the liabilities of the said business as of June 1, 1901; but the vendors expressly covenant and guarantee that on the said June 1, 1901, the liabilities of the vendors in respect of the said business and hereby assumed by the said Eppler Welt Machine Company, whether direct or indirect, due and payable, or accrued but not payable, or contingent, were not in excess of forty-three thousand ($43,000.00) dollars; and that since the said June 1, 1901, the vendors have not incurred any unusual expense in respect of their said business or contracted any debts or liabilities outside of the ordinary course of business; and it is expressly understood and agreed that the assumption by the said Eppler Welt Machine Company of the liabilities of the said business as hereinbefore recited is conditional upon the truth of the statements contained in the covenant and guaranty immediately hereinbefore preceding. The vendors shall at any time hereafter without expense to themselves or either of them at the request of the said Eppler Welt Machine Company or the United Company, do, sign, execute, and deliver any and all things, papers, instruments, deeds, bills of sale, and assignments which either of the said Companies may be advised are necessary to give the said Eppler Welt Machine Company a good and perfect title to any and all of the property hereby conveyed or intended to be conveyed.

(2) The vendors shall use their best efforts during the three months next following the date hereof to teach and instruct thoroughly any nominees of the United Company, not exceeding three in number, in any and all of the secret processes and other trade secrets heretofore known and used by the vendors, or either of them, in or in connection with the vendors' said business, and the vendors agree to use their best endeavors to persuade their employees to do the same, and shall, if so requested within twelve months from date, reduce such instructions to writing as fully, clearly and intelligibly as possible, and deliver the same to the said nominees of the United Company; and the vendors shall take any and all reasonable and proper steps which they shall be requested to take or which shall suggest themselves as expedient, not inconsistent with the provisions hereof, in order that the said nominees

of the United Company shall be made thoroughly conversant with the said secret processes and trade secrets, and enabled to make use of and employ such processes and trade secrets with the same degree of facility as the vendors or their employees; and the United Company agrees that the said nominees shall be suitable and proper persons to receive such instructions, and that they shall be designated and shall present themselves for such instructions at the factory in New Bedford within thirty (30) days from the date of the execution of this agreement, so as to enable the vendors to teach and instruct them within said three months from the date hereof.

(3) The said John B. Rhodes shall for three months from the date hereof take charge of, manage and carry on the said business, and shall devote as much time to the management and carrying on of said business for said Company as aforesaid as has heretofore been devoted by him to said business, when carried on by the vendors; and the vendors and either of them shall at all times during a period of five years from date give the fullest information in their power, upon request of the United Company, its officers, agents or nominees, upon any and all points connected with the history, development or management of the said business or of any of its parts, branches or departments.

(4) The United Company shall pay the vendors the sum of Two hundred thousand (200,000) Dollars cash upon the execution of this agreement, together with interest to date thereon from June 1, 1901, calculated at the rate of six per cent. per annum, and the receipt of either of the vendors shall be evidence that the United Company has complied with this provision. The United Company shall also issue to the vendors within five (5) days after the execution of this agreement, one hundred and seventy-five thousand (175,000) dollars at par of its preferred capital stock (that is, seven thousand (7,000) shares of such preferred capital stock), and the receipt of either of the vendors shall be evidence that the United Company has complied with this provision. The vendors shall not sell all or any part of the said seven thousand (7,000) shares of preferred capital stock within a period of twelve (12)

months from the date hereof without first making an offer in writing to Sidney W. Winslow, of Beverly, Massachusetts, President of the United Company to sell the same to him or to his nominee at the current market price upon the date of such offer. The said Winslow shall accept or reject such offer in writing within five (5) days after the receipt of such offer, and if he accept such offer, shall pay for same within (30) days from the receipt of such offer. The United Company shall further issue to the vendors, within five (5) days after the execution of this agreement, four hundred thousand (400,000) dollars at par of its preferred capital stock (that is, sixteen thousand (16,000) shares of such preferred capital stock) and the receipt of either of the vendors shall be evidence that the United Company has complied with this provision. The vendors shall not sell all or any part of the said sixteen thousand (16,000) shares of preferred capital stock within a period of three (3) years from the date hereof, at less than twenty-seven and 50-100 (27.50) dollars per share; except, and provided that, however, the vendors may notify the United Company in writing at or before the end of the second year from the date hereof that they desire the United Company to purchase from them at the end of the third year from the date hereof, all or any part of such sixteen thousand (16,000) shares of preferred capital stock, at twenty-five (25) dollars per share, whereupon the United Company shall be bound to purchase from the vendors at or before the end of the said third year from the date hereof, at twenty-five (25) dollars per share, such number of the said sixteen thousand (16,000) shares as the vendors may have designated in the said written notification; but the United Company shall have the privilege of purchasing such shares during the said third year in instalments, if it shall so desire, and upon the payment of any such instalment a pro rata number of the shares elected to be sold by the vendors as aforesaid shall be transferred to the United Company. The United Company shall further pay the vendors on or before July 15, 1901, an amount equal to the interest on five hundred seventy-five thousand (575,000) dollars for one month, calculated at the rate of six (6) per centum per annum, that is to say, the sum of twenty-eight hundred seventy-five

(2875) dollars, which sum shall be in lieu of any claim that the vendors might otherwise have to share in the last declared dividend on the preferred stock of the United Company, payable to stockholders of record on June 20, 1901. All the said stock referred to in this paragraph, that is, twenty-three thousand (23,000) shares of preferred stock, shall be issued jointly or severally to the vendors, as they shall in writing designate.

(5) It is further expressly provided and agreed that if at any time within three years next following the date hereof the net cash assets of the United Company (that is, the cash assets of the United Company over and above the liabilities of said Company (or if the surplus earnings and accumulated profits of said United Company at any time within said three years fall below the sum of eight hundred thousand (800,000) dollars, then the United Company shall upon receiving written notification of the election of vendors or either of them to avail themselves of this provision purchase for cash within thirty days from the receipt of said notification all or such part of the said sixteen thousand (16,000) shares of preferred stock at par as may be designated in the said written notification. The vendors or either of them shall in furtherance of the right in this paragraph hereinbefore provided have the further right at any time within the said three years to name in writing three public accountants, from whom one shall be selected by the United Company and such public accountant so selected by the United Company from the three named by the vendors or either of them shall have the right to examine the commercial books and accounts of the United Company, and if he shall find and report in writing that either the net cash assets of the United Company as hereinbefore defined or the surplus earnings and accumulated profits of the said United Company have fallen below eight hundred thousand (800,000) dollars, then the right of the said vendors to avail themselves of the provisions in this paragraph shall forthwith accrue.

(6) Upon the death of the vendors or either of them the rights hereby granted to and the liabilities hereby assumed by them or either of them in respect of the said twenty-three thousand (23,000) shares of preferred stock shall pass and inure to and be exercised

and assumed by the legal representatives of the vendors respectively.

(7) In order more fully to protect the goodwill of the business hereby conveyed, the vendors, and each of them, hereby covenant and agree that neither of them (except as hereinafter employed by or connected in some official capacity with, or as shareholder in the United Company, or the said Eppler Welt Machine Company, their respective assigns and successors) will, for a period of fifteen (15) years from the date hereof, either as proprietor, manager, manufacturer, partner, agent, employee, or stockholder of any corporation, carry on, engage in or be connected with, either directly or indirectly, the business of manufacturing or selling eyelets of any description or any substitutes therefor or any machinery for making eyelets, but it is understood for the purpose of this agreement that lacing hooks or buttons shall not be considered as substitutes for eyelets, and each of the vendors covenants never to disclose to any other than the said nominees of the United Company any of the said secret processes or trade secrets, nor for a period of fifteen years from the date hereof to disclose any secret processes or secrets relating to the said business hereby conveyed that may hereafter become known to either of them; but for the period of fifteen (15) years aforesaid to promote the success of the said business to the best of their several ability by communicating and disclosing to the nominees of the United Company any ideas or suggestions as to the conduct or management of the business, and any knowledge of inventions or improvements of present processes, or any new processes relating to the said business that may occur to or become known to either of the vendors, but without pecuniary expense to either of them.

(8) The Company agrees from the date hereof that the said John C. Rhodes shall be given full information from time to time regarding the management and operation of the business of the Company to the same degree and extent as any director of the Company, and shall have the right to inspect and examine any report made to the directors by any auditor of the Company.

(9) The vendors agree to sign any decree or stipulation or to

take any step or action in or in respect of any litigation in which they are engaged, upon the request of the United Company, provided that compliance with such request shall not involve any liability or expense on the part of the vendors.

(10) The vendors agree to furnish the certificate of an attorney at law of publicly recognized good standing and reputation that he has examined the chain of title to the real estate hereby conveyed for at least a period of thirty years back, and that he is satisfied that the vendors' title to the same is clear and free from all encumbrances.

(11) All covenants made and all conditions assumed by the vendors herein shall be binding upon them jointly and severally.

In Witness Whereof the said John C. Rhodes and the said John B. Rhodes have hereunto set their hands and seal and the United Company has caused these presents to be executed and its corporate seal to be hereto affixed by Sidney W. Winslow, its President, thereunto duly authorized the day and year first above written.

PLAINTIFF'S EXHIBIT 92.

[Put in Evidence, page 529.]

Indenture made this fourteenth day of December 1901, between Morley Button Manufacturing Company, a corporation organized and existing under the laws of the State of Maine (hereinafter called the Vendor) party hereto of the first part, and United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, (hereinafter called the Vendee) party hereto of the second part.

Whereas, the Vendor is engaged in the business of manufacturing and selling eyelets, and has in its factory in Portsmouth in the State of New Hampshire, certain machinery, tools, fixtures, appa-

ratus, materials, patterns and drawings for use in manufacturing eyelets and machines for making and finishing the same, the principal items of which are mentioned in Schedule A hereto annexed and is the owner of certain trade marks, inventions and improvements, an application for the grant of Letters Patent of the United States, and Letters Patent of the United States numbered 672,884, dated the 30th day of April, 1901, and certain secret processes for the manufacture of eyelets and secret formulas for preparing the finishing or coating material which it has applied to its eyelets, all which property of every nature hereinbefore referred to, together with the good will of said business and of the officers of the Vendor, the Vendee desires to purchase;

Now this Indenture Witnesseth that,

In consideration of the sum of Thirty-one Thousand Dollars ($31,000) paid by the Vendee to the Vendor, and of other valuable consideration, the receipt of which is hereby acknowledged

1. The Vendor has sold and conveyed, and by these presents does sell, convey and deliver unto the Vendee all the goods, chattels and property of the Vendor belonging to its eyelet business, consisting principally of all the machinery, tools, fixtures, apparatus, materials patterns and drawings now situated in the factory of the Vendor in said Portsmouth or elsewhere which have been used by the Vendor, or which were or are intended for use in manufacturing eyelets or machines and appliances for making and finishing eyelets, (the principal items thereof being mentioned in Schedule A hereto annexed) and the Vendor does also by these presents sell and convey unto the Vendee all trade marks used by the Vendor in the prosecution of said eyelet business; all the present right, title and interest of the Vendor in inventions and improvements which relate to eyelets, or machinery, machines, appliances, processes or methods used in the manufacture of eyelets, all secret processes or methods used by or known to the Vendor which are adapted for use in the manufacture of eyelets, and the good will of its said eyelet business; together with the entire interest in the inventions described in an application for the grant of Letters Patent of the United States for an improvement in eyelets invented

by one R. L. Ellery, filed in the United States Patent Office on the 6th day of May, 1901, Serial No. 58,897, and the entire interest in Letters Patent of the United States No. 672,884, dated April 30, 1901, granted upon the application of one Walter E. Bennett.

Reserving, however, to the Vendor its books of acconnt, cash on hand and in banks and all debts, bills receivable and obligations due or payable to it in respect to said eyelet business, also the stock of eyelets, finished and in process, brass and scrap, such stock being substantially as described in Schedule B hereto annexed.

To Have and to Hold all and singular the said goods, chattels, property and rights to Vendee and its successors and assigns.

2. And for the consideration aforesaid the Vendor covenants with the Vendee that the property and premises conveyed as aforesaid are free from all incumbrances; that the Vendor has good right to sell the same; that the Vendor will warrant and defend the same against the lawful claims and demands of all persons; and that the Vendor will from time to time hereafter, at the cost of the Vendee, execute and deliver to the Vendee such deeds, assignments or other written instruments and will do such acts, or cause them to be done upon the request of the Vendee, as shall in the opinion of the counsel of the Vendee be necessary or proper to vest and confirm in the Vendee the legal title to the property and premises hereby conveyed and, in especial, to assure to and vest in the Vendee the entire interest of the Vendor in and to all patentable inventions or improvements hereby conveyed and in and to Letters Patent of all countries therefor.

3. As further consideration of said sale and conveyance, the Vendee covenants that, in two suits in equity now pending in the Circuit Court of the United States for the District of Massachusetts, in each of which the J. C. Rhodes & Co. Incorporated is plaintiff and the Vendor is defendant, which charge infringement by the Vendor of Letters Patent of the United States for an improvement in eyelets, numbered 565,091 and dated August 4, 1896, and of Letters Patent of the United States for a design for an eyelet numbered 24,867 and dated November 12, 1895, it will

cause the bills of complaint to be dismissed without prejudice and without costs; and the Vendee covenants that without charge to the Vendor it will cause said J. C. Rhodes & Co. Incorporated, to execute and deliver to the Vendor a release under seal from all claims for damages or profits which J. C. Rhodes & Co. Incorporated or its predecessors in ownership of said several Letters Patent have by reason of the manufacture, sale or use of eyelets by the Vendee, or its customers, in infringement of said Letters Patent or either of them; and, further, the Vendee covenants that it will cause J. C. Rhodes & Co. Incorporated, as owner of said Letters Patent No. 565,091 and No. 24,867, to license the Vendor for the consideration of One Dollar, to manufacture the brass and the eyelets in process referred to in said Schedule B into eyelets which shall embody the invention and design respectively patented in said Letters Patent, and to sell such eyelets and the finished eyelets referred to in said schedule, to the Vendee or its nominees, or otherwise as hereinafter provided and during the term of one year from the date of these presents, to make and sell eyelets to the Vendee, or its nominees, or otherwise as hereinafter provided which shall embody the said invention and the said design.

4. The Vendee hereby agrees that, pursuant to the license to be granted to the Vendor under said Letters Patent No. 565,091 and No. 24,867, as aforesaid, the Vendor may sell to its present agents or customers a sufficient number of the finished eyelets referred to in said Schedule B, or eyelets to be completed or made from the eyelets in process or the brass referred to in said Schedule, to fill all orders which are on the books of the Vendor at the date of these presents and such orders as the agents of the Vendor have taken of which the Vendor shall be notified within thirty days from the date of these presents; but the Vendor agrees that it will not sell such eyelets at less than the prices mentioned in said Schedule C. hereto annexed. And the Vendor further agrees that the Vendee shall have the option to purchase at the lowest prices mentioned in said Schedule C for jobbers all such eyelets mentioned in said Schedule or made up from the material referred to in said Schedule, which shall not be required by the Vendor to fill its orders and the

orders to be taken by its agents as aforesaid, and if such option shall not be exercised within thirty days after the Vendee is notified thereof by the Vendor, the Vendor shall be at liberty to sell to the trade at not less than the prices mentioned in said Schedule C any of such eyelets which it then has on hand.

5. The Vendor, if so requested to do by the Vendee, will allow the machinery and apparatus mentioned in Schedule A hereto to remain for one year from the date of these presents in the factory of the Vendor at said Portsmouth substantially as now located in said factory, without charge for rent or storage, and also will, if requested so to do by the Vendee, manufacture eyelets for the Vendee during said year, by the aid of said machinery and apparatus, charging therefor the actual cost of labor and materials plus a reasonable charge for power, light and heat and for services of superintendents, but making no charge for rent. The Vendor shall only sell such eyelets to nominees of, or to customers approved by the Vendee, at prices from time to time to be fixed by the Vendee. The Vendor shall render bills on the first day of each month for all charges and disbursements in connection with the manufacture of eyelets for the Vendee, and the Vendee shall pay such bills on or before the 15th day of the month in which they shall be rendered.

6. The Vendor agrees, at any time during one year from the date hereof, to assist the Vendee in moving from said factory of the Vendor the property hereby sold and purchased, by suitably boxing, crating and otherwise preparing the same for shipment and by loading the same on the cars at said Portsmouth, and will charge therefor only the actual cost of the labor and materials employed. And the Vendor further agrees that, if the Vendee shall so request, the Vendor will at any time within three months after the removal of said property from said Portsmouth furnish skilled men from its factory, who thoroughly understand the manufacture of eyelets as hitherto conducted by the Vendor, to assist the Vendee in setting up said machinery and apparatus and to instruct the superintendents and workmen of the Vendee in the operation of the same and in the use of the secret and other processes heretofore practiced by the Vendor in the manufacture of

eyelets and in preparing and applying thereto finishing or coating material, and the Vendee shall reimburse the Vendor for the wages and expenses of workmen and other disbursements incurred by it in rendering such assistance.

7. The Vendor, for the consideration aforesaid, covenants and agrees with the Vendee, that it, during the term or terms of said Letters Patent No. 672,884, or of such Letters Patent of the United States as shall be granted upon the application of said Ellery hereby conveyed, will not directly or indirectly engage in the manufacture or sale of eyelets and will not engage in the eyelet business in competition with the Vendee, and will not encourage, aid or assist others in such competition, and will, so far as it shall exercise its influence in the trade, both in the United States and in foreign countries, endeavor to promote the interests of the Vendee and to assure to the Vendee the exclusive advantages intended to be secured by this instrument; and, to this end, the Vendor will cause its treasurer to join in the execution of this indenture binding thereby not only the Vendor, but also its said treasurer individually to the covenants in this Section 7 contained.

8. The covenants and agreements herein contained incumbent upon or for the benefit of the Vendor and of the Vendee respectively shall be incumbent upon and for the benefit of their respective successors and assigns.

In Witness Whereof, the Vendor has caused its corporate seal to be hereto affixed and these presents to be signed by its treasurer, under his seal, whose signature hereto shall bind the Vendor to all the covenants and agreements on the part of the Vendor herein contained and shall also bind its said treasurer individually to the observance of the covenants and agreements contained in Section 7 hereof, and the Vendee has caused its corporate seal to be hereto affixed and these presents to be signed by its President the day and year first above written.

PLAINTIFF'S EXHIBIT 93.

[Put in Evidence, page 530.]

Agreement made this fifteenth day of February, 1902, between Oliver A. Miller, of Brockton, Massachusetts, (hereinafter called the Vendor) of the first part, and the United Shoe Machinery Company, a corporation duly organized and existing under the laws of the State of New Jersey, and having an office in Boston, Massachusetts, (hereinafter called the Vendee) of the second part.

Whereas, the Vendor has for many years past carried on the business of manufacturing and trading in "Treeing Machines" at said Brockton, with offices in said Boston, and in Northampton,

England, and with agencies in France, Germany, Australia and elsewhere; and

Whereas, the Vendor is willing to sell and the Vendee desires to purchase the said "Treeing Machine" business, together with the goodwill thereof, and the plant at said Brockton; and

Whereas, in carrying out said sale the Vendor has by an instrument dated February 8, 1902, transferred to the Vendee the land and buildings at said Brockton comprising the plant aforesaid; and by an instrument dated February 11, 1902, the Vendor has transferred to the Vendee certain United States Letters Patent relating to said "Treeing Machines" and parts thereof; and by an instrument dated February 11, 1902, the Vendor has transferred to the Vendee the machinery, tools, fixtures, stock, etc., situated in said plant; and by an instrument dated February 11, 1902, the Vendor has transferred to the Vendee certain machinery, tools, fixtures, stock, etc., situated at Northampton, England.

(a) Now, Therefore, in consideration of the sum of One Hundred and Sixty Thousand Dollars ($160,000.00), the agreed purchase price for said business, goodwill, plant, stock, Letters Patent, etc., the receipt whereof in full is hereby acknowledged, the Vendor has further sold, assigned and transferred, and by these presents does sell, assign, and transfer to the Vendee, the goodwill of said business in "Treeing Machines" heretofore carried on at said Brockton and elsewhere under the name of O. A. Miller, together with the exclusive right to use the name of "O. A. Miller" in connection with the words "Treeing Machine" as a part of the corporate name of a corporation which shall be organized to carry on said business of manufacturing and selling said "Treeing Machines", but not otherwise, together with the right to represent such corporation and its successors and assigns as carrying on said business in said "Treeing Machines" in continuation of the Vendor and in succession to him, but not otherwise.

Except as above specified, nothing herein contained shall be construed as giving the Vendee any rights whatever to the use of the name "O. A. Miller", the Vendor expressly reserving all other rights in connection with the name of "O. A. Miller" and the

otherwise free and unrestricted right to use said name "O. A. Miller" or any part thereof in any and all countries.

(b) And for the said consideration the Vendor hereby further sells, assigns and transfers to the Vendee, all orders in connection with said "Treeing Machine" business outstanding on the 1st day of February, 1902, and all orders received since that date, together with all the benefits and advantages of the business transacted since that date, but the Vendee shall indemnify and hold the Vendor harmless against all expenses and liabilities incurred in the usual course of business in carrying on the business since that date.

Nothing herein contained is to be construed as giving to the Vendee any right whatever to the cash on hand, or in banks, or to books, books of account, accounts, bills receivable, debts, or obligations in existence on the 1st day of February, 1902, belonging to said business or the proceeds thereof, all and each of which are and is hereby expressly reserved by the Vendor for his own use and behoof, clear and free of any claim of or for or on behalf of the Vendee.

(c) And for the said consideration the Vendor further agrees that he will not at any time within fifteen years from the date of this Agreement, in any country in which "Treeing Machines" are used, either solely or jointly, with or as manager or agent for any other person or persons, or company, directly or indirectly, carry on or be engaged or concerned or interested in the business of manufacturing, selling, or dealing in boot or shoe "Treeing Machines", or "tree" legs, "tree" feet, or other parts thereof, or "treeing" tools for the "treeing" of boots or shoes by manufacturers before the said boots or shoes are packed or made ready for shipment. But nothing herein contained shall be construed as having any reference whatever to the manufacture or sale of Domestic or Retail boot or shoe "Trees", Polishers, Holders, or parts thereof, or Lasts, Followers, or Foot Forms, in respect to each and all of which the Vendor parts with no rights whatever, but hereby expressly reserves to himself the free and unrestricted right in any and all countries to make, use, or sell the same, or to

authorize others to make, use, and sell the same, either as agents, assigns, vendees or otherwise, as the Vendor may elect.

(d) The Treeing Machines referred to in clause (a) as being transferred to the Vendee, are machines designed and adapted for "treeing" boots or shoes in shoe factories before the boots or shoes are packed or made ready for shipment.

The Domestic or Retail boot or shoe "Trees", Polishers, and Holders referred to in clause (c) are devices designed and intended for the dressing, etc., of boots and shoes in Retail stores and elsewhere after the boots and shoes are received from the maker.

(e) And for the said consideration, the Vendor, for himself and his executors and administrators, covenants and agrees with the Vendee, and its successors and assigns, to execute and deliver such other deeds, assignments, powers of attorney or other instruments, and to do such acts as shall be necessary or proper to secure to and confirm in the Vendee, and its successors and assigns, all the plant, machinery, tools, fixtures, office furniture, merchandise, material of every nature, either crude or in process of manufacture, all Letters Patent, licenses and interests in Letters Patent or inventions, and all chattels and effects of every kind, nature and description, and the benefit of all contracts which belong to the Vendor and which constitute a part of the "Treeing Machine" business and plant hereby sold, wherever the same or any part thereof are situate.

In Witness Whereof, the party of the first part has hereunto set his hand and affixed his seal, and the party of the second part has caused its corporate name to be signed and its corporate seal to be affixed in token of its acceptance of this Agreement, the day and year first above written.

[Put in Evidence, page 531.]

ASSIGNMENT.

Whereas, Oliver A. Miller, of Brockton, Massachusetts, is the owner of the entire right, title and interest in and to Letters Patent of the United States hereinafter enumerated; and

Whereas, the United Shoe Machinery Company, a corporation duly organized and existing under the laws of the State of New Jersey, of Paterson, in the State of New Jersey, is desirous of acquiring the entire right, title and interest of said Miller in and to the several Letters Patent of the United States of America hereinafter referred to, and inventions therein shown, described and claimed:

Now, this indenture witnesseth, that for and in consideration of the sum of One Dollar, and other good and valuable considerations, the receipt whereof in full is hereby acknowledged, the said Oliver A. Miller has sold, assigned and transferred, and by these presents does sell, assign and transfer unto the said United Shoe Machinery Company, its successors and assigns, the entire right, title and interest in and to the following inventions and Letters Patent, and any reissue, renewal or extension thereof, for, to and in the United States, and for, to and in no other place or places:

No. 319,354, granted to Oliver A. Miller, assignee of Abel D. Tyler, Jr., for Boot Tree, June 2, 1885;

No. 319,355, granted to Oliver A. Miller, assignee of Abel D. Tyler, Jr., for Boot Tree, June 2, 1885;

No. 319,356, granted to Oliver A. Miller, assignee of Abel D. Tyler, Jr., for Boot Tree, June 2, 1885;

No. 347,309, granted to Oliver A. Miller, assignee of Alexander R. Wellman, for Boot Tree, August 10, 1886;

No. 348,937, granted to Oliver A. Miller, assignee of Abel D. Tyler, Jr., for Boot or Shoe Tree, September 7, 1886;

No. 393,003, granted to Oliver A. Miller, assignee of Alfred B. Fowler, for Boot-treeing Machine, November 20, 1888;

No. 427,698, granted to Howard G. Locke and Brockton Last Company, for Boot or Shoe Tree, May, 13, 1890;

No. 440,788, granted to Oliver A. Miller, assignee of Jothan H. Burbank, Lovina J. Burbank, Administratrix, for Boot Tree, November 18, 1890;

No. 441,115, to Oliver A. Miller, assignee of F. L. Stone and Alexander R. Wellman, for Boot or Shoe Tree, November 18, 1890;

No. 441,116, granted to Oliver A. Miller, asignee of Alexander R. Wellman, for Boot Tree, November 18, 1890;

No. 441,117, granted to Oliver A. Miller, assignee of Alexander R. Wellman, for Boot Tree, November 18, 1890;

No. 442,033, granted to Oliver A. Miller, assignee of Alfred B. Fowler, for Boot-treeing Machine, December 2, 1890;

No. 442,034, granted to Oliver A. Miller, assignee of Alfred B. Fowler, for Boot-treeing Machine, December 2, 1890;

Design No. 26,040, granted to Oliver A. Miller, for Ironing Tool, September 15, 1896.

No. 612,114, granted to Oliver A. Miller, assignee of Howard G. Locke, for Boot or Shoe-Treeing Machine, October 11, 1898;

No. 618,700, granted to Oliver A. Miller, assignee of Don Curtis Luce, for Boot Tree, January 31, 1899;

And one-half of the entire right, title and interest in and to the following United States Letters Patent: —

No. 342,298, granted to Oliver A. Howe, for Boot or Shoe Tree-Foot, May 18, 1886;

No. 420,501, granted to Clarence A. Sumner and Oliver A. Miller, for Boot or Shoe-treeing Machine, February 4, 1890, and all my right title and interest in and to Letters Patent No. 452,142 dated May 12, 1891.

The same to be held and enjoyed by the said United Shoe Machinery Company, its successors and assigns, to the full end of the term for which said Letters Patent are or may be granted, as fully and entirely as the same would have been held and enjoyed by the said Oliver A. Miller had this assignment not been made.

And for the hereinbefore-mentioned consideration, the said

Oliver A. Miller hereby sells, assigns and transfers unto the said United Shoe Machinery Company, its successors and assigns, all claims and demands, both at law and in equity, that the said Oliver A. Miller has or may have for damages or profits accrued, or which may accrue, on account of any infringement of the said Letters Patent, prior to the date hereof; and the said Oliver A. Miller hereby authorizes and empowers the said United Shoe Machinery Company, its successors and assigns, to sue for and collect the same, using said Oliver A. Miller's name, if need be, as party plaintiff.

And the said Oliver A. Miller hereby covenants with the said United Shoe Machinery Company, its successors and assigns, that he has the lawful right to transfer the interests herein conveyed, in the manner and form as herein expressed, and that the same are free from all prior grants, mortgages, licenses, or other encumbrance, whatever.

In testimony whereof, the said Oliver A. Miller has hereunto set his hand and affixed his seal, this 11th day of February, 1902.

OLIVER A. MILLER [SEAL]

Personally appeared before me, the above-mentioned Oliver A. Miller, known to me to be the identical person described in, and who executed the above instrument, and acknowledged said instrument to be his own free act and deed, and that the same was executed and delivered by him for the considerations, purposes and uses therein expressed, on the day and year therein mentioned.

Given under my hand and seal, at Boston, Massachusetts, this 15th day of February, 1902.

William Quinby, Notary Public.

PLAINTIFF'S EXHIBIT 95.

[Put in Evidence, page 531.]

Know all Men by these Presents, That I, Oliver Ammi Miller, of Clarence Avenue, in the Borough of Northampton, England, Manufacturer, in consideration of One Dollar, and other valuable consideration to me paid by the United Shoe Machinery Company, a corporation duly organized and existing under the laws of the State of New Jersey, hereinafter called the United Company, the receipt whereof in full is hereby acknowledged, do hereby sell, assign and transfer unto the said United Company, all my right, title and interest in and to the treeing machines, stock in trade and effects owned by me and held on my account on and after February 1, 1902, by the O. A. Miller Last Company, Limited, under an agreement dated December 14, 1900, made between said O. A. Miller Last Company, Limited, and myself, a copy of which agreement and of the schedules referred to therein is hereunto annexed, and also all moneys now or hereafter owed me by said O. A. Miller Last Company, Limited, on account of sales made on or after said February 1, 1902, under said agreement, and hereby sell, assign and transfer unto said United Company the said agreement dated December 14, 1900, and all my right, title and interest therein accrued or accruing on or after February 1, 1902, reserving, however, to myself, my executors or administrators or assigns, the right to collect all moneys due me under said agreement for sales made prior to February 1, 1902, and I hereby agree on demand to execute, acknowledge and deliver to said United Company such further instruments, notices and papers and to do all such further acts as may be necessary or proper or required by said United Company to vest the said property and rights hereby sold and assigned to the said United Company, its successors or assigns, and hereby authorize the said United Company, its successors or assigns, in my name to carry out the provisions and terms of said agreement so far as the same are encumbent upon me, or so far as I am entitled to act thereunder with the right at any time

on or prior to July 1, 1902, to determine the said agreement in my name, as provided for therein.

To Have and to Hold the same unto the said United Company, its successors and assigns, to their own use and behoof forever.

The United Company is to hold me harmless from any debt or liability incurred on account of said business on or after the date of this agreement, and from all errors and shrinkage in the foregoing schedules.

In Testimony Whereof, the said Oliver Ammi Miller has set his hand and affixed his seal, and the said United Company has caused its corporate name to be signed and its corporate seal to be annexed by its assistant treasurer, to this instrument, and to another of like tenor and date, this eleventh day of February, 1902.

OLIVER AMMI MILLER [SEAL]
UNITED SHOE MACHINERY COMPANY [SEAL]
By Edwd. P. Hurd, Asst. Tres.

PLAINTIFF'S EXHIBIT 96.

[Put in Evidence, page 532.]

This Agreement made this 30th day of June A. D. 1902, by and between the owners and holders of shares of the capital stock of the Marlboro Awl & Needle Company, hereinafter called the Marlboro Company, a corporation organized and existing under the laws of the Commonwealth of Massachusetts, who are subscribers hereto and who may hereafter become parties or assent hereto, each for himself and not for the others, hereinafter called the Stockholders, parties of the first part; the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, hereinafter called the United Company, party of the second part; and William H. Coolidge of Newton, Massachusetts, hereinafter called the Trustee, party of the third part, Witnesseth:

Whereas the said United Company proposes to cause a corporation to be formed for the purpose of carrying on the business of manufacturing and dealing in Awls and the like, (which proposed corporation is hereinafter referred to as the new corporation.)

And whereas the Stockholders believe it will be for their advantage, and for the advantage of all the Stockholders of the said Marlboro Company, to sell and transfer all property of the said Marlboro Company to such new corporation, and to merge the business now carried on by the said Marlboro Company in the business of such new corporation, provided satisfactory terms can be made for so doing;

And Whereas the United Company has given favorable consideration to a proposal for causing such new corporation to acquire and take over the business and property of the said Marlboro Company upon certain terms hereinafter set forth, which proposal said Stockholders believe to be a fair and advantageous one for the Stockholders of the said Marlboro Company;

And Whereas the said William H. Coolidge has been requested by the said Stockholders and by the said United Company to under-

take the duties of Trustee, as hereinafter set forth, for the purpose of consolidating the interests of the said Stockholders, and of so disposing and controlling the affairs of the said Marlboro Company, that the Agreement between the said Stockholders and the said United Company and the sale and transfer of the property of the said Marlboro Company may be carried out with certainty and without delay after the organization of said new corporation;

And Whereas the said William H. Coolidge is willing to undertake said trust.

Now, Therefore, in consideration of the premises and of the covenants and agreements on the part of the respective parties herein contained, the said Stockholders, the said United Company and the said Trustee do hereby covenant and agree as follows: —

One. The said Stockholders, and each of them, shall immediately upon the execution of these presents deliver into the possession of the said Trustee the certificate or certificates covering all stock owned or controlled by them, or any of them, or standing in their respective names upon the books of the said Marlboro Company, duly endorsed in blank, to be held by the said Trustee for the purposes hereinafter set forth, and for the purpose of

Two. The said Stockholders, and each of them, who are officers of the said Marlboro Company, shall immediately tender in due form their resignations as such officers, to take effect upon acceptance thereof by the Board of Directors or by the Stockholders or otherwise, in accordance with the Charter and By-Laws of said Marlboro Company.

Three. The said Stockholders, and each of them, shall at any and all times upon request of the said Trustee, so far as is within their control or power as officers or otherwise, cause meetings of the Board of Directors and of the stockholders of the said Marlboro Company to be held, and shall cause all such votes to be passed, and all such acts to be authorized and done by the said Marlboro Company as shall be requested by the said Trustee for the accomplishment of the purposes hereof, and shall cause the resignations of officers of the said Marlboro Company to be accepted at such time or times and in such order as requested by the said Trustee,

and shall cause the vacancies made by said resignations to be filled by the election of such person or persons as shall be designated by the said Trustee.

Four. The United Company agrees that upon the execution of this instrument, and relying upon the covenants herein contained on the part of the said Stockholders and of the said Trustees, and upon the trust hereby created, it will cause other steps to be taken for acquiring other property for the purposes of said new corporation and otherwise for establishing conditions favorable for the establishment and conduct of a successful business by the said new corporation, and that it will within six months from the date of these presents cause such new corporation to be formed, with such purposes and powers and subject to such regulations as may seem to it advisable for developing and carrying on said business.

Five. The United Company agrees that after the organization of the said new corporation, and when the said new corporation is in condition to acquire property and to do business, it will cause an offer to be made by such new corporation to the said Marlboro Company to purchase the entire property, business and good-will of the said Marlboro Company, except cash on hand and accounts receivable, and free from any and all accounts or bills payable, and any and all other liabilities, and in payment for the same to cause to be issued capital stock of the said new corporation to an amount based upon the value, according to an inventory to be taken, of the merchandise and stock on hand, tools, machinery, fixtures and other like tangible property of the said Marlboro Company.

Six. The value of said merchandise and stock on hand, tools, machinery, fixtures, and other like tangible property shall be determined in the following manner: —

The said Marlboro Company shall appoint one person and the said new corporation shall appoint one person to investigate and make an inventory of all such property owned by the said Marlboro Company, which inventory shall be upon the same basis as an inventory of like property of the said Marlboro Company made during the month of May, A. D. 1902 by Mr. Daniels, acting in behalf of the said Marlboro Company, and Mr. Lamb, acting in

behalf of the said United Company, omitting, however, certain gas engines and special tools relating thereto in said inventory contained and therein valued at $617.00, which shall not be included in the offer of the said new corporation. (Copies of which inventory of May A. D. 1902 have been delivered to the United Company and to the said Trustee, and are identified by the signatures of George H. Daniels, Treasurer of the said Marlboro Company, and of C. H. Bayley, acting in behalf of the United Company, and of the said Trustee, together with the date of affixing such signatures, which is the same as the date of this instrument.

So far as relates to property included in said inventory of May, 1902, the values therein stated shall be binding upon the parties, and in the event of disagreement between the two persons appointed, as aforesaid, by the said Marlboro Company and by the said new corporation, as to the proper valuation to be placed upon any other property included in said transfer, a third person shall be appointed by the said Trustee to join with the persons previously appointed in determining said value, and the value of the property as determined by the representatives of the said Marlboro Company and of the said new corporation, or in case of disagreement and the appointment of a third person, as herein provided, the value as determined by the majority, shall be binding upon all parties.

Seven. The total amount of the capital stock of the said new corporation shall be such amount as the United Company shall consider desirable for the conduct of the business proposed to be carried on by the said new corporation, and it shall consist in equal amounts of Preferred Stock and of Common Stock.

The Preferred Stock shall be entitled out of the surplus net earnings, if sufficient, after all proper reservations for working capital, to a non-cumulative preferential dividend at the rate of six per cent (6%) per annum on the par value of said Preferred Stock, but each dividend period shall stand and be considered separately, and no deficiency for any dividend period shall be a charge upon or payable out of the net earnings of any other period, and no dividends shall be declared except from the surplus of net profits arising from the corporation's business.

If after appropriating the accumulated profits of the corporation in excess of the amounts reserved as working capital to the dividends above provided there remain further accumulated profits over and above the amounts reserved as working capital, dividends of said profits shall be declared upon the Common Stock up to at the rate of six per cent (6%) per annum on the par value of said Common Stock, and any further such profits remaining and applicable to dividends shall be distributed upon Preferred and Common Stock share and share alike.

Dividends in accordance with and subject to the foregoing provision shall be declared semi-annually in January and July of each year.

In the event of the dissolution of the corporation or the distribution of its assets the Preferred Stock shall be entitled to be paid in full before any payment shall be made on account of the Common Stock.

The Common Stock shall be subject to the prior rights of the Preferred Stock, as herein declared, but the shares of Preferred and Common Stock shall have equal voting powers.

Eight. The Preferred Stock of said new corporation shall be issued only for cash at par or for the acquiring of other properties at a fair and just valuation, determined so far as may be in a manner similar to that above provided for determining the value of the property of the said Marlboro Company.

Nine. The amount of capital stock which shall be issued by the said new corporation for the purchase of the business and assets of the said Marlboro Company shall be equal in par value of Preferred Stock to the value, determined in the manner hereinbefore set forth, of the merchandise and stock on hand, tools, machinery, fixtures and other like tangible property of the said Marlboro Company, and there shall likewise be issued to the said Marlboro Company an equal amount in par value of Common Stock, which Common Stock shall be transferred to the United Company, as hereinafter provided.

Ten. The said Stockholders, and each of them, and the said Trustee hereby covenant and agree that upon the receipt by the

officers of the said Marlboro Company of an offer as herein set forth from the said new corporation to purchase the entire business and assets of the said Marlboro Company, they, and each of them, will vote upon all stock then standing in their names, and will so far as is within their control or power or the control or power of any of them, cause all votes to be passed, and all instruments and acts to be authorized by the said Marlboro Company, and will do, and so far as is within their control or power will cause to be done all acts, and will execute, and so far as is within their control or power will cause to be executed all instruments, and will aid in every way and use their influence and best endeavors to cause said offer to be accepted by the said Marlboro Company and the business and property of the said Marlboro Company to be transferred and delivered to the new corporation.

Eleven. The said Trustee is hereby given full authority and power at any time or times when in his judgment it becomes necessary or desirable for the accomplishment of the purposes of this Agreement and for carrying out the full intent of this instrument, to cause any or all of the stock of the said Marlboro Company delivered to him under the provisions hereof to be transferred into his own or such other name or names as he shall consider desirable, and at any time to cause such meeting to be called and such votes to be passed as in his judgment are necessary or desirable for that end, and to cause the resignations of any or all officers to be accepted and the vacancies thus caused to be filled with such person or persons as he shall consider desirable, and in general to exercise all control and to perform or cause to be performed all acts, and execute or cause to be executed all instruments which in his judgment are necessary or desirable for the carrying out of the full intent of this undertaking, and the said Trustee hereby covenants and agrees that in all things he will faithfully and impartially perform the duties of this trust, and will in the exercise of his judgment do and cause to be done all things which he shall consider necessary or advantageous to be done for the accomplishment of the purposes herein set forth.

Twelve. Upon the acceptance of said offer by the said Marlboro

Company the officers of the said new corporation shall be forthwith notified, and all necessary or desirable instruments shall be executed to transfer to and vest in the said new corporation the title in and to the said business and property of the said Marlboro Company, and such instruments shall be delivered into the possession of the said Trustee for delivery to the said new corporation upon receipt by the said Trustee of certificates of the capital stock of the said new corporation equal in par value of Preferred shares to the value of the merchandise and stock on hand, tools, machinery, fixtures and other like tangible property of the said Marlboro Company determined in the manner above set forth, together with a like amount in par value of Common Stock.

Thirteen. Upon delivery to the said Trustee of the said stock in the new corporation, as aforesaid, the said Trustee shall hold the same in trust for the following purposes : —

1. He shall transfer and deliver or cause to be transferred and delivered the said Common Stock to the said United Company to its own use and behoof.

2. He shall hold the said Preferred stock for the use and subject to the instructions of the said Marlboro Company.

Fourteen. The said stockholders and the said Trustee shall cause a proper vote or votes to be passed by the said Marlboro Company that the said Preferred Stock be distributed among the share holders of the said Marlboro Company as their interests may appear upon delivery by said share holders of their stock duly endorsed in blank for delivery to the said new corporation, and requesting and authorizing the said Trustee to transfer the said Preferred Stock in accordance with the said vote.

Fifteen. Not less than five (5) or more than twenty (20) shares of Preferred Stock of the said new corporation shall be subscribed for and issued to the incorporators of the said new corporation, and shall be transferred to the said United Company or shall be held for the use of the said United Company by such person or persons as the United Company may desire. The said shares shall be paid for in cash at par.

Sixteen. It is agreed that the said United Company shall retain

control of the said new corporation, and that in all cases where Preferred Stock is issued as hereinbefore provided for the acquiring of properties for the purposes of the said new corporation Common Stock to a like amount in par value to the par value of the Preferred Stock necessary for such purpose shall be issued to the United Company as part of such transaction.

Seventeen. If at any time within three (3) years from the date of the transfer of the property of the said Marlboro Company, as aforesaid, to the said new corporation, any of the said Stockholders shall desire to sell or transfer the whole or any part of their holdings of stock in the said new corporation acquired by them under the provisions hereof, they shall offer the same to the United Company and the United Company shall (upon thirty days' notice) at any time within said three (3) years take such stock offered to it by the said Stockholders, or any of them, and shall pay for the same at par, and excepting as herein provided said stock shall not be transferred or transferable.

Eighteen. The United Company shall have the right at its option at any time within three (3) years from the date of said transfer of the property of the said Marlboro Company to take any or all of the stock of the new corporation held by the said Stockholders under the provisions hereof by paying for the same in cash at par, and said stock shall be received by the said Stockholders, and shall be held at all times subject to this right.

Nineteen. The United Company agrees that it will give to the said new corporation the benefit of its influence in the conduct of its business, and will give to the said new corporation such business as in the judgment of the said United Company can be done by the said Marlboro Company with equal advantage and on equally favorable terms as with any other manufacturer or dealer in such lines, but nothing herein contained shall be construed to bind the United Company to give to the said new corporation the whole or any part of its business in any line or lines, or to deal with the said new corporation in any wise, excepting in so far as it shall be deemed by the said United Company for its advantage to do, the intent of this provision being that the United Company

shall in good faith endeavor to so control and manage the said new corporation that its business shall be successful and profitable, and to that end shall on equally favorable terms in its discretion give preference to the said new corporation over other manufacturers or dealers in similar lines.

Twenty. Upon the completion of the sale and transfer of the property of the said Marlboro Company to the said new corporation, and receipt by the said Trustee of the consideration as hereinbefore set forth therefor, from the said new corporation, the stock of the said Marlboro Company delivered to him under the provisions hereof shall be held by him in trust for the said new corporation, and upon request by the said new corporation the said Trustee shall forthwith deliver the same to and cause the same to be transferred into the name of the said new corporation or its nominees to its or their own use and behoof.

Twenty-One. The said Trustee is hereby authorized and empowered to construe this Agreement, and he may supply defects and omissions herein, and in general may make such modifications as may be necessary or expedient in his judgment to carry out properly and effectively the purposes hereof.

Twenty-Two. Until the formation of said new corporation and the transfer to it of the property and business of the said Marlboro Company, the persons for the time being acting as officers of the said Marlboro Company or in charge of its affairs shall carry on or shall permit or cause to be carried on said business under its present management, in the manner and along the lines in which it is now doing business, but no new lines shall be developed and no radical changes shall be made in its conduct, and no steps shall be taken which shall materially increase or decrease the property and holdings of the said Marlboro Company otherwise than as such changes take place in the ordinary course of its business, the intent being that at the time of the sale and transfer of its business and property to the said new corporation the said Marlboro Company shall be in the same condition in which it now is, with such changes and modifications only as come about in the ordinary course of its business.

Twenty-Three. It is agreed that no expense for salaries, rent or other similar fixed charges are to be charged against the said new corporation beyond the present expenses of the said Marlboro Company for said purposes, excepting in so far as increase may become necessary by reason of the development of the business of the said new corporation and the greater volume of business carried on by the said new corporation.

Twenty-four. It is agreed that all fractional parts of shares of the capital stock of the said new corporation to which the several Stockholders of the said Marlboro Company shall be respectively entitled in the distribution of the said stock of said new corporation among the share holders of the said Marlboro Company according to their respective holdings of the capital stock of the said Marlboro Company, shall be transferred to the said United Company, and that the said United Company shall take and shall pay for the same at the par value thereof in cash, and the said Trustee shall be authorized and instructed to distribute said stock in accordance with the provisions of this Section, and to apply the amount received for the stock so transferred to the United Company among the share holders entitled thereto, in proportion to their respective interests in such shares.

In Witness Whereof the said Stockholders and the said Trustee have hereunto and to two other instruments of even date and like tenor with these presents set their hands and seals, and the United Shoe Machinery Company has caused this instrument to be signed in triplicate by Edwd. P. Hurd, its Asst. Treasurer and its corporate seal to be affixed the day and year first above written.

[Put in Evidence, page 532.]

Agreement made this 30 day of June A. D. 1902, by and between George H. Daniels, of Marlboro in the Commonwealth of Massachusetts, and the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, of Paterson, in said State of New Jersey.

Whereas, by instrument of even date with these presents, an agreement has been entered into by and between certain stockholders of the Marlboro Awl and Needle Company (hereinafter called the Marlboro Company), a corporation organized and existing under the laws of the Commonwealth of Massachusetts, and having its usual place of business at Marlboro, in said Commonwealth, party of the first part, the said United Shoe Machinery Company, party of the second part, and William H. Coolidge of Newton Mass., trustee, party of the third part, and a trust has been created for the purpose of accomplishing the sale and transfer of all the property and business of the said Marlboro Company to a new corporation to be formed for the purpose of carrying on business in lines similar to the lines of business now carried on by the said Marlboro Company.

And whereas the said Daniels (who is a party to said agreement) is the Treasurer of the said Marlboro Company and has been actively engaged in the management of the business of the said Marlboro Company, and is experienced in matters relating to the lines of business proposed to be carried on by the said New Corporation;

And whereas the said United Shoe Machinery Company will have a large interest in the said New Corporation and by reason of its holdings of stock will be in control of the business management of the said New Corporation.

And whereas the said United Shoe Machinery Company is desirous that the said New Corporation shall have the benefit of the experience and services of the said Daniels in the management of its affairs.

And whereas the said Daniels desires to be employed by the said New Corporation,

Now, therefore, it is agreed as follows: —

The said Daniels shall continue in his present relation to the said Marlboro Company until such time as the said New Corporation shall have been formed and the business and property of the said Marlboro Company shall have been transferred and delivered to the said New Corporation.

The said United Shoe Machinery Company, upon the formation of said New Corporation and the transfer to it of the business and property of the said Marlboro Company, shall cause the said Daniels to be employed by the said New Corporation in its management for a term of at least three years from the commencement of said employment, and for such further time as shall be mutually agreed upon between the said Daniels and the said New Corporation, and as compensation for his services will cause a salary to be paid to him by the said New Corporation at the rate of fifteen hundred and sixty dollars ($1560) per year.

The said Daniels hereby covenants and agrees that he will enter into the employment of the said New Corporation when formed and will remain in said employment for a term of at least three years from the commencement thereof, and for such further time as may be agreed upon by and between the said Daniels and the said New Corporation, and that during the continuance of such employment he will devote his entire time and best judgment and endeavor to the promotion and development and successful conduct of the business of said New Corporation along such lines as shall be decided upon by the said New Corporation, receiving from the said New Corporation in return for his services, a salary at the rate of fifteen hundred and sixty dollars ($1560) per year.

In Witness Whereof the said George H. Daniels has hereunto and to another instrument of even date and like tenor set his hand and seal, and the United Shoe Machinery Company has caused these presents to be executed in duplicate the day and year first above written.

by Edwd. P. Hurd, Asst. Treasurer.

H. G. Donham to U. S. M. Co.

PLAINTIFF'S EXHIBIT 98.

[Put in Evidence, page 534.]

Agreement made this twenty fifth day of September A. D. 1902, by and between Arthur Fuller, of Boston, in the County of Suffolk and Commonwealth of Massachusetts, and the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, of Paterson in said State of New Jersey, having a place of business in said Boston (hereinafter called the United Company), Witnesseth:

Whereas, the said United Shoe Machinery Company is engaged in the manufacture of, and is interested in other companies engaged in the manufacture of machinery of all kinds for use in the manufacture of boots and shoes, and of supplying the same to manufacturers of boots and shoes in all parts of the United States and in all other countries;

And Whereas, the said Fuller is the owner of the majority of the capital stock of the American Sole-Laying Machine Company, a corporation organized and existing under the laws of the State of Maine, of Portland in said State of Maine (hereinafter referred to as the American Company), which corporation is the owner of certain patent rights and other property relating to the manufacture of certain machines for use in the manufacture of boots and shoes, and has been engaged in the business of manufacturing such machines and supplying the same to manufacturers of boots and shoes, and the said Fuller controls the actions of the said Company, and is in position to acquire the entire capital stock of the said Company;

And Whereas, the said Fuller desires to convey or cause to be conveyed to the said United Company all the property, interests and rights owned or controlled by the said American Company, and the said United Company desires to acquire the same.

Now, Therefore, the said Fuller and the said United Company, each in consideration of the covenants and agreements on the part of the other herein contained, do hereby covenant and agree as follows:

One. The said Fuller shall execute and deliver or cause to be executed and delivered to the said United Company any and all instruments, and shall do and cause to be done any and all acts necessary or desired by the said United Company to vest in the said United Company, its successors and assigns, the entire right, title and interest in and to all property, interests and rights of every name and nature owned by the said American Company, except alone its franchise, and all property, interests and rights to which the said American Company is entitled or which the said American Company has any right by agreement or otherwise to acquire or take over, and the entire business of the said American Company, together with the good-will thereof, including herein all Letters Patent of the United States and of any and all foreign countries owned or controlled by the said American Company; all inventions and improvements; all applications for Letters Patent of the United States and of any and all foreign countries, and all rights in, to and under Letters Patent, applications and inventions; all contracts, interests, rights, machinery, machines in stock or in process of construction, stock on hand, manufactured, unmanufactured or in process of manufacture, tools, special tools, supplies, jigs, models, patterns, drawings, fixtures, furniture, duplicate parts, pads, all claims and demands under agreement or otherwise for the use of inventions or for infringement of Letters Patent owned or controlled by the said American Company, and any and all other property, interests and rights of the said American Company wherever the same or any part thereof may be situated.

Two. The said Fuller hereby covenants and agrees with the said United Company, its successors and assigns, that the said American Company is now the owner, free from any and all encumbrances, of the entire right, title and interest in, to and under Letters Patent of the United States, No. 536,352, and in and to the inventions and improvements as secured by said Letters Patent and that the

same shall be conveyed to the said United Company under the foregoing provisions hereof, free from any and all encumbrances.

Three. The said Fuller hereby covenants with and warrants to the said United Company, its successors and assigns, that on the twentieth day of June, A. D. 1902, the property owned by the said American Company included the property set forth in the Schedule hereto annexed and marked Schedule "A"; that no substantial change has been made in said property and the amounts and quantities thereof since said date, and that the property now owned by the said American Company and to be conveyed to the said United Company under the provisions hereof is the same, subject to slight changes therein as to the amounts and quantities of parts and supplies by way of subtraction therefrom and addition thereto, as it was on said twentieth day of June, A. D. 1902.

Four. The said Fuller shall discharge or shall cause to be discharged all outstanding debts and direct and contingent obligations of the said American Company, and under the advice and with the approval of counsel for the said United Company shall take or cause to be taken the necessary steps to wind up the business of and to cause the dissolution of the said American Company, or in case the said United Company shall so elect after the discharge of all debts and other direct or contingent obligations of the said American Company, shall assign or cause to be assigned, and shall cause to be transferred to the said United Company, or to the nominee or nominees of the said United Company the entire issued capital stock of the said American Company.

Five. The said United Company upon receipt by it of instruments satisfactory to it, transferring to it the aforesaid property, interests and rights, shall pay to the said Fuller the sum of Fifteen Hundred (1500) Dollars, and shall likewise pay to the said Fuller the cost, not exceeding One Hundred (100) Dollars for each machine of two (2) new Two-Last machines referred to in the Schedule hereto annexed and included in the transfer to the said United Company.

Six. In addition to the payments in the preceding paragraph hereof provided for, the said United Company, its successors or

assigns, shall pay to the said Fuller the sum of Thirty-five Hundred (3500) Dollars, upon the terms and in the manner hereinafter set forth.

Seven. The said United Company shall on the last day of June and December in each year, until said sum of Thirty-five Hundred (3500) Dollars shall be paid in full, cause an account to be taken of all machines manufactured and put out by it, or under its authority, of the types heretofore manufactured and sold by the said American Company embodying any one or more of the inventions and improvements covered by said Letters Patent of the United States, No. 536,352, and shall on or before the last day of the calendar month next succeeding each such accounting pay to the said Fuller a royalty of Fifty (50) Dollars for each such machine; Provided, however, that in no case shall the said Fuller receive more than said sum of Thirty-five Hundred (3500) Dollars in the aggregate, and that the United Company shall have the right at any time, at its option, to pay to the said Fuller the balance then unpaid of said sum of Thirty-five Hundred (3500) Dollars, and when the said Fuller shall have received in the aggregate said sum of Thirty-five Hundred (3500) Dollars, all further interests of the said Fuller hereunder shall cease and determine.

Eight. The said United Company hereby guarantees to the said Fuller that the amount of royalty payable to the said Fuller under the provisions hereunder after the year 1902, and until said sum of $3500.00 shall have been paid in full shall not be less than Five Hundred (500) Dollars in each calendar year, and on the last day of January in each calendar year, after January 1903, until said sum of Thirty-five Hundred (3500) Dollars shall have been paid in full, the said United Company shall pay to the said Fuller such sum, if any, as may be necessary to bring the total amount paid on account of the preceding calendar year up to the sum of Five Hundred (500) Dollars.

Nine. The said Fuller hereby covenants and agrees with the said United Company, its successors and assigns, that he will not at any time within ten (10) years from the date hereof directly or indirectly, individually, as partner, or as officer in any corporation, or

in any other manner in the United States or in any other country, enter into or be engaged in, or financially, or otherwise assist any person, firm or corporation in entering into or engaging in or developing any business which relates to or is in any way concerned in the manufacture or sale of any machinery or machines intended or adapted for use in the operation of laying or levelling the soles of boots or shoes.

In Witness Whereof, the said Fuller has hereunto and to another instrument of even date and like tenor set his hand and seal, and the said United Company has caused this instrument to be signed in duplicate by Edward P. Hurd its Assistant Treasurer and its corporate seal to be affixed the day and year first above written.

PLAINTIFF'S EXHIBIT 99.

[Put in Evidence, page 537.]

This Agreement made this 1st day of October, A. D. 1902, by and between William J. Young, of Peabody, in the County of Essex and Commonwealth of Massachusetts, and the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, of Paterson, in said State of New Jersey, having a place of business in Boston in said Commonwealth of Massachusetts (hereinafter called the United Company), Witnesseth:

Whereas, the said United Company is engaged in the manufacture of machinery of all kinds for use in the manufacture of boots and shoes, and in putting the same out to manufacturers of boots and shoes, and to others, in all parts of the United States and in other countries, and is largely interested in the business of other companies engaged in like lines of business in the United States and in other countries;

And Whereas the said Young is the inventor of certain new and useful improvements in machines and devices for use in the manufacture and preparation of heels, for which Letters Patent of the United States and of other countries have been granted, and for which other Letters Patent may hereafter be granted, and is skilled in the art which pertains to machines and devices for such purposes and may hereafter make other inventions in said art, and is engaged in the manufacture of machines for use in the manufacture or preparation of heels, and in putting the same out to manufacturers of heels;

And Whereas the said Young desires to sell and transfer to the said United Company, and the said United Company desires to acquire, upon the terms and conditions hereinafter set forth, the entire right, title and interest in, to and under any and all Letters Patent of any countries other than the United States and Dominion of Canada which have been granted or may hereafter be granted for inventions or improvements relating or pertaining in any way to machinery or devices intended or adapted for use in the manu-

facture or preparation of heels heretofore made or which may hereafter within the term of fifteen (15) years from the date of these presents be made by the said Young, and in and to all such inventions and improvements in any and all countries other than the United States and the Dominion of Canada.

Now, Therefore, the said Young and the said United Shoe Machinery Company, each in consideration of the covenants on the part of the other herein contained, do hereby covenant and agree as follows: —

One. The said Young hereby grants, sells, assigns, transfers and sets over unto the said United Company, its successors and assigns, and shall hereafter upon request execute and deliver or cause to be executed and delivered to the said United Company any and all further instruments, and will do or cause to be done any and all further acts necessary or desired by the said United Company to fully vest and confirm the same to the said United Company, its successors and assigns, its or their nominee or nominees, the full and exclusive right, title and interest in all countries other than the United States and the Dominion of Canada in and to any and all inventions and improvements heretofore made by the said Young or which may hereafter at any time within the term of fifteen (15) years from the date of these presents be made by the said Young, relating or pertaining in any way to machinery or devices intended or adapted for use in the manufacture or preparation of heels, and the entire right, title and interest, free from any and all encumbrances, in, to and under any and all Letters Patent of any and all countries other than the United States and the Dominion of Canada which have been granted or may hereafter be granted for such inventions or improvements, and especially, shall execute or cause to be executed any and all instruments, and shall perform and caused to be performed any and all acts necessary or convenient or desired by the said United Company, to fully vest and confirm in the said United Company, its successors and assigns, its or their nominee or nominees, the entire right, title and interest, free from any and all encumbrances, in, to and under the Letters Patent referred to in the Schedule hereto annexed and

marked Schedule "A"; and the exclusive right, title and interest in all countries other than the United States and the Dominion of Canada in and to the inventions and improvements therein shown or described; and the entire right, title and interest in, to and under any and all Letters Patent of any and all countries other than the United States and the Dominion of Canada which have been or may hereafter be granted for the said inventions and improvements or any of them.

Two. The said Young hereby grants, sells, assigns, transfers and sets over unto the said United Company, its successors and assigns, and shall hereafter upon request execute and deliver or cause to be executed and delivered any and all further instruments, and will do or cause to be done any and all further acts necessary or convenient or desired by the said United Company to fully vest and confirm the same to the said United Company, its successors and assigns, its or their nominee or nominees, all right, title and interest, so far as the same relates or pertains to or may be or become useful in any country or countries other than the United States and the Dominion of Canada, had by the said Young, or which the said Young may at any time hereafter within the term of fifteen (15) years from the date of these presents have, or which the said Young has or may at any time hereafter within the term of fifteen (15) years from the date of these presents have any right by agreement or otherwise to acquire or take over in and to any and all inventions and improvements made or which may hereafter be made, relating or pertaining in any way to machinery or devices intended or adapted for use in the manufacture or preparation of heels, and in, to and under any and all Letters Patent of any and all countries other than the United States and the Dominion of Canada heretofore granted, or which may hereafter be granted for such inventions and improvements.

Three. The said Young hereby covenants and agrees with the said United Company, its successors and assigns, that without further or other consideration than that herein expressed he will forthwith fully and particularly disclose to the officers and patent solicitors of the said United Company all inventions and improvements

heretofore made by him and all rights, title and interests in inventions and improvements of others, made or to be made, now owned or possessed by him, or which he has any right by agreement or otherwise to acquire or take over, which relate or pertain in any way to machinery or devices intended or adapted for use in the manufacture or preparation of heels, and that hereafter upon making any inventions or improvements relating or pertaining in any way to machinery or devices intended or adapted for use in the manufacture or preparation of heels, or acquiring any right, title or interest in or to, or any right to acquire or take over any such inventions or improvements of others made or to be made, or any interest therein, or acquiring any right, title or interest in, to or under, or any right to acquire or take over any Letters Patent (or any interest therein) of any country other than the United States or the Dominion of Canada for such inventions or improvements at any time within the term of fifteen (15) years from the date of these presents, he will forthwith disclose the same to the said United Company, its successors or assigns, its or their officers and patent solicitors; that he will repeat such disclosures when and as often as requested by the said United Company, its successors or assigns; will execute and deliver any and all assignments, application papers and other instruments, and will do or cause to be done all acts necessary or convenient or desired by the said United Company, or by its successors or assigns, to vest in the said United Company, its successors and assigns, its or their nominee or nominees, the full and complete right, title and interest in all countries other than the United States and the Dominion of Canada in, to and under said inventions, improvements, Letters Patent, and such interests therein and rights thereunder; and, so far as is or shall be within his power, to enable the said United Company, its successors or assigns, to obtain Letters Patents covering such inventions and improvements, or any thereof, in any and all countries other than the United States and the Dominion of Canada, in which the said United Company, its successors or assigns, shall desire to obtain Letters Patent therefor, and to enjoy the full benefit of such inventions, improvements, Letters Patent and interests and rights.

Four. The said Young hereby sells, assigns, transfers and sets over unto the said United Company, its successors and assigns, all business and good-will which he now possesses or enjoys, relating or pertaining in any way to the business of manufacturing or dealing in machinery or devices intended or adapted for use in the manufacture of heels in any and all countries other than the United States and the Dominion of Canada, and agrees that upon receipt by him of any orders for such machines or devices at any time within the term of fifteen (15) years from the date of these presents he will promptly and without further consideration communicate and transfer the same to the said United Company, its successors or assigns.

Five. The said Young does hereby further covenant with the said United Company, its successors and assigns, that he will not without the consent in writing of the said United Company, its successors or assigns, at any time prior to fifteen (15) years from the date of these presents, directly or indirectly, individually, as partner, or as officer in any corporation, or in any other manner enter into or be engaged in, or financially or otherwise assist any person, firm or corporation in engaging in or developing or carrying on in any country other than the United States and the Dominion of Canada any business which consists in whole or in part in or relates to or is concerned in any way in the manufacture or lease or sale of machinery or devices intended or adapted for use in any way in the manufacture or preparation of heels.

Six. The United Company, provided the said Young shall faithfully keep and perform all covenants and agreements herein contained or implied on his part to be kept and performed, shall pay to the said Young, his heirs, executors, administrators and assigns, in accordance with and subject to the provisions herein contained, the sum of Fourteen Thousand (14,000) Dollars in installments as hereinafter set forth. And assignment or alienation of said sum, or any part thereof, shall be subject and shall be expressed to be subject to all equities, rights and privileges, by way of set-off, counter-claim or otherwise of the said United Company and to the performance of all covenants for the benefit of said United Com-

pany herein contained or implied, and the said United Company shall in no case be bound to recognize any assignment or alienation of said sum, or any part thereof, unless notice of such assignment or alienation in writing, signed by the said Young and by the said assignee, and containing an order on the part of the said Young to pay to the said assignee, shall be received by the said United Company within five (5) days from the date of such assignment or alienation.

Seven. Said sum of Fourteen Thousand (14,000) Dollars shall be paid as follows, to wit:—

On or before the first day of December in each of the years 1903, 1904, 1905 and 1906, the sum of Three Thousand (3000) Dollars, and on or before the first day of December in the year 1907, the sum of Two Thousand (2000) Dollars; provided, however, that the said United Company shall have the right at any time, at its option, to pay to the said Young the balance then unpaid of said sum of Fourteen Thousand (14,000) Dollars, less a discount from the amount then unpaid at the rate of five per cent. (5%) per annum; and further provided that the amount by which the prices charged for all machines purchased from the said Young by the said United Company, or by any of its associate or subsidiary companies as hereinafter provided (less discounts for cash if such discounts are actually taken) exceeds the manufacturing cost of such machines shall as hereinafter provided be deducted from the amounts to be paid to the said Young, his heirs, executors, administrators and assigns, hereunder,

Eight. The said Young shall fill any and all orders which he may receive from the said United Company, or its subsidiary or associate companies, at any time within five (5) years from the date hereof, for Compressing Machines for export to such countries other than the United States and the Dominion of Canada, as the said United Company, its subsidiary or associate companies, may desire, of the type now manufactured by the said Young; and in case the said United Company or its associate or subsidiary companies shall order any such machine or machines from the said Young and shall desire to have the same constructed embodying

therein changes and modifications from the said machines as now constructed, the said Young shall fill such orders with machines embodying such changes and modifications; provided, however, that if at any time the said Young shall discontinue the manufacture of Compressing Machines, he shall, upon six (6) months notice to the said United Company of his intention so to discontinue, be relieved from any further obligation hereunder to fill orders for such machines. Such notice thall take effect upon the expiration of six (6) months from the receipt thereof by the said United Company.

Nine. All machines purchased from the said Young by the said United Company, or by any of its associate or subsidiary companies under the foregoing provisions hereof shall be charged to the said purchaser at the rate at which like machines are now charged to the said United Company, its subsidiary and associate companies, subject, however, to additions thereto or deductions therefrom, equal to any differences in manufacturing cost caused by reason of any changes or modifications from the machines as now constructed made at the request of said United Company, its subsidiary or associate companies.

Ten. On the first day of December in each year, until the said sum of Fourteen Thousand (14,000) Dollars, less deductions therefrom, as herein provided, shall have been paid in full to the said Young, his heirs, executors, administrators, or assigns, an account shall be taken to determine the number of machines, if any, which have prior to each such accounting been ordered by the said United Company, or its subsidiary or associated companies, and have been or are to be supplied by the said Young hereunder on account of which deduction as herein provided has not already in some prior accounting been made and the manufacturing cost of such machines shall be deducted from the charging price as hereinbefore provided therefor (less discounts for cash if such discounts are actually taken) and the difference between such manufacturing cost and such charging price shall be deducted, as herein provided from the amount payable hereunder by the said United Company to the said Young, his heirs, executors, administrators or assigns. Such de-

duction on account of each machine so ordered shall be made from the amount of the installment hereinbefore provided, next to become payable after the date on which such machine is ordered so that the amounts payable to the said Young, his heirs, executors, administrators and assigns hereunder on the respective dates hereinbefore provided for the payment of said several installments shall be the respective amounts hereinbefore provided less in each case an amount equal to the sum by which the amounts charged as aforesaid for all such machines so ordered prior to said respective dates, and on account of which such deduction has not already been made, exceeds the manufacturing cost of such machines.

In Witness Whereof the said William J. Young has hereunto and to another instrument of even date and like tenor set his hand and seal, and the said United Shoe Machinery Company has caused this instrument to be signed in duplicate by George W. Brown its Treasurer and its corporate seal to be affixed the day and year first above written.

WILLIAM J. YOUNG [SEAL]

[SEAL] UNITED SHOE MACHINERY COMPANY

George W. Brown, Treasurer.

In the presence of H. G. Donham

SCHEDULE "A".

British Letters Patent, No. 12918, granted June 21, 1899 to Alfred George Brookes upon disclosure from abroad by William J. Young for Improvements in Heel Compressing Machines.

Letters Patent of the Empire of Germany, No. 133,038, dated July 5, 1899, granted to Deutsche Vereinigte Schuhmaschinen Gesellschaft m. b. H., in Frankfurt a. M., and described as follows: —

Zuführungs- und Ablegevorrichtung für Absatzpressen.

PLAINTIFF'S EXHIBIT 100.

[Put in Evidence, page 540.]

This Agreement made this twentieth day of November A. D. 1902, by and between George A. Smith, of Philadelphia, in the County of Philadelphia and Commonwealth of Pennsylvania, and the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, of Paterson, in said State of New Jersey, and having a place of business in Boston, Massachusetts (hereinafter called the United Company), Witnesseth:

That Whereas the United Company is engaged in the manufacture of machines, appliances, devices and supplies for use in the manufacture of boots and shoes and in the business of supplying such machines, appliances, devices and supplies to manufacturers of boots and shoes and to others in all parts of the United States and in other countries;

And Whereas the said Smith is the owner of the majority of the capital stock of The George A. Smith Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, and having a place of business in said Philadelphia (hereinafter called the Smith Company), which corporation is engaged in the business of manufacturing and dealing in machinery, appliances, devices and supplies used by manufacturers and dealers in boots or shoes and by others;

And Whereas the said Smith desires to assign, transfer and deliver and cause to be assigned, transferred or delivered to the United Company the property, assets and business of the said Smith Company, as hereinafter set forth, and the entire capital stock of the said Smith Company, and the said United Company desires to acquire the same upon the terms hereinafter set forth.

Now, Therefore, the said George A. Smith and the said United Company, each in consideration of the covenants and agreements on the part of the other herein contained, do hereby covenant and agree as follows:—

One. The said Smith shall upon demand, after the execution of

these presents, execute and deliver, or shall cause to be executed and delivered any and all instruments and shall do and cause to be done all acts necessary or desired by the said United Company to convey and transfer to and fully and completely vest in the said United Company, its successors and assigns, its nominee or nominees, the full and complete right, title and interest in and to all the property, assets and business of the said Smith Company, including stock in trade, furniture, fixtures, orders, the good-will of said business and any and all other property and assets of every name and nature, excepting its franchise and excepting its accounts, notes and bills receivable, claims and choses in action and excepting also any portion or portions of its stock in trade, fixtures or furniture which, as hereinafter provided, shall not be included in the inventory of such stock in trade, fixtures and furniture hereinafter provided to be made.

Two. As soon as convenient after the execution of these presents an inventory shall be taken by the said George A. Smith and by a representative of the said United Company to be appointed for that purpose, of the stock in trade, furniture and fixtures of the said Smith Company, setting forth in detail such property, together with a valuation of the several items contained in such inventory at such valuation as shall be agreed upon by and between the said Smith and the said representative of the said United Company,

Provided however, that if the said United Company shall elect not to acquire or if the said Smith and the said representative of the United Company shall be unable to agree upon a valuation to be placed upon any portion or portions of said stock in trade, fixtures and furniture, such portion or portions shall not be included within such inventory and shall be excepted from the property hereby agreed to be conveyed.

Three. The said Smith shall provide for the discharge of all outstanding indebtedness and direct or contingent obligations of the said Smith Company, and shall deliver to the said United Company duly endorsed in blank the certificates representing the total issued and outstanding stock of the said Smith Company.

Four. The said Smith hereby covenants and agrees with the said United Company, its successors and assigns, that he will not at any time within ten (10) years from the date of these presents, within the United States or in any other country, directly or indirectly, individually, as partner, or as an officer or stockholder in any corporation or otherwise (excepting in so far as he may be interested in or may be employed by the said United Company) without the written consent of the said United Company enter into or be engaged in or financially or otherwise assist any person, firm or corporation in entering into or developing or carrying on any business which relates or pertains in any way to the manufacture or sale or lease of any machines, machinery, devices or appliances intended or adapted for use in any way in the manufacture of boots or shoes, or any business which relates to or is concerned in the manufacture or sale or otherwise supplying to manufacturers of boots or shoes or to others, supplies intended or adapted for use in or about or in connection with any such machines, machinery, devices or appliances, or any business which will in any way compete with or interfere with any business carried on by the said United Company or by any company in which the said United Company is the legal or equitable owner of the majority of the capital stock; provided, however, that nothing herein contained shall interfere with the right of said Smith to engage in any business in any line or lines of shoe manufacturers' supplies or findings, which at the time of his entering into or engaging in such business are not dealt in by the said United Company or by any company in which the said United Company is legal and equitable owner of the majority of the capital stock.

Five. The United Company, upon receipt by it of all instruments of assignment and transfer and other instruments, and the performance of all acts necessary or desired by the United Company to vest in the said United Company, its successors and assigns, its nominee or nominees, good, clear and complete title in and to all property, assets, business and good-will of the said Smith Company (excepting its franchise and excepting its accounts, notes and bills receivable, claims and choses in action and excepting also

any portion or portions, if any, of its stock in trade, furniture and fixtures as shall be excepted under the provisions hereinbefore contained), and upon delivery to the said United Company of all such property and also of the certificates representing the entire capital stock of the said Smith Company duly endorsed in blank shall pay to the said Smith an amount equal to the valuation as fixed by the inventory above provided for of all the stock in trade, furniture and fixtures included therein.

Six. Inasmuch as the said Smith is the owner of the building and premises No. 415 Arch Street in Philadelphia, now occupied by the said Smith Company for the purposes of the business hereby agreed to be conveyed to the said United Company, and it is desired that the said United Company shall continue to occupy said building and premises for the purpose of carrying on upon said premises such part of the business formerly carried on by the said Smith Company as it shall deem advisable together with such extensions thereof and additions thereto as it may consider advisable, it is hereby agreed that the said Smith, as owner, shall lease to and the said United Company shall accept from the said Smith a lease of the said building and premises, No. 415 Arch Street in said Philadelphia for the term of from , paying to the lessor rental therefor at the annual rate of $2500.00.

Seven. The said United Company agrees that in case the said Smith so desires, the United Company will use its best efforts for the collection of the outstanding accounts, notes and bills receivable of the said Smith Company in the ordinary course of business without charge to the said Smith in excess of the actual expense thereof to the United Company.

In Witness Whereof the said George A. Smith has hereunto and to another instrument of even date and like tenor to these presents set his hand and seal, and the said United Shoe Machinery Company had caused these presents to be signed in duplicate by George W. Brown, its Treasurer, and its corporate seal to be affixed the day and year first above written.

GEORGE A. SMITH

UNITED SHOE MACHINERY CO.

George W. Brown, Treasurer.

PLAINTIFF'S EXHIBIT 101.

[Put in Evidence, page 542.]

This Agreement made this eighteenth day of December, A. D. 1902, by and between George A. Emerson and William R. Sampson, both of Lynn, in the County of Essex and Commonwealth of Massachusetts, copartners, doing business in said Lynn under the name and style of George W. Emerson & Company, and the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, of Paterson, in said State of New Jersey, having a place of business in Boston in said Commonwealth of Massachusetts (hereinafter called the United Company), Witnesseth:

That Whereas the said Emerson and Sampson as copartners as aforesaid are engaged in the business of manufacturing and dealing in machinery, appliances, devices and supplies intended or adapted for use in the manufacture of boots and shoes and otherwise, and are, as copartners aforesaid and individually, the owners of machinery, tools, fittings and other equipment useful in connection with said business, and of such machinery, appliances, devices and supplies, manufactured or in process of manufacture, and are likewise the owners of certain inventions and improvements, and of Letters Patent and applications for Letters Patent of the United States and of other countries covering the same;

And Whereas the United Company is engaged in the manufacture of machines, appliances, devices and supplies for use in the manufacture of boots and shoes, and in the business of supplying such machines, appliances, devices and supplies to manufacturers of boots and shoes in all parts of the United States and in other countries;

And Whereas the said Emerson and Sampson desire to sell, assign, transfer, set over and deliver to the said United Company, and the said United Company desires to acquire all and entire the property, assets, interests and rights of every name and nature relating or pertaining in any way to the said business heretofore carried on by the said Emerson and Sampson as copartners as

aforesaid, and all property, assets, interests and rights of every name and nature owned or controlled by the said Emerson and Sampson, or by either of them, relating or pertaining in any way to machinery, appliances, devices and supplies intended or adapted for use in the manufacture of boots and shoes or to the manufacture thereof, or to the business of dealing therein.

Now, Therefore, the said George A. Emerson and the said William R. Sampson, and each of them, in consideration of the covenants and agreements on the part of the said United Company herein contained, and the said United Company in consideration of the covenants and agreements on the part of the said Emerson and the said Sampson, and each of them, herein contained, do hereby covenant and agree as follows: —

One. The said Emerson and Sampson do hereby sell, assign, transfer and deliver unto the said United Company, its successors and assigns, and they and each of them shall hereafter if requested by the said United Company, its successors or assigns, execute and deliver and cause to be executed and delivered any and all instruments, and shall perform and cause to be performed any and all acts necessary or desired by the said United Company, its successors or assigns, to fully and completely confirm in the said United Company, its successors and assigns, full and complete title thereto, all property, assets, interests and rights of every name and nature (except alone bills, notes and accounts receivable) owned or controlled by the said Emerson and Sampson as copartners as aforesaid, and all property, assets, interests and rights of every name and nature of the said Emerson and Sampson, or either of them, relating or pertaining in any way to machinery, appliances, devices or supplies intended or adapted for use in the manufacture of boots and shoes or to the manufacture thereof, or to the business of dealing therein, including herein all Letters Patent of the United States and of any and all foreign countries, all inventions and improvements, all applications for Letters Patent of the United States and of any and all foreign countries, and all rights in, to and under such Letters Patent, applications and inventions, all leases, rights, machines, appliances, devices and supplies in stock or in process of

construction, stock on hand manufactured, unmanufactured or in process of manufacture, machinery, tools, special tools, jigs, patterns, drawings, fixtures, duplicate parts, supplies, the entire equipment and fittings of the plant heretofore occupied by the said George W. Emerson & Company, all orders on hand and the goodwill of the business which has heretofore been carried on by the said copartnership, all claims and demands under agreement or otherwise for the use of inventions or for infringement of Letters Patent, and any and all other property, assets, interests and rights of every name and nature (except notes, bills and accounts receivable) of the said George W. Emerson & Company, and all other property, interests and rights of every name and nature of the said Emerson and Sampson, or either of them, relating or pertaining in any way to machinery, appliances, devices or supplies intended or adapted for use in the manufacture of boots and shoes or to the manufacture thereof, or to the business of dealing therein.

Two. The said Emerson and Sampson do especially hereby sell, assign, transfer and deliver unto the said United Company, its successors and assigns, all of the property referred to in an inventory which has been made of the machinery and stock on hand of the said George W. Emerson & Company, a copy of which has been furnished to the said United Company, and a summary of which is set forth in the schedule hereto annexed and marked "Schedule A," and the said Emerson and Sampson, and each of them, do hereby covenant with and warrant to the said United Company, its successors and assigns, that they are the sole and exclusive owners of all the property set forth in said inventory, that the said property is free from all encumbrances, and that they have good right to sell and assign the same as aforesaid, and that they and each of them will warrant and defend the same against the lawful claims and demands of all persons.

Three. The said Emerson and the said Sampson, and each of them, do hereby especially grant, sell, assign, transfer and set over unto the said United Company, its successors and assigns, the entire right, title and interest had by the said Emerson and Sampson, or by either of them, or which they or either of them have

any right by agreement or otherwise to acquire or take over in and to any and all inventions and improvements made or to be made relating or pertaining in any way to machinery, appliances, devices or supplies intended or adapted for use in the manufacture of boots or shoes, and the entire right, title and interest had by the said Emerson and Sampson, or by either of them, in, to and under any and all Letters Patent of the United States and of any and all foreign countries for such inventions and improvements, and in, to and under any and all applications for Letters Patent of the United States and of any and all foreign countries therefor, including herein especially the entire right, title and interest, free from any and all encumbrances, in, to and under the Letters Patent of the United States, and of other countries, and the applications for Letters Patent referred to in the schedule hereto annexed and marked "Schedule B," and in and to the inventions and improvements therein shown or described, and in, to and under any and all Letters Patent to the United States, and of any and all foreign countries which have been or may hereafter be granted upon such inventions and improvements, or any of them.

Four. The said Emerson and Sampson, and each of them, do hereby covenant with and warrant to the said United Company, its successors and assigns, that they are the sole and exclusive owners of the entire right, title and interest in, to and under each and every of the Letters Patent of the United States and of other countries, and of the applications for Letters Patent referred to in said "Schedule B," and the entire right, title and interest in and to the inventions and improvements therein shown or described; that they have good right to sell and assign the same, and that they will warrant and defend the same against the lawful claims and demands of all persons. And the said Emerson and Sampson, and each of them, do further covenant and agree that upon request of the United Company, its successors and assigns, they will execute and deliver and will cause to be executed and delivered any and all instruments, and will perform and cause to be performed any and all acts necessary or desired by the said United Company, its successors or assigns, to vest and confirm in the said United Company,

its successors and assigns, the entire right, title and interest, free from any and all encumbrances, in, to and under each and every of said Letters Patent, applications, inventions and improvements, and to enable the said United Company, its successors and assigns, to show good and complete title to each of said Letters Patent and applications upon the records of the Patent Offices of the respective countries in which the said Letters Patent have been granted and the said applications filed, or otherwise to dispose said title as the said United Company, its successors and assigns, may desire; and, further, that they will execute and deliver and will cause to be executed and delivered to the said United Company, its successors and assigns, all applications and other instruments, and will do and cause to be done all acts which the said United Company, its successors or assigns, may desire to enable the said United Company, its successors and assigns, to apply for and to obtain for the sole benefit of the United Company, its successors and assigns, Letters Patent covering said inventions and improvements, or any of them, in any and all countries in which the said United Company, its successors and assigns, may desire to obtain Letters Patent covering the same, and to invest and confirm the full and complete title to all such Letters Patent in the said United Company, its successors and assigns.

Five. The said Emerson and the said Sampson, and each of them, do hereby grant, sell, assign, transfer and set over unto the said United Company, its successors and assigns, the entire right, title and interest in and to any and all inventions and improvements which they or either of them may make, own or have any right by agreement or otherwise to acquire or take over at any time within fifteen (15) years from the date of these presents relating or pertaining in any way to machinery, appliances, devices or supplies intended or adapted for use in the manufacture of boots and shoes, and the entire right, title and interest in and to any and all Letters Patent of the United States and of any and all foreign countries covering the same.

Six. The said Emerson and Sampson, and each of them, do hereby covenant and agree with the said United Company, its suc-

cessors and assigns, that hereafter upon making any inventions or improvements in or relating to machinery, appliances, devices or supplies intended or adapted for use in the manufacture of boots or shoes at any time within fifteen (15) years from the date of these presents, or within said period acquiring any right, title or interest in any such inventions or improvements, they, and each of them, shall forthwith disclose the same to the said United Company, its successors and assigns, its and their officers and patent solicitors; will repeat such disclosures when and as often as requested by the said United Company, its successors or assigns; will execute and deliver any and all assignments, application papers and other instruments, and will do any and all acts necessary or desired by the said United Company, its successors or assigns, and to vest in the said United Company, its successors and assigns, the full and complete right, title and interest in, to and under said inventions, improvements, Letters Patent and applications for Letters Patent, and such interests therein and rights thereunder, and to enable the said United Company, its successors or assigns, to obtain Letters Patent covering such inventions and improvements or any thereof in the United States and in any and all foreign countries in which the said United Company, its successors or assigns, shall desire to obtain Letters Patent therefor, and to enjoy the full benefit of such inventions, improvements, Letters Patent, applications, interests and rights.

Seven. The said Emerson and the said Sampson, and each of them, hereby covenant and agree with the said United Company, its successors and assigns, that they will not, nor will either of them, without the consent in writing of the said United Company, at any time prior to fifteen (15) years from the date of these presents, directly or indirectly, individually, as partner, or as officer in any corporation, or in any other manner (excepting in so far as they or either of them may be interested in or employed by the said United Company, its successors or assigns), enter into or be engaged in or financially or otherwise assist any person, firm or corporation in entering into or developing or carrying on any business which relates to or is in any way concerned in the manufac-

ture or sale of or otherwise dealing in any machinery, appliances, devices or supplies intended or adapted for use in the manufacture of boots and shoes, or in any business which will in any way interfere with or compete with any business carried on by the said United Company, its successors or assigns.

Eight. All right, title and interest of the said Emerson and Sampson, or either of them, in and to all burnishing machines put out by the said George W. Emerson & Company, and which on the tenth day of December, A. D. 1902, were not paid for are hereby transferred to the said United Company, its successors and assigns, together with all amounts due or to become due as payment therefor, and all claims on account thereof; and the said Emerson and Sampson do hereby irrevocably constitute and appoint the said United Company, its successors and assigns, the true and lawful attorney of them, and each of them, to institute in the name of the said Emerson and Sampson, or otherwise, such proceedings at law or in equity as the said United Company may deem desirable to secure, protect and enforce the same.

Nine. It is agreed that between the eighteenth day of December aforesaid and the date of actual delivery of the property hereby agreed to be conveyed to the said United Company, all business relating to the property hereby conveyed or agreed to be conveyed shall be carried on for the benefit of the said United Company, and that all amounts received from the sale of goods included within the terms hereof, or otherwise from the conduct of said business after the said eighteenth day of December, A. D. 1902, and all amounts collected after said tenth day of December, A. D. 1902, on account of the burnishing machines above referred to put out prior to said tenth day of December and not then paid for, shall be turned over to the said United Company, and that all amounts payable on account of goods sold or delivered or business done since said eighteenth day of December, A. D. 1902, shall be payable to the said United Company, the said United Company assuming the expenses of conducting such business from and after the said eighteenth day of December.

Ten. The said United Company shall upon receipt by it of all

instruments duly executed which shall be immediately requested by it for the purpose of carrying out the foregoing terms of this instrument, and upon delivery to it of the property hereinbefore agreed to be conveyed, pay to the said Emerson and Sampson jointly the sum of Forty-one Thousand, Five Hundred Dollars ($41,500). Such payments shall not, however, relieve the said Emerson and Sampson from any obligation to execute and deliver and to cause to be executed and delivered any and all further instruments, and to do and cause to be done any and all further acts necessary or desired by the said United Company, its successors or assigns, to carry out the full purpose and intent of this instrument, but the said Emerson and Sampson shall continue to be bound at any and all times hereafter to execute and cause to be executed all such further instruments, and to do and cause to be done all such further acts.

In Witness Whereof the said Emerson and Sampson have caused this instrument to be signed in the name of the said George W. Emerson & Company by George A. Emerson thereto duly authorized, and have hereunto set their respective hands and seals, and the said United Shoe Machinery Company has caused these presents to be signed by Sidney W. Winslow its President and its corporate seal to be hereunto affixed the day and year first above written.

SCHEDULE "A"

Summary of Inventory — To which reference may be had.

Pulleys	Finished Parts
Belting	Shafting
Machines	Hangers

Brushes	Couplings
Splitter Knives	Machinery
Parts	Tools
Composition Castings	Fixtures
Iron Castings	Patterns
Bar steel	Furniture

SCHEDULE "B"

Letters Patent of the United States.

No. 11,580, (Reissue) dated December 29, 1896, issued to S. D. Tripp, for Edge Finishing Machine.

No. 587,378, dated August 3, 1897, issued to S. D. Tripp, for Edge Finishing Machine.

No. 638,862, dated December 12, 1899, issued to Samuel J. Brissette, Assignor, to Geo. A. Emerson and William R. Sampson, for Leather Rolling Machine.

No. 650,998, dated June 5, 1900, issued to Seth D. Tripp, Assignor to Thaxter N. Tripp, for Sole Edge Burnishing Machine.

No. 653,016, dated July 3, 1900, issued to Samuel J. Brissette, Assignor, to George A. Emerson, for Heel Scarfing Machine.

No. 690,549, dated January 7, 1902, issued to Milton H. Ballard, Assignor, to George W. Emerson & Company, for Buffing Machine.

No. 701,425, dated June 3, 1902, issued to S. D. Tripp, Assignor, to Thaxter N. Tripp, for Edge Finishing Machine.

No. 705,550, dated July 29, 1902, issued to Milton H. Ballard, Assignor to Geo. W. Emerson & Company, for Polishing Machine.

British Letters Patent.

No. 19,314, dated September 1, 1896, granted to Seth Dexter Tripp, for Improvements in Edge Finishing Machines for Boots and Shoes.

Letters Patent of France.

No. 259,374, dated September 1, 1896, granted to Seth Dexter Tripp, for Edge Finishing Machine; also Patent of Addition to said Patent No. 259,374, said Patent of Addition being dated August 3, 1897.

Letters Patent of Germany.

No. 92,486, dated September 1, 1896, granted to Seth Dexter Tripp, for Maschine zum Zurichten der Sohlenkanten; also Patent of Addition to said Patent No. 92,486, said Patent of Addition being numbered 96,269, dated August 3, 1897, granted to Seth Dexter Tripp, for Maschine zum Zurichten der Sohlankanten.

Applications for Letters Patent of the United States.

Serial No. 99,851, filed March 25, 1902, Robert W. Thomson, Heel Waxing Machine.

Serial No. 129,998, filed November 3, 1902, Robert W. Thomson, Heel Waxing Machine.

PLAINTIFF'S EXHIBIT 102.

[Put in Evidence, page 545.]

Know all Men by these Presents:

That The T. A. Norris Machine Company, a corporation duly organized under the laws of the Commonwealth of Massachusetts, and having a principal place of business at 74 Commercial Street, in Brockton, in the County of Plymouth, in said Commonwealth, hereinafter called the Norris Company, in consideration of the sum of one dollar ($1.00) and other good and valuable considerations to it paid by the United Shoe Machinery Company, of Paterson, in the State of New Jersey, a corporation duly organized under the laws of the said State of New Jersey, and having a place of business at 205 Lincoln Street, in Boston, in said Commonwealth of Massachusetts, hereinafter called the United Company, the receipt whereof is hereby acknowledged, does hereby sell, assign, transfer and deliver unto the said United Shoe Machinery Company, all machines, machinery, tools, special tools, jigs, patterns, models, drawings, parts of machines, findings, shafting, hangers, pulleys, belting, office furniture and fixtures, owned by the Norris Company, including especially the chattels enumerated on the annexed schedules marked "Schedule A", "Schedule B" and "Schedule C", which chattels enumerated on the said schedules are now in the

building numbered 74 Commercial Street in said Brockton, and all other chattels belonging to the Norris Company wherever located, excepting only the accounts, books of account, stock books, blank certificates of stock, and the corporate seal of the said Norris Company;

To Have and to Hold the above granted goods and chattels, together with all the rights, privileges and appurtenances thereunto pertaining to the said United Shoe Machinery Company and its successors and assigns forever.

The said Norris Company for the consideration aforesaid does hereby for itself and for its successors and assigns, covenant and agree with the United Company and its successors and assigns that it is the legal owner of the goods and chattels enumerated on the said Schedules hereto annexed, that it has good right to sell and convey the same, and that the said goods and chattels are free from all debts and liabilities of the Norris Company.

And for the consideration aforesaid the Norris Company for itself and its successors and assigns covenants and agrees with the United Company and its successors and assigns that the Norris Company will and its successors and assigns shall execute and deliver any and all instruments and do all things which may be necessary or convenient to carry out the terms and intent of this instrument, and to vest in the United Company, its successors and assigns, the full and complete legal title to all goods and chattels owned by the Norris Company, with the exception aforesaid.

In Witness Whereof said The T. A. Norris Machine Company has caused this instrument to be executed and its corporate seal to be hereunto affixed by Thomas A. Norris, its President, thereunto duly authorized, this 1st day of July, A. D. 1902.

THE T. A. NORRIS MACHINE COMPANY

[SEAL] By Thomas A. Norris, President.

United States of America.
Commonwealth of Massachusetts.

Suffolk, ss. Boston, July 1, A. D. 1902.

Then personally appeared the above named Thomas A. Norris,

to me personally known, and known by me to be the President of The T. A. Norris Machine Company, and acknowledged that he executed the foregoing instrument as President of The T. A. Norris Machine Company, and that the same is the free act and deed of The T. A. Norris Machine Company.

Before me,

[SEAL] Nelson W. Howard, Notary Public.

SCHEDULE C.

Estimate of Machines at the T. A. Norris Machinery Company, June 10, 1902, By Mr. Putnam and Mr. Nash.

2 Amazeen Machines, Dunham Belt Attachment (1 rebuilt $5.00: 1 New $12.00)	17.50
1 O K Eyeletter	2.50

1 Lufkin Folder	25.00
1 Imp. Stitch Machine	9.00
1 Fischer Chan. Turner	12.00
1 #1 Rock. Heel Key and Brush	6.00
1 Norris Tip Punch (Cost $10.00)	10.00
1 Norris Hot Kit Burn (Cost $16.00) Like #8 Burnisher	16.00
1 Norris Piece Heel Builder (Cost $5.00)	5.00
1 Pinking Machine & Cutter	3.00
1 Rebuilt Edge Trimmer, Post	10.00
1 Fifield Chan. Layer	5.00
1 Ross Breaster	11.00
1 Smith Heel Trimmer	10.00
1 Ross Twin Edge Setter	25.00
1 Washburn Channel Layer New, Cost $12.00	9.00
1 18″ C. S. Bench U. L. Splitter Fifield	20.00
1 18″ C. S. Sole Evener	20.00
1 Sq. Base Edge Trimmer	12.00
1 Washburn Chan. Layer New Cost $12.00	9.00
1 Brush Shaft & Heel Key	3.00
1 Buzzell Heel Scourer	12.50
1 Washburn Channel Layer, New (Cost $12.00)	9.00
1 Buzzell S. W. Buffer	17.50
1 Gilmore Buffer	25.00
1 Bresnahan Rand Chopper	8.00
1 McKay Sewer, Peare Horn	65.00
1 18″ Centennial Splitter U. L.	20.00
1 18″ Stowe Splitter U. L.	16.00
1 S. & F. Moulder, Heavy	25.00
1 Carver Heel Scourer	25.00
1 Stur. Exhauster 40″	25.00
1 L. W. Splitter	20.00
1 Ross Twin Edge Setter	25.00
1 McKay Sewer Stanley Gas Horn	50.00
1 Tapley Wauk. Machine	5.00
1 Norris Rand Chopper, New Cost $5.00	5.00
1 Busell Sq. Base Trim.	21.00

1 18″ Stowe Splitter U. L.	16.00
2 18″ C. S. Sole Eveners	40.00
2 18″ Carver Sole Evener	60.00
1 Smith Heel Trimmer	10.00
1 4′ Hawkins Sole Cutter New Cost $120.00	120.00
1 Adams Top Pc. Scourer	15.00
1 Giant Leveler, Second-hand, Short Rack	25.00
1 Rock. Heel Finisher	15.00
1 Heel Press Screw	3.00
1 Edge Rimmer, S. H., Base (S. & F.)	3.00
1 #4 Sturt. Blower S. H.	5.00
1 W. B. 30 Roller Cast Gears	30.00
1 18″ Stowe Splitter U. L.	16.00
1 30″ W. B. Roller Cut Gear	30.00
2 40″ Brush Shafts, Norris	7.50
1 Puritan 4-row Strapper	70.00
1 Twin Union Edge Setter	25.00
1 9′ Hawkins Gearless Cutter	100.00
6 Norris 6′ Brush Shafts (Cost $5.50 each)	33.00
2 Carver 4′ Brush Shaft	7.00
1 Six Gang Veneer Press	2.00
1 18″ Cent. Splitter, U. L.	25.00
1 22″ Tripp Roller	16.00
1 9′ Hawkins Sole Cutter Gear	75.00
2 Baby Sole Cutter	100.00
3 Fisher Channel Turners S. H.	15.00
3 No. 1 American Grinders (Small)	6.00
8 American Grinders (Large)	24.00
2 Common Punches New	2.00
3 Edge Trimmer Tin Hoods	1.10
1 12″ Chase Skiver	2.00
1 Uni. Cementer S. H.	5.00
1 Common Seam Rubber S. H.	.75
1 Gilmore Buffer Blower	.50
1 No. 00 Sturt. Blower	.50
1 8″ Chase Skiver S. H.	.50

6 Norris Tapley Imp. Stitch Mach. New Cost $9.00 each	54.00
2 No. 0 Edge Trimmer Blowers	1.00
2 Washburn Boot Jacks	1.00
1 Young Counter Waxer	10.00
2 King Cement Pots	.50
1 Stimpson Pinking Machine	.50
1 Arnold Chan.	5.00
1 Norris Heel Beader (Cost 7.50)	7.50
1 Amazeen Skiver, Dunham Attachment	5.00
1 Star Rand Turner	2.00
4 Brockton Gore Markers	70.00
1 Adams Heel Gauge	1.00
1 St. Edge Folder	1.00
2 Norris Rand Choppers (New)	10.00
3 Crispin Jacks	1.50
4 Norris Welt Cutters (New) Comp $20.00	58.00

PLAINTIFF'S EXHIBIT 103.

[Put in Evidence, page 547.]

This indenture, made this eighteenth day of February, 1903, between William B. Cross, of Brockton, in the State of Massachusetts, and the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, of Paterson, in said State, hereinafter called the United Company. Witnesseth:

Whereas, W. B. Cross is the owner of five hundred (500) shares of Preferred and Three Hundred and Thirty (330) shares of Common Stock of the W. W. Cross & Company, Incorporated, a corporation duly established under the laws of the State of Maine, of Portland, in said State, and

Whereas, the United Company owns or controls the balance of said Preferred and Common Stock of said W. W. Cross & Company, Incorporated, not owned by said W. B. Cross, and desires to be in position at any time to acquire the said stock now owned by the said Cross:

Now, Therefore, the parties hereto in consideration of the premises, and of the sum of One (1) Dollar to each paid by the other, the receipt of which is hereby acknowledged, hereby covenant and agree to and with each other as follows: —

One. The United Company shall have the option at any time upon reasonable notice to said Cross, or, in the event of the death of said Cross, upon reasonable notice to the executors or administrators of the estate of said Cross, to purchase the said Five Hundred (500) shares of Preferred and Three Hundred and Thirty (330) shares of Common Stock of the W. W. Cross & Company, Incorporated, owned by the said Cross upon the payment to said Cross or to the executors or administrators of said Cross, as the case may be, of the sum of Fifty Thousand (50,000) Dollars therefor.

Two. The United Company hereby acknowledges that it has received from said William B. Cross said Five Hundred (500) shares of the Preferred Capital stock, and Three Hundred and

Thirty (330) shares of the Common Capital Stock of the W. W. Cross & Company, Incorporated, standing in the name of William B. Cross, and endorsed by him in blank, as collateral security to assure the performance of the option given to the United Company by this indenture, to be held and disposed of by said United Company as follows, viz. :— in the event, at any time, of the exercise by the United Company of the option given to it by the provisions of paragraph "one" hereof, to transfer said Five Hundred (500) shares of Preferred and Three Hundred and Thirty (330) shares of Common Stock of said W. W. Cross & Company, Incorporated, or cause the same to be transferred, to the United Company or its nominees, and thereupon to pay the sum of Fifty Thousand (50,000) Dollars to said W. B. Cross, his executors or administrators.

Three. Said United Company may, if it desire, while it holds said stock hereunder, prior to the exercise by it of the option given it hereunder, cause the same to be transferred into its name or the names of its nominees provided it causes proxies upon the same to be given to said W. B. Cross his executors or administrators, and causes all dividends thereon to be paid to said W. B. Cross, or to the estate of the said W. B. Cross.

Four. It is understood and agreed that said W. B. Cross shall not assign or transfer any interest in said stock so held by said United Company, to any other person, firm or corporation.

In Witness Whereof said W. B. Cross has hereunto set his hand and seal and the said United Shoe Machinery Company has caused its corporate seal to be hereto affixed and these presents to be executed in its name and behalf by George W. Brown, its Treasurer, the day and year aforesaid.

WILLIAM B. CROSS [SEAL]

[SEAL] UNITED SHOE MACHINERY COMPANY

By George W. Brown, Treasurer.

PLAINTIFF'S EXHIBIT 104.

[Put in Evidence, page 549.]

Agreement, made this sixth day of May 1903, at Boston, Massachusetts, by and between the Estate of John K. Krieg, late of New York, in the Borough of Manhattan, and State of New York, by Hermine L. Krieg, of said New York, administratrix of said Estate, duly constituted and qualified, Lewis G. Metzger, Charles O. Kuhnert and Lemuel R. Mears, all of Brooklyn, in the Borough of Brooklyn, and State of New York, (hereinafter referred to as the Vendors) of the first part; Carl H. Krieg of said New York for any interest he may have in the estate of John K. Krieg, and for his own account of the second part; and the United Shoe Machinery Company, (hereinafter called the United Company), a corporation organized and existing under the laws of the State of New Jersey, of Paterson, in the State of New Jersey, having a place of business at said Boston, of the third part, Witnesseth:

Whereas heretofore a certain partnership, under the firm name and style of J. K. Krieg & Company has been engaged in carrying on a certain business of manufacturing and dealing in shoe machinery and shoe manufacturers' goods, findings, supplies and equipment, and also in the business of manufacturing and dealing in goods, supplies and equipment for retail shoe stores and for cobblers, having its principal place of business at No. 39 Warren Street, New York, N. Y. and

Whereas prior to the death of John K. Krieg, the said John K. Krieg, Louis G. Metzger, Charles O. Kuhnert and Lemuel R. Mears were the sole partners and the sole owners of all the property, business and goodwill of the said partnership, and since the death of the said John K. Krieg, the said Louis C. Metzger, Charles O. Kuhnert and Lemuel R. Mears, the surviving partners, and the estate of John K. Krieg have been at all times, and are now the owners of all property, business and goodwill of the said partnership in liquidation, and said business has been carried on since the death of John K. Krieg, under the same firm name, with the consent of all persons interested, and

Whereas, the vendors desire to assign and transfer to the said United Company, and the United Company desires to acquire, upon the terms and conditions hereinafter set forth, the entire property and assets (excepting, however, a certain blacking manufacturing plant also owned by J. K. Krieg & Company, and excepting notes, accounts and bills receivable on account of goods sold and business done prior to the first day of January A. D. 1903) of the said firm of J. K. Krieg & Company, and the business and good will of J. K. Krieg & Company as a going concern; said transfer to take effect as of January 1st, A. D. 1903, —

Now, therefore, the said vendors, jointly and severally, for themselves, their heirs, executors and administrators, the said Carl H. Krieg for himself, and his personal representatives, and the United Company for itself its successors and assigns, each in consideration of one dollar by each of the others in hand paid, the receipt of which is hereby acknowledged, and in consideration of the covenants and agreements on the part of the others herein contained, do hereby covenant and agree as follows:

One: The vendors shall execute and deliver, and shall cause to be executed and delivered to the United Company, all papers, and shall perform, and cause to be performed, all acts necessary or desired by the United Company, to vest in the United Company, its successors and assigns, its or their nominee or nominees, the full right, title and interest, free from any and all encumbrances, in and to the property and business of every name and nature, of J. K. Krieg & Company, including herein, without prejudice to the generality of said assignment, all tangible property, notes, bills and accounts receivable, on account of goods sold or business done since the first day of January A. D. 1903, all letters patent, and all rights and interests in and to and under letters patent, the good will of said business and all profits, and the benefit and advantage of all business done since the 1st day of January, 1903, but not including, however, the blacking plant hereinbefore referred to, or any bills, notes or accounts receivable for goods sold or business done prior to January 1st, 1903.

Two: The instruments of transfer shall be in a form satisfactory

to the United Company, and shall include, with other covenants, full covenants of title and for further assurances, and shall also include full covenants of warranty on the part of the vendors, that on the 1st day of January, A. D. 1903, the property owned by the said J. K. Krieg & Company, included all of the property set forth in a certain inventory of the stock in trade and other tangible property (excepting the blacking plant) of J. K. Krieg & Company, made by J. K. Krieg & Company as of January 1st, 1903, and which has been furnished to the United Company for inspection, and that the actual cost value of the said property, and of the various items thereof, included in said inventory, were as is set forth in said inventory, with proper deductions from said cost value for depreciation as to all goods in anywise deteriorated, or for any reason, not promptly salable in the ordinary course of business, and that the property of the said J. K. Krieg & Company on hand at the date of the transfer herein provided for, includes with other property acquired since that date, all the property set forth in said inventory of January 1st, 1903, excepting insofar as the same has been used since January 1st, 1903, in manufacturing for the business of J. K. Krieg & Company, or as has been sold by said J. K. Krieg & Company since said date in the ordinary course of business.

Three: The said property and business shall be conveyed free from all direct or contingent obligations and liabilities, and from all claims and demands of every nature; but the expenses of conducting the business and the purchase of additional supplies and materials for use in the business transferred, since the 1st day of January, A. D. 1903, shall be borne by the United Company.

Four: The vendors, including herein specifically the executor or administrator of the estate of John K. Krieg, the said Louis C. Metzger, Charles O. Kuhnert and Lemuel R. Mears, and the said Carl H. Krieg, shall assign, transfer and set over, or shall cause to be assigned, transferred and set over to the United Company, its successors or assigns, its nominee or nominees, by instruments in such form and with such covenants as shall be desired by the United Company, all inventions and all letters patent of the United States and of any and all foreign countries owned or controlled by

them, or any one or more of them, relating or pertaining in any way to shoe machinery, or to shoe manufacturers' goods, supplies, findings or equipment, or the manufacture thereof, and shall likewise assign any and all interests had by them, or by any one or more of them, in, to or under such invention or letters patent.

Five: The consideration to be paid by the United Company for the transfer and delivery to it as aforesaid, of all the said property, assets and business, shall be an amount equal to the actual cost price, less discounts, of the stock in trade and other property of J. K. Krieg & Company on hand January 1st A. D. 1903, which is set forth in the inventory of January 1st 1903, above referred to, less proper deductions therefrom in the case of goods not readily salable and for depreciation, provided, however, that in the determination of the amount to be paid by the United Company, no value shall be put on any goods which are obsolete, or such that they will not be readily salable within two years from the date of transfer.

Six: The United Company shall also pay interest at the rate of five per cent per annum from the 1st day of January, 1903 to the time of the transfer and payment, upon the sum, determined, as in the next preceding paragraph hereof provided, as the value of the property included in said inventory, and shall further pay an additional amount as hereinafter provided, to cover the good will of the business of J. K. Krieg & Company.

Seven: The transfer to the United Company, its successors, assigns or nominees, shall include the good will of the business of J. K. Krieg & Company, with the title to and exclusive right to use all trade names, marks and brands owned, controlled or used by J. K. Krieg & Company, whether registered or not, and shall especially include the exclusive right to the use of the name of J. K. Krieg & Company or J. K. Krieg, or any name so similar thereto as to cause, or to be reasonably likely to cause confusion with said name of J. K. Krieg & Company or to confuse any other business with the business and good will to the conveyed hereunder. And the said vendors and the said C. H. Krieg shall enter into a covenant with the United Company, its successors, assigns or nom-

inees, that they will not, nor will any of them individually, or in combination, as partners, or otherwise, with others use the same. It is provided, however, that the said Carl H. Krieg, notwithstanding anything in this paragraph hereof provided, shall be at liberty to use the name of Carl H. Krieg & Company in connection with any business other than the business of manufacturing or dealing in shoe machinery, or shoe manufacturers' goods, findings, supplies or equipment.

Eight: For the purpose of enabling the United Company, its successors and assigns or nominees, to enjoy the benefit of the good will thus acquired, the vendors, including especially the executor or administrator of the estate of John K. Krieg, the said Louis C. Metzger, the said Charles O. Kuhnert and the said Lemuel R. Mears, and the said Carl H. Krieg, shall enter into binding covenants with the United Company, its successors and assigns, or with the nominees of the United Company in such form as shall be desired by the United Company, that they will not, nor will either or any of them, at any time within fifteen years from the date of said transfer, individually, as partner, as officer or employee of any corporation or otherwise, excepting as they may be employed by the United Company, its successors, assigns or nominees, enter into or be engaged in, or financially or otherwise assist any person, firm or corporation in entering into or developing or carrying on any business which relates or pertains in any way to manufacturing or dealing in shoe machinery or shoe manufacturers' goods, findings, supplies or equipment, or in any business which will in any way interfere with or compete with the said United Company, its successors, assigns or nominees, in the business of manufacturing or dealing in shoe machinery or shoe manufacturers' goods, findings, supplies or equipment, but the provisions of this paragraph shall not be construed as preventing the said vendors or the said Carl H. Krieg from engaging in the business of dealing in goods, supplies and equipment for retail shoe stores or for cobblers.

Nine: The United Company, as a consideration for the good will of J. K. Krieg & Company and for the covenants herein provided for shall pay, in addition to the payments hereinbefore provided

for, an amount equal to ten per cent (10%) of the value (determined as in paragraph 5 hereof provided) of that part of the property owned by J. K. Krieg & Company on the first day of January, 1903, and included in said inventory of January 1st, 1903, which consists of shoe machinery and shoe manufacturers' goods, findings, supplies and equipment (as distinguished from supplies, findings and equipment for shoe retailers and for cobblers and from fixtures.)

Ten: Inasmuch as it is understood and agreed between all the parties hereto, and the United Company enters into this agreement only upon the condition that the said Carl H. Krieg and Hermine L. Krieg, shall, on or before the first day of July, 1903, purchase from the United Company, all property acquired in connection with, or for the purposes of that part of the business herein provided to be conveyed, which pertains to retail shoe dealers and to cobblers, and the said Carl H. Krieg and Hermine L. Krieg have entered into a written agreement with the United Company of even date with these presents, providing for the purchase by them as aforesaid, it is hereby expressly provided, that all obligations of the United Company under this instrument are contingent upon the performance by the said Carl H. Krieg and Hermine L. Krieg of their agreement to purchase said property in accordance with the terms in said instrument set forth; and upon default of the said Carl H. Krieg and Hermine L. Krieg therein, the United Company shall, at its election, be freed from all obligations hereunder.

In Witness Whereof, the said Louis C. Metzger, Charles O. Kuhnert, Lemuel R. Mears and Carl H. Krieg have hereunto set their respective hands and seals, the United Shoe Machinery Company has caused these presents to be signed by Edward P. Hurd its Assistant Treasurer and its corporate seal to be hereto affixed, and the Estate of John K. Krieg has signed and sealed these Presents by Hermine L. Krieg, the administratrix of said estate thereto duly authorized, the day and year first above written.

PLAINTIFF'S EXHIBIT 105.

[Put in Evidence, page 549.]

New York, N. Y., January 23, 1903.

United Shoe Machinery Company, Boston, Massachusetts.

Dear Sirs: — We beg to make to you the following proposition for the purchase by you of the business of J. K. Krieg & Company: —

We offer to sell to you the entire property and business of J. K. Krieg & Company for a consideration to be determined as follows, namely: — An inventory of all the stock in trade of J. K. Krieg & Company shall be immediately taken, in which inventory the value to be given to such property shall be based upon the actual cost of such property, with proper deductions for depreciation as to all goods not promptly salable in the ordinary course of business, or which otherwise are properly subject to such deductions.

We estimate that such inventory will show stock amounting to approximately $110,000, and will guarantee that not less than $95,000 worth of such goods are goods of such nature as will be readily salable within one year in the ordinary course of business, and that the balance is made up of goods which, in the ordinary course of business, it will be possible to sell within two years. Any stock which appears to be obsolete or such that it will not be readily salable within two years shall be included in the sale, but shall not be given any value in the inventory.

The cost prices of goods above referred to are to be figured less all discounts, and exclusive of any charge for freight, expressage or carting.

The foregoing proposition includes all of the property of J. K. Krieg & Company excepting its Blacking Factory, and the consid-

eration for which we offer to sell to you all of said property (except the Blacking Factory) is an amount equal to the value as set forth in the inventory above provided for of the stock in trade, plus an amount equal to ten per cent. (10%) of such inventoried value to cover good-will and all other property, interests and rights relating to the business transferred.

In case you wish to take over also the Blacking Factory it shall be included in the sale to you or we will dispose of it as you may direct upon your paying to us the inventoried value thereof, or, in case you elect not to acquire the same, it shall not be included in the sale to you. We will also turn over to you the Machine Shop, which is owned by the Krieg estate and is operated independently of the J. K. Krieg & Company business, at its inventoried value, which we place at $5000.00. No allowance shall be made for good-will or other interests of the Blacking Factory or of the Machine Shop.

In consideration of your taking the foregoing proposition under advisement and your agreement to take steps to investigate the business and property proposed to be conveyed, we agree that this proposition shall be open for your acceptance for sixty (60) days from the date hereof. In case after investigation the trade shall be consummated, the consideration above provided, based upon the inventory of property, shall be paid to us in cash upon the execution of the papers; and it shall further be provided that Messrs. Krieg, Metzger and Kuhnart shall enter into the employment of and shall be employed by the United Company at salaries of Fifty (50) Dollars per week each, and that they shall each enter into an agreement, in usual form, with the United Company against engaging in any business which will in any way compete with the business of the United Company, at any time within a period of fifteen (15) years from the execution thereof.

In order that you may investigate and determine the facts as to the property and business hereby offered to be conveyed, it is understood that all the books relating to the business and all property included in this offer shall be open at any and all times, during the sixty (60) days during which this offer is to remain

open, to the inspection of the experts of the United Company, and that we will give to the experts all assistance within our power to enable them to determine the actual condition of the said property and business.

It is understood that the word "property" on page 2, line 4, does not include, Cash, Bills Receivable and Accounts.

Very truly yours,

Est. J. K. Krieg,
by Carl H. Krieg
Louis C. Metzger
C. O. Kuhnert.

PLAINTIFF'S EXHIBIT 106.

[Put in Evidence, page 552.]

This agreement made this twentieth day of October, A. D. 1903, by and between Joseph P. Curtis, of Everett, in the Commonwealth of Massachusetts, and the United Shoe Machinery Company, of Paterson, in the State of New Jersey, a corporation duly organized under the laws of said State of New Jersey and having a place of business at 205 Lincoln Street, Boston, in said Commonwealth (hereinafter called the United Company), Witnesseth:

That Whereas the said Curtis has invented certain improvements in Cementing Machines and has described and claimed the same in applications for Letters Patent of the United States, to wit:— Serial No. 135,039, filed December 13, 1902, and Serial No. 174,-913, filed September 28, 1903, and has made or caused to be made for him thirty-four (34) machines, more or less, embodying the said improvements, and he desires to sell the inventions set forth in said applications, and the said United Company desires to buy the said inventions on the terms and conditions hereinafter set forth:

Now, Therefore, in consideration of the sum of (1) one dollar and other good and valuable considerations by each of said parties to the other paid, the receipt whereof is hereby mutually acknowledged, and in further consideration of the mutual covenants and agree-

ments hereinafter contained, the parties do hereby covenant and agree as follows: —

The said Curtis hereby sells, assigns, transfers and sets over unto the said United Company, its successors and assigns, the entire right, title and interest in and to each and all of the inventions disclosed in the said applications and any and all Letters Patent of the United States or of any foreign countries which may be granted for the said inventions.

The said Curtis further covenants and agrees that he will execute any and all application papers, assignments, and other documents and do all other things which may be necessary or convenient to enable the United Company to obtain good and valid Letters Patent of the United States and of any foreign countries where the United Company may desire to patent the said invention and to vest in the United Company the complete legal and equitable title to any applications which may be made for Letters Patent and to any and all Letters Patent which may be granted for the said invention.

The said Curtis also hereby sells, assigns, transfers and sets over unto the said United Company, its successors and assigns, any and all inventions and improvements which he may at any time hereafter make in Cementing Machines, either as sole inventor or as joint inventor with others, and all right, title and interest in, to and under all inventions and improvements in Cementing Machines which he may in anywise own or control or which he may have any right by agreement or otherwise to acquire or take over, and all Letters Patent and interests therein and rights thereunder, and he does hereby covenant and agree with said United Company, its successors and assigns, that upon making any such inventions or improvements or acquiring any title, interest, or right in, to or under such inventions or improvements, he will forthwith disclose the same to said United Company, its officers and patent solicitors, and that he will, and his heirs, executors, and administrators shall, at any time thereafter, upon request of the said United Company, its successors or assigns, execute any and all applications, assignments, and other papers and will perform or cause to be performed

any and all acts which may be necessary or desired by the said United Company, its successors or assigns, to obtain Letters Patent of the United States and of any foreign countries where it desires to obtain Letters Patent covering such inventions, and improvements, or any of them, made, owned or controlled by the said Curtis and to fully and completely vest and confirm in said United Company, its successors and assigns, the full and complete right, title, and interest, in, to, and under all such inventions, improvements, applications, Letters Patent, interests, and rights.

The United Company covenants and agrees that upon the receipt by it from the Patent Office of a notice of the allowance of the said application Serial No. 174,913, filed September 28, 1903, it will pay to the said Curtis the sum of five hundred (500) dollars.

The United Company also covenants and agrees that it will, until the expiration of the term of the Letters Patent which may issue on said application Serial No. 174,913, or until the aggregate amount of royalty paid hereunder shall have reached the sum of five thousand (5000) dollars, whichever shall first transpire, pay to the said Curtis the sum of ten (10) dollars as a royalty fee for each and every machine embodying the inventions covered by the claims of said Letters Patent put out by the United Company in the United States or in any country in which it may obtain Letters Patent for the said invention. It is Provided, however, that in the event that the United Company is unsuccessful in obtaining Letters Patent of the United States which in the opinion of counsel for the United Company adequately protect the machines shown in the said two applications Serial No. 135,039 and Serial No. 174,913, then, upon notice to that effect being given by the said United Company to the said Curtis, the said royalty payments shall cease and no further payment of any kind under this agreement shall be made by the United Company to the said Curtis. The royalty payments provided for above shall be made as follows, viz. : —

On or before the tenth day of each month the United Company shall render an account showing the number of machines theretofore put out by it, and for which it has received payment, embodying the inventions covered by said Letters Patent and on account

of which royalty as herein provided has not already been paid and shall accompany such account by payment to said Curtis of the said sum of ten (10) dollars as royalty for each such machine; it being understood, however, that if a machine is returned on which a royalty fee has once been paid, no further fee is to be paid in the event of such machine being again put out. It is Provided, however, that the royalty payments of the United Company to the said Curtis shall cease in any event whenever said royalty payments shall have amounted in the aggregate to the sum of five thousand (5000) dollars — that is, in the event of the sum of ten (10) dollars per machine having been paid to the said Curtis upon five hundred (500) machines, no further payments shall be made.

The obligation of the said United Company to pay royalty to the said Curtis for machines put out by it is, however, subject to the following conditions: —

The said Curtis hereby covenants and agrees that he will protect from infringement the United States Letters Patent which may issue for the inventions disclosed in said applications, and that if any competing machine is put upon the market which in the opinion of counsel for the said United Company infringes any one of said Letters Patent, said Curtis shall, upon notice from said United Company so to do, promptly institute legal proceedings to stop such infringement and shall prosecute such suit with all possible vigor, and in case he is unsuccessful in stopping such infringement, then the obligations of the United Company to pay royalty on machines thereafter sold by it shall cease and determine. It is also hereby agreed by the said Curtis that the United Company may in its discretion withhold payment of royalty on machines sold by it while infringement of the patent or patents continues and pending the determination of the proceedings taken to stop such infringement.

The said Curtis further covenants and agrees that if any of the machines which he has heretofore made and sold are returned to him by the purchaser, he will thoroughly repair such returned machines and bill them to the United Company at twenty-five (25) dollars per machine.

The said Curtis also hereby for himself and for his heirs, executors, administrators, and assigns covenants and agrees with said United Company and its successors and assigns that he is the sole and exclusive owner of the inventions set forth in said applications and that he has good right and title to sell and assign the said inventions, and that he has granted no license or licenses for the use of said inventions.

The covenants and agreements of the said Curtis herein contained shall be binding upon him and upon his heirs, executors, and administrators, and the benefits thereof shall enure to and be enforcible by the successors and assigns of the said United Company.

The covenants and agreements of the United Company herein contained shall be binding upon and enforcible against the successors and assigns of the United Company.

In Witness Whereof the said Joseph P. Curtis has hereunto set his hand and affixed his seal and the United Shoe Machinery Company has caused this instrument to be signed and its corporate seal to be hereunto affixed by Edward P. Hurd, its Assistant Treasurer, thereunto duly authorized, in duplicate, the day and year first above written.

JOSEPH P. CURTIS [SEAL]
UNITED SHOE MACHINERY COMPANY [SEAL]

PLAINTIFF'S EXHIBIT 107.

[Put in Evidence, page 553.]

This Agreement made at Boston, Massachusetts, this 1st day of January, A. D. 1904, by and between Fred H. Perry, of West Medford, in the County of Middlesex and Commonwealth of Massachusetts, of the one part, and the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, of Paterson, in said State of New Jersey, having a place of business in said Boston (hereinafter called the United Company), of the other part: Witnesseth:

Whereas the United Company is engaged throughout the United

States of America and elsewhere in the business of manufacturing and dealing in and with machinery, tools, mechanisms, devices, materials, supplies, processes and things for use in the manufacture of boots and shoes, and in manufacturing and dealing in and with eyelets, lacing hooks, grommets and similar articles not only for boots and shoes but also for all other purposes, and machinery, tools and devices for manufacturing, setting and otherwise operating upon and with such eyelets, lacing hooks, grommets and like articles, and is largely interested by reason of its ownership of shares of the capital stock of such companies or otherwise in the business of other companies also engaged in the business of manufacturing and dealing in and with such machinery, tools, mechanisms, devices, materials, supplies, processes and things, eyelets, lacing hooks, grommets and similar articles, and machinery, tools and devices for manufacturing, setting and otherwise operating upon and with the same, and also in other lines of business incidental thereto or connected therewith, and not only in the United States but also throughout the Dominion of Canada and the several countries of Europe and elsewhere in all parts of the world where such machinery or other articles are used, which said companies are hereinafter referred to as the "associate, allied and subsidiary companies" of the said United Company.

And Whereas the said Perry desires to enter into an agreement with the said United Company, under which the said United Company shall employ the said Perry or shall cause the said Perry to be employed by one or more of its associate, allied and subsidiary companies as hereinafter set forth, and the said United Company desires to secure the services of the said Perry as hereinafter set forth, and to obtain for itself, its associate, allied and subsidiary companies, the benefit of the inventions of the said Perry as hereinafter set forth.

Now, Therefore, be it Known, that the said Perry in consideration of one dollar ($1.00) and other good and valuable considerations to him paid by the United Company, the receipt of which he hereby acknowledges, and of the covenants and agreements on the part of the United Company hereinafter contained, and the United

Company in consideration of one dollar ($1.00) and other valuable considerations, the receipt of which from the said Perry the said United Company hereby acknowledges, and of the covenants and agreements on the part of the said Perry herein contained, do respectively covenant and agree, each with the other as follows: —

One. The United Company hereby covenants and agrees with the said Perry that, provided the said Perry shall faithfully and truly keep and perform each and all of the covenants and agreements on his part herein contained, the United Company for a period of one (1) year from the date of these presents, and thereafter during such further time, if any, as may be mutually desired by the parties hereto, shall employ the said Perry or shall cause the said Perry to be employed by one or more of its associate, allied or subsidiary companies in such capacity and in the performance of such duties as may from time to time be assigned to the said Perry by the said United Company, or by such person or persons as may be designated for such purpose by the said United Company, in experimenting upon, originating, inventing, improving, constructing, remodeling and reconstructing machinery and devices for the purposes of the said United Company, its associate, allied and subsidiary companies, and in working out, developing and embodying in such machinery and devices, improvements and ideas, whether originated by the said Perry or orignated by others and referred by the said United Company to the said Perry, including therein such work as machinist or otherwise as may be necessary or convenient in connection with such duties; and that the United Company shall pay or shall cause to be paid to the said Perry compensation as hereinafter provided.

Two. The said Perry covenants and agrees to and with the said United Company that for a period of one (1) year from the date of these presents, and throughout any time thereafter during which he may be employed by the said United Company, its associate, allied or subsidiary companies, he will well and truly serve the United Company and its associate, allied and subsidiary companies in such capacity and in the performance of such duties as aforesaid as may from time to time be assigned to him as aforesaid, and that

he will give his entire time and the full and entire benefit of his skill, co-operation and endeavor to the accomplishment of the purposes and the performance of the duties of said employment so assigned to him, and that he wlll at all times faithfully and truly and to the best of his skill and ability act diligently and loyally for the promotion of the interests of the said United Company, its sssociate, allied and subsidiary companies, receiving compensation as hereinafter provided.

Three. Inasmuch as through his relationship with the United Company, its associate, allied and subsidiary companies, the said Perry will from time to time in the course of his employment become possessed of secret or confidential information concerning the business and affairs of the said United Company, its associate, allied and subsidiary companies, to a greater or less extent, the said Perry hereby covenants and agrees to and with the said United Company that all information concerning the business and affairs of the said United Company or of any of its associate, allied or subsidiary companies of which he shall at any time become possessed, which is of a confidential or private nature, he shall carefully guard and keep, and that he will at no time, either while he is in the employment of the United Company, its associate, allied or subsidiary companies, or after such employment shall have ceased, disclose any such information to any person, or employ the same in anywise other than for the benefit of the United Company, its associate, allied or subsidiary companies, in connection with said employment.

Four. The said Perry hereby sells, assigns, transfers and sets over unto the said United Company any and all inventions and improvements heretofore made by him, or which he may at any time hereafter during said period of one (1) year from the date hereof, or within any time thereafter during which he shall be employed by the United Chmpany, or by any one or more of its associate, allied or subsidiary companies, or at any time within five (5) years from the termination of any such employment make either as sole inventor or as joint inventor with others and whether made in or out of the usual working hours or upon the premises of the

United Company, its associate, allied or subsidiary companies, or elsewhere, and all inventions, improvements, Letters Patent of the United States and of any and all foreign countries, and applications for Letters Patent, and all right, title and interest in, to or under inventions, improvements, Letters Patent and applications for Letters Patent which he now owns, controls or has any right by agreement or otherwise to acquire or take over, or which he may at any time during which he shall be in the employment of the said United Company, its associate, allied or subsidiary companies, or at any time within said period of five (5) years from the termination of any such employment in anywise own or control or have any right by agreement or otherwise to acquire or take over relating or pertaining in any way to footwear or to machinery, tools, mechanisms, devices, materials, supplies, processes or things intended or adapted for use in the manufacture thereof, or to eyelets, lacing hooks, grommets or similar articles for use in boots or shoes, or for any other purpose, or to machinery or devices for manufacturing, setting or otherwise operating upon or with such eyelets, lacing hooks, grommets or like articles; and does hereby covenant and agree to and with the said United Company that upon making any such inventions or improvements or acquiring any right, title or interest in, to or under or any right to acquire or take over any right, title or interest in any such inventions or improvements, Letters Patent or applications for Letters Patent, he will forthwith disclose the same to the United Company, its officers and patent solicitors, and will repeat such disclosures when and as often as requested by the United Company; and that he will and his heirs, executors and administrators shall at any and all times thereafter upon the request of the United Company, execute and cause to be executed any and all applications for Letters Patent, assignments, and other papers, and will perform and cause to be performed any and all acts which may be necessary or desired by the said United Company, to obtain to the said United Company, its successors, assigns or nominees, Letters Patent of the United States and of any and all other countries where it may be desired to obtain Letters Patent covering such inventions and

improvements, or any of them made, owned or controlled by the said Perry, and to fully and completely vest and confirm in the said United Company, its successors and assigns, or in the nominee or nominees of the said United Company, its successors or assigns, the full and complete right, title and interest in, to and under all such inventions, improvements, Letters Patent, applications, interests and rights, and to enable the said United Company, its successors, assigns or nominees to secure and enjoy the full benefits and advantages thereof.

Five. The said Perry hereby further covenants and agrees to and with the said United Company that he will not at any time within said term of one (1) year from the date of these presents, or at any time thereafter during which the said Perry may be in the employment of the United Company, or of any one or more of its associate, allied or subsidiary companies, or at any time within five (5) years from the termination of any such employment, in any country (without the consent in writing of the United Company) either directly or indirectly, individually or in combination with others, or as officer or stockholder of a corporation, or as manager, agent or employee, or otherwise (excepting as an employee of the said United Company, its associate, allied or subsidiary companies) enter into or be engaged or interested in or financially or otherwise assist any person, firm or corporation in entering into, developing or carrying on any business which consists in whole or in part of, or relates or pertains in any way to manufacturing or dealing in machinery, tools, mechanisms, devices, materials, supplies, processes or things relating or pertaining in any way to boots or shoes, or to the manufacture thereof, or any business which consists in whole or in part of, or relates or pertains in any way to manufacturing or dealing in eyelets, lacing hooks, grommets or similar articles for use in boots or shoes or for any other purpose, or manufacturing or dealing in machinery, tools, or devices intended or adapted for use in manufacturing, setting or otherwise operating upon or with eyelets, lacing hooks, grommets or like articles, or in making, developing or exploiting any invention pertaining to such machinery, tools, mechanisms, devices, materials,

supplies, processes or things, or to eyelets, lacing hooks, grommets or similar articles, or such machinery, tools or devices therefor, or in any business which will in any way compete or interfere with the business or interests of the United Company, or the business of any of the associate, allied or subsidiary companies of the United Company.

Six. The United Company hereby covenants and agrees to and with the said Perry that, provided the said Perry shall faithfully and truly keep and perform each and all of the covenants and agreements on his part herein contained, and shall well and truly perform the duties of his employment herein provided for, the United Company shall pay or cause to be paid to the said Perry compensation therefor at the rate of thirty dollars ($30.00) per week for said term of one (1) year from the date hereof, and at the rate of not less than thirty dollars ($30.00) per week during such time thereafter as the said Perry may be in the employment of the said United Company or of any one or more of its associate, allied or subsidiary companies, such compensation to paid to the said Perry weekly at the end of each week during such employment.

Seven. The term "United Company" as herein used, shall be held to include the said United Shoe Machinery Company and its successors and assigns, and all covenants and agreements on the part of the said Perry herein contained may be enforced for the benefit of the said United Company, its successors or assigns, or of any one or more of its or their associate, allied or subsidiary companies.

In Witness Whereof I, the said Fred H. Perry, have hereunto set my hand and seal, and the said United Shoe Machinery Company has caused these presents to be signed in its name and on its behalf by Sidney W. Winslow, its President, and its corporate seal to be hereto affixed the day and year first above written.

FRED H. PERRY [SEAL]

UNITED SHOE MACHINERY COMPANY [SEAL]

By S. W. Winslow, President.

Commonwealth of Massachusetts:

Suffolk, ss. Boston, Massachusetts.

On this 11th day of January A. D. 1904, before the undersigned, a Notary Public duly constituted and qualified, personally appeared Fred H. Perry personally known to me and known to me to be the Fred H. Perry described in and who executed the foregoing instrument, and the said Perry did acknowledge that he executed the same as his free act and deed for the uses and purposes therein mentioned;

And at the same time and place personally appeared before me Sidney W. Winslow, personally known to me and known to me to be the President of the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, and the said Winslow did acknowledge that, being thereto duly authorized, he executed the foregoing instrument in the name and on the behalf of the said United Shoe Machinery Company as the act and deed of the said United Shoe Machinery Company, for the uses and purposes therein mentioned.

HAROLD G. DONHAM,
Notary Public.

[SEAL]

PLAINTIFF'S EXHIBIT 108.

[Put in Evidence, page 554.]

I, Joseph W. Leary, of Lynn, Massachusetts, in consideration of the sum of three thousand, fifty-two dollars, seventy-two cents ($3052.72) and other valuable considerations to me paid by the United Shoe Machinery Company, a New Jersey corporation, having a place of business in Boston, Massachusetts, (hereinfter called the United Company) the receipt of which I hereby acknowledge, have sold and delivered and do hereby sell, assign, transfer and set over unto the said United Company the entire business heretofore carried on by me in said Lynn and elsewhere of dealing in and with shoe machinery, devices and supplies, cements, blackings and stains, and the entire good-will of said business and the stock in trade and other property and assets relating thereto,

including all trade names, marks and brands used in connection therewith — all free from any and all notes, bills and accounts payable and other encumbrances whatsoever. This transfer, however, does not include any cash on hand or on deposit or any notes, bills or accounts receivable or the books of entry and account. And I, the said Leary, will at any and all times hereafter upon request of the United Company execute and cause to be executed any and all instruments and perform and cause to be performed any and all acts necessary or desired by the United Company to fully and completely vest and confirm in the United Company the full and complete title to said business, good-will and property, free from any and all encumbrances whatsoever, and to enable the said United Company to secure and enjoy the full and entire benefits and advantages thereof.

And I, the said Leary, and the said United Company, each in consideration of the foregoing purchase and transfer and of other good and valuable considerations by the other paid, the receipt of which is hereby acknowledged, and of the covenants and agreements on the part of the other herein contained, do hereby covenant and agree as follows: —

One. The United Company hereby covenants and agrees with the said Leary that provided the said Leary shall faithfully and truly keep and perform each and all of the covenants and agreements on his part herein contained, the United Company for the period of five (5) years from the date of these presents, and thereafter during such further time, if any, as may be mutually desired by the parties hereto, shall employ the said Leary or shall cause the said Leary to be employed by one or more of its associate, allied or subsidiary companies in such capacity and in the performance of such duties connected with the business and affairs of the United Company, or its associate, allied and subsidiary companies, as may from time to time be assigned to him by the said United Company, or by such person or persons as shall be designated by the said United Company for such purposes, and that the United Company shall pay or shall cause to be paid to the said Leary compensation as hereinafter provided.

Two. The said Leary covenants and agrees to and with the said United Company that for a period of five (5) years from the date of these presents, and throughout any time thereafter during which he may be employed by the said United Company, its associate, allied or subsidiary companies, he will well and truly serve the said United Company and its associate, allied and subsidiary companies, in such capacity and in the performance of such duties as may from time to time be assigned to him by the said United Company, or by such person or persons as may be designated for such purpose, and that he will give his entire time and the full and entire benefit of his skill, co-operation and endeavor to the accomplishment of such purposes and the performance of such duties as may from time to time be assigned to him as aforesaid, and that he will at all times faithfully and truly and to the best of his skill and ability act diligently and loyally for the promotion of the interest of the said United Company, its associate, allied and subsidiary companies, receiving compensation therefor as hereinafter provided.

Three. The said Leary hereby further covenants and agrees to and with the said United Company that he will not at any time within said term of five (5) years from the date of these presents, or at any time thereafter during which the said Leary may be in the employment of the said United Company or of any one or more of its associate, allied or subsidiary companies, or at any time within ten (10) years from the termination of such employment, in any country (without the consent in writing of the said United Company) either directly or indirectly, individually or in combination with others, or as an officer or stockholder of a corporation, or as manager, agent or employee or otherwise (excepting as an employee of the said United Company, its associate, allied or subsidiary companies) enter into or be engaged or interested in or financially or otherwise assist any person, firm or corporation in entering into, developing or carrying on any business which consists in whole or in part of or relates or pertains in any way to manufacturing or dealing in or with machinery, tools, mechanism, devices, materials, supplies, processes or things relating or pertaining in any way to boots or shoes or to the manufacture thereof,

or manufacturing or dealing in or with eyelets, lacing hooks, grommets or similar articles for any purpose, or machinery, tools, mechanisms, devices, materials, supplies, processes or things for operating upon or with such eyelets, lacing hooks, grommets or similar articles, or manufacturing or dealing in cements, blackings or stains, or in making, developing or exploiting any invention which pertains to machinery, tools, mechanisms, devices, materials, supplies, processes or things of the kinds above mentioned, eyelets, lacing hooks, grommets or similar articles, cements, blackings or stains, or in any business which will otherwise, in any way, compete or interfere with the business or interests of the said United Company or the business of any of its associate, allied or subsidiary companies.

Four. The said Leary shall not be required to disclose his secret formulae for making cements, blackings or stains, but if at any time during the continuance of the employment herein provided for the said United Company, its associate, allied or subsidiary companies, shall desire to have any cements, blackings or stains made in accordance with such formulae, the said Leary will, without compensation other than his regular salary, manufacture from time to time such cements, blackings or stains in such amounts as may be desired by the said United Company, its associate, allied or subsidiary companies, and will deliver the same as may be directed; the United Company, its associate, allied or subsidiary companies, paying the cost of the raw materials and expense of manufacture thereof.

Five. The United Company hereby further covenants and agrees to and with the said Leary that provided the said Leary shall faithfully and truly keep and perform each and all of the covenants and agreements on his part herein contained, and shall well and truly perform the duties of his employment herein provided for, it will during such time as the said Leary shall be in the employ of the said United Company, its associate, allied or subsidiary companies, pay or cause to be paid to the said Leary compensation as follows, viz: —

For said term of five (5) years from the date hereof, hereinbe-

fore provided for, such compensation shall be at the rate of forty dollars ($40.00) per week.

After the expiration of said period of five (5) years from the date hereof, during such further time as the said Leary shall be in the employment of the said United Company, its associate, allied or subsidiary companies, such compensation shall be at such rate as may be agreed upon by and between the said Leary and the said United Company.

Six. The term "United Company" as herein used shall be held to include the said United Shoe Machinery Company, its successors and assigns, and all covenants and agreements on the part of the said Leary herein contained may be enforced for the benefit of the said United Company, its successors or assigns, or of any one or more of its or their associate, allied or subsidiary companies.

In Witness Whereof the said Joseph W. Leary has hereunto set his hand and seal, and the said United Shoe Machinery Company has caused these presents to be signed by Edwd P. Hurd its Assistant Treasurer, and its corporate seal to be hereto affixed this first day of January, A. D. 1904.

JOSEPH W. LEARY [SEAL]
UNITED SHOE MACHINERY COMPANY [SEAL]
Edwd. P. Hurd, Assistant Treasurer.

In the presence of H. G. Donham

PLAINTIFF'S EXHIBIT 109.

[Put in Evidence, page 555.]

This Indenture, made this twenty-third day of January, A. D. 1904, by and between the F. G. Farnham Brush Manfg. Co., a corporation organized and existing under the laws of the State of New Jersey, having a place of business at Honesdale, Wayne County, Pennsylvania, (hereinafter called the "Brush Company") party of the first part, Frank G. Farnham, of said Honesdale, party of the second part, and the United Shoe Machinery Company, a corporation organized and existing under the laws of said State of New Jersey, having a place of business in Boston, County of Suf-

folk, Massachusetts (hereinafter called the "United Company") party of the third part, Witnesseth:

Whereas the Brush Company is engaged and has for some time been engaged at said Honesdale and elsewhere in the business of manufacturing and dealing in and with brushes, sleeves, collars, hubs, fillers, bristles, fiber and other parts and supplies therefor, and is the owner of various inventions, improvements, Letters Patent and other property, interests and rights relating thereto, and has established in connection with said business a valuable good-will;

And Whereas the said Farnham by reason of his ownership of shares of the capital stock of said Brush Company and otherwise is largely interested in and is identified with said Brush Company, and the said Farnham is also personally the owner of certain inventions, improvements and Letters Patent relating to brushes and parts and supplies therefor, and property relating to the business of manufacturing and dealing therein, and the said Farnham in negotiating the trade covered by this indenture has acted both for himself personally and also as representing the said Brush Company;

And whereas the said Farnham and the said Brush Company, and each of them, desire to sell and convey and to cause to be sold and conveyed, and the United Company desires to acquire the said business of the said Brush Company, the good-will thereof and the said inventions, improvements, Letters Patent, and other property, interests and rights relating to said business of manufacturing and dealing in brushes and parts and supplies therefor, all upon the terms and conditions hereinafter set forth;

Now, Therefore, be it Known that the said Brush Company and the said Farnham, in consideration of the sum of one dollar ($1.00) and other good and valuable considerations to each of them paid by the said United Company, the receipt of which the said Brush Company and the said Farnham hereby acknowledges, have made and do hereby make the assignments and transfers hereinafter set forth, and that the said Brush Company and the said Farnham, each in consideration of the covenants and agreements on the part

of the United Company hereinafter contained, and the United Company in consideration of the said assignments and transfers and the covenants and agreements on the part of the said Brush Company and the said Farnham hereinafter contained, have entered and do enter into the covenants and agreements hereinafter set forth.

The said Brush Company has sold and does hereby sell, assign, transfer, set over and deliver unto the said United Company, its successors and assigns, the entire property and business of every name and nature, excepting as hereinafter expressly excluded, of the said Brush Company, including herein, without prejudice to the generality of the foregoing assignment, the entire manufacturing plant of the said Brush Company, tools, machine tools, special tools, jigs, models, patterns, drawings, supplies and equipment, stock on hand manufactured, unmanufactured or in process of manufacture, brushes, hubs, sleeves, collars, fillers, bristles, fiber and other parts and supplies therefor, all formulae, trade lists and information, all books of entry and account, the benefit of all contracts relating to said business, and all other interests and rights of every name and nature, and especially including the good-will of said business and all trade names, marks and brands (whether registered or not) used or useful in connection with said business, but excepting from this transfer, however, the franchise of said Brush Company, its cash on hand and on deposit, and all notes, bills and accounts receivable.

The said Farnham has sold and does hereby sell, assign, transfer, set over and deliver unto the said United Company, its successors and assigns, all property, interests and rights of every name and nature, owned or controlled by him relating or pertaining in any way to the business of manufacturing or dealing in brushes or parts or supplies therefor.

The said Farnham and the said Brush Company and each of them have sold and set over and do hereby specifically and without prejudice to the generality of the foregoing assignment sell, assign, transfer, and set over unto the said United Company, its successors and assigns, all inventions and improvements, Letters Patent

of the United States and of any and all foreign countries, applications for Letters Patent, and all interests and rights in, to or under inventions, improvements, Letters Patent or applications for Letters Patent now owned or controlled by them or by either of them, or which they or either of them have any right by agreement or otherwise to acquire or take over, or which they or either of them may at any time within fifteen (15) years from the date of these presents, make, acquire, own or control or have any right by agreement or otherwise to acquire or take over relating or pertaining in any way to brushes or to hubs, sleeves, collars, bristles, fiber or other parts or supplies therefor.

To Have and to Hold all of the property, business and good-will and all interests and rights of every name and nature included within this instrument to the said United Shoe Machinery Company, its successors and assigns to its and their own use and behoof absolutely.

All the property, business and good-will of every name and nature included within this instrument are conveyed free from any and all bills and accounts payable and other obligations and encumbrances whatsoever; and for the consideration aforesaid the said Brush Company and the said Farnham and each of them do hereby, without prejudice to the generality of the foregoing assignments, covenant with and warrant to the said United Company, its successors and assigns, that the tangible property hereby conveyed and the absolute title to which is hereby vested in the United Company, its successors and assigns, includes all the property set forth in an inventory of the stock in trade and other property of the said Brush Company made as of the date of these presents and a copy of which is hereto annexed and marked "Schedule A"; and that the Letters Patent and inventions hereby conveyed, and the absolute title to which is hereby vested in the United Company, its successors and assigns, include all the Letters Patent of the United States and of other countries which are set forth in the schedule annexed to this instrument and marked "Schedule B" and the inventions covered thereby; that the said Brush Company is the absolute owner of all of the said property included in said "Sche-

dule A" and that the said Brush Company or the said Farnham is the absolute owner of the said Letters Patent and each of them included in said "Schedule B", and the inventions and improvements covered thereby; that the said Brush Company and the said Farnham, or one of them, has good right, title and authority to sell and transfer as aforesaid all the property, business and good-will and all interests and rights of every name and nature included within the terms of this instrument; that we, the said Brush Company and the said Farnham, and each of us, will warrant and defend the name and every part thereof against the claims and demands of any and all persons whatsoever, and that we, the said Brush Company and the said Farnham, and each of us, will at any and all times hereafter upon request of the said United Company, its successors and assigns, execute and cause to be executed any and all further instruments and will perform and cause to be performed any and all further acts necessary or desired by the said United Company, its successors or assigns, to fully and completely vest in the said United Company, its successors and assigns, the full and entire right, title and interest in, to and under all the property, business and good-will and every part thereof included within the foregoing assignments, and to enable the said United Company, its successors and assigns, to secure and enjoy the full benefits and advantages thereof.

The said Brush Company and the said Farnham and each of them shall at any and all times hereafter upon making, owning or acquiring at any time within fifteen (15) years from the date of these presents, or becoming possessed of any right to acquire or to take over any inventions or improvements or any Letters Patent or applications for Letters Patent of the United States or of any foreign country, or any right, title or interest in, to or under any such inventions, improvements, Letters Patent or applications for Letters Patent relating or pertaining in any way to brushes or to fillers, hubs, sleeves, collars, bristles, fiber or other parts or supplies therefor, shall forthwith fully disclose the same or cause the same to be disclosed to the said United Company, its successors and assigns, and its or their officers and patent solicitors, and at

any and all times thereafter they and each of them shall upon the request of the said United Company, its successors or assigns, execute and cause to be executed any and all applications for Letters Patent, assignments and other papers, and shall perform and cause to be performed any and all acts which may be necessary or desired by the said United Company, its successors or assigns, to obtain to the said United Company, its successors or assigns, Letters Patent of the United States and of any and all foreign countries where it may be desired to obtain Letters Patent covering such inventions and improvements, or any of them, so made, owned or controlled by the said Farnham and the said Brush Company, or by either of them, and to fully and completely vest and confirm in the said United Company, its successors and assigns, the full and complete right, title and interest in, to and under all such inventions, improvements, Letters Patent, applications, interests and rights, and to enable the said United Company, its successors or assigns, to secure and enjoy the full benefits and advantages thereof, — all without further consideration than that hereinbefore set forth but at the expense of the said United Company, its successors and assigns.

The said Brush Company and the said Farnham, and each of them, do hereby covenant and agree to and with the said United Company, its successors and assigns, that they will not nor will either of them at any time within fifteen (15) years from the date of these presents, in any country, (without the consent in writing of the said United Company, its successors or assigns) directly or indirectly, in any manner, enter into or be engaged in or financially or otherwise assist any person, firm or corporation in entering into, developing or carrying on any business which consists of or relates or pertains in any way to manufacturing or dealing in brushes, or manufacturing or dealing in sleeves, collars, fillers, hubs, bristles, fiber or other parts or supplies therefor, or in any business which will interfere or compete with the business of the United Company, its successors or assigns, relating to brushes or parts or supplies therefor, or in developing or exploiting any invention relating thereto, but that they will co-operate with the said United Company, its successors and assigns, to enable the said United Com-

pany, its successors and assigns, to obtain and enjoy the entire benefits and advantages of the good-will hereby conveyed. The said Brush Company and the said Farnham shall also obtain and deliver to the United Company a like covenant, duly executed by Mr. F. G. Farnham and by Mr. N. C. Farnham, who have been and are now identified with and interested in the business of the said Brush Company.

The United Company shall pay to the said Brush Company and to the said Farnham jointly upon the execution of this instrument and such other instruments in accordance with the terms hereof as may be requested at the same time with the execution of this instrument and delivery of the property set forth in said inventory, "Schedule A," the sum of Twenty Thousand Nine Hundred Fifteen and 32/100 Dollars.

The United Company shall also, in addition to said sum of Twenty Thousand Nine Hundred Fifteen and 32/100 Dollars above provided for, make to the said Brush Company and to the said Farnham jointly further payments as hereinafter provided, but not, however, exceeding in the aggregate the sum of Five Thousand (5000) Dollars, viz: —

During the continuance in force of Letters Patent of the United States, No. 673,119, dated April 30, 1901, granted to Frank Gunn Farnham for Improvements in Brushes (hereby conveyed to the said United Company) until the payments herein provided for shall have amounted in the aggregate to the sum of Five Thousand (5000) Dollars, provided said Letters Patent, No. 673,119, shall so long remain in force, the United Company shall pay to the said Brush Company and to the said Farnham jointly as aforesaid an amount equal to three (3) per centum of the net receipts from sales by the said United Company of brushes embodying inventions covered by any one or more of the Letters Patent of the United States enumerated in said "Schedule B" hereto annexed; Provided, however, that in case said Letters Patent of the United States, No. 673,119, shall not have been declared invalid prior to the first day of January 1909, the United Company shall on or before said first day of January 1909 pay to the said Brush Company and to

the said Farnham such sum, if any, as may be necessary to bring the aggregate amount of payments under the provisions of this paragraph up to said total sum of Five Thousand (5000) Dollars.

An account shall be kept by the United Company of all brushes so sold by it embodying any of the inventions covered by any one or more of the said Letters Patent of the United States included in said "Schedule B" hereto annexed, and shall on or before the thirteenth day of January, April, July and October in each year, until the obligations of the United Company under this paragraph hereof shall have terminated, render to the said Brush Company and to the said Farnham jointly an account showing the net receipts during the three (3) calendar months ending with the last day of the month preceding each such account from sales of such brushes so sold by or under the authority of the said United Company, and whether sold within the United States or elsewhere, and shall accompany each such accounting with payment to the said Brush Company and to the said Farnham jointly of an amount equal to three (3) per centum of such net receipts during the period covered by each such accounting. When the total amount of payments hereunder by the United Company shall have reached in the aggregate the sum of Five Thousand (5000) Dollars, or in the event prior to such time of said Letters Patent, No. 673,119, having been declared invalid, all further obligations of the United Company hereunder shall cease; and it is further provided that the United Company shall have the right at any time at its election to pay to the said Brush Company and to the said Farnham jointly such sum as at the time of such payment may be necessary to bring the payments hereunder up to the total of Five Thousand (5000) Dollars, and thereupon all obligations of the United Company hereunder shall cease.

If so requested by the said Brush Company or by the said Farnham the accounts provided for by the preceding paragraph hereof shall be duly verified and sworn to.

The said Brush Company and the said Farnham and each of them hereby covenant and agree to and with the said United Company that if the said United Company shall so elect the said United

Company may, for such period, not exceeding six (6) months from the date hereof, as the said United Company may desire, carry on the business hereby conveyed at the works heretofore occupied by the said Brush Company at Honesdale, Pennsylvania, the said United Company paying to the said Brush Company an amount equal to the rent thereof during such time as it shall so continue to occupy said works at the rate heretofore paid by the said Brush Company, and also (the said business from the date hereof being the business of the said United Company) paying all running expenses, including electric light, power, gas, fuel, superintendence, book-keeping and labor of said factory.

The property hereby conveyed by the said Farnham includes certain collars (estimated by the said Farnham about One Thousand (1000) pairs) for use in connection with brushes used by metal or nickel plate workers and now either on hand or in the possession of metal or nickel plate workers to whom they have been loaned; And it is Hereby Agreed that, in case the United Company shall either itself or through some other Company continue the manufacture of said type of brushes for metal or nickel plate trade after the United Company shall have removed the business hereby conveyed from Honesdale, or shall sell and convey that part of said business which relates to brushes for use by metal or nickel plate workers to some other party, the United Company shall pay or shall cause to be paid to the said Farnham personally, as an additional compensation for such collars, a sum of not less than Five Hundred (500) Dollars, and if in the event of such sale as aforesaid the United Company is able to obtain on account of such collars any sum in excess of Five Hundred (500) Dollars it will pay to the said Farnham such additional sum as it may receive up to the sum of Two Hundred and Fifty (250) Dollars in excess of said sum of Five Hundred (500) Dollars.

The said Brush Company and the said Farnham and each of them, without prejudice to the generality of the assignments and other covenants herein contained, hereby covenant with and warrant to the said United Company, its successors and assigns, that said Letters Patent and inventions hereby conveyed included within

said "Schedule B" hereto annexed are free from all prior grants, licenses and encumbrances whatsoever, and do hereby sell, assign, transfer and set over to the said United Company, its successors and assigns, for its and their own use and behoof absolutely, all claims and demands at law, in equity or otherwise, accrued or which may hereafter accrue for damages, profits or otherwise arising out of infringement of said Letters Patent or any of them, and do hereby irrevocably constitute and appoint the said United Company, its successors and assigns, the true and lawful attorney of the said Brush Company and of the said Farnham, and each of them, in the name of the said Brush Company and of the said Farnham, or either of them, or in the name of the said United Company or otherwise, to take such action at law or in equity or otherwise as may be necessary or desired by the said United Company to secure and enforce such claims and demands or otherwise to enable the said United Company to secure and enjoy the full benefits and advantages of all the property, business, good-will, interests and rights of every name and nature hereby conveyed or intended so to be.

All covenants and agreements herein expressed as on the part of the said Brush Company and the said Farnham and each of them shall be taken as joint and several covenants, enforceable against the said Brush Company and the said Farnham or either of them; and inasmuch as the said United Company has entered into this indenture relying upon the representations of the said Farnham as to the power and authority of the said Brush Company to make the assignments and enter into the covenants herein set forth and the consent of all the stockholders of the said Brush Company thereto the said Farnham does hereby covenant with and warrant to the said United Company, its successors and assigns, that all necessary votes by the said Brush Company have been or shall be passed, and all necessary acts have been or shall be done to enable the said Brush Company lawfully to enter into and to carry out the intent of this indenture and to vest and confirm, free from all claims and demands, in the said United Company, its successors and assigns,

the business, good-will and property of every name and nature of the said Brush Company as herein provided.

It is understood and agreed that the said Brush Company shall have the use of the books of entry and account heretofore used in connection with its business, for the purpose of collecting outstanding bills and accounts receivable, and otherwise settling up the matters connected with such business transacted prior to the date hereof.

The United Company assumes no responsibility for the application or distribution of the sums to be paid to the said Brush Company and to the said Farnham hereunder, and it is agreed that payment by the said United Company by valid check, made to the order of the said Brush Company and delivered to the said Farnham as Treasurer of said Company, of any sum due or payable under the provisions hereof shall fully discharge the United Company from its obligations as to such sum, and the said Farnham is hereby authorized to receipt for any payments hereunder, both in his own name and in the name of said Brush Company.

The said Farnham and the said Brush Company and each of them shall deliver to the said United Company receipts covering all hubs, sleeves or collars owned by the said Brush Company or by the said Farnham, which are in the hands of users thereof or others upon loan from the said Brush Company or from the said Farnham, in so far as such receipts have been or can, by any reasonable effort, be obtained by the said Farnham or by the said Brush Company.

The said Brush Company and the said Farnham hereby covenant with and warrant to the said United Company, its successors and assigns, that they and each of them will indemnify, protect and hold harmless the said United Company, its successors and assigns, against any and all claims or demands which may be made in, to or under any of the property of any nature hereby conveyed or any attachment which may be made upon such property by any creditor of the said Brush Company, or of the said Farnham or any other person claiming to hold or attach the same or any interest therein

by, through or under or as to the property of the said Brush Company or the said Farnham.

In Witness Whereof the said F. G. Farnham Brush Manfg. Co. has caused these presents to be signed by Fred C. Farnham, its president and its corporate seal to be hereto affixed, the said Farnham affixes his hand and seal, and the said United Shoe Machinery Company has caused these presents to be signed by Edward P. Hurd, its Assistant Treasurer, and its corporate seal to be hereto affixed this twenty-third day of January, A. D. 1904.

Special meeting of the Stockholders of The F. G. Farnham Brush Man'f'g Co., Camden, New Jersey, February 23, 1904.

A special meeting of the stockholders of The F. G. Farnham Brush Man'f'g Co. was duly held at the registered office of the company, to-wit, at the office of the New Jersey Corporation Guarantee & Trust Company, Nos. 417–419 Market Street, Camden, New Jersey, on Tuesday, the twenty-third day of February, 1904, at ten o'clock A. M., pursuant to the call of the President, due notice thereof, as provided by the By-Laws, having been given by the Secretary, as appears by the following original affidavit: —

Commonwealth of Pennsylvania,

County of Wayne, ss.

Norman C. Farnham, being duly sworn, doth depose and say that he is the Secretary, duly constituted and qualified, of the F. G. Farnham Brush Man'f'g Co., a corporation of the State of New Jersey, and that he did give notice of a special meeting of the stockholders of said company to be held at the office of the company in Camden, New Jersey, on Tuesday, the twenty-third day of February, 1904, in accordance with the call of the President, by sending a written notice, of which the following is a copy, stating the day, hour and place of the meeting and the general nature of the business to be transacted, to each stockholder of record at least five (5) days, exclusive of the day of mailing, before the date of said special meeting, at such address as appears on the stock book of the company.

[CORPORATE SEAL] Norman C. Farnham, Secretary

Subscribed and sworn to before me this twenty-fourth day of February, A. D. 1904.

Robt. A. Smith, Notary Public.

[SEAL] Commission expires January 14th, 1905.

Honesdale, Pennsylvania, February 15, 1904.

The F. G. Farnham Brush Manf'g Co. Notice of Special Meeting of Stockholders.

Notice is hereby given that at the call of the President a special meeting of the stockholders of this company will be held on Tuesday, the twenty-third day of February, 1904, at ten o'clock in the forenoon, at the office of the company, No. 417 Market Street Camden, New Jersey, for the following purposes:

1. To take action with reference to the sale of the property, assets, business and good-will of this company, as negotiated by a committee appointed for that purpose by the Board of Directors.

2. To take action upon a proposition to sell the entire property, assets, business and good-will of this company, except alone its franchise, cash, and bills, notes and accounts receivable, to the United Shoe Machinery Company, a New Jersey corporation.

3. To take action with reference to the execution by this company of a certain instrument which has been prepared covering the transfer by this company of its property, assets, business and good-will to the United Shoe Machinery Company, a New Jersey corporation, upon the terms in said instrument set forth. A copy of said instrument is now on file at the office of this company at Honesdale, Pennsylvania, and the same will be presented for action at the meeting hereby called.

4. To authorize, direct, ratify, confirm and approve the execution of all papers and the performance of all acts necessary or desirable to carry into effect the votes of the stockholders, including, if such shall be the vote of the stockholders, the sale of the property, assets, business and good-will of this company to the United Shoe Machinery Company, a New Jersey corporation.

5. To transact any other business which may properly come before the meeting.

[CORPORATE SEAL] N. C. Farnham, Secretary.

In the absence of the President the meeting was called to order by Mr. F. G. Farnham, who upon motion duly seconded was duly elected President pro tempore and presided at the meeting.

The secretary not being present, Mr. Jos. F. Cotter was upon motion duly seconded duly chosen Secretary of the meeting and kept the records thereof. He was sworn to the faithful performance of his duties as follows:

State of New Jersey,

County of Camden, ss.,

Jos. F. Cotter, secretary of the special meeting of stockholders of The F. G. Farnham Brush Man'f'g Co., held at the registered office of the company at Camden, New Jersey, this twenty-third day of February, 1904, being by me duly sworn, upon his oath does promise and swear that he will faithfully discharge the duties of Secretary of said meeting to the best of his skill and ability.

Jos. F. Cotter, Secretary

Subscribed and sworn to before me this twenty-third day of February, 1904.

Wm. F. Eidell, Notary Public

The notice calling the meeting was read.

The Secretary was directed to investigate and report upon the representation at the meeting and subsequently made a report as follows: —

Total stock issued and outstanding 1109 shares

Stockholders present in person.

Mr. F. G. Farnham 560 shares

Stockholders represented by proxy.

Mr. J. S. Brown
by F. G. Farnham, proxy, 5 shares

It appearing from the report of the Secretary that stockholders holding a majority of the amount of stock issued and outstanding, and entitled to be voted upon at this meeting, were present in person or by proxy, a quorum was declared to be present for the transaction of business. The proxies were directed to be filed with the Secretary.

The minutes of the special meeting of the Directors of the company held at Honesdale, Pennsylvania, on December 30, 1903, appointing a committee to negotiate a sale of the company's property and business, and of the special meeting of Directors held at Honesdale, Pennsylvania, on January 9, 1904, at which meeting the committee appointed to negotiate the sale of the property and business of the company made its report, were read, and it was stated to the meeting that a committee having been, as in said minutes set forth, appointed by the Directors to negotiate the sale of the property, assets, business and good-will of the company, such committee had succeeded in negotiating a sale to the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, having a place of business in Boston, Massachusetts, at a price based upon cost value of materials and property on hand, plus certain additional sums on account of patents, good-will and other assets, of the entire property, business and good-will of every name and nature of the company, excepting alone its franchise and all cash on hand and on deposit, and notes, bills and accounts receivable, and also a sale to the said United Shoe Machinery Company by Mr. Frank G. Farnham of certain foreign patent rights and other property owned by Mr. Farnham personally, it having been necessary, it order to negotiate the trade with the said United Shoe Machinery Company, to include all of said property, not only of this company but also

of Mr. Farnham personally and to make the trade as a single transaction. It is also called to the attention of the meeting that in accordance with the terms negotiated for such sale it would be necessary for this company and for Mr. Farnham to enter into proper covenants in favor of the purchaser, including especially covenants as to title to the property, assets, business and good-will conveyed, for further assurances, for the transfer of any inventions or patent rights hereafter acquired or owned by this company or by Mr. Farnham relating to brushes or to fillers, hubs, sleeves, collars, bristles, fibre or other parts or supplies therefor, and against competition.

It was further stated to the meeting that since the seventh day of January an inventory of the materials and property of the company on hand had been made and the amount of the consideration to be paid by the said United Shoe Machinery Company for said purchase and covenants had been more accurately determined to be the sum of twenty thousand, nine hundred fifteen dollars, thirty-two cents ($20,915.32) in cash, and five thousand dollars ($5000) in royalty (in accordance with and subject to the terms of the instrument embodying said trade, referred to in the call for this meeting) upon brushes sold embodying the inventions or improvements covered by certain Letters Patent of the United States included within the sale to the United Shoe Machinery Company, plus an additional sum not yet determined but estimated at about eighteen hundred dollars ($1800) on account of certain sleeves and collars now in the hands of manufacturers; and that of said purchase price the sum of twenty thousand, nine hundred fifteen dollars, thirty-two cents ($20,915.32) in cash, and the sum of five thousand dollars ($5000) in royalty, as aforesaid, is to be paid on account of the property, assets, business and good-will and the covenants of this company, the balance being on account of the personal transfers and covenants of Mr. F. G. Farnham.

The instrument referred to was submitted to the meeting for inspection.

Upon motion duly seconded it was

Voted: — That the action of the Directors and of the committee

appointed by the Directors in negotiating a sale to the United Shoe Machinery Company upon the terms above set forth of the entire property, assets and business of every name and nature of this company, except alone its franchise, cash on hand and on deposit, and notes, bills and accounts receivable, be and the same hereby is confirmed, ratified and approved, and is adopted as the act and deed of this company.

Upon motion duly seconded it was

Voted: — That the sale of the property, assets, business and good-will of this company to the said United Shoe Machinery Company as negotiated and as set forth in the written proposition made under date of January 6, 1904 by the committee appointed by the Board of Directors for that purpose, and in the written acceptance of said proposition by the said United Shoe Machinery Company under date of January 7, 1904, be and the same hereby is authorized, confirmed, ratified and approved, and is adopted as the act and deed of this company.

Upon motion duly seconded it was

Voted: — That this company do sell, assign, transfer, set over and deliver to the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, having a place of business in Boston, Massachusetts, the entire property, assets, business and good-will of every name and nature of this company, except alone the franchise of this company and any and all cash on hand or on deposit, and bills, notes or accounts receivable, and do enter into proper covenants with the said purchaser in support thereof; said sale and transfer to take effect as of the twenty-third day of January, 1904.

Upon motion duly seconded it was

Voted: — That the sale provided for in the next preceding vote be made in consideration of the payment by the said United Shoe Machinery Company to this company for the property, assets, business and good-will included therein and covenants in support thereof, of the sum of twenty thousand, nine hundred and fifteen dollars, thirty-two cents ($20,915.32) in cash, and the undertaking of the said United Shoe Machinery Company, in accordance

with and subject to the terms of the written instrument embodying the terms of this sale, referred to in the call for this meeting and now before the meeting, to pay to this company during the continuance in force of Letters Patent of the United States, No. 673,-119, dated April 30, 1901, until the aggregate sum of five thousand dollars ($5000) shall have been paid, a certain sum, in the nature of royalty upon brushes sold by the United Shoe Machinery Company embodying the inventions or improvements covered by certain Letters Patent of the United States included in the transfer from this company.

Upon motion duly seconded it was

Voted: — That this company execute under date of the twenty-third day of January 1904 an instrument of transfer to the United Shoe Machinery Company, a New Jersey corporation, of all the property, assets, business and good-will of this company of every name and nature, except alone its franchise, cash on hand and on deposit and notes, bills and accounts receivable, and containing covenants on the part of this company in the form of the following instrument between this company as party of the first part, Frank G. Farnham, of Honesdale, Pennsylvania, party of the second part, and the said United Shoe Machinery Company, party of the third part; said instrument being the instrument referred to in the call for this meeting and referred to in the preceding vote, viz.: —

At this point there is inserted in the original record a full copy of the Indenture of January 23, 1904, herein referred to, it being a duplicate copy of the foregoing instrument to which this certified copy of the record is annexed.

Attest: Norman C. Farnham, Secretary.

[CORPORATE SEAL]

Upon motion duly seconded it was Voted:

That this company do execute and cause to be executed any and all instruments, and do perform and cause to be performed any and all acts necessary or desired to carry into effect the terms of the instruments referred to in the next preceding vote and to fully

and completely vest and confirm in the said United Shoe Machinery Company, its successors, assigns or nominees, any and all of the property, assets, business and good-will of this company, excepting its franchise, cash, bills, notes and accounts receivable, including herein without prejudice to the generality of this vote the transfer to the said United Shoe Macninery Company, its successors, assigns, or nominees, of all inventions or improvements, and all Letters Patent of the United States and of any and all foreign countries, and all trade names, marks and brands, and all interests and rights in, to or under the same, owned or controlled by this company.

Upon motion duly seconded it was Voted:

That the execution by Mr. Fred C. Farnham, as President of this company, for, in the name of and in behalf of this company of any and all of the instruments referred to in the two preceding votes be and the same hereby is authorized, confirmed, ratified and approved, and that the President be and he hereby is authorized and directed to formally execute for, in the name and on behalf of this company and under its corporate seal an instrument in the form of that above set forth at length in these minutes, giving same date as of the twenty-third day of January, A. D. 1904, and to execute any and all further instruments and to perform any and all acts necessary or desired to carry out the terms of said instrument or to carry out the intent of any and all of the votes passed at this meeting, and to deliver all such instruments to the said United Shoe Machinery Company upon or after delivery by the said United Shoe Machinery Company to this company of a duplicate of said instrument of January 23, 1904, duly executed by the said United Shoe Machinery Company.

Each and all of the votes passed at this meeting were passed by the unanimous vote of all stockholders present in person or by proxy, to-wit, were passed by the affirmative vote of the holders of a majority of the stock issued and outstanding.

There being no further business to come before the meeting, it was on motion duly seconded

Voted: To adjourn.

Adjourned.

Jos. F. Cotter, Secretary pro tem.

Attest: F. G. Farnham.

Norman C. Farnham,

[CORPORATE SEAL] Secretary of the Company

Honesdale, Pennsylvania, February 24, 1904.

THE F. G. FARNHAM MAN'F'G CO.

A special meeting of the Board of Directors of The F. G. Farnham Brush Man'f'g Co. was duly called by the President and was held at the office of the company, in Honesdale, Pennsylvania, on Wednesday, the twenty-fourth day of February, 1904, at three o'clock P. M.

There were present of the Board

Messrs. F. G. Farnham,	Signed
John Kuback	"
F. G. Farnham	"
N. C. Farnham	"
T. R. Thersk	"
Geo. W. Seaman	"

The records of the special stockholders' meeting, held at the office of the company in Camden, New Jersey, on Tuesday, the twenty-third day of February, 1904, were read, from which it appeared that the company had, by affirmative vote of the holders of a majority of the stock issued and outstanding, voted to sell, assign and transfer to the United Shoe Machinery Company, a New Jersey corporation, having a place of business at Boston, Massachusetts, the entire property, assets, business and good-will of this company, excepting alone its franchise, cash on hand and on deposit, and bills, notes and accounts receivable.

There was also presented to the meeting a written consent, signed by the holders of a majority of the stock of this company issued and outstanding, consenting to and approving such sale.

Thereupon, upon motion duly seconded, it was Voted:

That this company do sell, assign, transfer, set over and deliver

to the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, having a place of business in Boston, Massachusetts, the entire property, assets, business and good-will of every name and nature of this company, except alone the franchise of this company and any and all cash on hand or on deposit, and bills, notes or accounts receivable, and do enter into proper covenants with the said purchaser in support thereof; said sale and transfer to take effect as of the twenty-third day of January, 1904.

Upon motion duly seconded, it was Voted:

That the sale provided for in the next preceding vote be made in consideration of the payment by the said United Shoe Machinery Company to this company for the property, assets, business and good-will included therein and covenants in support thereof, of the sum of twenty thousand, nine hundred fifteen dollars, thirty-two cents ($20,915.32) in cash, and the undertaking of the said United Shoe Machinery Company, in accordance with and subject to the terms of the written instrument embodying the terms of this sale, which is set forth at length in the minutes of and the execution of which was authorized by the stockholders at the special meeting of the stockholders of this company, held at Camden, New Jersey, on Tuesday, the twenty-third day of February, 1904, to pay to this company during the continuance in force of Letters Patent of the United States No. 673,119, dated April 30, 1901, until the aggregate sum of five thousand dollars ($5000) shall have been paid, a certain sum, in the nature of royalty upon brushes sold by the United Shoe Machinery Company embodying the inventions or improvements covered by certain Letters Patent of the United States included in the transfer from this company.

Upon motion, duly seconded, it was Voted:

That this company execute under date of the twenty-third day of January, 1904, an instrument of transfer to the United Shoe Machinery Company, a New Jersey corporation, of all the property, assets, business and good-will of this company of every name and nature, except alone its franchise, cash on hand and on deposit and notes, bills and accounts receivable and containing covenants on

the part of this company in the form of the instrument between this company as party of the first part, Frank G. Farnham, of Honesdale, Pennsylvania, party of the second part, and the said United Shoe Machinery Company, party of the third part, which instrument is set forth at length in the minutes of and the execution of which was authorized by the stockholders at the special meeting of the stockholders of this company, held at Camden, New Jersey, on Tuesday, the twenty-third day of February, 1904.

Upon motion, duly seconded, it was Voted:

That this company do execute and cause to be executed any and all instruments, and do perform and cause to be performed any and all acts necessary or desired to carry into effect the terms of the instrument referred to in the next preceding vote, and to fully and completely vest and confirm in the said United Shoe Machinery Company, its successors, assigns or nominees, any and all of the property, assets, business and good-will of this company, excepting its franchise, cash, bills, notes and accounts receivable, including herein without prejudice to the generality of this vote the transfer to the said United Shoe Machinery Company, its successors, assigns or nominees, of all inventions or improvements, and all Letters Patent of the United States and of any and all foreign countries, and all trade names, marks and brands, and all interests and rights in, to or under the same, owned or controlled by this company.

Upon motion duly seconded, it was Voted:

That the execution by Mr. Fred C. Farnham as President of this company, for, in the name of and in behalf of this company of any and all of the instruments referred to in the two preceding votes be and the same hereby is authorized, confirmed, ratified and approved, and that the President be and he hereby is authorized and directed to formally execute for, in the name and on behalf of this company and under its corporate seal an instrument in the form of that which is set forth at length in the minutes of and the execution of which was authorized by the stockholders at the special meeting of the stockholders of this company, held at Camden, New Jersey, on Tuesday, the twenty-third day of February, 1904,

giving same date as of the twenty-third day of January, A. D. 1904, and to execute any and all further instruments and to perform any and all acts necessary or desired to carry out the terms of said instrument or to carry out the intent of any and all of the votes passed at this meeting, and to deliver all such instruments to the said United Shoe Machinery Company upon or after delivery by the said United Shoe Machinery Company to this company of a duplicate of said instrument of January 23, 1904, duly executed by the said United Shoe Machinery Company.

Each and all of the votes passed at this meeting were approved and favorably voted upon by a majority of the whole Board of Directors of this company.

There being no further business to come before the meeting, it was, on motion duly seconded, Voted: To adjourn.

Adjourned.

Attest: Norman C. Farnham, Secretary.

PLAINTIFF'S EXHIBIT 110.

[Put in Evidence, page 557.]

This Agreement made this second day of May A. D. One Thousand Nine Hundred and Four, by and between the United Shoe Machinery Company, a corporation duly organized under the laws of the State of New Jersey, with a registered office at Paterson, New Jersey, and a usual place of business at 205 Lincoln Street, in Boston in the Commonwealth of Massachusetts, (hereinafter called the United Company), party of the first part, and The American Glue Company, a corporation duly organized under the laws of the State of New Jersey with a registered office at Trenton, New Jersey, and a usual place of business at 121 Beverly Street, in said Boston, (hereinafter called the American Company), party of the second part, herein acting for and on behalf of and hereby binding not only itself but any and all branch companies which now are or may hereafter be organized or controlled by the American Company or in which the American Company is or may be interested, Witnesseth: —

That Whereas the United Company and the American Company, on the Sixteenth day of February, One Thousand Nine Hundred and One, entered into an agreement by which the United Company became the exclusive agent for Europe for the sale of all Sand Paper made for or by the American Company for use in the manufacture of boots and shoes;

And Whereas the said Companies are now desirous of entering into an agreement whereby the United Company shall become the exclusive agent of the American Company for the sale of all Sand Paper, owned, handled, or manufactured by or for the American Company, or in which it is or may be in any way interested, for use in the manufacture of boots and shoes in the United States and Dominion of Canada.

Now, Therefore, in consideration of the sum of One Dollar ($1.00) by each of the parties to the other paid, the receipt whereof is hereby acknowledged, and in further consideration of the mutual

covenants and agreements herein contained, the said parties do hereby covenant and agree as follows: —

The American Company agrees that the United Company shall have from the First day of June, A. D. One Thousand Nine Hundred and Four, the exclusive agency for the United States and the Dominion of Canada, for the sale of all Sand Paper in all forms, owned, handled, or manufactured by or for the American Company, or in which it is or may be in any way interested, and used or intended for use in the manufacture of boots and shoes.

The United Company agrees to make every reasonable effort to extend and increase the sale of the American Company's Sand Paper, and agrees and hereby binds itself that during the continuance of this agreement it will not use, or cause to be used in any of the factories which it may own or control, and that it will not sell any Sand Paper except that obtained from the American Company, except such brands, trade marks, grades and qualities as the American Company after reasonable trials is unable to produce to the satisfaction of the consumer at prices not greater than the United Company can obtain equal quantities elsewhere, and at any time when the American Company can furnish such equal qualities at equal prices, it shall receive the preference on all orders placed by the United Company.

The United Company also agrees to furnish the American Company or its representatives, at any time, such information as it may desire regarding sales and prices.

The American Company agrees to furnish exclusively for, and sell and deliver to the United Company promptly on receipt of its orders, unavoidable delays excepted, all Sand Paper which the United Company may from time to time order, and to use suitable materials and all due care and precaution in manufacturing and in the seasoning of the same; also to furnish free of charge, samples for testing and experimenting and to employ a competent man, whose duty it shall be to investigate, upon request, all complaints, and assist the United Company to increase the sale of its Sand Paper.

This Agreement shall continue for One Year from the First day

of June, A. D. One Thousand Nine Hundred and Four, unless sooner terminated as hereinafter provided. It is agreed, however, that either party shall have the right to terminate this agreement by a three months' notice in writing delivered to the other of said parties, and in case such notice shall be given, then this agreement shall, at the end of the said three months, terminate. If this agreement shall continue for the full term of one year without such notice having been given by either party, then it shall continue in full force and effect until it is terminated by a three months' notice in writing, delivered by one of the parties to the other as hereinbefore provided. In the event that the American Company gives such notice, it hereby agrees to do nothing that might operate to the disadvantage of its exclusive agent, the United Company, until the expiration of the three months' period and the termination of this contract, and the United Company may return to the American Company such stock of unsold goods as shall have been purchased under this contract, at the expense of the American Company, and the American Company will pay the United Company for such returned goods at the prices existing at the termination of this contract.

The American Company shall from time to time fix minimum selling prices, below which the United Company shall not sell without the consent of the American Company.

In the event of any material change in the conditions governing the selling prices to consumers, a new schedule of prices shall be arranged between the American Company and the United Company.

All goods shall be delivered to the warehouses of the United Company in Boston, or to any railroad depots or steamship docks in Boston, free of cost of delivery to the United Company. On all direct shipments by the American Company to points in New England outside of Boston, an allowance of Fifteen Cents (15c) per One Hundred Pounds for freight shall be deducted from the invoice prices herein set forth, and on direct shipments by the American Company to all points in the Dominion of Canada and the United States outside of New England, an allowance of Fifty

Cents (50c) per One Hundred Pounds shall be deducted from the invoice prices herein set forth.

Payment shall be Sixty Days net, or less Two Per Cent (2%) for cash if paid between the Tenth and Twentieth day of the month succeeding that in which invoices are rendered.

Any Sand Paper manufactured by the American Company and in the hands of the United Company, its agents or customers, which after careful investigation is found to be defective in quality through any fault of the American Company, may be returned to and at the expense of the American Company, and charged back to them at the then existing prices, but no allowance made to customers by the United Company shall be charged back to the American Company except by its written consent.

It is further agreed that from time to time and at its own expense the United Company may return to the American Company and charge back at the then existing prices any sand paper in good condition and readily salable in other territories, but which at the time of such return is unsalable in the district making such returns.

All orders and inquiries for Shoe Paper received by the American Company after the First Day of June, A. D. One Thousand Nine Hundred and Four shall not be filled by it, but shall be turned over to the United Company; nor shall the American Company solicit any orders for this class of business between this date and June 1st, 1904.

It is mutually agreed that the term "Sand Paper" or "Shoe Paper" wherever used in this agreement is understood and acknowledged to cover and include Emery, Garnet Flint, and any and all abrasives whether natural or artificial, which have been or may hereafter be applied to paper and cloth, or any combination of the two, or any similar material which has been or may be used.

The United Company reserves the right to purchase from companies, other than the American Company, Sand Paper for use on the Buffing or Cleaning Machines of the "Naumkeag" type, in case it should hereafter engage in manufacturing or dealing in Naumkeag or similar machines.

All orders shipped on and after the Second Day of May, One

Thousand Nine Hundred and Four, shall be invoiced at list prices and discounts as per attached Price Lists marked "A" and Discount Sheet marked "B" until such time as new lists and discounts are made as hereinbefore provided, except shipments to the Dominion of Canada, which shall be invoiced as per attached Price Lists marked "A" and Discount Sheet marked "C".

In the event of strikes, combinations of working people, accidents to machinery, floods, ice, fires, wars, civil commotion, epidemics, or any other causes beyond the control of either of the parties to this agreement, by reason of which the obligations entered into are interrupted or rendered impossible, the conditions of this agreement may and shall be suspended during such reasonable time as may be required by either party to resume them.

It is further agreed and understood that this agreement shall also be binding on and enforceable against the successors and assigns of the parties hereto.

In Witness Whereof the United Shoe Machinery Company has caused this contract to be executed and its corporate seal to be hereto affixed by Edward P. Hurd, its Assistant Treasurer, and the American Glue Company has caused this contract to be executed and its corporate seal to be hereto affixed by D. Webster Dow, its Second Vice-President, in duplicate, the day and year first above written.

PLAINTIFF'S EXHIBIT 111.

[Put in Evidence, page 558.]

Indenture made this First day of January, 1904, by and between Zachary Taylor French, of Boston, in the Commonwealth of Massachusetts, as party of the first part: United Shoe Machinery Company, a corporation organized and existing under the laws of the State of Maine, formerly named Goodyear Shoe Machinery Company, (hereinafter called the Maine Company) party hereto of the second part: and United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey (hereinafter called the New Jersey Company) party hereto of the third part.

Whereas, by a certain written agreement, dated the 19th day of December 1895, made between said French and one William C. Meyer, as parties of the first part, and the Maine Company (under the name of Goodyear Shoe Machinery Company), as party of the second part, recorded November 27, 1899 in the Patent Office of the United States of America, in Liber F. 60, Page 436 of Transfers of Patents, the said French and the said Meyer did grant to the Maine Company the exclusive right and license to make, use and sell certain inventions described and claimed in and by certain Letters Patent therein specifically mentioned and which should be patented in and by such Letters Patent as should be granted to them or either of them upon certain pending applications therein men-

tioned, which agreement is hereinafter referred to as the "Rounding and Channeling Machine Agreement," and

Whereas, by another agreement dated the 19th day of December 1895, hereinafter referred to as the "Shanking and Feather Edging Machine Agreement", made by and between the same parties as were parties to said "Rounding and Channeling Machine Agreement", recorded November 27, 1899 in the Patent Office of the United States of America, in Liber F. 60, Page 442, said French and Meyer did grant to said Maine Company the exclusive right and license to make, use and sell certain inventions described and claimed in and by certain Letters Patent referred to in said "Shanking and Feather Edging Machine Agreement", and which should be patented in and by such letters patent as should be granted to said French and Meyer or either of them, upon certain pending applications referred to in said last mentioned agreement; and

Whereas, by a certain agreement dated the 2nd day of January 1899, hereinafter referred to as the "Agreement of January 2nd, 1899", made by and between the same parties as were parties to said "Rounding and Channeling Machine Agreement" recorded November 27, 1899 in the Patent Office of the United States of America in Liber F. 60, Page 448, of Transfers of Patents, the said French and Meyer did grant and agree to grant to said Maine Company the sole and exclusive license to make, use and sell certain inventions described and claimed in and by certain Letters Patent referred to in said "Agreement of January 2nd, 1899", and in such letters patent as should be granted to them or either of them upon certain pending applications for letters patent referred to in said last mentioned agreement; said three agreements being also referred to hereinafter as the "License Agreements"; and

Whereas, all the royalties or license fees due and payable to said French from the Maine Company pursuant to said three License Agreements which are payable in respect to machines sold, leased or otherwise disposed of by the Maine Company prior to the date of this instrument, have been paid to said French, and all the covenants and agreements for the benefit of said French incumbent

upon the said Maine Company have been fully performed by the Maine Company; and

Whereas, the Maine Company desires to purchase, and the said French is willing to sell and convey to the Maine Company the entire right, title and interest of said French in and to all the inventions, Letters Patent and applications for Letters Patent mentioned or referred to in or contemplated by said three License Agreements, and to be forever released and discharged after the date of this instrument from the payment to said French or his executors or administrators of royalties or license fees, or other sums, pursuant to said three License Agreements, or either of them; and

Whereas, the New Jersey Company desires to purchase, and the said French is willing to sell and convey to the New Jersey Company, the entire right, title and interest of said French in and to all other inventions or improvements in or relating to machines, machinery, tools, appliances, articles, and methods to be used or adapted for use in the manufacture of footwear, footwear findings, leather articles or for leather working, which said French has heretofore invented, discovered or acquired, or which he shall hereafter invent, discover or acquire during the period of ten years from the 1st day of January, 1904, and in and to all letters patent, both of the United States of America, and of other countries, which have been or shall be hereafter obtained for such inventions or improvements or any of them; and

Whereas, the Letters Patent and applications for Letters Patent mentioned or referred to in said three License Agreements so far as now known to the parties hereto are described in the "Schedule of Patents and Applications for Patents" hereinafter contained:

Now, therefore, the parties hereto agree as follows: —

1. The said French in consideration of the sum of One Dollar and other valuable consideration to him paid contemporaneously with the execution and delivery of this Indenture, the receipt of which is hereby acknowledged, has sold, assigned and conveyed and does hereby sell, assign and convey to the Maine Company all his right, title and interest in and to the several Letters Patent and Appli-

cations for Letters Patent described or referred to in the "Schedule of Patents and Applications for Patents", herein contained, and all his right, title and interest in and to the several inventions therein described and claimed; also all his right, title and interest in and to all inventions or improvements mentioned, referred to or contemplated by said three License Agreements, which are not described or referred to in said "Schedule of Patents and Applications for Patents", and all his right, title and interest in and to such Letters Patent, both of the United States of America and of other countries, as have been or shall be hereafter obtained for such inventions or improvements or either or any of them.

To Have and to Hold all such inventions, improvements and letters patent to the Maine Company, and its successors and assigns to the full end of the respective terms of such letters patent as have been or shall be granted for such inventions or improvements, or either or any of them and to the full end of any and all reissued or extended terms thereof.

2. The said French for the consideration aforesaid, which he acknowledges has been paid to and is received by him in full satisfaction for all royalties, license fees and other sums provided to be paid to him in and by said three License Agreements for inventions or improvements made and for his services rendered prior and up to the date of this instrument, hereby forever releases and discharges the Maine Company from all its covenants and agreements in said three License Agreements contained, and acknowledges that it has fully performed all and every its said covenants and agreements.

3. The said French, for himself and not for said Meyer, for the aforesaid consideration, hereby agrees that said License Agreements shall hereafter be unrestrictedly assignable by the Maine Company, and that all the beneficial interest of the Maine Company created by said three License Agreements shall hereafter be construed to be for the benefit of the Maine Company and its successors and assigns; and that, if requested so to do, he will assent in writing to any and all such assignments which shall be made from time to time by the Maine Company, its successors or assigns.

4. The said French, for the aforesaid consideration, hereby authorizes and requests the Commissioner of Patents of the United States of America to issue from time to time to the Maine Company, its successors and assigns, as the assignee of his entire interest therein, all such Letters Patent of the United States of America as shall hereafter be allowed upon pending applications for letters patent mentioned or referred to in the "Schedule of Patents and Applications for Patents" hereinafter contained, or upon any and all such applications made in renewal thereof or as divisional applications. And agrees with the Maine Company from time to time hereafter, upon the request, but at the expense of the Maine Company, to do such acts and execute and make oath to and deliver all such deeds of assignment, powers of attorney, or other written instruments as shall, in the opinion of the counsel of said Maine Company, be necessary or convenient to vest the legal title to his entire interest in and to such inventions and improvements hereby sold and conveyed, and in and to all Letters Patent therefor both of the United States of America and of foreign countries, in said Maine Company, or in such nominee or nominees as it shall designate to take title to the same, or either or any thereof; and that he will upon the request, but at the expense of the Maine Company, from time to time hereafter do whatever may be deemed necessary and proper by the counsel of the Maine Company to secure the grant of letters patent for such inventions or improvements and reissues or extensions thereof and to enable or assist the Maine Company to maintain and defend its title to the inventions, improvements and letters patent hereby sold and conveyed or agreed to be sold and conveyed to it.

5. The said French, in consideration of the agreement of the New Jersey Company hereinafter contained, to pay to him, his executors and administrators, the sum of Fifteen Thousand Dollars ($15,000.) in ten (10) annual payments of Fifteen Hundred Dollars ($1500.) each, payable on the last day of each calendar year for the next ten (10) years, hereby sells, assigns and conveys to the New Jersey Company, its successors and assigns all his right, title and interest in and to all letters patent for inventions or

improvements in or relating to machines, machinery, tools, appliances, articles and methods to be used in the manufacture of footwear, footwear findings, leather articles or for leather working (except such letters patent as he has agreed to sell and convey to the Maine Company) and all his right, title and interest in and to all such inventions or improvements, whether made by himself or by or with another or others, which he has invented, discovered or acquired but not patented (except such inventions and improvements as he has agreed to sell and convey to the Maine Company) or which he shall hereafter invent or discover or acquire during the period of ten (10) years beginning the first day of January 1904 and ending the thirty-first day of December 1913; and agrees that he will promptly communicate to the President, General Manager, or counsel of the New Jersey Company, all such inventions or improvements hereby sold and conveyed to the New Jersey Company, or which he shall make, discover or acquire during said period of ten (10) years, whether the same have been or shall be made by himself or by or with another or others; and whenever so requested to do, will disclose or explain all such inventions or improvements hereby sold and conveyed or agreed to be sold and conveyed to the New Jersey Company fully and completely to the New Jersey Company, or its President, General Manager or counsel, and that he will upon the request but at the expense of said New Jersey Company, execute and make oath to all such applications, specifications, powers of attorney or other written instruments in such form as the New Jersey Company, or its President, General Manager or counsel shall deem proper to obtain the grant of letters patent of the United States of America, and of foreign countries and reissues and extensions thereof for such inventions and improvements hereby sold and conveyed or agreed to be sold and conveyed to the New Jersey Company; and that he will, upon the request, but at the expense of the New Jersey Company, do such acts and execute and make oath to and deliver all such deeds of assignment, powers of attorney or other written instruments as shall, in the opinion of the counsel of said New Jersey Company be necessary or convenient to vest the legal title to his entire interest

in and to such inventions and improvements hereby sold and conveyed or agreed to be sold and conveyed to the New Jersey Company and in and to all Letters Patent therefor, both of the United States of America and foreign countries in said New Jersey Company or in such nominee or nominees as it shall designate to take title to the same, or either or any thereof, and that he will upon the request, but at the expense of the said New Jersey Company from time to time hereafter do whatever may be deemed necessary and proper by the counsel of the New Jersey Company to enable or assist the New Jersey Company to maintain or defend its title to such inventions, improvements and Letters Patent hereby sold and conveyed or agreed to be sold and conveyed to the New Jersey Company.

To Have and to Hold all such inventions, improvements and letters patent to the New Jersey Company and its successors and assigns to the full end of the respective terms of such letters patent as have been or shall be granted for such inventions or improvements or either or any of them, and to the full end of any and all reissued or extended terms thereof.

6. And the said French further agrees with the New Jersey Company, that during the period of ten years beginning the first day of January 1904 and ending on the 31st day of December, 1913, he will not, except by the request of, or for the benefit of the New Jersey Company or the Maine Company, either by himself or jointly with another or others, or directly or indirectly, or as a stockholder, agent, servant or employee, become interested in or engage in inventing, making, selling or developing any machine, machinery, appliance, device or method designed or adapted to be employed in the manufacture of footwear, or in the manipulation of leather or the manufacture of footwear findings, in competition with the New Jersey Company or corporations controlled by it, and that he will not during said period, except by the request of the New Jersey Company, directly or indirectly, aid, assist or encourage anyone to engage in the manufacture of or to deal in machines, machinery, tools, appliances or articles to be used or adapted to be used in the manufacture of footwear, footwear findings, leather

articles or for leather working, in competition with the New Jersey Company or corporations controlled by it, and that he will not infringe or aid or assist anyone to infringe any trade marks, trade names or Letters Patent now owned or which shall hereafter be owned by said New Jersey Company or by corporations controlled by it.

7. The New Jersey Company, in consideration of the herein contained agreements with it on the part of said French, agrees to pay to him, his executors and administrators, the sum of Fifteen Thousand Dollars ($15,000) in ten (10) annual payments of Fifteen Hundred Dollars ($1500) each, during the ten (10) years next ensuing, the first of said payments to be made on the thirty-first day of December 1904, and the last of said payments on the thirty-first day of December 1913.

8. The Maine Company in consideration of one Dollar and other valuable consideration to it paid by the other parties hereto, the receipt of which is hereby acknowledged, hereby assents to this agreement.

9. The covenants and agreements herein contained which are incumbent upon or for the benefit of the Maine Company or the New Jersey Company shall be construed to be incumbent upon and for the benefit of their respective successors, and those which are incumbent upon or for the benefit of said French shall be construed to be incumbent upon and for the benefit of his executors and administrators.

10. The Maine Company and the New Jersey Company severally agree that the payments to be made by them respectively to the said French at the time of the execution and delivery of this Indenture as provided in paragraph 1 hereof, and the ten annual payments of fifteen hundred dollars ($1500) each, referred to in paragraphs 5 and 7 hereof shall be net to the said French without reduction or abatement upon any account, and, in consideration thereof, the said French hereby releases and discharges the Maine Company and the New Jersey Company from any and all claims and demands which he has or may have against said Companies or either of them arising out of any and all matters or things existing

or accruing prior to the date of this Indenture; and the Maine Company and the New Jersey Company in consideration of the covenants and agreements of said French herein contained hereby release and discharge the said French from any and all claims and demands which they or either of them respectively have against him by reason of any and all matters or things existing or accruing prior to the date of this Indenture, except claims of the Maine Company or the New Jersey Company to such right, title and interest in inventions, applications for letters patent and letters patent as the said French has sold and conveyed or agreed to sell and convey to the Maine Company or to the New Jersey Company.

PLAINTIFF'S EXHIBIT 112.

[Put in Evidence, page 559.]

Know all Men by these Presents:

That we, Herbert L. Kimball and Irving A. Hadley, both of Lynn, Massachusetts, heretofore engaged as copartners at said Lynn and elsewhere in the business of manufacturing and dealing in needles, awls, drivers, and similar articles under the firm name and style of Kimball & Hadley, in consideration of the sum of four thousand, seven hundred and fifty dollars ($4750.00) in cash to us paid by the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, having a place of business in Boston, Massachusetts, the receipt of which we hereby acknowledge, have sold and do by these presents sell, assign, transfer, set over and deliver to the said United Shoe Machinery Company, its successors and assigns, the said business heretofore carried on by us, together with the good-will thereof, and all business, good-will, property, interests and rights of every name and nature had by us or by either of us or which we or either of us is in anywise, by agreement or otherwise, entitled to acquire or take over relating to needles, awls, drivers, and like articles, including herein all merchandise, needles, awls, drivers, supplies, materials manufactured, unmanufactured or in process of manufacture, machines, machinery, tools, fixtures, furniture and equipment, the good-will of all such business, and all trade names, marks and brands, and all other property, interests and rights, benefits and advantages of whatsoever name or nature relating thereto; Excepting, However, that this assignment does not include any cash on hand or any bills, notes and accounts receivable.

To Have and to Hold all of the said business, good-will, property, interests and rights to the said United Shoe Machinery Company, its successors and assigns, to its and their own use and behoof absolutely.

And for the same consideration we and each of us do hereby covenant with and warrant to the said United Shoe Machinery Company, its successors and assigns, that the property hereby

conveyed includes all of the property set forth in the schedule hereto annexed and marked "Schedule A"; that we are the absolute owners of all the business, good-will, property, interests and rights hereby conveyed or expressed or intended to be conveyed; that the same are free from any and all incumbrances; that we have good right to sell and assign the same as aforesaid, and will warrant and defend the same against the lawful claims and demands of all persons.

And for the same consideration we and each of us do hereby covenant and agree to and with the said United Shoe Machinery Company, its successors and assigns, that at any and all times hereafter we and each of us will without further consideration execute and cause to be executed any and all further assignments or other instruments, and will perform and cause to be performed any and all further acts necessary or desired by the said United Shoe Machinery Company, its successors or assigns, to fully and completely vest and confirm in the said United Shoe Machinery Company, its successors and assigns, the full and absolute title in and to all the business, good-will, property, interests and rights, benefits and advantages hereby conveyed or expressed or intended to be conveyed, and to enable the said United Shoe Machinery Company, its successors and assigns, to secure, protect, and enjoy the full benefits and advantages thereof.

And for the same consideration we and each of us do hereby covenant and agree to and with the said United Shoe Machinery Company, its successors and assigns, that we will not nor will either of us at any time within fifteen (15) years from the date of these presents directly or indirectly, individually or in combination with others, as manager, agent or employee, or as officer or stockholder in a corporation, or otherwise, in any manner, enter into or be engaged or interested in or financially or otherwise assist any person, firm or corporation in entering into, developing or carrying on any business which consists in whole or in part of or relates to manufacturing or dealing in needles, awls or drivers.

This sale shall take effect as of the close of business on the tenth day of June, A. D. 1904.

In Witness Whereof we, the said Herbert L. Kimball and Irving A. Hadley have hereunto set our respective hands and seals, and have signed these presents in the name of the said partnership this eleventh day of June, A. D. 1904.

SCHEDULE A.

This schedule consists of an inventory made Monday, June 13, 1904, by Mr. Charles W. Martin and the same will be identified by signature of the parties and attached to this instrument later.

H & H

PLAINTIFF'S EXHIBIT 113.

[Put in Evidence, page 362.]

Indenture made this twenty-eighth day of June A. D. 1904, by and between William B. Arnold of North Abington, Massachusetts, and the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey (hereinafter called the "United Company")

Whereas the said Arnold had heretofore been engaged in the business of manufacturing and dealing in cementing machines and devices, and is an officer of the Arnold Machine & Supply Company, a corporation organized and existing under the laws of the State of Maine (hereinafter called the "Arnold Company") likewise engaged in the business of manufacturing and dealing in cementing machines and devices, and by reason of his ownership of capital stock of the said Arnold Company controls the action of said Arnold Company; and

Whereas the United Company desires to acquire all the business, property and interests of the said Arnold and of the said Arnold Company relating to cementing machinery or devices, and the said Arnold desires to sell and convey and to cause the same to be sold and conveyed to the said United Company as hereinafter provided;

Now, therefore, this instrument Witnesseth:

That the said Arnold, in consideration of the sum of one dollar ($1.00) and other good and valuable considerations to him paid by the said United Company, the receipt of which the said Arnold hereby acknowledges, has sold and does hereby sell, assign, transfer, set over and deliver to the said United Company, its successors and assigns, all business, good-will, property, interests and rights of every name and nature had by the said Arnold or which he is in anywise entitled to acquire or take over relating to cementing machinery or devices or to the manufacture or sale thereof.

Without prejudice to the generality of the foregoing assignment the said Arnold hereby sells, assigns, transfers and sets over to the said United Company, its successors and assigns, all inventions, improvements and Letters Patent and all rights in, to or under inventions, improvements or Letters Patent now had by him or which he has any right by agreement or otherwise to acquire or take over, or which he may at any time hereafter within fifteen (15) years from the date of these presents make, either alone or jointly with others, own, control or have any right by agreement or otherwise to acquire or take over relating to cementing machinery or devices.

To Have and to Hold all of the business, good-will, property, interests and rights hereby conveyed or agreed to be conveyed to the said United Company, its successors and assigns, to its and their own use and behoof absolutely.

And for the same consideration the said Arnold does hereby covenant and agree to and with the said United Company, its successors and assigns, that at any and all times hereafter upon making or acquiring or obtaining any right to acquire or take over within fifteen (15) years from the date of these presents any invention, improvement or Letters Patent, or any interest or right therein, thereunder or thereto relating to cementing machinery or devices he will forthwith disclose the same to the said United Company, its successors and assigns, its or their attorneys and patent solicitors, and will repeat such disclosures when and as often as requested, and that at any and all times upon request he will execute and

cause to be executed any and all applications, assignments and other instruments, and will perform and cause to be performed any and all acts necessary or desired by the said United Company, its successors and assigns, to enable the said United Company, its successors or assigns, to apply for and procure in the name of the said United Company, its successors or assigns, or of such persons or corporations as the said United Company, its successors or assigns, may designate, Letters Patent of the United States and of any and all foreign countries where the said United Company, its successors or assigns, may desire to obtain Letters Patent therefor, covering in such form as the said United Company, its successors or assigns, may desire, the inventions or improvements, or any of them, hereby conveyed or agreed to be conveyed, and to fully and completely vest and confirm in and to enable the said United Company, its successors and assigns, to secure, protect and enjoy the full benefits and advantages of said inventions, improvements, Letters Patent, property, interests and rights hereby conveyed or intended to be conveyed — all without further consideration than herein expressed, but the expense of obtaining Letters Patent as aforesaid to be borne by the said United Company, its successors or assigns.

And for the same consideration the said Arnold does hereby covenant and agree to and with the said United Company, its successors and assigns, that he will not at any time within fifteen (15) years from the date of these presents, directly or indirectly, individually or in combination with others, as manager, agent or employee or as officer or stockholder in a corporation, or otherwise, enter into or be engaged in, or financially or otherwise assist any person, firm or corporation in entering into, developing or carrying on any business which consists in whole or in part of or relates to manufacturing or dealing in cementing machinery or devices, or in developing or exploiting any invention (excepting the inventions assigned to the United Company, its successors and assigns, as aforesaid) relating to such machinery or devices.

And for the same consideration the said Arnold does hereby covenant and agree to and with the said United Company, its suc-

cessors and assigns, that he will cause all necessary actions to be taken and papers to be executed to fully and completely vest in the said United Company, its successors and assigns, all business, good-will, property, interests and rights of every name and nature of the said Arnold Company relating or pertaining in any way to cementing machinery or devices, including in such assignment from the Arnold Company, without prejudice to the generality thereof, all inventions, improvements, Letters Patent and interests and rights therein, thereunder or thereto relating to cementing machinery or devices now or hereafter owned by the said Arnold Company or which the said Arnold Company has now or may hereafter have any right by agreement or otherwise to acquire or take over, together also with a covenant on the part of the said Arnold Company that it will not hereafter engage in the cementing machine business.

The said Arnold hereby covenants with and warrants to the said United Company, its successors and assigns, that the said Arnold Company is the absolute owner of the inventions and improvements covered by Letters Patent of the United States, No. 728,793, dated May 19, 1903, granted to George F. Dunn, Assignor of one-half to William B. Arnold, for an Innersole-Cement Machine, and of said Letters Patent; and of the inventions shown and described in a certain pending application for Letters Patent of the United States, filed July 16, 1903, by one George F. Dunn, for Improvements in Cement-Applying Machines, said application being Serial Number 165,743, and of said pending application; that no prior grant of or license to use the inventions or any of them covered by said Letters Patent or included in said application has been made, and that the same are in all respects free from incumbrances; that the said Arnold Company has good right to assign said inventions, said Letters Patent, and said application, and that the said Arnold will cause a clear and perfect title to said inventions, Letters Patent, application, and any Letters Patent which may be issued upon said application or for said inventions to be vested in the said United Company, its successors and assigns; and (without pre-

judice to the generality of said assignment) that the other property hereby conveyed or agreed to be conveyed includes the following:

Three (3) complete cementing machines (assembled and ready to put out)

Patterns
Jigs
Tools

The said Arnold hereby states that the following enumerated machines embodying the novel roll (a^3) of said Letters Patent of the United States, No. 728,793, have heretofore been put out by by the said Arnold or by the said Arnold Company, viz:

M. N. Arnold & Company, North Abington, Mass.	1 machine
W. L. Douglas Company, Brockton, Mass.	2 machines
Commonwealth Shoe & Leather Company, Whitman, Mass.	1 machine
Commonwealth Shoe & Leather Company, Gardner, Mass.	1 machine
L. A. Crossett, North Abington, Mass.	1 machine
Leonard & Barrows, Middleboro, Mass.	1 machine

and covenants with and warrants to the said United Company, its successors and assigns, that no other machines embodying the inventions of said Letters Patent, No. 728,793, or of said application Serial Number 165,743, or any of them, have been put out by or under the authority of the said Arnold or the said Arnold Company.

The United Company hereby covenants to and with the said Arnold that the United Company will pay to the said Arnold immediately after the execution of these presents the sum of five hundred dollars ($500.00) in cash.

The United Company further covenants and agrees to and with the said Arnold that hereafter during the continuance in force as a good and valid Letters Patent of said Letters Patent of the United States, No. 728,793, or of such Letters Patent of the United States, if any, as may issue upon said application Serial Number 165,743, the United Company will pay to the said Arnold as royalty under such Letters Patent the sum of fifteen dollars ($15.00) for each

innersole-cementing machine, for cementing so-called "Gem Insoles," — embodying the invention patented in Letters Patent of the United States of America, dated January 19, 1897, No. 575,460, — sold by the United Company for use within the United States of America embodying any one or more inventions covered and secured by any one or more claims then existing and valid of said Letters Patent, No. 728,793, or of such Letters Patent of the United States as may issue as aforesaid upon said application Serial Number 165,743, and will pay to the said Arnold the sum of ten dollars ($10.00) for each and every such cementing machine embodying any one or more such inventions of said Letters Patent, No. 728,793, or such Letters Patent of the United States as may issue as aforesaid upon said application Serial Number 165,743 sold by the United Company for use within the United States, other than the machines for cementing so-called "Gem Insoles" above provided for.

The United Company shall keep true and accurate account during the continuance in force of said Letters Patent of all cementing machines sold by it on account of which royalty is payable to the said Arnold as aforesaid, and shall semi-annually on or before the last day of August and February in each year render to the said Arnold a statement showing the number of machines so sold by it during the six (6) calendar months ending with the last day of June and December next preceding such accounting, and shall accompany such accounting by payment to the said Arnold of the amount of the royalty shown by such accounting to be due.

In Witness Whereof the said William B. Arnold has hereunto set his hand and seal, and the said United Shoe Machinery Company has caused these presents to be signed by Edwd. P. Hurd, its Assistant Treasurer, and its corporate seal to be hereto affixed the day and year first above written.

WILLIAM B. ARNOLD

UNITED SHOE MACHINERY COMPANY.

By Edward P. Hurd, Asst. Treas.

Commonwealth of Massachusetts.

County of Suffolk, ss. Boston,

On this 28th day of June A. D. 1904 before me personally appeared William B. Arnold, to me personally known, and having executed the foregoing instrument in my presence did acknowledge the same to be his free act and deed.

Harold Gregory Donham, Notary Public.

PLAINTIFF'S EXHIBIT 114.

[Put in Evidence, page 564.]

This Agreement made this 25th day of October, A. D. 1904, by and between Irving E. Booth and Quentin W. Booth (hereinafter called Booth Brothers) both of the City of Rochester, in the State of New York, parties of the first part, and the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey and having a place of business at No. 205 Lincoln Street, Boston, Massachusetts, (hereinafter called the United Company) party of the second part. Witnesseth: —

Whereas said Booth Brothers, one or both, are owners of a certain invention known as a "Perforating Machine" on which there is existing at the present time Letters Patent of the United States No. 701107, dated May 27th, granted to William H. Treen.

Whereas said Booth Brothers desire to make the following assignment and enter into the agreement, hereinafter set forth, with the United Company and the United Company desire to acquire the rights hereinafter granted;

Now, Therefore, be it known that the said parties hereto for and in consideration of the sum of one dollar and other good and valuable consideration by each to the other in hand paid, the receipt of which is hereby acknowledged, do hereby agree as follows:—

1. That said Booth Brothers agree to deliver to the said United Company an assignment of a valid title to the patent covering the said machine and also the experimental machine and all tools, patterns, drawings, etc., used in the manufacture and for the construction of this machine and upon such delivery the United Com-

pany agrees to pay Booth Brothers the sum of twenty-four hundred dollars ($2400.00) and the United Company agree to buy Booth Brothers the sum of fifteen dollars ($15.00) on each Perforating machine sold in the United States embodying said patent or patents to be issued on the present construction of the said machine; and the said United Company agree to pay Booth Brothers the sum of ten dollars ($10.00) on each Perforating Machine sold embodying the patent or patents to be issued on the present construction of the machine in Canada or in other foreign countries not included in the contract between Booth Brothers and the United Company, dated the 17th day of September, 1904, with regard to foreign patents on this same machine.

2. The United Company hereby agree that for the term of four years from this date the royalty on the output of the said machines shall amount to the sum of seven hundred fifty dollars ($750.00) per annum and if at the end of the four years from date the total amount of the royalties agreed upon do not amount to the sum of three thousand dollars ($3,000.00) (the amount which will have been paid under the guarantee), the United Company may continue to manufacture and sell without paying further royalties until the total amount of royalties beginning this date amount to the sum of three thousand dollars ($3,000.00), from which time the royalties shall again be paid as in paragraph 1. Said royalties shall be paid on or before February fifteenth and August fifteenth of each year for the period of six months preceding January first and July first, respectively, and shall continue until the total amount paid Booth Brothers, including the twenty-four hundred dollars ($2400.00) aforesaid, shall amount to the total sum of ten thousand dollars ($10,000.00), after which no royalties shall be paid and all interest of the said Booth Brothers in the said inventions shall cease.

3. The United Company agree to take over the experimental machine, tools, patterns, assignments, etc., as soon as they conveniently can and not to exceed two months from this date, and to commence the manufacture and sale of the said invention and machine at the earliest practical date. Until such taking over by the United Company, Booth Brothers may finish up as far as possible

the machines they have in stock and may make such sales as come to them in the regular course of their business and on any sales made by them prior to the time of the taking over of the business by the United Company the said Booth Brothers are to have whatever profit there may be in the business, but Booth Brothers agree to make delivery at any time upon request of the United Company and, as to any completed Perforating Machines or parts of machines which are salable and new, the United Company agree to take same paying the cost of the manufacture of same in addition to the specified amount of twenty-four hundred dollars ($2400.00).

4. If at any time within six months from the date of this contract the United Company elect to make an outright purchase of all the right, title and interest of the said Booth Brothers of in and to the said invention and patent, the United Company may do so upon the payment of fifty-five hundred dollars ($5,500.00), less the amount of twenty-four hundred dollars ($2,400.00), aforesaid, and the amount of five hundred dollars ($500.00) paid them on account of said contract made September 17th, 1904, provided said five hundred dollars ($500.00) has been paid, but if the United Company exercise this option of purchase it is further agreed that the United Company, if able to obtain Letters Patent of the United States covering the present construction of the Perforating Machine not covered by the Treen Patent, shall upon the granting of said United States patent or patents make further payment to the said Booth Brothers of the sum of twenty-five hundred dollars ($2,500.00).

5. It is further agreed that the United Company shall apply for Letters Patent in the United States, and in such other countries as it may elect, to cover and protect the machine as now constructed and which ideas are not already covered by the Treen Patent, which patents are to be taken out at the expense of the United Company; and said Booth Brothers agree that they and each of them will execute and cause to be executed any and all assignments, applications for Letters Patent, and other instruments, and will perform and cause to be performed any and all acts which may be necessary or desired by the United Company to enable the United Company to

apply for and obtain in its name Letters Patent, as aforesaid, in such form as the United Company may desire for delivering the complete title to the United Company of said invention and patent.

6. It is further agreed that if during the term the United Company are selling the Perforating Machine under the royalty agreement proceedings are instituted against the United Company for infringement of patent or patents for building and selling said Perforating Machine, that the United Company shall pay all the expense of said litigation and in case an injunction should be issued against the United Company preventing it from building and selling Perforating Machines under said patent or patents the United Company shall be released from any further payments to Booth Brothers on account of said royalties or on account of the guarantee of royalties during the continuance of such injunction.

7. It is further agreed that in case an injunction is issued, as aforesaid, and the United Company are prevented from building and selling the said Perforating Machines, that Booth Brothers may have the right to purchase from the United Company the tools, patterns and drawings for the sum of twenty-four hundred dollars ($2,400.00) and refunding to the United Company all royalties which have been paid and any additional cost which the United Company may have incurred for obtaining patent or patents in the United States covering the present construction of the said machines, and the United Company also agree upon the said payments by Booth Brothers of said sums to transfer back to Booth Brothers the Treen Patent above referred to and also any patent or patents taken out in the United States by the United Company covering the present construction of the machine; it being understood that said Booth Brothers' right of purchase shall not be operative, provided the United Company has exercised its option and purchase Booth Brothers' interest outright.

8. Booth Brothers further agree that they will not, or will either of them, engage in the manufacture or sale of any Perforating Machine or become interested in any manner whatever in such machine during the terms of the patents covering the machine herein described.

9. It is further agreed that the words "United Shoe Machinery Company" and "United Company" include the successors and assigns of the said Company; and the words "Booth Brothers" include the above personal and legal representatives of the said Booth Brothers and each of them.

In Witness Whereof the said parties hereto have duly executed this instrument in duplicate the day and year first above written.

IRVING E. BOOTH [SEAL]
QUENTIN W. BOOTH [SEAL]
UNITED SHOE MACHINERY COMPANY [SEAL]
By Edward P. Hurd, Asst. Trs.

PLAINTIFF'S EXHIBIT 115.

[Put in Evidence, page 566.]

This Indenture made this first day of October, A. D. 1904, by and between Leopold J. Courteau, of Brockton, Massachusetts, and the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, having a place of business in Boston, Massachusetts, hereinafter called the "United Company", Witnesseth:

Whereas the said Courteau has devised a mechanism for holding the linings of shoes during the process of pasting the outer leather to the lining, which mechanism the said Courteau believes to embody certain features of novelty and invention;

And Whereas the said Courteau desires to assign such invention, if any, to the said United Company and has requested the said United Company to accept and enter into the following agreement with the said Courteau;

Now, Therefore, be it Known That I, the said Leopold J. Courteau, in consideration of the sum of one dollar ($1.00) and other good and valuable considerations to me paid by the said United Company, the receipt of which I hereby acknowledge, have sold and do by these presents sell, assign, transfer and set over to the said United Company, its successors and assigns, the entire right, title and interest in, to and under any and all inventions

and improvements embodied in the mechanism heretofore devised by me for holding linings and any and all inventions, improvements or Letters Patent, or rights or interests therein which I have heretofore made or now have relating to machinery or devices for the same or any similar purposes.

The said Courteau hereby covenants with and warrants to the said United Company, its successors and assigns, that the inventions, interests and rights hereby conveyed, referred to in the preceding paragraph hereof are free from all prior grants; that he has good title to and right to assign the same as aforesaid; and that no licenses to make, use or vend mechanisms embodying said inventions have heretofore been granted by him, but that the same are free from all incumbrances of every nature.

It is understood and agreed that the said United Company shall as soon as convenient after the execution of these presents make an investigation of said mechanism devised by the said Courteau with a view to determining the patentability of the same and also whether or not it is practicable to build said mechanisms and put the same on the market and that the said Courteau will without further compensation than that herein provided for upon request of the said United Company give all advice and assistance in his power which may be necessary or desired for such purposes.

In case in the opinion of the patent solicitors of the United Company Letters Patent of the United States can be obtained giving any substantial protection covering invention of the said Courteau embodied in said mechanism the United Company shall apply for and if possible obtain such Letters Patent of the United States.

The United Company hereby covenants and agrees to and with the said Courteau that in case Letters Patent of the United States, as aforesaid, shall be obtained by the United Company covering invention of the said Courteau embodied in said mechanism, the United Company will pay to the said Courteau in the nature of royalty an amount equal to ten per cent. (10%) of the net selling price received by the United Company for all devices made and sold by the said United Company or under its authority within the United

States of America embodying such invention of the said Courteau covered by said Letters Patent of the United States during the continuance in force as good and valid Letters Patent the said Letters Patent of the United States obtained as aforesaid — subject, however, to the right of the United Company, as hereinafter provided, to terminate all further obligations to make payments hereunder to the said Courteau by payment to the said Courteau of the sum of one thousand dollars ($1000.00).

The United Company further covenants and agrees to and with the said Courteau that in case any Letters Patent of countries other than the United States shall be obtained by or under the authority of the said United Company covering invention of the said Courteau embodied in the mechanism hereinbefore referred to the United Company will pay or cause to be paid to the said Courteau in the nature of royalty an amount equal to ten per cent. (10%) of the net selling price received by the said United Company or by such company as the United Company may authorize to manufacture and sell such mechanism from the sale of mechanisms embodying said invention covered by such Letters Patent existing and protecting such invention in the country of manufacture and sale — subject, however, to the right to the United Company, as herein provided, to terminate all further obligations to make or cause to be made any further payments to the said Courteau. The United Company assumes no obligations to apply for such foreign Letters Patent, but will for itself determine the advisability of so doing.

In the event of any mechanisms being made and sold in respect to which the said Courteau is entitled to royalties hereunder the United Company shall render to the said Courteau an account showing the number of such devices in respect to which royalties are so due; such accounts to be rendered semi-annually on or before the fifteenth day of February and August covering all mechanisms in respect to which such royalty is payable sold during the six (6) calendar months ending with the last day of December or June next preceding each such accounting. Each such accounting shall be accompanied by payment of the amount due as royalty in respect to the mechanisms covered thereby.

In case any mechanisms embodying said invention of the said Courteau shall be sold as aforesaid the United Company shall be at liberty at all times without restriction or control by the said Courteau to fix the selling price of the same. It is provided, however, and the United Company hereby agrees that if at any time prior to the expiration, as hereinafter provided, of the obligation of the United Company to render accounts and pay royalty hereunder, the said Courteau shall request the United Company to supply to the M. A. Packard Company, a corporation now doing business in Brockton, Massachusetts, mechanisms embodying said invention of the said Courteau and the United Company is then manufacturing and putting out such mechanisms the United Company will furnish to the said M. A. Packard Company, under lease without royalty, and at a price equal to the cost of manufacture of the same to the United Company, sufficient of said mechanisms for the reasonable requirements of the said M. A. Packard Company for use in its own factory in the manufacture of boots and shoes made by said company. This provision for the sale of mechanisms to the M. A. Packard Company is to be strictly limited as herein set forth, and all further obligations of the United Company to furnish such mechanisms shall forthwith cease and determine in case at any time any attempt shall be made to transfer any such mechanisms so furnished to the M. A. Packard or if any such mechanisms shall be delivered by the said M. A. Packard Company or permitted to pass into the possession of any other person, firm or corporation. No royalty shall be paid to the said Courteau in respect to mechanisms furnished to the said M. A. Packard Company under the provisions of this paragraph.

In case at any time the United Company shall so desire it is hereby provided and agreed that the United Company may, by paying to the said Courteau the sum of one thousand dollars ($1000.00), terminate all further obligation hereunder to pay or cause to be paid to the said Courteau further royalties under the provisions hereof. Such payment, however, shall not in anywise affect the obligations of the said Courteau to sign all papers and perform all acts herein made incumbent upon him.

The said Courteau hereby sells, assigns, transfers and sets over to the said United Company, its successors or assigns, any and all inventions, improvements and Letters Patent of the United States and of any and all foreign countries, and any and all rights, title or interest in such inventions, improvements or Letters Patent which he may at any time hereafter within fifteen (15) years from the date of these presents make, own or possess, or have any right by agreement or otherwise to acquire or take over which may be an improvement upon the mechanism hereinbefore referred to devised by him, or is intended for similar purposes, or which in anywise relates to mechanisms or devices for handling or holding linings.

The said Courteau hereby covenants and agrees to and with the said United Company, its successors or assigns, that he will at any and all times hereafter make all disclosures, render all assistance, execute and cause to be executed any and all applications for Letters Patent, assignments and other instruments and will perform and cause to be performed any and all acts which may be necessary or desired by the said United Company, its successors or assigns, to fully and completely vest and confirm in the said United Company, its successors or assigns, the full and complete right, title and interest in, to and under any and all inventions, improvements, Letters Patent, interests and rights included within the foregoing terms of this instrument, and to enable the said United Company, its successors or assigns, to obtain in the name of the said United Company, or of the said Courteau, or otherwise as the said United Company may desire, Letters Patent of the United States and of any and all foreign countries where the United Company may desire to obtain Letters Patent covering in such form as the United Company may desire any or all of the inventions and improvements included herein with claims in such form as the United Company may desire, and to enable the United Company, its successors or assigns, to secure, possess, enjoy and enforce the full benefit and advantages of all said inventions, improvements, Letters Patent, interests and rights —all without further consideration than herein provided for, but the expense of applying for and obtaining Letters Patent as afore-

said, preparation of assignments and other instruments to be borne by the said United Company, its successors or assigns.

In Witness Whereof the parties hereto have duly executed this instrument in duplicate the day and year first above written.

[Put in Evidence, page 567.]

Know all Men by these Presents:

Whereas we, Oscar A. Campbell and Samuel H. Nichols, both of Brockton, in the Commonwealth of Massachusetts, copartners in business under the name and style of Brockton Supply Company are the owners of the following Letters Patent of the United States, to wit:

No. 777,795, granted December 20, 1904, to Harry Lyon, assignor to us, Oscar A. Campbell and Samuel H. Nichols, co-partners as Brockton Supply Company, for Machine for Pulling Lasting Tacks:

No. 795,631, granted July 25, 1905, to Harry Lyon, assignor to us, Oscar A. Campbell and Samuel H. Nichols, co-partners as Brockton Supply Company, for Machine for Pulling Lasting Tacks:

and of the following application for Letters Patent of the United States, to wit:—

Serial No. 263,233, filed by Harry Lyon June 1, 1905, for Improvements in Tacking Mechanisms, and

Whereas United Shoe Machinery Company, of Paterson, in the State of New Jersey, a corporation duly organized under the laws of said State of New Jersey and having a place of business at 205 Lincoln Street, Boston, in said Commonwealth of Massachusetts, hereinafter called the United Company, is desirous of acquiring the entire right, title and interest in, to and under the said Letters Patent and the said application, together with any and all inventions therein shown or described and any and all Letters Patent of the United States or of foreign countries which have been or which may be granted for said inventions, or any of them, and together with any and all reissues, renewals, or extensions of said Letters Patent, or any of them, which may be granted,

Now, Therefore, in consideration of the sum of One Dollar ($1.00) and other good and valuable considerations to each of us paid by the United Company, the receipt whereof is hereby acknowledged, we, the said Campbell and the said Nichols, do hereby jointly and severally, sell, assign, transfer and set over unto the United Company the entire right, title and interest in, to and under the said Letters Patent No. 777,795 and No. 795,631, and the said application Serial No. 263,233, together with any and all inventions therein shown or described and any and all Letters Patent of the United States or of foreign countries which have been or which may be granted for said inventions, or any of them, and together with any and all reissues, renewals, or extensions of said Letters Patent, or any of them which may be granted.

To Have, to Hold and to Enjoy the said inventions, the said application, and all the said Letters Patent, reissues, renewals and extensions to the United Company, its successors and assigns, to its and their own use and behoof forever.

And we do hereby authorize and request the Commissioner of Patents of the United States to issue any United States Letters Patent which may be granted on the said application Serial No. 263,233, or for the invention or inventions therein shown or described or on any divisional or renewal applications for any of

said inventions to said United Shoe Machinery Company, its successors and assigns, as assignee of the entire right, title and interest therein and thereto.

And for the same consideration, we the said Campbell and the said Nichols, do hereby, jointly and severally, sell, assign, transfer and set over unto the United Company, its successors and assigns, all claims and demands both at law and in equity which we, or either of us, have or may hereafter acquire on account of any infringement of said Letters Patent No. 777,795, and No. 795,631, or either of them, prior to the date hereof and we do hereby, jointly and severally, authorize and empower the United Company, its successors and assigns, to sue for and collect the same using our names if need be, to its and their own absolute use.

And for the same consideration, we, the said Campbell and the said Nichols, for ourselves and for our legal representatives, do hereby, jointly and severally, covenant and agree with the United Company, its successors and assigns, that we, have granted no license to make, use or sell any of the inventions described in said Letters Patent No. 777,795 or No. 795,631 or in said application Serial No. 263,233, that our right, title and interest therein has not been encumbered, that we have good right and title to sell and assign the same as aforesaid, and that we will not execute any instrument in conflict herewith.

And we, for ourselves and for our legal representatives, do hereby, jointly and severally, further covenant and agree with the United Company, its successors and assigns, that upon request we will and our legal representatives shall execute, divisional, renewal or reissue applications, amended specifications or rightful oaths; communicate to the United Company, its successors and assigns, any facts known to us relating to any of the inventions described in said Letters Patent No. 777,795 and No. 795,631 and in said application Serial No. 263,233, or to the history of said inventions; execute preliminary statements and testify in any interference proceedings; execute and deliver any application papers, assignments, or other instruments and do all other acts which in the opinion of counsel for the United Company may be necessary or convenient

to carry out the terms and extent of this instrument and to secure the grant of Letters Patent to the United Company in the United States and in all other countries where the United Company may desire to patent said inventions, or any of them, with specifications and claims in such form as shall be approved by counsel for the United Company, and to vest and confirm in the United Company, its successors and assigns, the full and complete legal and equitable title to all such Letters Patent, without further consideration than now paid but at the expense of the United Company, its successors and assigns.

In Witness Whereof we, the said Oscar A. Campbell and the said Samuel H. Nichols have hereunto set our respective hands and seals this first day of November, 1905.

OSCAR A. CAMPBELL [SEAL]
SAMUEL H. NICHOLS [SEAL]

Commonwealth of Massachusetts.

County of Suffolk, ss. November 1, 1905.

Then personally appeared the above named Oscar A. Campbell and Samuel H. Nichols, to me personally known, and known by me to be the persons described in and who executed the foregoing instrument and severally acknowledged the same to be their free act and deed, before me,

Nelson W. Howard,
Notary Public.

[SEAL]

PLAINTIFF'S EXHIBIT 117.

[Put in Evidence, page 568.]

Agreement made this thirty first day of January 1906 by and between The Smith Lacing Machine Company as vendor, hereinafter called the Smith Company, and the United Shoe Machinery Company as purchaser, hereinafter called the United Company.

Whereas the Smith Company is a corporation duly organized and existing under the laws of the State of Maine, with its principal office in Kittery, in the State of Maine, and is and has been engaged in Boston in the Commonwealth of Massachusetts in the

manufacture of machines for lacing boot and shoe uppers hereinafter referred to as Smith lacing machines, and

Whereas the United Company is a corporation duly organized and existing under the laws of the State of New Jersey, with its principal office in Paterson in said State of New Jersey, and has an office in said Boston, and

Whereas the Smith Company has agreed to sell all its property and assets except its franchise, its cash on hand and such bills and accounts receivable as it has to the United Company on the following terms: —

Now the Parties Hereto Agree as Follows: —

1. The Smith Company agrees to sell to the United Company and the United Company agrees to purchase all the property and assets of the Smith Company of every name and nature, except its franchise, its cash on hand and such bills and accounts receivable as it had on the sixth day of January 1906.

The property sold includes: —

(a) Letters Patent and applications for letters patent described in the schedule of Patents and Applications for Letters Patent forming a part hereof, and all title, interest and rights in to or under, and all licenses under, letters patent, and in and to any and all inventions and improvements, and any and all applications for letters patent, and all claims and demands under agreement or otherwise for the use of inventions or for infringement of Letters Patent.

(b) Lacing machines, known as "Smith Lacing Machines" including fifty of said lacing machines in process of construction by the Metallic Heel and Counter Company at its factory, Number 100 Purchase Street, in said Boston, and drawings, patterns, jigs, special tools and appliances for the manufacture of the same or designed for use in connection with the same.

(c) The good will of the Smith Company and of its business

(d) The exclusive right to all inventions and improvements in lacing or tying machines, devices or methods for use in lacing or tying or temporarily fastening boot or shoe uppers which have been or shall hereafter be invented by Willard A. Smith of Ports-

mouth in the State of New Hampshire, now the Secretary of the said Smith Company, and the exclusive right to all letters patent of any and every country which shall or may be obtained for said inventions or improvements or either or any of them.

2. The United Company agrees to pay to the Smith Company in consideration of the covenants and agreements of the Smith Company herein contained, the sum of One Hundred and Seventeen Thousand, Five Hundred Dollars ($117,500.) of which sum Fifty Thousand Dollars ($50,000.) shall be paid in cash simultaneously with the execution of this agreement, and the balance thereof, namely Sixty-seven Thousand and Five Hundred Dollars ($67,-500.) (hereinafter referred to as the deferred payment) shall be paid as follows:—

On the fifteenth day of January and on the fifteenth day of July in each year until the said deferred payment shall have been paid in full, the United Company shall pay to the Smith Company in respect to each lacing machine sold or leased by the United Company during the six calendar months ending January 1st and July 1st next preceding, the sum of Seventy-five Dollars ($75.00) except that if the United Company shall lease or cause to be leased any lacing machines in countries foreign to the United States of America at a royalty to be paid for the use of the same of one half cent or less per dozen pairs of boot or shoe uppers laced by the aid of such machines, then the amount to be paid to the Smith Company by the United Company in respect to each lacing machine so leased in a foreign country shall be fifty dollars ($50.00). Nothing herein shall be construed to require the United Company to make any payment in respect to lacing machines which the United Company shall put out for a limited period on trial, or shall substitute for leased machines destroyed by fire or other casualty, or shall exchange for Smith Lacing Machines sold or leased by it.

3. The United Company agrees to keep full and accurate books of account which shall show the number of all lacing machines which shall be made by or for it in the United States of America or elsewhere, and the names of all those to whom such machines shall have been sold or leased, and the price or the amount of the

lease premium received therefor; and agrees to allow the Treasurer of said Smith Company or its attorneys to inspect such books at all reasonable times to verify the accuracy of such accounts; and that it will in the months of January and July of each year make full and true returns to the Smith Company of all Lacing machines sold or leased by it during the next preceding six months.

4. The United Company agrees that it will not charge more than Three Hundred Dollars ($300.) for each Smith Lacing Machine when leased or caused to be leased by it without royalty in the United States and that it will not charge a royalty in excess of One Cent per dozen pairs of boot or shoe uppers laced by the aid of any Smith lacing machine, when the machines are leased without an initial premium charge, but if the United Company shall lease Smith lacing machines for a royalty of one cent or less per dozen pairs of boot or shoe uppers laced by the aid of such machines, it may charge an initial fee to the lessee.

5. The Smith Company agrees that the United Company may complete the fifty Smith Lacing Machines now in process of construction in the factory of the Metallic Heel and Counter Company, and the United Company undertakes to promptly complete the same under the supervision of Messrs. George E. Warren and Willard A. Smith, The Smith Company agrees to pay to the United Company a sum equal to the cost to the United Company of completing said machines, the labor employed thereon to be charged at fifty-five (55) cents per hour.

6. The United Company agrees that it will use its best effort to promote the sale or lease of Smith lacing machines of the type recently completed by the Smith Company, and agrees that if it manufactures sells or leases any other lacing machines than machines of the type of the Smith lacing machine, until the deferred payment above mentioned shall have been paid in full, it will pay to the Smith Company in respect to such substituted lacing machines the amounts above provided to be paid in respect to the Smith Lacing Machines.

7. The Smith Company agrees upon receipt of the cash payment hereinbefore provided to be made to it to forthwith pay all of its

debts including the cost of completing said fifty Smith Lacing Machines, and when all of its debts shall have been paid, to distribute ratably among its shareholders the balance of cash remaining after the payment of its debts, and any and all other cash or bills or accounts receivable or the proceeds thereof which it shall have, and agrees that from time to time hereafter when and as it shall receive from the United Company payments under this agreement to distribute the same ratably among its shareholders, and when the deferred payment herein agreed to be paid by the United Company shall have been paid in full to require its shareholders to surrender their respective certificates of stock to its Treasurer endorsed in blank and to deliver to the United Company all such certificates so endorsed in blank to the United Company, and all its books of account, stock books and corporate papers.

8. The Smith Company agrees from time to time hereafter and whenever so requested to do by the United Company to execute and deliver such bills of sale, assignments, powers of attorney, or other written instruments and to do or cause to be done such acts as in the opinion of the counsel of the United Company shall be necessary or proper to secure to and to confirm in the United Company and its successors and assigns all the property hereby conveyed, and the exclusive legal title to all letters patent, licenses and interests in said letters patent or inventions hereby sold and conveyed and the benefit of all contracts which the Smith Company has.

9. The Smith Company hereby covenants with the United Company its successors and assigns that it has the lawful right to sell and transfer the property hereby agreed to be sold and conveyed and agrees to convey the same free from all prior grants, mortgages, licenses or other encumbrances whatever.

10. The Smith Company agrees to turn over its business as of the close of business on January 6th, 1906, and agrees that all the profits or income of its business, if any, arising from business transacted since that date shall inure and be paid to the United Company. The United Company agrees to pay all the expenses of carrying on the business incurred since the sixth day of Janu-

ary, 1906, except the cost of completing said fifty Smith Lacing Machines provided in Paragraph 5 hereof to be paid by the Smith Company. The Smith Company covenants and agrees hereafter to transact no further or other business than to liquidate as provided in Paragraph 7 hereof, and agrees to forthwith notify the Commissioner of Corporations of Massachusetts that it has ceased to transact business, and to apply to the Attorney General of the State of Maine to be excused from filing returns with the Secretary of the State of Maine.

SCHEDULE OF PATENTS AND APPLICATIONS FOR LETTERS PATENT.

Patents of United States of America.

No. 740,938, granted October 6, 1903, to Willard A. Smith, for an improvement in Means for Securing Shoe Uppers Preparatory to Lasting.

No. 767,844, granted August 16, 1904, to Smith Lacing Machine Company as assignor of Willard A. Smith, for an improvement in Friction Clutches.

No. 779,008 granted January 3rd, 1905 to Smith Lacing Machine Company as assignor of Willard A. Smith for an improvement in Machines for Automatically Lacing Shoe Uppers.

No. 795,073 granted July 18th 1905 to Willard A. Smith for an Improvement in Means for Temporarily Lacing Shoe Uppers.

Applications for Letters Patent of the United States.

Serial No. 245,704 filed February 15, 1905 by Willard A. Smith for an improvement in needles for shoe lacing machines.

Serial No. 259,839 filed May 10, 1905 by Willard A. Smith for the reissue of Letters Patent No. 779,008.

Serial No. 296,385 filed January 16, 1906 by Willard A. Smith for an improvement in fastening machines.

Letters Patent of Great Britain.

No. 16,520, dated July 26, 1904 granted to Willard Allan Smith of 10 Wibird Street, Portsmouth in the County of Rockingham and State of New Hampshire, U. S. A., Mechanical Engineer, for "An Improved Automatic Machine for lacing shoe uppers".

Letters Patent of France.

No. 345,797, to Monsieur Smith (Willard Allan) représenté par Mrs. Lavoix et Moses, 7, Rue de Chateaudun, a Paris, applied for the 12th day of August 1904, delivered on the 29th day of October 1904 for "Machine a lacer les empeignes."

Letters Patent of Germany.

No. 163,497, dated July 31, 1904, pubiished October 24, 1905, to Willard Allan Smith in Portsmouth (New Hampshire, U. S. A.) for "Maschine zum Verschnüren der mit Schnürlöchern versehenen Oberlederteile von Schnurstiefeln vor dem Aufziehen auf den Leisten".

In Witness Whereof the Smith Company pursuant to a vote of its stockholders at a special meeting duly called and held at the office of the company in Kittery, Maine, has caused these premises to be signed in its behalf and its corporate seal to be hereto affixed by its Treasurer and the United Company has caused these presents to be signed in its behalf and its corporate seal to be hereto affixed by its President.

PLAINTIFF'S EXHIBIT 119.

[Put in Evidence, page 569.]

Agreement made this thirty-first day of January, 1906, by and between the Metallic Heel and Counter Company as vendor, hereinafter called the Metallic Company, and the United Shoe Machinery Company as purchaser, hereinafter called the United Company.

Whereas the Metallic Company is a corporation duly organized and existing under the laws of the State of Maine, with its principal office in Kittery, in the State of Maine, and is and has been engaged in Boston in the Commonwealth of Massachusetts in the manufacture of metallic heels and counters and machines of various kinds; and

Whereas the United Company is a corporation duly organized and existing under the laws of the State of New Jersey, with its principal office in Paterson in said State of New Jersey, and has an office in said Boston, and in connection with its other business is about to engage in the manufacture of Smith Lacing Machines, so-called, for lacing or tying the uppers of boots and shoes, and in selling or leasing such Lacing machines.

Whereas the Metallic Company has agreed to sell all its property and assets hereinafter described and referred to, except its

franchise, its cash on hand and such bills and accounts receivable as it has, to the United Company on the following terms: —

Now the parties hereto agree as follows: —

1. The Metallic Company agrees to sell to the United Company and the United Company agrees to purchase all the property and assets of the Metallic Company of every name and nature, except its franchise, its cash on hand, such bills and accounts receivable as it had on the sixth day of January, 1906, and all its gasoline engines, whether completed or in the process of construction, and parts of such engines.

The property hereby agreed to be sold includes: —

(a) The Letters Patent and applications for Letters Patent described in the Schedule of Patents and applications for Letters Patent forming a part hereof.

(b) All title, interest and rights in, to or under, and all licenses under letters patent, and in and to any and all inventions and improvements and any and all applications for letters patent, and all claims and demands under agreement or otherwise for the use of inventions or for infringement of letters patent.

(c) Machines, machinery, tools, special tools and appliances, drawings, patterns, jigs, duplicate parts, fixtures and furniture situated in the factory of the Metallic Company in Boston.

(d) Stock on hand, manufactured or in process of manufacture, merchandise and supplies, consisting in the main of the articles specified in the "Memorandum of finished and raw material on hand January 6, 1906," forming a part hereof.

(e) All interest or lien which the Metallic Company has upon fifty Smith Lacing Machines, so called, in process of manufacture for the Smith Lacing Machine Company.

(f) The good will of the Metallic Company and of its business, and all property, interests and rights of every name and nature wherever situate owned by the Metallic Company, or to which it is in any way entitled, except the property, interests and rights hereinbefore expressly reserved to the Metallic Company.

2. The United Company agree to pay to the Metallic Company in consideration of the covenants and agreements of the Metallic

Company herein contained the sum of One Hundred Nineteen Thousand Eight Hundred and Twenty and twenty-four one hundredths Dollars ($119.820.24) of which sum Fifty-two Thousand Three Hundred and Twenty and Twenty-four one hundredths Dollars ($52,320.24) shall be paid in cash simultaneously with the execution of this agreement, and the balance thereof, namely Sixty-seven Thousand Five hundred Dollars ($67,500.) (hereinafter referred to as the deferred payment) shall be paid as follows:—

On the fifteenth day of January and on the fifteenth day of July in each year until the said deferred payment shall have been paid in full, the United Company shall pay to the Metallic Company in respect to each lacing machine sold or leased by the United Company during the six calendar months ending January 1st and July 1st next preceding, the sum of seventy-five Dollars ($75) except that if the United Company shall lease or cause to be leased any lacing machines in countries foreign to the United States of America at a royalty to be paid for the use of the same of one-half cent or less per dozen pairs of boot or shoe uppers laced by the aid of such machines, then the amount to be paid to the Metallic Company by the United Company in respect to each lacing machine so leased in a foreign country shall be fifty dollars ($50.00).

Nothing herein shall be construed to require the United Company to make any payment in respect to lacing machines which the United Company shall put out for a limited period on trial, or shall substitute for leased machines destroyed by fire or other casualty, or shall exchange for Smith Lacing Machines sold or leased by it.

3. The United Company agrees to keep full and accurate books of account which shall show the number of all lacing machines which shall be made by or for it in the United States of America or elsewhere, and the names of all those to whom such machines shall have been sold or leased, and the price or the amount of the lease premium received therefor; and agrees to allow the Treasurer of the Metallic Company or its attorney to inspect such books at all reasonable times to verify the accuracy of such accounts; and that it will in the months of January and July of each year make full and true returns to the Metallic Company of all lacing machines sold or leased by it during the next preceding six months.

4. The United Company agrees that it will not charge more than Three Hundred Dollars ($300.) for each Smith Lacing Machine when leased or caused to be leased by it without royalty, in the United States, and that it will not charge a royalty in excess of One cent per dozen pairs of boot or shoe uppers laced by the aid of any Smith Lacing Machine, when the machines are leased without an initial premium charge, but if the United Company shall lease Smith Lacing Machines for a royalty of one cent or less per dozen pairs of boot or shoe uppers laced by the aid of such machines, it may charge an initial fee to the lessee.

5. The United Company agrees that it will use its best efforts to promote the sale or lease of Smith lacing machines of the type recently completed by the Metallic Company for the Smith Lacing Machine Company, and agrees that if it manufactures sells or leases any other lacing machines than machines of the type of the Smith lacing machine, until the deferred payment above mentioned shall have been paid in full, it will pay to the Metallic Company in respect to such substituted lacing machines the amounts above provided to be paid in respect to the Smith lacing machines.

6. The United Company agrees to perform all uncompleted contracts which the Metallic Company is bound to perform, and the Metallic Company agrees to pay to the United Company the cost and expense of so doing, the labor employed to be charged at 55 cents per hour. All the profits realized from such contracts above the amounts so to be charged by the United Company are to be retained by the Metallic Company, except in the case of the contract with the Library Bureau, the profits arising from which shall inure to the United Company, and the losses, if any, shall be paid by the Metallic Company.

7. The Metallic Company agrees upon receipt of the cash payment hereinbefore provided to be made to it to forthwith pay all of its debts and when all of its debts shall have been paid, including such sums as shall be necessary to enable it to make any payments required to be made by it under the provisions of paragraph 6 hereof to distribute ratably among its shareholders the balance of cash remaining after the payment of its debts, and any and all other

cash or bills or accounts receivable or the proceeds thereof which it shall have, and agrees that from time to time hereafter when and as it shall receive from the United Company payments under this agreement to distribute the same ratably among its shareholders, and when the deferred payment herein agreed to be paid by the United Company shall have been paid in full, to require its shareholders to surrender their respective certificates of stock to its Treasurer endorsed in blank and to deliver to the United Company all such certificates so endorsed in blank to the United Company, and all its books of account, stock books and corporate papers.

8. The Metallic Company agrees from time to time hereafter and whenever so requested to do by the United Company to execute and deliver such bills of sale, assignments, powers of attorney, or other written instruments and to do or cause to be done such acts as in the opinion of the counsel of the United Company shall be necessary or proper to secure to and to confirm in the United Company and its successors and assigns all the property hereby conveyed, and the exclusive legal title to all letters patent, licenses and interests in said letters patent or inventions hereby sold and conveyed and the benefit of all contracts which the Metallic Company has.

9. The Metallic Company hereby covenants with the United Company, its successors and assigns, that it has the lawful right to sell and transfer the property hereby agreed to be sold and conveyed, and agrees to convey the same free from all prior grants, mortgages, licenses or other encumbrances whatever.

10. The Metallic Company agrees to turn over its business as of the close of business of January 6th, 1906, and agrees that all the profits or income of its business, if any, arising from business transacted since that date, except as otherwise provided in Paragraph 6 hereof, shall inure and be paid to the United Company. The United Company agrees to pay all the expenses of carrying on the business incurred since the 6th day of January, 1906, except as otherwise provided in Paragraph 6 hereof. The Metallic Company covenants and agrees hereafter to transact no further or other business than to liquidate as provided in Paragraph 7 hereof, and

agrees to forthwith notify the Commissioner of Corporations of Massachusetts that it has ceased to transact business, and to apply to the Attorney General of the State of Maine to be excused from filing returns with the Secretary of State of Maine.

In Witness Whereof, the Metallic Company pursuant to a vote of its stockholders at a special meeting duly called and held at the office of the Company in Kittery, Maine, has caused these presents to be signed in its behalf and its corporate seal to be hereto affixed by its Treasurer and the United Company has caused these presents to be signed in its behalf and its corporate seal to be affixed by its President.

[SEAL] METALLIC HEEL AND COUNTER COMPANY
by Geo. E. Warren, Treasurer

[SEAL] UNITED SHOE MACHINERY COMPANY
by Sidney W. Winslow, President

In consideration of the purchase by United Shoe Machinery Company of the property and assets of the Metallic Heel and Counter Company referred to in the foregoing agreement, and in cousideration of One Dollar to us paid by said United Shoe Machinery Company, we, George E. Warren of Boston, and John B. Hadaway of Brockton, in the Commonwealth of Massachusetts, hereby jointly and severally covenant and agree with said United Shoe Machinery Company that if it shall sustain a loss in the performance of the contract made by said Metallic Heel and Counter Company with the Library Bureau referred to in paragraph 6 of the foregoing agreement, they will pay on demand to said United

Shoe Machinery Company a sum equal to the amount of that loss, unless a sum equal to the amount of said loss shall have been paid by the Metallic Heel and Counter Company.

In Witness Whereof we hereunto set our hands and seals, this ninth day of February 1906.

GEO. E. WARREN [SEAL]
JOHN B. HADAWAY [SEAL]

PLAINTIFF'S EXHIBIT 120.

[Put in Evidence, page 570.]

This Indenture made at Boston, Massachusetts, this fourth day of September, A. D. 1906, by and between Zotique Beaudry, of Lynn, Massachusetts, and the United-Xpedite Finishing Company, a corporation organized and existing under the laws of the State of Maine (hereinafter called the "Finishing Company") Witnesseth:

That whereas the said Beaudry has heretofore made various inventions in machinery, methods, mechanisms, tools and devices for burnishing or finishing the heels of boots and shoes or useful in the performance of such work, and may hereafter make other such inventions (all of which subjects of invention shall be hereafter referred to as and shall be included in the phrase "heel finishing machinery, methods and devices" wherever hereinafter used), and has carried on certain business in machinery, mechanisms, tools and devices for burnishing or finishing heels and has established certain good-will therein:

And whereas the said Beaudry desires to sell to the said Finishing Company the present and future inventions made, owned or acquired by the said Beaudry in "heel finishing machinery, methods and devices" and said business in heel burnishing or finishing machinery, mechanisms, tools and devices, together with the goodwill thereof, and the said Finishing Company desires to acquire the same and to secure the benefit of the covenants on the part of the said Beaudry hereinafter set forth:

Now, Therefore, be it Known that in consideration of the sum of one dollar ($1.00) and other good and valuable considerations to the said Beaudry paid by the said Finishing Company, the

receipt of which the said Beaudry hereby acknowledges, the said Beaudry does hereby sell, assign, transfer and set over to the said Finishing Company, its successors and assigns, all inventions, improvements, Letters Patent of the United States and of any and all other countries, and applications for Letters Patent, and interests and rights in, to and under inventions, improvements, Letters Patent and applications for Letters Patent now had by the said Beaudry or which he has any right by agreement or otherwise to acquire or take over, or which at any time hereafter within a period of fifteen (15) years from the date hereof he may make, own, acquire or have any right by agreement or otherwise to acquire or take over in "heel finishing machinery, methods or devices."

And for the same consideration the said Beaudry does hereby sell, assign, transfer, set over and deliver to the said Finishing Company, its successors and assigns, said business in heel burnishing or finishing machinery, mechanisms, tools and devices, together with the good-will thereof, and all heel finishing machinery, mechanisms and devices, drawings, blue prints, models and other property, interests and rights now or hereafter had by the said Beaudry which consist of or relate to heel finishing machinery, tools, mechanisms, methods or devices.

To Have and to Hold all of the foregoing to the said Finishing Company, its successors and assigns, to its and their own use and behoof absolutely.

And this Instrument further Witnesseth that the said Beaudry in consideration of the covenant and agreements on the part of the Finishing Company hereinafter contained, and the said Finishing Company in consideration of the foregoing assignment and of the covenants and agreements on the part of the said Beaudry herein contained, do hereby covenant and agree, each with the other, as follows: —

One. The said Beaudry, without prejudice to the generality of the foregoing assignments, hereby covenants with and warrants to the said Finishing Company, its successors and assigns, that the inventions and applications for Letters Patent hereinbefore con-

veyed include the following applications for Letters Patent of the United States now pending in the United States Patent Office, viz:

Application of Zotique Beaudry Serial No. 191,247, filed January 30, 1904, for Inventions in Machines for Burnishing the Edges of the Heels and Soles of Boots and Shoes: — Renewed March 29, 1905, Serial No. 252,646;

Application of Zotique Beaudry Serial No. 196,813, filed March 5, 1904, for Inventions in Burnishing Tools for Boots and Shoes: — Renewed March 29, 1905, Serial No. 252,647;

Application of Zotique Beaudry Serial No. 304,880, filed March 8, 1906, for Improvement in Tools for Finishing the Heels of Boots and Shoes;

together with the inventions covered thereby; that he is the owner, free from any and all prior grants, licenses or other incumbrances, of the same and of all interests and rights therein, thereunder and thereto in the United States and in all other countries; that he has good right to sell, assign and transfer the same as aforesaid and will warrant and defend his title thereto against the lawful claims and demands of all persons claiming by, through or under him.

Two. The said Beaudry hereby covenants and agrees to and with the said Finishing Company that he will forthwith fully and completely disclose to the said Finishing Company, its officers and patent solicitors, all inventions and improvements in and all Letters Patent and applications for Letters Patent of the United States and of any and all other countries for inventions in "heel finishing machinery, methods and devices", and all property, interests and rights included within the foregoing assignments now had by him or which he has any right by agreement or otherwise to acquire or take over; and that hereafter at any and all times upon making, owning or acquiring or obtaining any right by agreement or otherwise to acquire or take over any invention, improvement, Letters Patent or application for Letters Patent, property, interests or right included within the terms of the assignment hereinbefore contained, he will promptly disclose the same to the said Finishing Company, its officers and patent solicitors; will repeat all such disclosures when and as often as requested; and at any and all times

hereafter will execute and cause to be executed any and all applications, assignments and other instruments, and will perform and cause to be performed any and all acts necessary or desired by the Finishing Company to enable the Finishing Company to obtain Letters Patent of the United States and of such other countries as the said Finishing Company may desire, covering in such form as shall be approved by the attorneys for the Finishing Company the inventions and improvements or any of them included within the terms of the foregoing assignment, and to fully and completely vest and confirm in the said Finishing Company or its nominees, its or their successors and assigns, such Letters Patent and all inventions, improvements, Letters Patent, property, interests and rights included within the terms of the assignments in this instrument contained, and to enable the said Finishing Company to secure and enjoy the full benefits and advantages thereof — all without further consideration than that hereinafter provided for but the expense of obtaining such Letters Patent to be borne by the said Finishing Company.

Three. The said Beaudry hereby covenants and agrees to and with the said Finishing Company, its successors and assigns, that he will not at any time within the period of fifteen (15) years from the date of these presents (without the consent in writing of the said Finishing Company) directly or indirectly, individually or in combination with others, as officer or stockholder of a corporation, as manager, partner, agent or otherwise be engaged or interested in or financially or otherwise assist any person, firm or corporation (other than the said Finishing Company, its successors or assigns) in making, developing or exploiting any invention or improvement in "heel finishing machinery, methods or devices", or in entering into, developing or carrying on any business which consists in whole or in part in manufacturing or in any wise dealing in machinery, mechanisms, tools or devices for burnishing or finishing heels. It is recognized that in addition to the finishing or burnishing of the heels of footwear there is the operation of finishing or setting the edges of the soles, as distinguished from the heel, and that machines and tools can be made for finishing or setting

the edges of the soles which are not adapted or intended for doing the work of heel finishing or burnishing machines. Such machines and tools are hereinafter termed "edge setting machines" and "edge setting tools", and are the machines and tools referred to by said terms wherever hereinafter used. It is also recognized that it is sometimes possible for a shoe manufacturer to use "edge setting machines" and "edge setting tools" for "setting the edges" of "spring" heels and to a very limited extent of other low heels. In view thereof, and of the fact that the said Beaudry desires to be at liberty to carry on the business of manufacturing and dealing in such "edge setting machines" and "edge setting tools" it is understood and agreed that the machinery hereinbefore referred to and covered by the covenant of the said Beaudry in this Article Three hereof contained is machinery intended or adapted for use in finishing or burnishing heels and that the said Beaudry, his successors or assigns, remain at liberty to carry on the business of manufacturing and dealing in "edge setting machines" and "edge setting tools" as distinguished from machines intended or adapted for use in finishing or burnishing heels and shall not be barred from putting out such "edge setting machines" or "edge setting tools" by reason of the fact that such machines or tools are in some instances used by the purchaser thereof for "setting the edges" of spring heels or other low heels of a total height, including the top lift, not greater than four-eighths (4/8) of one (1) inch, measured from the heel-seat line to the outside of the top lift in place, but (excepting to the slight extent that the "edge setting machines" and "edge setting tools" put out as aforesaid by the said Beaudry may be capable of use upon spring heels or other low heels of a height not lower than four-eighths (4/8) of one (1) inch, as above defined) the said Beaudry shall not manufacture or deal in any machines or tools of any description intended or adapted (with or without modification) for use upon heels of any description or as combination machines or tools for doing work upon both soles and heels. Nothing herein contained shall be construed as any limitation upon the scope of the assignments hereinbefore contained of present or future inventions, or as any reservation on the part of the said

Beaudry or any grant to the said Beaudry of any right or interest in or any right to use any of the inventions herein conveyed or provided to be conveyed to the said Finishing Company.

Four. In consideration for the foregoing assignments and covenants by the said Beaudry the said Finishing Company shall pay to the said Beaudry the sum of twelve thousand five hundred dollars ($12,500) upon the execution of this instrument.

Five. The term "Finishing Company" wherever herein used shall include the said United-Xpedite Finishing Company, its successors and assigns.

In Witness Whereof the said Zotique Beaudry has hereunto set his hand and seal; and the said United-Xpedite Finishing Company has caused its corporate seal to be hereto affixed and this instrument to be signed in its name and behalf by Louis H. Baker, its Assistant Treasurer, this fourth day of September, A. D. 1906.

ZOTIQUE BEAUDRY [SEAL]

[SEAL] UNITED-XPEDITE FINISHING COMPANY

By Louis H. Baker

Commonwealth of Massachusetts.

Suffolk, ss. Boston

On this fourth day of September personally appeared before me Zotique Beaudry, known to me and known to me to be the person described in and who executed the foregoing instrument, and acknowledged the foregoing instrument to be his free act and deed.

Harold Gregory Donham

[SEAL] Notary Public

PLAINTIFF'S EXHIBIT 121.

[Put in Evidence, page 572.]

Know all Men by these Presents

That Whereas, Irving E. Booth and Quentin W. Booth, both of Rochester in the State of New York (hereinafter called the "vendors") have been heretofore engaged as co-partners doing business under the firm name and style of "Booth Brothers" in the business of manufacturing and dealing in machinery, tools, mechanisms, devices, findings, materials, supplies, methods, processes and things relating to or used in the manufacture of boots, shoes and other footwear, and leather working, having a manufacturing establishment at said Rochester and doing business at said Rochester and elsewhere throughout the United States of America and in foreign countries, and are possessed of a manufacturing plant and equipment for carrying on such business, and of inventions, improvements and Letters Patent of the United States and of foreign countries and of rights to and under such Letters Patent and applications therefor covering inventions relating to such business, and have also established a valuable good-will in connection with said business;

And Whereas, the said vendors desire to sell to the vendee hereinafter named, and said vendee desires to acquire said business and said plant, equipment, inventions, improvements, patents, patent rights and good-will of said vendors, together with certain warranties and covenants on the part of the said vendors, — all as hereinafter more fully set forth;

Now, Therefore, we, the said Irving E. Booth and Quentin W. Booth, both individually and as co-partners as aforesaid, the vendors, in consideration of one dollar ($1.00) and other good and valuable considerations to us paid by the United Shoe Machinery Company, a corporation duly organized and existing under the laws of the State of New Jersey (hereinafter called the "vendee") the receipt of which is hereby acknowledged, do hereby grant, sell, assign, transfer, set over, convey and deliver unto the said vendee the entire business of the vendors above described, and all and sin-

gular the plant, equipment, inventions, improvements, Letters Patent of the United States of America and of other countries, and rights to or under such Letters Patent or applications therefor, and good-will of the vendors or of either of them in any way relating to or connected with said business, excepting therefrom such parts of said plant and equipment as are hereinafter specifically mentioned and stated to be excepted from the terms of this instrument, and excepting also an invention now owned or controlled by the vendors and described in an application for Letters Patent of the United States, Serial Number 313,775, of which disposal may be made according to the terms of an option and agreement covering the same, dated November 1, 1907, executed by the vendors and delivered to the vendee simultaneously with these presents and as part of the same transaction but not otherwise.

Including in said business plant, equipment and good-will hereby conveyed without prejudice to the generality of the foregoing assignment:

1. All machines, machinery, shafting, tools, mechanisms, devices, jigs, patterns, drawings and other articles or things except machinery, tools and other articles or things specially designed for use in connection with the invention covered by said application Serial Number 313,775 above mentioned.

2. The entire business of said vendors above described, together with the good-will thereof.

3. Any and all trade-marks, trade names and brands, relating to or connected with said business which have been heretofore used by the vendors or either of them, or to which the said vendors or either of them have any right or are in any way entitled.

And we do also hereby grant, sell, transfer and deliver unto the said vendee all stock on hand, manufactured or unmanufactured or in process of manufacture, except such as embodies the invention covered by said application Serial Number 313,775 above mentioned, and all merchandise, goods and other supplies — all as specifically set forth in an inventory thereof now in the possession of said vendee, marked "Stock Inventory, November 1, 1907", and identified by the signatures of the vendors and vendee.

To Have and to Hold the same to the said vendee, its successors and assigns, to its and their own use and behoof absolutely.

Expressly excepted from the terms of this instrument are

1. Real estate and any and all interests in real estate owned by the vendors or either of them, either severally or in common with others.

2. Bills, notes, debts and accounts receivable on the day of the date hereof.

3. Books of entry and account.

4. Cash on hand or on deposit on the day of the date hereof.

5. Machines heretofore sold conditionally or put out on trial.

6. The copies of the "Official Gazette" of the United States Patent Office in the office of said Booth Brothers.

No claims against the vendee under agreements made between the vendors and the vendee, dated September 17, 1904 and October 25, 1904, in respect to certain improvements in perforating machines, are hereby waived or extinguished.

And for the same consideration we, the said vendors, do hereby jointly and severally covenant with the said vendee, its successors and assigns, that we, the said Irving E. Booth and Quentin W. Booth, are the sole partners in the firm of Booth Brothers, above named, and that no other person, firm or corporation has any interest of any nature therein or in the business, property, assets and good-will thereof hereby conveyed; that we, the said vendors, are possessed of and have title, free from any and all incumbrances, to the plant and equipment hereby conveyed; that we have good right to convey the said plant and equipment and convey said business and the good-will thereof, free from any claims or incumbrances whatsoever to the said vendee; and that we will and our respective executors or administrators shall warrant and defend the same to the said vendee, its successors and assigns, against the lawful claims and demands of any and all persons, and protect, indemnify and hold harmless said vendee, its successors and assigns, from and against any liens or claims upon, to or against the same.

And for the same consideration we, the said vendors, do hereby jointly and severally agree to and with the said vendee, its suc-

cessors and assigns, that we and each of us will at any and all times hereafter, upon request of the vendee, or its attorney for the time being, execute or cause to be executed any and all deeds, instruments of assignment and other instruments, and will perform or cause to be performed, any and all acts which may be necessary or proper to fully and completely vest and confirm in the vendee, its successors or assigns, all the business, plant, equipment, patents, patent rights, stock in trade, goods, merchandise and other supplies, and good-will hereby conveyed or expressed to be conveyed, and to enable the said vendee, its successors and assigns, to secure and enjoy the full benefits and advantages thereof.

And for the same consideration we, the said vendors, do hereby jointly and severally covenant and agree to and with the said vendee, its successors and assigns, that during the period of fifteen (15) years beginning with the date hereof we will not and neither of us shall, directly or indirectly, in anywise enter into or be engaged or interested in manufacturing, selling or dealing in or with machinery or other articles connected with or relating to the manufacture of boots, shoes or other footwear, or any machinery, process, tool, mechanism or device for manufacturing the same, or in developing, selling, exploiting or dealing with any invention or Letters Patent relating to any such articles or the manufacture thereof, or relating to any such machinery, process, tool, mechanism or device, or in any business which consists in whole or in part of manufacturing or dealing in or with such articles or such machinery, tool, mechanism or device, or in making, developing or exploiting any such invention or Letters Patent; and that during said term we will not and neither of us shall, directly or indirectly, do any act or enter into or be engaged or interested in any business which will in anywise compete or interfere with or be in anywise prejudicial to or detract from the value of the business or good-will sold by us to the said vendee and herein described, or said business or any business of manufacturing or dealing in or with the articles above named, or any articles intended or adapted for any like or similar purpose, which is now or hereafter may be carried on by said vendee, its successors or assigns, or by any cor-

poration now or hereafter controlled by it, and that during said term we will not and neither of us shall, directly or indirectly, financially or otherwise encourage or assist or in any way influence or advise any other person, firm or corporation, in doing any of the above things, or engaging in any such business; but nothing herein contained shall be construed to prevent us or either of us from being or becoming an employee, officer or stockholder of said United Shoe Machinery Company or of any corporation now or hereafter owned or controlled by it, or from disposing of the invention covered by said application Serial Number 313,775 according to the terms of the option and agreement above mentioned concerning the same.

And we do hereby irrevocably constitute and appoint the said vendee to be our true and lawful attorney with power of substitution for us and each of us and in our name or names or the name of either of us, or otherwise, to take any action at law, in equity or otherwise, and to perform any and all acts which may be necessary or proper to secure, protect and enforce all or any part of the business, property, good-will, interests and rights of the said vendors hereby conveyed.

In Witness Whereof we, the said Irving E. Booth and the said Quentin W. Booth, have hereto set our hands and seals this first day of November, 1907.

IRVING E. BOOTH.
QUENTIN W. BOOTH.

Commonwealth of Massachusetts.

Suffolk, ss.

On this twelfth day of December, A. D. 1907, appeared Irving E. Booth and Quentin W. Booth, personally known to me and known to me to be the persons described in the foregoing instrument executed by them, and severally acknowledged that they executed the same as their free act and deed, before me

Frederick L. Edmands, Notary Public

PLAINTIFF'S EXHIBIT 122.

[Put in Evidence, page 572.]

This agreement made this first day of November 1907, by and between Irving E. Booth and Quentin W. Booth, both of Rochester in the State of New York, co-partners doing business under the firm name and style of "Booth Brothers", and the United Shoe Machinery Company, (hereinafter called the "United Company"), a corporation duly organized and existing under the laws of the State of New Jersey; Witnesseth:

That Whereas, said Irving E. Booth and Quentin W. Booth as co-partners as aforesaid, have, by an instrument in writing bearing even date herewith, conveyed to said United Company, the business, property, inventions, improvements, patents, patent rights and good will of said firm of Booth Brothers as set forth in said instrument; and have also by another instrument in writing bearing the same date and for the same consideration granted a license and given an option to said United Company and entered into covenants and agreements with said United Company all as therein set forth;

And Whereas the consideration for such conveyance, license, option, covenants and agreements stated in said first named instrument is "One Dollar ($1) and other valuable considerations";

And Whereas said parties desire to define the actual consideration therefor and to provide for the payment of such consideration;

Now, Therefore, it is hereby mutually covenanted and agreed:

First. That the actual consideration for the conveyance, license, option, covenants, and agreements aforesaid is the sum of seventy-one thousand two hundred eighty-four and 20/100 dollars ($71,284.20) in money.

Second. That of the said sum of seventy-one thousand two hundred eighty-four and 20/100 dollars ($71,284.20) the sum of thirty-five thousand six hundred forty-two and 10/100 dollars ($35,642.10) has this day been paid by said United Company to said Booth Brothers, and that the remainder of said sum of seventy-one thousand two hundred eighty-four and 20/100 dollars ($71,-

284.20) to wit, the sum of thirty-five thousand six hundred forty-two and 10/100 dollars ($35,642.10) is to be paid in instalments as follows: the sum of seventeen thousand eight hundred twenty-one and 5/100 dollars ($17,821.05) on the first day of November, 1908, and the sum of seventeen thousand eight hundred twenty-one and 5/100 dollars ($17,821.05) on the first day of November 1909; both of such payments to be without interest.

And the said United Company does further covenant and agree that it will promptly and punctually pay to said Booth Brothers when due each of said instalments.

Executed in duplicate the day and year first above written.

[SEAL] UNITED SHOE MACHINERY COMPANY
Edwd. P. Hurd, Assistant Treasurer.
IRVING E. BOOTH [SEAL]
QUENTIN W. BOOTH [SEAL]

PLAINTIFF'S EXHIBIT 123.

[Put in Evidence, page 573.]

Know all Men by these Presents.

That Whereas Irving E. Booth and Quentin W. Booth, both of Rochester in the State of New York, co-partners doing business under the firm name and style of "Booth Brothers" have on the day of the date hereof executed an instrument of conveyance conveying to the United Shoe Machinery Company, a corporation duly organized under the laws of the State of New Jersey (hereinafter called the "United Company"), the business, property and good will of said Booth Brothers and the inventions, improvements, Letters Patent of the United States of America and of other countries, and rights to and under such Letters Patent and applications therefor described in said instrument of conveyance which is to be delivered to said United Company simultaneously with this instrument and as part of the same transaction;

And Whereas the said Booth Brothers are the owners of an invention (the nature of which is now unknown to said United Company) described in an application for Letters Patent of the

United States, Serial Number 313,775, which invention was expressly excepted from the terms of said instrument of conveyance;

And Whereas as part of the transaction above mentioned and for the same consideration said Booth Brothers desire to grant the license and give the option and make the covenants and agreements hereinafter set forth, and the United Company desires to acquire such license and to secure said option and said covenants and agreements;

Now, Therefore, we, the said Irving E. Booth and Quentin W. Booth, both individually and as co-partners as aforesaid, for the consideration expressed in said instrument of conveyance and for the further sum of one dollar ($1.00) to each of us paid by said United Company, receipt whereof is hereby acknowledged, do hereby grant unto said United Company and its assigns for the period of twelve (12) months from the time when commercially operative machines shall be delivered and the nature of said invention shall be disclosed to said United Company as hereinafter provided, the sole and exclusive license to manufacture, use and license others to use both in the United States and in all other countries machines embodying the invention above named for the purpose of demonstrating the value in use of such invention but for no other purpose.

And we do also grant unto said United Company for the period of the license hereby granted the right to use any and all the machinery, tools, mechanisms, devices, jigs, drawings, patterns and other articles or things which have been or may hereafter be specially designed for use in connection with said invention.

And for the same consideration we do jointly and severally agree that within six (6) months from the date hereof we will deliver to said United Company two (2) commercially operative machines embodying said invention and will also fully disclose or cause to be fully disclosed to the President, a Vice President, the General Manager, Superintendent or Counsel of said United Company the nature of said invention and all and singular the methods and processes used in the manufacture thereof or in any way relating to or connected with said invention, and will repeat or cause to be

repeated such disclosures and fully explain the same or cause the same to be fully explained when and as often as may be requested by the said officers of the United Company or any of them; but such disclosures shall be made for the sole purpose of enabling said United Company, and its assigns, to manufacture, use and license others to use machines or other articles or things embodying said invention in accordance with the terms of the license hereby granted and said United Company shall make no other use of such disclosures.

And for the same consideration we do further jointly and severally agree that at any time within the period of the license hereby granted, we will upon request assign and transfer unto said United Company the full and exclusive right (both in the United States and in all foreign countries) to said invention as described in said application and to any and all improvements thereon, and will give to said United Company good title to any and all Letters Patent which may have been issued covering the same and to the machinery, tools, mechanisms, devices, jigs, drawings, patterns and other articles or things above mentioned upon the following terms:

Said United Company shall pay to us upon such assignment and transfer the sum of five thousand dollars ($5,000) and shall also agree with us as follows:

F. L. E.

(a) that it will pay to us ~~during the term of the Letters Patent of the United States which may be issued upon said application Serial Number 313,775~~, the sum of fifteen dollars ($15) for each and every machine or other article or thing embodying said invention which shall be sold or leased by it in the United States, and ten dollars ($10) for each and every such machine, article or thing which shall be sold or leased by it in any country other than the United States;

(b) that if the sums paid by it to us within the period of ten (10) years from the time when it makes said payment of five thousand dollars ($5,000) and takes said assignment, shall not amount to the total sum of ten thousand dollars ($10,000), exclusive of said sum of five thousand dollars ($5,000), and if requested by us

in writing before the expiration of said period of ten (10) years, it will pay to us on the day of the expiration of said period the amount if any by which the total amount actually paid by it during said period, exclusive of said sum of five thousand dollars ($5,000), is less than said sum of ten thousand dollars ($10,000), but on the condition that no further payments to us in respect to machines sold or leased by it shall thereafter be required until the sums which would otherwise have been payable to us, as herein stated, from the beginning of said period of ten (10) years, exclusive of said sum of five thousand dollars ($5,000), shall amount to the total sum of ten thousand dollars ($10,000), from which time payments shall again be made as herein stated; and

(c) that it will account to us and make the payments required in respect to machines sold or leased by it on or before February 15th and August 15th of each year for the period of six (6) months preceding January 1st and July 1st of each year respectively, and will continue to so account and to make such payments until the total amount paid by it, exclusive of the sum of five thousand dollars ($5,000) above mentioned, shall amount to the total sum of thirty-five thousand dollars ($35,000), and no longer,

but no payments shall be required after the expiration of the Letters Patent which may issue upon said application. F. L. E.

And for the same consideration we do hereby jointly and severally agree that in case said United Company shall not within the period above mentioned and after thirty (30) days' written notice to exercise the option above granted communicated by us to said United Company, request such assignment and transfer and pay to us said sum of five thousand dollars ($5,000) we may thereupon or at any time thereafter assign and transfer said invention and improvements and any and all Letters Patent which may have been issued covering the same to any other person or party, but we further jointly and severally agree that before making any such assignment and transfer, or any agreement therefor, we will promptly disclose to said United Company the terms upon which such other person or party desires to acquire said invention and improvements and that said United Company shall thereupon have

the right to acquire the same upon like terms, but only during such period of time after said disclosure is made as may be necessary to enable said United Company to communicate to us its acceptance of said terms.

And for the same consideration we do further jointly and severally agree that during the period of fifteen (15) years from the date hereof we will not and neither of us shall, except as an employee of said United Company or of a corporation owned or controlled by it, manufacture or deal in or with said invention or improvements otherwise than to completely dispose of the same to other persons or parties for cash, for royalty, or upon other terms in case said United Company does not desire to acquire the same under the provisions hereof, and to take such steps as may be necessary to secure, protect and enforce our rights to said invention or improvements whether under Letter Patents or otherwise; and that we will not and neither of us shall during said period of fifteen (15) years, directly or indirectly, financially or otherwise, encourage or assist any person, firm or corporation, other than said United Company, in manufacturing or dealing in or with said invention or improvements or articles embodying the same; but for the purpose of disposing of the same as herein provided we may, the provisions hereof notwithstanding, alter, improve, or add to said invention and make other and further application for Letters Patent covering the same or covering such alterations, improvements or additions.

Said United Company may by its own attorneys and at its own expense, but in the name of said Booth Brothers, file applications for and, if possible, obtain Letters Patent of countries other than the United States covering said invention, and if said United Company shall not exercise the option first hereinbefore provided for, then and in that case we will reimburse said United Company for all sums expended by it for services, fees and other expenses incurred in connection with filing such application or obtaining such patents.

In Witness Whereof we the said Irving E. Booth and Quentin

W. Booth have hereto set our hands and seals this first day of November 1907.

IRVING E. BOOTH. [SEAL]
QUENTIN W. BOOTH. [SEAL]

Commonwealth of Massachusetts,
Suffolk, ss.

On this twelfth day of December, A. D. 1907, before me personally appeared Irving E. Booth and Quentin W. Booth, to me known to be the persons described in and who executed the foregoing instrument, and acknowledged that they executed the same as their free act and deed.

Frederick L. Edwards, Notary Public.

PLAINTIFF'S EXHIBIT 124.

[Put in Evidence, page 573.]

This Agreement, made this first day of November, A. D. 1907, by and between Irving E. Booth and Quentin W. Booth, both of Rochester in the State of New York, co-partners doing business under the firm name and style of "Booth Brothers" (hereinafter called "Booth Brothers"), and the United Shoe Machinery Company, a corporation duly established under the laws of the State of New Jersey (hereinafter called the "United Company") Witnesseth:

That Whereas by an instrument of conveyance dated November 1, 1907, said Booth Brothers have conveyed to said United Company the entire business, property, assets and good-will of said Booth Brothers as therein set forth, including all patents and patent rights, and have given full covenants of title thereto; and

Whereas by an assignment dated November 1, 1907, said Booth Brothers have assigned to said United Company certain patents and patent rights including all their right in or to an invention described in application for Letters Patent of the United States, Serial No. 211,794, filed June 9, 1904, for Improvement in Fudging Machines"; and have covenanted that they are the absolute owners of the same; and

Whereas said Booth Brothers have heretofore made an agree-

ment in writing, dated May 11, 1907, in respect to the invention above named with one Thomas G. Plant, of Boston, Massachusetts, a copy of which is hereto annexed;

Now, therefore, it is mutually agreed that the right of said Booth Brothers in said invention conveyed to the United Company as aforesaid is subject to the rights of said Thomas G. Plant under said agreement of May 11, 1907.

And for the consideration expressed in the instrument of conveyance above named and for the further consideration of one dollar ($1.00) to the said Booth Brothers paid by the said United Company and of the covenants on the part of said United Company hereinafter contained, said Irving E. Booth and Quentin W. Booth do individually and as co-partners as aforesaid hereby assign, transfer and set over unto the said United Company and its successors and assigns the said agreement with said Plant and all advantages to be derived therefrom; and the said United Company hereby agrees with said Booth Brothers that it will perform and observe the agreements on the part of the said Booth Brothers to be performed and observed, according to the terms of said agreement upon the following conditions:

1. Said United Company may prosecute by its own attorneys the interference mentioned in said agreement and shall not be held to make any payment to attorneys or solicitors or others heretofore employed by said Booth Brothers for services heretofore rendered or expenses heretofore incurred in connection with said interference, but said Booth Brothers may, at their own expense, employ counsel or attorneys to be associated with the attorneys of said United Company in prosecuting such interference.

2. Said United Company shall pay over to said Booth Brothers such sums and such sums only as it shall actually receive under the provisions of Article 3 of said agreement, but if any sums are at any time due and unpaid under the provisions of said Article 3 it shall if requested by said Booth Brothers, and at their expense, or it shall permit said Booth Brothers to bring such suit in its name.

3. In any case of infringement of the patent referred to in said agreement said United Company shall begin and prosecute suit to

suppress the same by its own attorneys, and the expense of such suit shall be apportioned between said United Company and said Booth Brothers according to their respective pecuniary interests in the result thereof, or said United Company shall permit said Booth Brothers to bring such suit in its name.

In Witness Whereof the said Irving E. Booth and Quentin W. Booth have hereto set their hands and seals; and the United Shoe Machinery Company has caused its corporate seal to be hereto affixed and these presents to be executed and delivered in its name and behalf by Edward P. Hurd its Asst. Treasurer, the day and year first above written.

IRVING E. BOOTH [SEAL]

QUENTIN W. BOOTH [SEAL]

[SEAL] UNITED SHOE MACHINERY COMPANY

By Edwd. P. Hurd, Asst. Tres.

MEMORANDUM OF AGREEMENT

made this eleventh day of May, A. D. 1907, between Irving E. Booth, Quentin W. Booth, Copartners, doing business under the firm name of Booth Brothers, Rochester, New York, hereinafter referred to as "Booth Brothers", and Thomas G. Plant, of Boston, Massachusetts.

Witnesseth that said Booth Brothers are the owners of an Application for Letters Patent of the United States, Serial Number 211-794, filed June 9, 1904, for improvement in Fudging Machine, which application is at present involved in Interference #27259, entitled Heys *v.* Hadaway *v.* Krewson, and that said Plant is desirous of acquiring a license from said Booth Brothers, under the claims at issue in a Letters Patent to said Krewson or to his assignees, Booth Brothers;

Now Therefore, in consideration of the premises, the parties above referred to have hereby agreed as follows:

1. Said Booth Brothers agree to prosecute said Interference with due diligence and with an honest and sincere purpose to obtain a decision of priority therein in favor of said Krewson and to have a

patent issued to said Krewson at the earliest practicable date containing the claims at issue in said Interference.

2. Said Booth Brothers further agree to and do hereby grant unto the said Plant, and to his assigns, the right and license (but not exclusive) to make, use and sell machines containing the invention of said claims at issue to the full end of the term for which any Letters Patent may be granted to the said Krewson, or to said Booth Brothers, containing such claims, provided said Plant during such time complies with the conditions hereinafter stated, this license to become effective upon the granting of a patent containing such claims.

3. Said Plant agrees to pay to the said Booth Brothers, or to their order, Three Hundred (300) Dollars, annually, for said license, from and after the date of issuance of said Letters Patent and until the expiration thereof, the first payment to be made six (6) months from the date of issue of the Letters Patent referred to and upon the corresponding day and month each year thereafter during the life of said patent.

4. It is mutually agreed that should the said Letters Patent be declared to be invalid by any Court of Appeals, or should the claims at issue in said Interference be declared to be invalid in view of any evidence before such Court, then and in such event the obligation on the part of said Plant to pay, annually, said sum of Three Hundred (300) Dollars shall cease forthwith.

5. Said Plant agrees that he will not, either directly or indirectly, contest the validity of any Letters Patent issued to said Krewson or Booth Brothers containing the claims of said Interference.

6. It is agreed that if, during any year of the life of the patent herein referred to, any open infringement of the said patent, as to the claims involved in the Interference above mentioned, shall be called to the attention of said Booth Brothers and they fail to take prompt steps, by bringing and diligently prosecuting suit, to suppress such infringement, then, and in such event, the license fee herein agreed to be paid by said Plant for that year need not be paid, and that it need not be paid during any succeeding year or years in which the same or any other open infringement exists

without suit on the part of said Booth Brothers, after due notice by said Plant of such infringement or infringements, to suppress the same.

7. This agreement is binding upon the parties hereto and their respective Heirs, Executors, Administrators and Assigns.

8. Said Booth Brothers agree to permit said Plant to nominate associate counsel to assist so far as said Plant desires in the prosecution of the Krewson case, he to have necessary authority therefor from Booth Brothers.

In Witness Whereof the parties hereto have hereunto set their hands and seals the day and year first above given.

PLAINTIFF'S EXHIBIT 125.

[Put in Evidence, page 577.]

This Indenture, made this first day of December, 1908, by and between William B. Rice and Harry L. Rice, both of Quincy, Massachusetts, and John H. Richardson, of Cliftondale, Massachusetts, (hereinafter called the "vendors") parties of the first part, and the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, (hereinafter called the "United Company") party of the second part, and the Richardson Shoe Machinery Company, a corporation organized and existing under the laws of the State of Maine (hereinafter called the "Richardson Company") party of the third part, Witnesseth:

That Whereas each of the said vendors is a stockholder, director and officer of the said Richardson Company which has been and is now engaged in developing and in dealing in and with certain machinery intended or adapted for use in the manufacture of footwear including especially sewing machines of the type known in the trade as "McKay Sewing Machines" and machinery intended or adapted for cutting or dieing out leather or other materials, including machines of the kind known in the trade as "Clicking Machines"; and the said vendors have represented to the United Company that they own or control all of the shares of the capital stock of said Richardson Company:

And Whereas the said vendors desire to sell and transfer to the said United Company all of the shares of the capital stock of said Richardson Company and the United Company desires to acquire the same together with the warranties and covenants on the part of the said vendors hereinafter set forth:

Now, Therefore, the parties hereto, each in consideration of the covenants and agreements on the part of the other herein contained, do hereby covenant and agree, each with the other, as follows:

1. The said vendors hereby covenant and agree that they will forthwith cause whatever steps may be necessary to be taken to convey to and vest in the said United Company, or such person or persons as the United Company shall designate to receive the same, the ownership, free from any claim or incumbrance, of all of the shares of the capital stock of the said Richardson Company, and will cause such shares to be transferred upon the books of the Richardson Company and new certificates to be issued therefor in the name of the said United Company or such person or persons as may be designated by the United Company therefor.

2. The said vendors hereby covenant and agree that they will as and when requested by the United Company cause all of the present officers and directors of the said Richardson Company to tender their resignations in writing to take effect upon acceptance by the directors, and as and when requested will cause all such actions to be taken by the directors and officers of the said Richardson Company as may be necessary or desired to transfer the control and management of the said Richardson Company to the said United Company or to such person or persons as the United Company may designate therefor, and to cause such persons as the United Company may designate to be chosen officers and directors of said Richardson Company. It is understood and agreed that the United Company shall as promptly as possible after execution of this indenture designate the persons to receive the stock and the persons to be elected directors and officers of the Richardson Company in order that the vendors may proceed at once to comply with the obligations of paragraphs 1 and 2 hereof.

3. The said vendors and each of them hereby covenant with and

warrant to the said United Company that the said Richardson Company is a corporation duly organized and existing under the laws of the State of Maine; that the total authorized capital stock of the said Richardson Company is the sum of sixty thousand dollars ($60,000) consisting of six hundred (600) shares of the par value of one hundred dollars ($100) each; that all of said shares of capital stock have been issued as fully paid; that of said six hundred (600) shares two hundred (200) shares of the par value of twenty thousand dollars ($20,000) are owned free from incumbrance by the Richardson Company itself and stand in the name of William B. Rice as Trustee for said Richardson Company; that all the rest of the authorized capital stock is owned or controlled by the vendors; that on the first day of December, 1908, said Richardson Company is free from all indebtedness and direct and contingent obligations excepting the indebtedness set forth in "Schedule A" hereto annexed, amounting to a total of thirty-two thousand one hundred fifty-eight dollars and fifty cents ($32,158.50) with certain interest thereon, and excepting the cost remaining unpaid of twenty (20) Richardson Sewing Machines and of certain jigs and parts ordered but not yet received or paid for, as set forth in paragraph 4 hereof; that on the first day of December, 1908, the factory equipment, patterns, jigs, etc., (including one set jigs, patterns, etc., in England) Richardson Sole Sewing Machines new, second-hand and rebuilt, machine parts and supplies, furniture and fixtures and raw materials on hand owned by the said Richardson Company is of the value at cost less depreciation of at least twenty-two thousand dollars ($22,000) and includes all of such property shown by inventory of September 1, 1908 with such additions thereto as have been made since that date, excepting so far as raw materials and supplies have been used and machines and machine parts have been disposed of in the ordinary course of business since said inventory of September 1, 1908. A brief summary of such property from said inventory of September 1, 1908 has been furnished by the said vendors and is hereto annexed, marked "Schedule B". The said vendors and each of them further covenant with and warrant to the said United Company that on this first day of December, 1908, the

said Richardson Company owns the machines mentioned in "Schedule C" hereto annexed which machines are in the possession of customers of the said Richardson Company upon loan under agreements for the payment of rental to the said Richardson Company and that the rental agreements covering all of said machines (unless the contrary is indicated in said "Schedule C") are in the possession of and owned by said Richardson Company; that on this first day of December, 1908, the Richardson Company is the owner of all the inventions, improvements and Letters Patent and interests therein formerly owned by the Steam Heated Horn Company, and is the owner of all the Letters Patent and applications for and interests in Letters Patent of the United States and other countries mentioned in "Schedule D" hereto annexed and the inventions covered thereby; that the property hereinbefore enumerated is not exclusive of other property of similar or different nature owned by the said Richardson Company; that all of the property herein or in said schedule hereto annexed, referred to as owned by the said Richardson Company, is free from any and all incumbrances; and that none of the property, interests or rights of any nature owned by the Richardson Company on September 1, 1908, have been transferred or disposed of otherwise than in the ordinary course of its business of manufacturing and dealing in machines, and that all of such property (excepting so far as used or disposed of in such ordinary course of business) and all of such interests and rights are still owned and possessed by the said Richardson Company.

4. The said vendors hereby jointly and severally covenant and agree to and with said United Company and to and with the said Richardson Company that they will promptly and at their own expense cause all indebtedness of said Richardson Company existing on this first day of December, 1908, or arising from dealings or transactions which have taken place prior to said date to be discharged and that they will at all times protect, indemnify and hold harmless the said Richardson Company from and against any and all indebtedness and obligations existing on said date or arising from dealings or transactions prior thereto and from all loss, cost, damage or expense arising therefrom, excepting alone however

that the vendors do not agree to pay or to indemnify against the amounts, not exceeding $90.00 per machine, remaining to be paid for twenty (20) Richardson sewing machines now being built for said Richardson Company by William Spiers, of Leicester, England, and the amounts, not exceeding $4,000.00, remaining to be paid for certain parts and jigs which have heretofore been ordered but have not yet been delivered to the said Richardson Company.

5. Each of the said vendors hereby sells, assigns, transfers, sets over and delivers to the said United Company all inventions, improvements, Letters Patent and interests and rights therein, thereunder or thereto which he has or to which he is in anywise entitled relating to any machinery of the kinds referred to in the preamble hereof or for the same or any similar purpose; and likewise sells, assigns, transfers and sets over to the said United Company any and all inventions, improvements, Letters Patent and interests and rights therein, thereunder or thereto which he may make, acquire, own or have any right to acquire or take over at any time within ten (10) years from the date hereof relating to any such machinery.

6. Each of the said vendors as a material part of this transaction and of the consideration for the agreement of the United Company to make the payment hereinafter provided for does hereby covenant and agree to and with the said United Company, and also to and with the said Richardson Company, that he will not at any time within ten (10) years from the date of these presents directly or indirectly, individually or in combination with others, as principal, agent, employee or representative, or as officer or stockholder of a corporation or otherwise, without the consent in writing of said United Company, enter into or be engaged or interested in or financially or otherwise assist any other person, firm or corporation in entering into, engaging in, developing or carrying on the manufacturing of or dealing in any machinery of the kinds referred to in the preamble hereof, or for the same or any similar purpose, or in any business which consists in whole or in part in manufacturing or dealing in such machinery or which will directly or

indirectly interfere or compete with the business of the said Richardson Company or of the said United Company in such machinery.

7. Each of the said vendors covenants and agrees that he will make all necessary disclosures and will at any and all times hereafter upon request execute any and all instruments and perform any and all acts which may be necessary or proper to carry out the full intent of this instrument and to enable the said United Company to secure, protect and enjoy the full benefits and advantages of all assignments and transfers herein provided for and of the covenants herein contained.

8. The said United Company as full consideration for the assignments and transfers herein made or provided for and for the covenants herein contained hereby agrees to pay to the said vendors the sum of eighty thousand dollars ($80,000). All parties hereby agree that said sum shall be paid to the said Harry L. Rice as agent for said vendors to receive the same and that the United Company shall be in no respect responsible for the application or distribution thereof. Such payment shall be made upon execution of papers and delivery of stock. It is distinctly understood that the said sum of eighty thousand dollars ($80,000) shall belong to the vendors individually and that no part of the said sum shall be paid or accounted for by the vendors or any of them to the Richardson Company or its successors or assigns on account of the said two hundred (200) shares held in trust by William B. Rice as Trustee for the Richardson Company as aforesaid; and the United Company covenants that neither the Richardson Company nor its successors or assigns, shall make or claim for any such payment or accounting.

9. Whereas the rental agreements covering machines put out on rental by the said Richardson Company provided for payment of rentals semi-annually, in advance; and whereas the Richardson Company, prior to December 1, 1908, has collected rentals covering periods of time in part subsequent to said December 1, 1908, and may hereafter collect overdue accounts for rental pertaining in part to periods of time prior to said December 1, 1908; now therefore it is agreed that the vendors shall cause to be turned over to the

United Company an amount equal to the rentals heretofore collected covering any periods of time subsequent to December 1, 1908, and the United Company shall cause to be turned over to the said vendors an amount equal to the rentals, if any, hereafter collected, which cover any periods of time prior to December 1, 1908; provided, however, that in figuring the rentals for the purpose of adjustment as aforesaid the same shall be figured on a basis of sixty-five dollars ($65.00) per year per machine (although the lease provides for seventy-five dollars ($75.00). In the adjustment between the vendors and the United Company to the date of December 1, 1908, (as of which date the transfer of the Richardson Company to the United Company is to take effect) debits and credits, in accordance with the foregoing provisions of this paragraph, with reference to rentals shall be made, and the vendors shall also be credited with an amount equal to the cash of the Richardson Company on hand at the close of business on the last day of November, 1908. There shall also be credited to the vendors an amount equal to any sums (less the expenses, if any, of making collections) which the Richardson Company shall collect on account of bills owing to the said Richardson Company on said first day of December, 1908, for goods theretofore sold and delivered by the said Richardson Company.

10. There are in the hands of the persons, firms and corporations hereinafter named certain stocks of parts of Richardson Sole Sewing Machines which have heretofore been supplied to said persons, firms or corporations by the said Richardson Company, viz: —

Stock in the hands of L. G. Freeman, of Cincinnati, Ohio, to the amount at catalogue selling prices of about one thousand dollars ($1,000).

Stock in the hands of Manufacturers' Supply Company, of St. Louis, Missouri, to the amount at catalogue selling prices of about one thousand dollars ($1,000).

Stock in the hands of Brooks & Company, of Auburn, Maine, to the amount at catalogue selling prices of about one hundred dollars ($100).

Stock in the hands of George William Hill & Company, of Leicester, England, to the amount at catalogue selling prices of about twelve hundred dollars ($1200).

Stock in the hands of Irving L. Keith, of Haverhill, Massachusetts, to the amount at catalogue selling prices of about two hundred and fifty dollars ($250).

Certain small stocks of parts in the hands of Nollesche Werke, of Weissenfels a/s Germany.

Certain small stocks of parts in the hands of the Boylston Manufacturing Company, at Leicester, England.

It is understood and agreed that the United Company shall cause the said Richardson Company to give an opportunity to the said L. G. Freeman, Manufacturers' Supply Company, Brooks & Company, George William Hill & Company and Irving L. Keith, and also, if the United Company shall see fit, to the said Nollesche Werke and the Boylston Manufacturing Company, to turn over and transfer to the said Richardson Company or to such persons as it may designate therefor the said stocks of parts at such prices as may be agreed upon between the said Richardson Company and the said respective persons, firms and corporations, not, however, exceeding the catalogue selling price thereof less the discounts therefrom which have been allowed said persons, firms or corporations in respect thereto, and if these stocks shall be so taken over by the said Richardson Company the said vendors agree to reimburse the said Richardson Company to the extent of all amounts paid by the said Richardson Company for said stocks in excess of the actual manufacturing cost of such parts to the Richardson Company which costs are estimated to be from thirty-three and one-third per cent. (33 1/3%) to fifty per cent. (50%) of the catalogue selling prices.

11. The original or copy of each of the following outstanding agreements of the Richardson Shoe Machinery Company has been furnished by the vendors to the said United Company, viz: —

Agreement, dated April 27, 1908, between the Richardson Shoe Machinery Company and the Essex Machine Company, of Lynn, Massachusetts.

Agreement, dated October 22, 1908, between the Richardson Shoe Machinery Company and Cushman-Hollis Company;

Agreement, expressed to terminate July 1, 1910, between the Richardson Shoe Machinery Company and the H. C. Godman Company;

Agreement, dated August 15, 1908, between the Richardson Shoe Machinery Company and R. E. Hood;

The rental agreements covering the machines enumerated in said Schedule C annexed (excepting when the contrary is indicated in said Schedule C);

and it is agreed that the United Company in taking over the Richardson Company as aforesaid shall take said Company subject to the obligations of the Richardson Company under said agreements required by said agreements to be performed after this first day of December, 1908, the said vendors paying or causing to be paid such indebtedness, if any, and discharging or causing to be discharged such obligations, if any, under or arising from said agreements as pertain to the period prior to said first day of December, 1908 or arise from transactions which took place under said agreements prior to said first day of December, 1908. The covenants of the vendors set forth in lines fifteen to twenty-four of paragraph 3 hereof and set forth in paragraph 4 hereof are hereby modified to such extent as is necessary to meet the requirements of this article 11 as to said agreements herein enumerated.

12. The term "United Company" wherever herein used shall include the said United Shoe Machinery Company, its successors and assigns. The Richardson Company joins in this agreement for the purpose of consenting to the transfer or conveyance as herein provided of the two hundred (200) shares which are stated in paragraph numbered 3 hereof to be owned by the Richardson Company and stand in the name of William B. Rice as trustee for said Richardson Company; and the Richardson Company hereby expressly authorizes and directs the said William B. Rice, Trustee as aforesaid, to transfer the said shares when and as the vendors may request.

In Witness Whereof the parties hereto have hereunto set their hands and seals the day and year first above written.

PLAINTIFF'S EXHIBIT 126.

[Put in Evidence, page 577.]

This agreement made this first day of December, A. D. 1908, by and between John H. Richardson, of Cliftondale, Massachusetts, and the United Shoe Machinery Company, a corporation duly organized under the laws of the State of New Jersey, (hereinafter called the "United Company"), Witnesseth:

That whereas the United Company is engaged throughout the United States of America and elsewhere in the business of manufacturing and dealing in and with machinery, tools, mechanisms, devices, findings, materials, supplies, methods, processes and things for use in the manufacture of footwear and for leather working, and

Whereas, the said Richardson desires to enter into the employment of the said United Company and the said United Company desires to secure the services and inventions of the said Richardson together with the covenants and agreements on the part of the said Richardson herein contained,

Now, Therefore, be it Known that the said Richardson in consideration of the covenants and agreements on the part of the United Company herein contained does hereby covenant and agree to and with the said United Company as hereinafter set forth, and does hereby make the transfers and assignments hereinafter contained and the said United Company in consideration of the covenants, agreements and assignments on the part of the said Richard-

son hereinafter contained does hereby covenant and agree to and with the said Richardson as hereinafter set forth.

1. The said Richardson hereby covenants and agrees to and with the said United Company that for a term of one year beginning with the date hereof he will render and give his time, services and skill exclusively to the said United Company for the accomplishment of such purposes and the performance of such duties as shall from time to time be assigned to him by the said United Company or such person as may be designated for such purpose by the said United Company, and that he will at all times faithfully and truly and to the best of his skill and ability, act diligently and loyally for the promotion of the interests of the said United Company.

2. The said Richardson has sold and does hereby sell, assign, transfer and set over unto the said United Company any and all inventions and improvements which he may at any time hereafter, prior to the expiration of said period of one year beginning with the date hereof or at any time within ten years from the expiration of said period of one year, make, either as sole inventor or as joint inventor with another or others, and whether made in or out of the ususal working hours or upon the premises of the said United Company or otherwise, in, relating to or designed or adapted for use in machinery, tools, mechanisms, devices, findings, materials, supplies, methods, processes or things designed or adapted for use in the manufacture of footwear or in the manipulation or working of leather or in or relating to or designed or adapted for use in the manufacture of any such machine or of such other articles or things or in or relating to or designed or adapted for use in any machinery, tools, mechanisms, devices, materials, supplies, processes or things designed or adapted for use in such manufacture of machinery or of such other articles or things or in, relating to or in any manner designed or adapted for use in any of the factories or in the business of said United Company or of any of the Companies now or hereafter owned or controlled by it, and has likewise sold and does hereby sell, assign, transfer and set over unto the said United Company all inventions, improvements, Letters Patent and Applications for Letters Patent (both of the United

States of America and of any and all other countries) and all right, title and interest therein, thereunder or thereto which the said Richardson now owns, controls or has any right by agreement or otherwise to acquire, take over, convey or cause to be conveyed, or which he may at any time during said term of one year or at any time with said period of ten years after the expiration of said term of one year, own, control or have any right by agreement or otherwise to acquire, take over, convey or cause to be conveyed, in, relating to or designed or adapted for use in any machinery, tools, mechanisms, devices, findings, materials, supplies, methods, processes or things of the kinds hereinbefore referred to in this article hereof, or in the manufacture thereof or in, relating to or designed or adapted for use in any machinery, methods, processes or other articles or things designed or adapted for use in such manufacture or in, relating to or in any manner designed or adapted for use in any of the factories or in the business of the said United Company or any Companies now or hereafter owned or controlled by it.

To Have and to Hold all of said inventions, improvements, Letters Patent, applications for Letters Patent, interests and rights to said United Company, its successors and assigns to its and their own use and behoof absolutely.

3. The said Richardson hereby covenants and agrees to and with the said United Company that he will promptly disclose to the President, General Manager, Superintendent or Counsel of said United Company all inventions, improvements, Letters Patent, applications for Letters Patent, interests and rights included within the terms of Article 2 hereof which he now has or has any right by agreement or otherwise to acquire, take over, convey or cause to be conveyed, and that upon making any invention or improvement, or acquiring any right, title or interest in, to or under or any right to acquire, take over, convey or cause to be conveyed any invention or improvement, Letters Patent or application for Letters Patent or interest or right therein included within the terms of Article 2 hereof, he will forthwith disclose the same to the President, General Manager, Superintentent or Counsel of said United Company;

that he will repeat such disclosures and fully explain the same when and as often as may be requested by said officers of the said United Company or any of them, and that he will, and his heirs, executors and administrators shall, at any and all times upon the request of the said officers of the said United Company or any of them, perform or cause to be performed all such acts, will execute or cause to be executed all such applications, specifications, powers of attorney or other instruments in such manner and form as the United Company or its counsel for the time being shall deem proper to obtain the grant of Letters Patent of the United States and of any and all other countries where it may be desired to obtain Letters Patent therefor covering the inventions and improvements under the terms of said Article 2 hereof conveyed or provided to be conveyed and to fully and completely vest and confirm in the said United Company or in such nominee or nominees as the said United Company shall designate to take title to the same so far as is within the power of the said Richardson, his heirs, executors or administrators to the full and complete right, title and interest in, to and under all such Letters Patent and the entire right, title and interest in, to and under all inventions, improvements, Letters Patent and applications for Letters Patent, interests and rights included within the terms of Article 2 hereof and thereby conveyed or provided to be conveyed and to enable the said United Company to secure and enjoy the full benefits and advantages thereof — all without further consideration than that hereinafter provided for but at the expense of the said United Company.

4. The said Richardson does hereby further covenant and agree to and with the said United Company that he will not at any time within said term of one year beginning with the date hereof, or at any time within ten years from the expiration of said period of one year, either directly or indirectly, individually or jointly with another or others or as partner, agent, contractor, employee or as officer or stockholder of a corporation or otherwise (excepting as an employee, officer or stockholder of the said United Company) enter into or be engaged or interested in inventing, exploit-

ing, manufacturing, selling, dealing in or developing any machinery, tools, mechanisms, devices, findings, materials, supplies, methods, processes or things designed or adapted to be employed in the manufacture of footwear or in the manipulation or working of leather or designed or adapted for use in the manufacture of any such machine or of any such other article or things or in exploiting, selling or dealing in or with any invention or Letters Patent relating to such machinery or any such other articles or things or to the manufacture thereof, or in any business so far as it consists in inventing, exploiting, manufacturing, selling, dealing in or developing any such machinery or such other articles or things, or in making, exploiting, selling, dealing in or developing any such invention or Letters Patent or in any business which will in any wise compete or interfere with the business of said United Company or of any corporation now or hereafter owned or controlled by it, and that he will not financially or otherwise encourage or assist any other person, firm or corporation in inventing, exploiting, manufacturing, selling, dealing in or developing any such machinery or such other articles or things or any inventions or Letters Patent relating thereto, or in entering into, developing or carrying on any such business.

5. The United Company, as consideration for the services of the said Richardson and for the assignments hereinbefore made or provided to be made and the covenants and agreements on the part of the said Richardson hereinbefore contained hereby covenants and agrees to and with the said Richardson to employ the said Richardson for the term of one year beginning with the date hereof and during said period to pay to said Richardson, provided the said Richardson shall continue faithfully to perform the duties of said employment and to faithfully keep and perform the covenants and agreements on his part herein contained, a salary at the rate of twenty-five hundred dollars per annum, payable in equal monthly installments of $208.33 Dollars each.

6. In case, upon the expiration of the said period of one year beginning with the date hereof, neither the said United Company nor the said Richardson shall notify the other of the termination of

said employment, then unless a new agreement in writing shall be made said employment shall continue upon the same terms and conditions as hereinbefore provided until such time as either party shall give to the other thirty days notice of the intention to terminate the same and if such employment shall continue beyond the expiration of said period of one year beginning with the date hereof the assignments, covenants and agreements contained or provided for in Article 2 hereof shall apply to all inventions, improvements, Letters Patent, applications for Letters Patent, interests and rights of the kinds referred to in said Article 2, made, owned or acquired by the said Richardson or which the said Richardson shall have the right to acquire, take over, convey or cause to be conveyed during the further continuance of said employment and during the period of ten years thereafter, and all the covenants and agreements on the part of the said Richardson in this instrument contained shall apply to the period during which the further employment of the said Richardson shall continue and for the period of ten years thereafter.

7. The term "United Company" as herein used shall be held to include said United Shoe Machinery Company and its successors and assigns and all covenants and agreements on the part of said Richardson herein contained shall run to and may be enforced by and for the benefit of said United Company, its successors and assigns.

In Witness Whereof the said John H. Richardson has hereunto set his hand and seal and the said United Shoe Machinery Company has caused these presents to be signed in its name and on its behalf by Edward P. Hurd, its Assistant Treasurer, and its corporate seal to be hereto affixed the day and year first above written.

JOHN H. RICHARDSON [SEAL]
UNITED SHOE MACHINERY COMPANY [SEAL]
By Edwd. P. Hurd, Asst. Tres.

Commonwealth of Massachusetts.

Suffolk, ss. Boston, Jan. 28, 1909.

On this twenty-eighth day of January, A. D. 1909, before me

personally appeared John H. Richardson to me known to be the person described in and who executed the foregoing instrument and acknowledged that he executed the same as his free act and deed.

Harold Gregory Donham, Notary Public. [SEAL]

PLAINTIFF'S EXHIBIT 127.

[Put in Evidence, page 579.]

Know all Men by these Presents: That Whereas, the Carver Cotton Gin Company, a corporation organized and existing under the laws of the Commonwealth of Massachusetts, and having a usual place of business at East Bridgewater in said Commonwealth (hereinafter called the "Carver Company") has heretofore been engaged in connection with its general machinery business in a business of manufacturing and dealing in machinery, mechanisms, tools and devices for use in the manufacture of footwear, and is the owner of certain property relating thereto, and is desirous of disposing of the same to the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey (hereinafter called the "United Company");

And Whereas, Edward Hobart is the Treasurer and a substantial stockholder of the said Carver Company and is personally desirous that the purchase of said business and property by the said United Company from the said Carver Company shall be carried through, and has in behalf of the Carver Company conducted the negotiations for said purchase by the United Company;

Now, Therefore, in consideration of the sum of one dollar ($1.00) and other good and valuable considerations paid by the said United Company to the said Carver Company, the receipt whereof is hereby acknowledged, the said Carver Company does hereby make the sale, assignments and transfers hereinafter set forth, and enter into the warranties and covenants hereinafter contained; and the said Hobart personally in consideration of the making of said purchase by the said United Company and payment of said consideration does hereby enter into the covenants upon the part of the said Hobart hereinafter contained.

The Carver Company for the consideration aforesaid does hereby sell, assign, transfer, set over and deliver unto the said United Company, its successors and assigns, all that part of the business of the said Carver Company (excepting as hereinafter specifically provided) which consists of or relates to or is connected with manufacturing or dealing in machinery, tools, mechanisms or devices for use in the manufacture of footwear, together with the good-will thereof, and stock in trade and all other property, interests and rights relating thereto, including herein without prejudice to the generality of the foregoing all trade names, marks or brands (including the exclusive right so far as the said Carver Company is able to grant the same to the use either alone or in connection with other words or names (except the use of the Corporate name of the Carver Cotton Gin Company) of the name "Carver" as applied to machinery, mechanisms, tools or devices for use in the manufacture of footwear or business therein), all patterns, blue prints, drawings, jigs, special tools, mechanisms and devices pertaining to the business of manufacturing or dealing in such machinery, mechanisms, tools or devices; all inventions and Letters Patent of the United States and of any and all other countries which the said Carver Company now owns or has any right by agreement or otherwise to acquire or take over relating to machinery, mechanisms, tools or devices for use in the manufacture of footwear or to the manufacture thereof; all machines, mechanisms, tools, devices for use in the manufacture of footwear and all duplicate parts therefor on hand manufactured or in process of manufacture; and any and all other articles and things, interests and rights pertaining to said business.

To Have and to Hold all of said property, interests and rights of every name and nature to the said United Shoe Machinery Company, its successors and assigns, to its and their own use and behoof absolutely.

An inventory of the stock on hand of machinery, mechanisms, tools and devices and duplicate parts thereof for use in the manufacture of footwear on hand April 1, 1908 has been prepared by the said Carver Company and identified by the signature of the

said Hobart, Treasurer of the said Carver Company, and Edward P. Hurd, Assistant Treasurer of the said United Company, and a summary of the same is hereto attached; and the said Carver Company hereby warrants to the said United Company, its successors and assigns, that the property of that nature hereby conveyed includes all of the property set forth in said inventory excepting such as has been used in the regular course of business since said first day of April; that it has good title and right to convey all of the same to the said United Company free from any incumbrances, and will warrant and defend the same against the lawful claims and demands of all persons. The Carver Company also agrees to account to the United Company for any of said property which has been used since the first day of April, it being the understanding and agreement that the United Company shall have the benefits of all the said business in manufacturing or dealing in machinery, mechanisms, tools or devices for use in the manufacture of footwear done since said first day of April.

And for the consideration aforesaid the said Carver Company and the said Hobart personally do hereby covenant and agree to and with the said United Company, its successors and assigns, (the said Carver Company for itself and the said Hobart for himself but neither for the other) that they will not nor will either of them (without the consent in writing in each instance of the said United Company, its successors or assigns, and excepting in so far as the said Carver Company may be interested as a stockholder or the said Hobart as a stockholder, officer or otherwise in the said United Company, its successors or assigns) at any time within fifteen (15) years from the date of these presents directly or indirectly either jointly or severally, individually or in combination with others, as stockholder or officer in any corporation, or as owner, partner, principal, agent or otherwise enter into or be engaged or interested in or financially or otherwise assist any other person, firm or corporation in entering into, developing, engaging in or carrying on any business which relates or pertains in any way to manufacturing, selling or otherwise dealing in any machinery, tools, mechanisms or devices for use in the manufacture of footwear, or any

business which will in any way interfere or compete with the business of the said United Company, its successors or assigns, in manufacturing or dealing in or with machinery, mechanisms, tools or devices for use in the manufacture of footwear; excepting, however, that the said Carver Company reserves to itself and in no way includes as part of this transaction the business heretofore carried on by it of manufacturing the Lockett Crimping Machines, and also of manufacturing machines for grinding splitter knives other than grinders for knives for use in the manufacture of footwear; and, further, the said Carver Company reserves from the sale transfer hereby made its general machinery business (other than machinery, mechanisms, tools or devices for use in the manufacture of footwear) including the business of manufacturing, buying, selling and installing and otherwise dealing in general factory machinery such as shafting, engines, boilers, elevators and the like used by shoe manufacturers as well as others for the operation of their factories, but not including in this reservation any machinery, mechanisms, tools or devices for use in manufacturing or operating upon footwear or portions thereof or any business therein.

And for the same consideration the said Carver Company and the said Hobart, each for itself and himself but not for the other, do hereby covenant and agree to and with the said United Company, its successors and assigns, that they and either of them will at any time or times hereafter whenever requested by the United Company, its successors or assigns, its or their officers, attorneys or patent solicitors, execute and deliver or cause to be executed and delivered any and all instruments, and will do or cause to be done any and all acts which may be necessary or desired to fully vest and confirm in the said United Company, its successors and assigns, all the property, interests and rights of every name or nature hereby conveyed or intended so to be, and to carry out the full intent of this instrument.

The term "United Company" wherever herein used shall include the said United Shoe Machinery Company and its successors and assigns, and all covenants and agreements running to the said

United Company may be enforced by or for the benefit of the United Company or any successor or assignee.

In Witness Whereof the said Carver Cotton Gin Company has caused this instrument to be signed and its corporate seal to be hereto affixed by Edward Hobart, its Treasurer; and the said Edward Hobart has hereunto set his hand and seal this 30th day of April, A. D. 1908.

CARVER COTTON GIN COMPANY
By Edward Hobart, Treasurer.
EDWARD HOBART

Commonwealth of Massachusetts.
Suffolk, ss. Boston

On this 30th day of April 1908 before me appeared Edward Hobart, to me personally known, who being by me duly sworn did say that he is the Treasurer of the Carver Cotton Gin Company, a corporation organized and existing under the laws of the Commonwealth of Massachusetts; that the seal affixed to the foregoing instrument is the corporate seal of said corporation, and that said instrument was signed and sealed in behalf of said corporation by authority of its Board of Directors, and said Hobart acknowledged said instrument to be the free act and deed of said corporation.

Harold Gregory Donham, Notary Public.

PLAINTIFF'S EXHIBIT 128.

[Put in Evidence, page 582.]

This indenture, made this twentieth day of January 1909, by and between Harry L. Rice, of Quincy, Massachusetts, and Fred LaChapelle, of Lynn, Massachusetts, (hereinafter called the "vendors") of the one part, and the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, (hereinafter called the "United Company") of the other part, Witnesseth:

That Whereas, the said vendors prior to the date of this indenture have been engaged in developing and in dealing in and with certain methods and machinery, mechanisms and devices for forming chain stitches and chain stitch seams, and certain machinery, mechanisms, tools and devices intended or adapted for use in the manufacture of footwear including especially machines, mechanisms, tools and devices intended or adapted for use in attaching welts, outsoles or insoles of welted or turned footwear, and the said vendors have represented to the United Company that they

jointly or severally own certain inventions, improvements, Letters Patent and applications for Letters Patent, and certain machines, drawings, machine parts and other property relating to such methods and machinery, mechanisms, tools and devices, and to the business of developing and dealing therein and therewith;

And Whereas, the said vendors desire to sell and transfer to the said United Company all of such inventions, improvements, Letters Patent, applications for Letters Patent, and other property, and all interests and rights in and to such inventions, improvements, Letters Patent, applications for Letters Patent and property, and in and to all business heretofore carried on by the said vendors or either of them relating thereto and the good-will thereof; and the United Company desires to acquire the same together with the warranties and covenants on the part of the said vendors hereinafter set forth;

Now, Therefore, be it Known that the said vendors and each of them in consideration of the covenant and agreement on the part of the United Company to make the payment hereinafter provided for do hereby make the sales, transfers, covenants and agreements on their part hereinafter set forth; and the said United Company in consideration of said sales, transfers, covenants and agreements does hereby covenant and agree to make said payment hereinafter provided for.

1. The said vendors and each of them for the consideration aforesaid hereby sell, assign, transfer, set over and deliver to the said United Company all inventions, improvements, Letters Patent, applications for Letters Patent and interests and rights in, to and under inventions, improvements, Letters Patent and applications for Letters Patent of the United States and of any and all other countries which they own or either of them owns, or to which they are or either of them is in anywise entitled relating to methods for the formation of chain stitches or chain stitch seams intended or adapted for use in attaching the welts, outsoles or insoles of welted or turned footwear, or to machinery, mechanisms, tools or devices pertaining to such chain stitches or chain stitch seams or the formation thereof, or relating to machinery, mechanisms, tools or devices

intended or adapted in whole or in part for use in attaching in whole or in part the welts, outsoles or insoles of welted or turned footwear; and likewise for the same consideration to sell, assign, transfer and set over to the said United Company any and all inventions, improvements, Letters Patent, and interests and rights in, to and under inventions, improvements and Letters Patent which they or either of them may at any time within ten (10) years from the date hereof make, acquire, own or have any right by agreement or otherwise to acquire or take over relating to any methods, machinery, mechanisms, tools or devices intended or adapted for any such purpose or purposes.

2. And for the same consideration each of the said vendors does also hereby sell, assign, transfer, set over and deliver to the said United Company all machines, machine parts, drawings and other property which he has constructed or caused to be constructed, or which he owns or has any right by agreement or otherwise to acquire or take over relating to methods or to machinery, mechanisms, tools or devices of the kinds described in paragraph 1 hereof, or to the development or manufacture of the same, including herein any and all business and the good-will thereof heretofore carried on by him or by the vendors relating to any such methods, machinery, mechanisms, tools or devices.

To Have and to Hold all of the property, inventions, improvements, Letters Patent, applications for Letters Patent, interests and rights in paragraphs 1 and 2 hereof mentioned to the said United Company, its successors and assigns, to its and their own use and behoof absolutely.

3. And for the same consideration the said vendors do hereby jointly and severally (without prejudice to the generality of the foregoing assignments) covenant with and warrant to the said United Company that the inventions, improvements, Letters Patent and applications for Letters Patent relating to methods, machinery, mechanisms, tools and devices of the kinds enumerated in paragraph 1 hereof now owned by them or one of them and hereby conveyed include the entire right, title and interest free from any and all licenses, grants or encumbrances whatsoever in,

to and under the Letters Patent and applications for Letters Patent enumerated in the schedule hereto annexed and marked "Schedule A" and in, to and under the inventions and improvements covered thereby; that the property hereby conveyed includes the machines, drawings and other property enumerated in the schedule hereto annexed and marked "Schedule B"; and that the said property enumerated in "Schedule B" is free from any and all claims or encumbrances.

4. And for the same consideration each of the said vendors as a material part of this transaction and of the consideration for the agreement of the United Company to make the payment hereinafter provided for does hereby covenant and agree to and with the said United Company that he will not at any time within ten (10) years from the date of these presents directly or indirectly, individually or in combination with others, as principal, agent, employee or representative, or as officer or stockholder of a corporation or otherwise, without the consent in writing of said United Company, enter into or be engaged or interested in or financially or otherwise assist any other person, firm or corporation in entering into, engaging in, developing or carrying on the manufacturing of or dealing in any method, machinery, mechanism, tool or device of the kinds referred to in paragraph 1 hereof, or for the same or any similar purpose, or in any business which consists in whole or in part in manufacturing or dealing in any such method, machinery, mechanism, tool or device, or which will directly or indirectly interfere or compete with the business of the said United Company therein.

5. And for the same consideration each of the said vendors does hereby covenant and agree to and with the said United Company that without further or other consideration than that herein provided for he will make all necessary disclosures and will at any and all times hereafter upon request execute and cause to be executed any and all applications for Letters Patent, assignments, transfers, powers of attorney and other instruments, and will perform and cause to be performed any and all acts requested by the United Company which may be necessary or desired to fully and com-

pletely vest and confirm in the said United Company or its nominees all inventions, improvements, Letters Patent, applications for Letters Patent, property, interests and rights hereby conveyed or agreed or expressed to be conveyed, and to carry out the full intent of this instrument, and to enable the said United Company to secure, protect and enjoy the full benefits and advantages of all assignments and transfers herein made or provided for and of all covenants and agreements herein contained.

6. The said United Company as full consideration for the assignments and transfers herein made or provided for and for the covenants and agreements on the part of the vendors herein contained hereby agrees to pay to the said vendors the sum of ten thousand dollars ($10,000). All parties agree that said sum shall be paid to the said Harry L. Rice as agent for said vendors to receive the same, and that the United Company shall be in no respect responsible for the application or distribution thereof. Such payment shall be made upon the execution of papers.

7. The term "United Company" wherever herein used shall include the said United Shoe Machinery Company, its successors and assigns.

In Witness Whereof the parties have hereunto set their hands and seals the day and year first above written.

HARRY L. RICE [SEAL]

SCHEDULE B.

1 Outsole Stitching Machine located at 493 Union Street, Lynn, Massachusetts.

1 inseam Welting Machine located at Ashland, Massachusetts, in the factory of Ray Bros.

Certain patterns for said machines located at Ashland, Massachusetts, in the factory of Ray Bros.

Certain working sketches of the above machines.

PLAINTIFF'S EXHIBIT 129.

[Put in Evidence, page 584.]

This Agreement, made this first day of February in the year 1910, by and between W. Eugene Ellis, of Haverhill, in the County of Essex and Commonwealth of Massachusetts, and Everett D. Chadwick, of Winchester, in the County of Middlesex and said Commonwealth (hereinafter called the "vendors") of the one part, and the United Shoe Machinery Company, a corporation duly organized and existing under the laws of the State of New Jersey (hereinafter called the "United Company") of the other part, Witnesseth:

That Whereas each of the vendors is a stockholder, officer and director of the Ellis Lacer Company, a corporation duly organized and existing under the laws of the State of Maine (hereinafter called the "Ellis Company") which has been and now is engaged in developing and dealing in and with machinery, mechanisms and devices intended or adapted for use in the manufacture of foot wear, including especially certain devices for temporarily securing together the tops of lace shoes while the same are being lasted, said device being known in the trade and hereinafter referred to as the "Ellis Lacer"; and the vendors have represented to the United Company that they own or control all of the shares of the capital stock of the Ellis Company;

And Whereas the vendors desire to sell and transfer to the United Company all of the shares of the capital stock of the Ellis Company and the United Company desires to acquire the same together with the warranties and covenants on the part of the vendors hereinafter set forth;

Now, Thereafter, said parties hereto, each in consideration of the covenants and agreements on the part of the other herein contained, do hereby covenant and agree, each with the other, as follows: —

1. The vendors hereby covenant and agree that they will forthwith cause whatever steps may be necessary to be taken to convey to and vest in the United Company, or such person or persons as

the United Company shall designate to receive the same, the ownership, free from any claim or incumbrance, of all of the shares of the capital stock of the Ellis Company, and will cause such shares to be transferred upon the books of the Ellis Company and new certificates to be issued therefor in the name of the United Company or such person or persons as may be designated by the United Company therefor.

2. The vendors hereby covenant and agree that they will, as and when requested by the United Company, cause all of the present officers and directors of the Ellis Company to tender their resignations in writing to take effect upon the acceptance thereof by the directors, and that as and when requested they will cause all such actions to be taken by the directors and officers of the Ellis Company as may be necessary or desired to transfer the control and management of the Ellis Company to the United Company or to such person or persons as the United Company may designate therefor, and to cause such persons as the United Company may designate to be legally chosen officers and directors of the Ellis Company.

3. The vendors hereby jointly and severally covenant with and warrant to the United Company that the Ellis Company is a corporation duly organized and existing under the laws of the State of Maine; that the total authorized capital stock of the Ellis Company is the sum of fifty thousand dollars ($50,000) consisting of five thousand (5000) shares of the par value of ten dollars ($10) each; that all of said shares of capital stock have been issued as fully paid; that the schedule hereto annexed and marked "Schedule A" contains a true, accurate and complete statement of the condition of the business of the Ellis Company at the close of business on the thirty-first day of January, 1910; that the schedule hereto annexed and marked "Schedule B" is a true and complete inventory of the machinery, tools, mechanisms and appliances mentioned in "Schedule A" and that the value thereof at cost, less depreciation, is at least equal to the amount set forth as the value thereof in said "Schedule A"; that the schedule hereto annexed and marked "Schedule C" is a true, accurate and complete list of

all Letters Patent and applications for Letters Patent of the United States of America owned or controlled by the Ellis Company or to which the Ellis Company is in any way entitled; and that the schedule hereto annexed and marked "Schedule D" is a true and complete list of all lease agreements for the use by others of Ellis Lacers heretofore entered into by or for the interest or account of the Ellis Company and now outstanding.

4. The vendors hereby jointly and severally covenant and agree to and with the United Company that on this first day of February, 1910, the Ellis Company is the owner, free from any and all grants, licenses or other incumbrances whatsoever, of the entire legal and equitable title and interest in, to and under the Letters Patent and application for Letters Patent enumerated in said "Schedule C" hereto annexed and each of them and of the inventions covered thereby, and that they and each of them will warrant and defend the same to the United Company, its successors and assigns; excepting, however, from the provisions of this paragraph all Letters Patent enumerated in said "Schedule C" not originally applied for by the vendors or either of them, and the vendors covenant and agree that said excepted Letters Patent are free from any grant, license or other incumbrance made or suffered by them or either of them or by the Ellis Company and that they will and each of them shall warrant and defend the same to the United Company against all persons claiming by, through or under them or either of them or by, through or under the Ellis Company.

5. The vendors hereby jointly and severally covenant and agree to and with the United Company that they will promptly and at their own expense cause all indebtedness of the Ellis Company existing on this first day of February 1910 or arising from dealings or transactions which have taken place prior to said date to be discharged, and that they will at all times protect, indemnify and hold harmless the Ellis Company from and against any and all indebtedness and obligations whatsoever (except the obligations of the lease agreements enumerated in said "Schedule D") existing on said date or arising from dealings or transactions prior thereto and from all loss, cost, damage or expense arising therefrom; not

including, however, cost, damage or expense arising out of any suit which may hereafter be brought by others against the Ellis Lacer Company for infringement of patents by or by reason of the manufacture or sale of Ellis Lacers.

6. Each of the vendors hereby sells, assigns, transfers, sets over and delivers to the United Company all inventions, improvements, Letters Patent of the United States of America and of all other countries and states of the Western Hemisphere, applications for such Letters Patent, and all interests and rights in, under or to such inventions, improvements, Letters Patent and applications for Letters Patent which he has or controls or to which he is in any way entitled or which at any time within five (5) years from the date of this agreement he shall make, own, acquire or have any right by agreement or otherwise to acquire or take over relating to machinery, mechanisms or devices useful for or adapted to the purpose for which Ellis Lacers are designed; and each of the vendors covenants and agrees that he will make all necessary disclosures and will at any and all times hereafter upon request execute or cause to be executed any and all assignments of or applications for Letters Patent and any and all other instruments, and perform and cause to be performed any and all acts which may be necessary or proper to carry out the full intent of this instrument and to enable the United Company to secure, protect, and enjoy the full benefits and advantages of all assignments and transfers herein provided for and of the covenants herein contained.

7. The vendors hereby jointly and severally covenant and agree to and with the United Company that they will not and that neither of them shall during the period of five (5) years beginning with the date of this agreement directly or indirectly, individually or in combination with others enter into or be engaged or interested in or financially or otherwsie encourage or assist any other person, firm or corporation, in entering into, developing or carrying on in the United States of America any business of manufacturing or dealing in machinery, mechanisms, devices or other articles or things useful for or adapted to the purpose for which Ellis Lacers are designed.

8. The United Company as full consideration for the assignments and transfers herein made or provided for and for the covenants herein contained hereby agrees to pay to the said vendors the sum of one hundred twenty-five thousand dollars ($125,000) said sum to be paid to W. E. Ellis as agent for said vendors to receive the same and such payment to be made on or before the fourth day of February, 1910.

9. The term "United Company" wherever herein used shall include the said United Shoe Machinery Company, its successors and assigns, and all covenants binding upon the vendors shall bind them and their respective heirs, executors, administrators and assigns.

In Witness Whereof the parties hereto have hereunto and to another instrument of like tenor set their hands and seals the day and year first above written.

W. Eugene Ellis
Everett D. Chadwick
United Shoe Machinery Company
By George W. Brown, Vice President.

United States of America.
Commonwealth of Massachusetts.
Suffolk, ss. Boston, February 4, 1910.

Then personally appeared the above named W. Eugene Ellis and Everett D. Chadwick, personally known to me and known to me to be the persons who executed the foregoing instrument, and severally acknowledged that they executed the same as their free act and deed. Before me

Emile H. Tardivel, Notary Public.

PLAINTIFF'S EXHIBIT 130.

[Put in Evidence, page 586.]

This Agreement, made at Boston, Massachusetts, this 3rd day of February, 1910, by and between

Alexander H. Lewis of Glendale, Ohio
Alfred J. Becht of Cincinnati, Ohio
Morris McGrew of Cincinnati, Ohio
Samuel J. Wentworth of Newport, Kentucky
Pearl J. Wentworth of Newport, Kentucky
Jesse S. Wentworth of St. Louis, Mo.
Bayard L. Kilgour of Cincinnati, Ohio.

hereinafter called the vendors, parties of the first part, and the United Shoe Machinery Company, a corporation organized and

existing under the laws of the State of New Jersey (hereinafter called the United Company), party of the second part Witnesseth:

That Whereas each of the said vendors is a stockholder and director, and certain of the vendors are officers in and of The Wentworth Company, a corporation organized and existing under the laws of the State of Ohio, engaged in the business of inventing, developing, exploiting, manufacturing and dealing in certain machinery and devices designed or adapted for use in the manufacture of footwear, including especially machinery and devices of the kinds hereinafter in Article Five hereof referred to; and the said vendors have represented to the United Company that they are jointly or severally the owners of, or control and have the right to dispose of all of the shares of the capital stock of the said The Wentworth Company; and have agreed with the United Company as hereinafter set forth.

Now Therefore: the said vendors on the one part and the said United Company on the other part, each in consideration of the covenants and agreements on the part of the other, hereinafter contained, do hereby covenant and agree, each with the other, as hereinafter set forth, viz:

One. The said vendors, and each of them, hereby covenant and agree to and with the said United Company, that the vendors will forthwith cause all such votes to be passed, actions to be taken and instruments to be executed, by and on behalf of the said The Wentworth Company, as may be necessary or requested by the said United Company, to transfer to and vest in the United Company the entire property, assets, business and good will, interests and rights of the said The Wentworth Company, of whatsoever name and nature and wherever located (excepting such property, interests and rights, if any, as the United Company shall elect not to take over from The Wentworth Company).

Two. The said vendors, and each of them, do further covenant and agree to and with the said United Company that the vendors will forthwith, upon request after the execution of such instruments as may be called for by the United Company to carry out the transfers provided for in Article One hereof, cause all such steps to be

taken as may be necessary, or requested by the United Company, to replace the present directors and officers of The Wentworth Company by such persons as may be designated therefor by the United Company; and that the vendors will transfer to and cause to be transferred to and vested in such persons as may be designated by the said United Company therefor, the ownership of all of the shares of the capital stock of The Wentworth Company issued and outstanding.

Three. The said vendors, and each of them, hereby covenant with and warrant to the said United Company as follows, viz: —

1. That the said The Wentworth Company is a corporation organized and existing under the laws of the State of Ohio; that the total authorized capital stock of The Wentworth Company is the sum of one hundred and fifty thousand dollars ($150,000.00), divided into fifteen hundred (1500) shares of the par value of one hundred dollars ($100.00) each; that of said fifteen hundred (1500) shares three hundred (300) shares, of the total par value of thirty thousand dollars ($30,000), remain in the corporation unissued; and that the total capital stock of the said The Wentworth Company, issued and outstanding, consists of twelve hundred (1200) shares of the total par value of one hundred and twenty thousand dollars ($120,000.00).

2. That on the 9th day of December 1909 the condition of The Wentworth Company as to Assets and Liabilities was as is set forth in the "Statement of The Wentworth Company as of Dec. 9th, 1909" submitted by the vendors to the United Company and a copy of which is hereto attached marked Schedule A; and that since the said 9th day of December 1909 no change has been made, or prior to the actual transfer to the United Company will be made, in the condition of The Wentworth Company, Assets reduced or Liabilities increased, excepting such ordinary changes as have resulted or shall result from the carrying on of the commercial business of The Wentworth Company in ordinary course, since said date.

3. That the said The Wentworth Company is the owner of and

that the transfer herein provided to be made to the United Company shall include the following, viz: —

(a) The entire right, title and interest in, to and under each and all of the Letters Patent and applications for Letters Patent, of the United States and all other countries, which are enumerated in the schedule hereto annexed marked Schedule B, and all inventions covered thereby.

(b) All of the machinery, fixtures, tools, materials, merchandise, duplicate parts, supplies, drawings, patterns, blue prints, jigs, models, furniture, experimental machines and devices, records, files, books of entry and account and other property which were included in said "Statement of The Wentworth Company as of Dec. 9th, 1909"; were owned by The Wentworth Company or to which the said The Wentworth Company was entitled on said date or which since said date have been, or prior to the actual transfer to the United Company shall have been acquired by The Wentworth Company (subject however, in respect to stock, materials and supplies, to such changes as shall have resulted from the carrying on of the commercial business of The Wentworth Company in ordinary course between said December 9th and said actual transfer.)

(c) All of the machines on hand or elsewhere, not under lease, mentioned in the schedule hereto annexed marked Schedule C, and all of the machines on lease, mentioned in said Schedule C (subject, however, to the rights of the lessees under the leases thereof.)

(d) Current accounts, rental accounts and accrued rentals as set forth in said statement of December 9th, with such additions thereto as have occurred or resulted from business done since said date, and less such amounts thereof as have, since said December 9th, by payment thereof, been reduced to cash.

(e) Cash to the amount set forth in said statement of December 9th, to wit: four thousand eight hundred and seventy seven dollars and seventeen cents ($4,877.17); plus all collections made since said, and less such sums if any as have been expended since said date out of said cash on hand in payment for goods purchased since said date by The Wentworth Company in ordinary course

of business for the ordinary carrying on of the business of The Wentworth Company; in payment of the wages of the employees of The Wentworth Company dating from said December 9th, in the ordinary course of business and at the same rate as before said December 9th; in payment in ordinary course of the rental for premises becoming due after said December 9th; and less any payments of ordinary petty cash expenses of the carrying on of said commercial business since said date — but not deducting from the cash on hand December 9th or received since said date any amounts paid on account of any indebtedness of any nature existing prior to December 9th, or arising out of any transactions which took place prior to said date; and not deducting any payments whatsoever on account of any attorney's fees or legal expense whatsoever or on account of any matters, transactions or things other than those above expressly provided to be deducted. In case any deductions have been made from said cash on hand December 9th or received since said date other than the deductions above expressly provided to be made, the amount thereof shall be refunded by the said vendors.

Four. It is the agreement upon which the amount of the consideration herein provided to be paid is based, that all the property hereinbefore provided to be conveyed, shall be conveyed to and vested in the United Company free from debt claim or incumbrance, and that The Wentworth Company shall be turned over to the United Company as hereinbefore provided, free from indebtedness and direct or contingent obligations (excepting as hereinafter in this Article Four hereof expressly provided), and to that end the said vendors, and each of them, do hereby covenant with and warrant to the United Company that the vendors will forthwith, and at their own expense, cause to be discharged, all indebtedness and direct or contingent obligations of the said The Wentworth Company (excepting as hereinafter in this Article Four hereof expressly provided), and that they, the said vendors, will indemnify, protect and hold harmless the said The Wentworth Company, and the said property so agreed to be conveyed to the United Company from and against any and all claims, liability, indebtedness and obliga-

tions existing at the time of the transfer to the said United Company, or arising from any acts or transactions prior thereto. Excepting However, any indebtedness existing for goods purchased since said December 9th by The Wentworth Company for the ordinary carrying on of the business of The Wentworth Company since said date and any indebtedness to employees for wages in ordinary course and at the established rate dating from said December 9th and excepting the obligations, if any, of The Wentworth Company accruing after said transfer to the United Company under certain agreements of The Wentworth Company, the original or a copy of each of which has been furnished by the vendors to the United Company prior to the execution of this agreement and which are included in the list set forth in the schedule hereto annexed and marked Schedule D.

Five. Each of the said vendors for the protection of the good will and business herein provided to be conveyed to the United Company, does hereby covenant and agree to and with the said United Company that he will not individually or in combination with others, directly or indirectly, in any capacity, at any time within a period of ten (10) years from the date of this agreement, without the consent in writing of the United Company first obtained, enter into or be engaged or interested in originating, manufacturing, developing, exploiting or dealing in any machinery or devices of any kind heretofore dealt in, exploited, manufactured, or built (whether in the form of a model, experimental or commercial machine or device) or originated by or for the said The Wentworth Company — including machinery and devices as follows, viz:

Machines or devices for Beating or Pounding the bottom or sides of heel seats or toes of foot-wear.

Machines or devices for any of the purposes of the machine heretofore put out by The Wentworth Company, and known as the Wentworth Shank Machine; a circular concerning which is hereto attached, marked "E."

Machines or devices for assembling the portions of foot-wear over the last prior to or preparatory to the pulling-over and lasting operations.

Ironing devices like those, or for the same or a like purpose to those heretofore manufactured by or for The Wentworth Company.
or any machinery or devices intended or adapted for a like purpose, and that he will not compete or interfere with the business of the said United Company in machinery or devices of said kinds or for said purposes.

Six. Nothing herein contained shall be construed as a warrantee of the validity of any of the Letters Patent herein provided to be conveyed. Neither do the vendors warrant that the machines or devices heretofore constructed in accordance with the constructions covered by said Letters Patent, do not infringe other Letters Patent not owned or controlled, in whole or in part, by The Wentworth Company or by any of the vendors, but each of the vendors does hereby assign to the United Company any other inventions, Letters Patent, and applications for Letters Patent, and interests and rights in, to, or under inventions, Letters Patent or applications for Letters Patent (if there are any such), which he owns or controls which apply to the constructions or methods covered by said Letters Patent, or constructions like those heretofore put out by The Wentworth Company.

Seven. The United Company in consideration of the foregoing covenants, agreements and warranties on the part of the said vendors, does hereby covenant to and with the said vendors that upon the receipt by the United Company of the instruments which the United Company may call for to make the transfers provided for in Articles One and Two hereof, the United Company will pay to the said vendors the sum of Sixty Thousand (60,000) dollars.

It is agreed that such payment by the United Company may be made by check or draft to the order of Alfred J. Becht, one of the vendors, who shall receive the same as agent for the vendors, for application and distribution among the persons entitled thereto; and it is agreed that the United Company shall have no responsibility for the application or distribution of the amount so paid.

Seven. The term United Company as herein used includes the said United Shoe Machinery Company, its successors and assigns.

In Witness Whereof, said parties of the first part have hereunto, and to another instrument of even date and like tenor, set their hands and seals, and the United Company has executed this instrument in duplicate, the date and year first above written.

ALEXANDER H. LEWIS [SEAL]

LIABILITIES.

None.

"A".

Approximate General Condition of The Wentworth Company.

Established in November, 1904. Organized in February, 1905.
Incorporated August 15th, 1906.

An Ohio Corporation:

Capital Stock Authorized 150,000.00 — Issued stock, fully paid up 120,000; Treasury Stock, not issued 30,000

Patents on Heel Seat Beater:
In United States
" Canada
" England
" Germany
" France
" Australia

Machines are being manufactured in England and Germany on a royalty for each machine.
In England we receive $38.88 (8 pounds Sterling) royalty for each machine manufactured.
In Germany we receive $60.00 royalty for each machine manufactured.

Foreign Agencies:

Canada — Can terminate on 6 months notice.
England " " " 6 " "
Germany " " " 6 " "
France — Agency not definitely established.
Australia — Have a 5 year agreement, expiring May 28th, 1912
Can probably be cancelled by an equitable arrangement with Australian Agents.

Machines Drawing Rental:

In United States and Canada 305

Machines on Trial:

In United States, demonstration completed and ready for acceptance, mostly in New England . .	19

SCHEDULE D.

Agreement dated Feby. 13th, 1909, between The Wentworth Company and Nollesche-Werke.

Agreement dated May 18, 1908, between The Wentworth Company and Gimson & Co., Ltd.

Agreement dated May 28, 1908, between The Wentworth Company and John McEvoy & Sons of Sydney, N. S. W.

Agreement set forth in proposition dated Aug. 14, 1908, from The Wentworth Company to Kieffer Brothers of Montreal, and accepted by Kieffer Bros. Sept. 3, 1908.

Agreement of lease between The Wentworth Company and Richter & Co. dated April 22, 1909, granting to The Wentworth Company lease of premises 210–212–214 E. Ninth Street, for one year, from the 1st of May, 1909, at rental of $1044 per year.

Undertakings of The Wentworth Company as set forth in letters addressed to the following enumerated purchasers of Wentworth machines, each of said letters being in the following form:

"We hereby agree that in the event that you purchase outright

from us one or more of our Heel Seat Beader machines, this Company will protect you fully in the use of same.

In the event that any individual, company, or corporation, brings suit against you or attempts to enjoin you with the object of preventing you from using the said machine or machines, we will protect and defend you against any and all such action or actions brought against you, and we will assume all expenses of the defense and trial, the same as though you were using the machine or machines under lease.

We further agree to supply you with any duplicate parts of the machines, from time to time, as you may need them at catalogue prices."

The only exception being in letter to C. H. Aborn & Co. in which provision is made for the return of the purchase price under certain conditions.

PLAINTIFF'S EXHIBIT 131.

[Put in Evidence, page 588.]

Know all Men by these Presents: That the B. F. Sturtevant Company, a corporation organized and existing under the laws of the State of Massachusetts, in consideration of one dollar ($1.00) and other good and valuable considerations to it paid by the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, the receipt of which is hereby acknowledged, has sold and does hereby grant, sell, assign, transfer, set over and deliver to the said United Shoe Machinery Company the following property, interests and rights, viz: —

(a) The business as a going concern of the said B. F. Sturtevant Company in manufacturing and dealing in pegwood and wood shanks together with the good-will of such business, and the exclusive right in all countries in which pegwood or wood shanks are or shall hereafter be made, sold or used to the use of the names "Sturtevant" or "B. F. Sturtevant" in selling or dealing in pegwood or wood shanks.

(b) All of the real estate owned by the Sturtevant Company or by the trustees under the will of Benjamin F. Sturtevant, late of Boston, Massachusetts, located in the Town of Conway, New Hampshire, together with the leases of any and all premises in said Conway held under lease by the said Sturtevant Company and including in such property so conveyed the ownership of the mill site, the mill building, the storage buildings, and all other buildings in said Conway occupied by the Sturtevant Company and the ownership of all steam boilers, steam engines, dynamos and all fixtures in said buildings or upon said premises. A separate deed of the real estate included herein is to be duly executed by the Sturtevant Company and delivered to the said United Company.

(c) All pegwood and wood shanks manufactured or in process of manufacture owned by the Sturtevant Company including without prejudice to the generality hereof all of the pegwood and wood shanks manufactured or in process of manufacture now located upon the premises above referred to at Conway, New Hampshire,

or at the store of the Sturtevant Company at No. 34 Oliver Street, Boston, Massachusetts.

(d) All cases and half cases intended and adapted for use to box pegwood for shipment and all bags intended and adapted for use to ship wood shanks owned by the Sturtevant Company including without prejudice to the generality hereof all such cases, half cases and bags now located upon the said premises at Conway, New Hampshire, or at said No. 34 Oliver Street, Boston, Massachusetts.

(e) All cord wood intended and adapted for the manufacture of pegwood owned by the said Sturtevant Company and located upon the said premises at said Conway or at the railroad in said Conway including without prejudice to the generality hereof about fifty-six and eight tenths (56.8) cords of such wood, be the same more or less, now in or adjacent to the mill building above referred to, and about seventy-two and sixty-three hundredths (72.63) cords of such wood, be the same more or less, now at the freight yard at said Conway.

(f) All manufacturing equipment, machines, machinery, tools, patterns and other goods, chattels and property located in the buildings above mentioned or upon said premises or pertaining to said business of manufacturing and dealing in pegwood and wood shanks, excepting, however, the following property not pertaining to said business and located upon said premises, viz: — veneer for brush backs and fans and wood heels and lumber designed for the manufacture of wood heels, — and also excepting books of account, accounts and bills receivable and cash on hand on the twenty-first day of February, 1910.

To Have and to Hold all and singular the said property, interests and rights to the said United Shoe Machinery Company, its successors and assigns, to its and their own use and behoof absolutely.

And for the same consideration the said B. F. Sturtevant Company does hereby covenant with and warrant to the said United Shoe Machinery Company, without prejudice to the generality of the foregoing assignment and transfer, that the property hereby conveyed includes all of the property of every nature mentioned in the following schedule, viz: —

SCHEDULE.

All that lot of land with the buildings thereon situated in Conway in said County of Carroll, and bounded northerly on the road leading to the Portsmouth, Great Falls & Conway Railroad depot, one hundred fifty-two (152) feet; westerly on land now or late of C. W. Wilder; southerly on the mill pond one hundred fifty-two (152) feet and easterly on land now or late of Sarah E. Berrey; being a parcel of land one hundred fifty-two (152) feet wide running from said road to the mill pond, and being the same premises conveyed to Benjamin F. Sturtevant by three (3) deeds, all recorded with Carroll County deeds, — one from Leavitt H. Eastman, dated May 31, 1873, and recorded in Book 61, page 479, and two (2) from Sarah E. Berrey and Jacob H. Berrey dated respectively May 31, 1873 and September 19, 1873, and recorded with said Deeds in Book 61, page 482, and Book 62, page 248, together with all fixtures and appurtenances pertaining thereto.

Two (2) storage buildings located on land not owned by the B. F. Sturtevant Company.

52,805,825 wood shanks of merchantable kind, quality and finish in bags ready for shipment.

194,399 rolls of pegwood of merchantable kind, quality and finish in cases ready for shipment.

678 empty half cases made and adapted for use for shipping pegwood.

1371 empty bags designed and adapted for shipping wood shanks.

129.43 cords of white birch cord wood suitable for the manufacture of pegwood and located as follows, viz: —

Fifty-six and eight tenths (56.8) cords in or adjacent to the mill building above referred to.

Seventy-two and sixty-three hundredths (72.63) cords of such wood at the railway freight yard at said Conway.

Full equipment for conducting the business of manufacturing and dealing in pegwood and wood shanks including power and lighting equipment, engines, boilers, transmission, wiring, shafting, hangers, tools, patterns, machines, machinery and supplies, as set forth in the inventory thereof made as of the twenty-third day of

February, 1910, a copy of which has been exhibited to the said United Shoe Machinery Company.

And for the same consideration the said B. F. Sturtevant Company does hereby covenant with and warrant to the said United Shoe Machinery Company that the B. F. Sturtevant Company is the lawful owner of all the property, interests and rights hereby purported to be conveyed; that they are free from all incumbrances; that the said B. F. Sturtevant Company has good right to sell and assign the same as aforesaid and will warrant and defend the same against the lawful claims and demands of all persons.

In Witness Whereof the said B. F. Sturtevant Company has caused this instrument to be signed in its name and behalf by Eugene N. Foss, its Treasurer thereto duly authorized, and its corporate seal to be hereto affixed this twenty-third day of February, 1910.

[SEAL] B. F. STURTEVANT COMPANY
By E. N. Foss, Treasurer.

In the presence of
Harold G. Donham

PLAINTIFF'S EXHIBIT 132.

[Put in Evidence, page 590.]

Agreement made this twenty-third day of September, 1910, by and between Thomas G. Plant of Boston, Massachusetts, and the United Shoe Machinery Company (hereinafter called the "United Company"), a corporation organized under the laws of New Jersey, having its principal office at Paterson, in the State of New Jersey, and an office in Boston, Massachusetts, Witnesseth: That

Whereas, Thomas G. Plant has heretofore made and has acquired from others and now owns or controls various inventions, improvements, letters patent of the United States and of other countries and applications for letters patent covering shoe machinery and accessories thereto hereinafter more fully described in paragraph (A); and

Whereas, said Thomas G. Plant also owns or controls certain

shares of corporate stock, machinery, machines, tools, supplies and other personal property, hereinafter more full described in paragraph (B); and

Whereas, said Thomas G. Plant has heretofore entered into certain contracts and agreements hereinafter more fully described in paragraph (C); and

Whereas, various suits have been brought and claims mnde by United Company against said Plant, hereinafter more fully described in paragraph (D); and

Whereas, said United Company is engaged in the manufacture of shoe machinery and accessories thereto and owns and controls numerous patents and applications for patents relating thereto and believes that by the acquisition of the said inventions, improvements, letters patent and applications for letters patent owned or controlled by said Plant, it would be enabled by the use of the same in connection with the inventions, improvements and patents owned and controlled by it to perfect and improve the shoe machinery manufactured and leased by it, and would be able to manufacture and lease in certain respects more efficient machines, whereby it may furnish to manufacturers of boots and shoes machinery by the aid of which they will be enabled to make a better product and at less expense than at present, and the United Company, therefore, desires to purchase said inventions, improvements, letters patent and applications for letters patent from said Plant; and

Whereas, said Plant is unwilling to sell said inventions, improvements, letters patent, and applications for letters patent, unless the purchaser will also purchase all said shares of corporate stock, machinery and other personal property hereinabove referred to, and will also enter into certain undertakings and agreements in reference to the contracts and agreements of said Plant above referred to, and further, will compromise and settle all controversies and claims existing between the parties hereto by the dismissal of said suits as against said Plant and the execution of mutual general releases.

(A) Letters patent and applications for letters patent of the

United States covering various inventions in connection with shoe machinery described and identified in Exhibit "A" hereto attached.

Letters patent and applications therefor covering said inventions in various foreign countries described and identified in Exhibit "B" hereto attached.

(B) $1,500,000 par (15,000 shares) of the preferred stock and $750,000 par (7,500 shares) of the common stock of the Thomas G. Plant Company, a description of which, including a statement as to its assets, liabilities, and earnings, is hereto attached marked Exhibit "XX".

Certain machinery, machines, tools, supplies and other personal property, schedule of which is hereto annexed marked Exhibit "C".

(C) An agreement between Charles P. Stanbon, of Lynn, Massachusetts, and the Manufacturers' Machine Company, dated May 29th, 1905, a copy whereof is hereto annexed, marked Exhibit "D". (Said agreement has been extended until November 1, 1910.)

An agreement between the Keighley Company and said Thomas G. Plant, dated January 26th, 1910, a copy whereof is hereto annexed, marked Exhibit "E".

An agreement between said Thomas G. Plant and the Stanley Company, dated June 15th, 1910, a copy whereof is hereto annexed, marked Exhibit "F".

A contract between said Thomas G. Plant and the Stanley Manufacturing Company, dated June 15th, 1910, a copy whereof is hereto annexed, marked Exhibit "G".

A further contract between said Thomas G. Plant and the Stanley Manufacturing Company, dated June 15th, 1910, a copy whereof is hereto annexed, marked Exhibit "H".

A further contract between said Thomas G. Plant, and the Stanley Manufacturing Company, dated June 15th, 1910, a copy whereof is hereto annexed, marked Exhibit "I".

(D) Claims against said Plant to enforce certain leases or licenses so called, which claims are represented in a Bill in Equity now pending in the Supreme Judicial Court of Massachusetts.

Various claims of infringement of letters patent by said Plant,

which claims are represented in part by certain bills in equity which have heretofore been prepared and a portion of which have been brought and are now pending in the United States Circuit Court for the District of Massachusetts against said Plant.

A claim against the Stanley Manufacturing Company for breach of contract between said Stanley Manufacturing Company and said United Shoe Machinery Company, said contract being dated May 1st, 1901.

Now, Therefore, said parties mutually covenant and agree each with the other as follows: —

The said Plant will, on or before the thirtieth (30th) day of September, 1910, sell, assign, transfer and set over to said United Company, by instruments in proper form, all inventions, improvements, letters patent of the United States and other countries, applications for letters patent and interests and rights in, to and under inventions, improvements, letters patent and applications for letters patent which he now owns or controls, or which at any time hereafter within fifteen (15) years from the date hereof he shall make, own or acquire, relating to machinery, mechanisms, tools, devices, processes, methods or things intended or adapted for use in the manufacture of footwear or in the working or manipulation of leather, or relating to eyelets or to footwear findings of any descriptions whatsoever; together with any and all rights he now has or may within fifteen (15) years have by agreement or otherwise to acquire or take over such inventions, improvements, letters patent of the United States and other countries, applications for letters patent and interests and rights therein, thereunder or thereto; including herein without prejudice to generality of the foregoing description, the entire right, title and interest, free from any prior grant or other incumbrance whatsoever in, to and under all of the letters patent and applications for letters patent referred to in the schedules hereto annexed and marked "Exhibit A" and "Exhibit B", together with the inventions and improvements covered thereby, and the said Plant will likewise, on or before said thirtieth day of September, 1910, deliver to said United Company properly executed assignments and transfers of all the shares of

stock in corporations and the other personal property hereinabove set forth and will accept in full payment for all of the foregoing the sum of six million dollars ($6,000,000) to be paid to him by said United Company, of which sum one million dollars ($1,000,000) is to be paid upon the execution of this agreement, and the balance of five million dollars ($5,000,000) is to be paid on or before the thirtieth (30th) day of September, 1910, upon the delivery of the assignments and transfers above mentioned.

At the time of the final payment to be made by the United Company to said Plant and in connection therewith, the United Company will deliver to said Plant agreements in proper form providing for the dismissal or discontinuance so far as said Plant is concerned, without costs to either party, of the suit now pending in the Supreme Judicial Court of Massachusetts, and for the dismissal or discontinuance of the suits now pending in the United States Circuit Court against said Plant, and properly executed general releases, including any and all claims and demands against said Plant and properly executed releases of any and all claims and demands against said Stanley Manufacturing Company, and contemporaneously said Plant will deliver duly executed general releases of all claims and demands against said United Shoe Machinery Company.

Said Plant is to pay the rent of offices occupied by him at 60 Congress Street, Boston, to the date of this agreement; all the rent and other expenses in connection therewith to be paid by the United Shoe Machinery Company during the remainder of the term for which said Plant has obligated himself; and said Plant is to be held harmless and indemnified from all cost in connection therewith.

The United Company hereby agrees to assume all agreements, obligations and liabilities of said Plant and of said Manufacturers' Machine Company under said existing contracts between said Plant or said Manufacturers' Machine Company and Charles P. Stanbon, the Keighley Company, Stanley Company, the Stanley Manufacturing Company, copies whereof are hereinabove referred to and annexed to this agreement, or to hold the said Plant and the

said Manufacturers' Machine Company harmless and indemnified from all liability thereunder.

It is further agreed in connection with said contracts that said Plant is to pay for all labor performed and machinery, tools, parts, materials and supplies delivered prior to the date of this agreement.

The United Company shall pay for all labor performed on and after the date of this agreement in connection with shoe machinery work now being carried on by or on account of said Plant in the shops named in Exhibit "C", all of which work is subject to termination by said Plant and nine-tenths (9/10) of which is subject to immediate termination by said Plant.

All the cost of tools, machine tools, machinery, parts, materials and supplies for Thomas G. Plant, Bresnahan Shoe Machinery Company and the Stanley Company in connection with shoe machinery now contracted for and delivered on and after this date, which are used by said United Company, shall be paid by United Company.

One-half the cost of all such tools, machine tools, machinery, parts, materials and supplies not so used shall be paid by each party, but title to same shall vest in United Company.

Said Plant guarantees that the total amount of the cost of such tools, machine tools, machinery, parts, materials and supplies so not yet delivered does not exceed one hundred and fifty thousand dollars ($150,000). Said Plant will, if and when requested by said United Company, use his best endeavors to secure the cancellation of orders or contracts for such machine tools, etc.

The principal items so far as known to said Plant are shown on memorandum hereto annexed marked "X".

The cost of cancellation of contracts covering such machine tools, etc., shall be divided equally.

Said Plant hereby guarantees that the condition of the Plant Company as to assets and liabilities was and is as set forth in the statement hereto annexed, marked "X".

Said Plant further warrants to the said United Company that the said Plant is the owner of and that the agreement herein contained to convey to the United Company includes the entire right, title and interest, free from any and all incumbrances whatsoever, in,

to and under all the letters patent and applications for letters patent which are enumerated in the schedules hereto annexed, marked "A" and "B", and the inventions and improvements covered thereby.

Said Plant hereby covenants and agrees to and with the said United Company that at any and all times hereafter, upon request he will execute and cause to be executed any and all applications for letters patent of the United States and other countries, assignments, powers of attorney, and other instruments, and will perform and cause to be performed any and all further acts which may be necessary or desired by the United Company to fully and entirely vest and confirm in the said United Company or its nominees, all the inventions, improvements, letters patent, applications for letters patent, and other property, interests and rights hereby agreed to be conveyed; to enable the United Company to secure letters patent in all countries in which the United Company shall desire covering said inventions or any of them, and generally to carry out the full intent of this agreement — all without further consideration than that herein provided to be paid, but at the expense of the United Company.

The term United Shoe Machinery Company or United Company wherever herein used shall include said United Shoe Machinery Company, its successors and assigns.

All covenants and agreements on the part of said Plant herein contained shall be binding upon the said Plant and his personal representatives.

Papers shall be passed and balance of money paid over at First National Bank, Boston, September thirtieth, 1910, at noon.

THOS. G. PLANT. [SEAL]

[SEAL] UNITED SHOE MACHINERY CO.
By S. W. Winslow, President

Boston, September 23rd, 1910.

The receipt of one million dollars ($1,000,000) under the foregoing agreement is hereby acknowledged.

Applications

Name of Applicant	Serial No.	Date Filed	Subject Matter
Cummings, H. H.	293,047	Dec. 23, 1905	Loose Nailer
Heys, John J.	309,997	Apr. 5, 1906	Heel Seat Rough Rounder.
Stanbon, Chas. P.	309,109	Mar. 31, 1906	Welt Cutting Machine
Phelan, Merton D.	319,709	June 1, 1906	Automatic Heel Seat Rough Rounder
Phelan, Merton D.	529,313	Nov. 22, 1909	Lasting Machine
Woodward, Erastus	327,136	July 21, 1906	Leveling Machine Jack
Stewart, Wm. C.	343,458	Nov. 14, 1906	Pulling Over Machine

Phelan, Merton D.	353,211	Jan. 21, 1907	Horn Controlling Mechanism for Work Support
English, A. M.	333,062	Sept. 4, 1906	Heel Burnishing Mechanism
Plant, Thomas G.	412,391	Jan. 24, 1908	Machines for Treating Insoles
Plant, Thomas G.	454,082	Sept. 21, 1908	Laying and Leveling Machines
Plant, Thomas G.	501,448	June 11, 1909	Edge Protectors for Shoe Soles
Plant, Thomas G.	501,449	June 11, 1909	Heel Breasting Machines
Plant, Thomas G.	501,920	June 14, 1909	Connection Cutters
Stewart, Wm. C.	502,666	June 17, 1909	Knife Grinders
Plant, Thomas G.	508,436	July 19, 1909	Welt Shoe Preparing Machine
Plant, Thomas G.	518,690	Sept. 20, 1909	Lasting Pincers
Stewart, Wm. C.	522,596	Oct. 14, 1909	Machines for Brushing Edges of Boot and Shoe Soles
McLeod, Geo. T.	524,951	Oct. 27, 1909	Top Lift Scalloper or Concaver
McLeod, Geo. T.	524,952	Oct. 27, 1909	Shoemakers' Work Bench
Stewart, Wm. C.	526,760	Nov. 8, 1909	Leather Cutting Machine
Glass, Perley R.	536,169	Jan. 3, 1910	Lasting Machine
Plant, Thomas G.	555,294	Apr. 13, 1910	Shoe Supports
Plant, Thomas G.	555,295	Apr. 13, 1910	Work Supports
Plant, Thomas G.	558,915	May 2, 1910	Lasting Machine
Plant, Thomas G.	560,239	May 9, 1910	Heel Breasting Machine
Eaton, Clarence L.	560,174	May 9, 1910	Method of Waxing Thread
Woodward, E.	551,200	Mar. 24, 1910	Shoe Laying and Leveling Jack.

Exhibit B

British Patents.

Number	Date	Title
18968/06	Aug. 24, 1906	Improvements in Pads for Buffing Machines, particularly those for Boots and Shoes, and in the Manufacture of said Pads.
18969/06	Aug. 24, 1906	Improvements in Machines for forming and Driving Metallic Fasteners or Staples.
19262/06	Aug. 28, 1906	Improvements in Machines for Leveling or Beating Out the Outsoles of Boots and Shoes.
19631/06	Sept. 3, 1906	Improvements in Nail Forming and Driving Machines.
20215/06	Sept. 11, 1906	Improvements in Stitch Impressing or Impression Finishing Machines for Boots and Shoes.
20216/06	Sept. 11, 1906	Improvements in Machines for Trimming and otherwise Operating upon the Soles of Boots and Shoes.
20722/06	Sept. 18, 1906	Improvements in Heeling Machines for Boots and Shoes.
23396/06	Oct. 23, 1905	Improvements in Sole Rounding Machines.
26185/06	Nov. 19, 1906	Improvements in Sewing Machines.
27992/06	Dec. 9, 1905	Improvements in Tack or Nail Holding and Driving Devices.
92/07	Jan. 1, 1907	Improvements in and connected with Machines for Trimming or Rounding the Soles of Boots or Shoes.
197/07	June 3, 1907	Improvements in or relating to Boot and Shoe Breasting Machines.
411/07	Jan. 7, 1907	Improvements in or relating to Channel Flap Laying Machines for Boots and Shoes.

1269/07 Jan. 17, 1907 Improvements in Sole Leveling or like Machines for the Manufacture of Boots and Shoes.

1590/07 Jan. 21, 1907 Improvements in Boots and Shoes.

1591/07 Jan. 21, 1907 Improvements in Boots and Shoes.

2135/07 Jan. 28, 1907 Improvements in Welt or Strip Measuring Devices particularly applicable to the manufacture of Boots or Shoes.

4236/07 Aug. 20, 1907 Improvements in pulling Over Machines for Boots and Shoes.

7614/07 Mar. 31, 1906 Improvements in Channel Flap Laying Machines for use in the Manufacture of Boots and Shoes.

7893/07 Apr. 5, 1906 Improvements in Channeling Machines for use in the Manufacture of Boots and Shoes.

10809/07 May 10, 1906 Improvements in Insole Slashing Machines for Boots, Shoes and the like.

11883/07 May 22, 1907 Improvements in Lasting Machines for Boots and Shoes.

15162/07 July 2, 1906 Improvements in Boot Treeing Machines.

15445/07 July 4, 1907 Improvements in the Method of and Machines for Bottoming Boots and Shoes.

15870/07 July 11, 1906 Improvements in Buffing Machines.

17070/07 July 25, 1907 Improvements in the Pad Covers of Buffing Machines and in the Process or Method of Making same.

18492/07 Aug. 15, 1907 Improvements in Insole and like Slashing Machines for use in the Manufacture of Boots and Shoes.

21779/07 Oct. 2, 1907 Improvements in or relating to Machines for Molding Buffing Pad Covers.

21793/07 Oct. 2, 1907 Improvements in Machines for Marking or Notching Welts or other Parts of Boots and Shoes to Facilitate Bottoming.

27876/07 Dec. 18, 1907 Improvements in or relating to Machines for Reinforcing Insoles.

4229/08 Feb. 25, 1908 Improvements in or relating to Machines for Operating on the Bottoms of Boots and Shoes.

9983/08 Aug. 20, 1907 Improvements in Pulling Over Machines for Boots and Shoes.

9984/08 Aug. 20, 1907 Improvements in Pulling Over Machines for Boots and Shoes.

15739/08 Nov. 13, 1907 Improvements in or relating to Channel Lip Turning Machines.

15740/08 Dec. 2, 1907 Improvements in or relating to Channel Lip Turning Machines.

17857/08 Aug. 25, 1908 Improvements in or relating to Stop Mechanisms for Sewing-machines.

18235/08 Aug. 31, 1908 Improvements in or relating to Boot and Shoe Sewing Machines.

18423/08 Dec. 26, 1907 Improvements in or relating to Thread Controlling Mechanism for Sewing Machines.

18424/08 Jan. 29, 1908 Improvements in or relating to Sewing Machines.

18496/08 Feb. 4, 1908 Improvements in or relating to Sole Sewing Machines.

18761/08 Dec. 23, 1907 Improvements in or relating to Channel Moistening Devices for Sewing Machines or the like.

20356/08 Apr. 9, 1908 Improvements in or relating to Wax Thread Sewing Machine Attachments.

23025/08 Apr. 15, 1908 Improvements in or relating to Lock Stitch Sewing Machines.

23964/08 Nov. 9, 1909 Improvements in or relating to Insole Reinforcing Machines or the like.

24193/08 Nov. 11, 1908 Improvements in or relating to Jacks for Boot and Shoe Lasts.

24683/08 Nov. 20, 1907 Improvements in or relating to Heel Beading Machines.

24684/08 Nov. 20, 1907 Improvements in or relating to Work Supports.

2092/09 Jan. 28, 1909 Improvements in Welt or Strip Measuring Devices particularly applicable to the Manufacture of Boots or Shoes.

2093/09 Jan. 28, 1909 Improvements in or relating to Sewing Machines.

2094/09 Jan. 28, 1909 Improvements in or relating to Bobbin Winding Mechanism.

7481/09 Mar. 29, 1909 Improvements in or relating to Treeing Devices for Boots and Shoes.

8772/09 Apr. 13, 1909 Improvements in or relating to Horn Controlling Mechanism for Fastener Inserting Machines.

11119/09 May 11, 1909 Improvements in or relating to Nail Assorting and Delivering Mechanisms.

11711/09 May 18, 1909 Improvements in or relating to Heel and Toplift Holders.

12867/09 June 1, 1909 Improvements in or relating to Heeling Machines.

12892/09 June 1, 1909 Improvements in or relating to Work Holders for Heeling Machines.

13313/09 June 7, 1909 Improvements in or relating to Shoe Sewing Machines.

13314/09 June 7, 1909 Improvements in or relating to Machines for Sewing Boots and Shoes.

14306/09 June 18, 1909 Improvements in or relating to Nail Assorting and Delivering Mechanisms.

14307/09 June 18, 1909 Improvements in or relating to Boot and Shoe Channeling Machines.

14609/09 June 22, 1909 Improvements in or relating to Heeling Machines.

16212/09 July 12, 1909 Improvements in or relating to Machines for Inserting Fasteners in Leather.

16348/09 July 13, 1909 Improvements in or relating to Lasting Machines.

16349/09 July 13, 1909 Improvements in or relating to Lasting Machines.

16350/09 July 13, 1909 Improvements in or relating to Lasting Machines.

17191/09 July 23, 1909 Improvements in or relating to Machines for Inserting Metallic Fastenings in the Manufacture of Boots and Shoes.

17902/09 Aug. 3, 1909 Improvements in or relating to Insoles for Boots and Shoes.

17913/09 Aug. 3, 1909 Improvements in or relating to Work Supports for Boot and Shoe Machines.

27244/09 Nov. 23, 1909 Improvements in or relating to Jacks for Slugging and Other Machines.

28076/09 Dec. 1, 1909 Improvements in or relating to Welt Laying and Attaching Machines.

28488/09 Dec. 6, 1909 Improved Apparatus for applying adhesive to strips of canvas or the like.

9015/04 Apr. 19, 1904 Improvements in Sole Molding Machines.

19631/06 Sept. 3, 1906 Improvements in Nail Forming and Driving Machines.

20216/16 Sept. 11, 1906 Improvements in Machines for Trimming and otherwise Operating upon the Soles of Boots and Shoes.

British Applications.

Number	Date	Title
16347/09	July 13, 1909	Improvements in or relating to Lasting Machines.
18672/09	Aug. 13, 1909	Improvements in or relating to Heeling Machines.
19344/09	Aug. 23, 1909	Improvements in or relating to Insole Covering and Reinforcing Machines.
24626/09	Oct. 26, 1909	Improvements in or relating to Machines for Slashing Soles of Boots and Shoes.
26480/09	Nov. 15, 1909	Improvements in or relating to Sole Rounding Machines.

27761/09 Nov. 29, 1909 Improvements in or relating to Heel shaving Machines.

27762/09 Nov. 29, 1909 Improvements in or relating to Shoe Sole Edge Setters.

5666/10 Mar. 7, 1910 Improvements in or relating to Shoe Sole Flexers.

11480/10 May 9, 1910 Improvements in or relating to Laying and Leveling Machines.

11628/10 May 10, 1910 Improvements in Rotary Jacks.

11629/10 May 10, 1910 Improvements in or relating to Heeling Machines.

11841/10 May 12, 1910 Improvements in or relating to Laying and Leveling Machines.

12008/10 May 14, 1910 Improvements in or relating to Outsole Markers.

13395/10 Oct. 19, 1909 Improvements in Ironing and Dressing Jacks for Boots and Shoes.

13814/10 Mar. 26, 1910 Improvements in or relating to Sole Edge Waxing Machines.

14803/10 Dec. 22, 1909 Improvements in Driving Shaft Controlling Means.

20743/10 Sept. 6, 1910 Improvements in or relating to Heel Breasting Machines.

20744/10 Sept. 6, 1910 Improvements in or relating to Welt Shoe Preparing Machines.

27350/09 Nov. 24, 1909 Improvements in or relating to Shoe Jacks.

20753/10 Sept. 15, 1909 Improvements in or relating to Brush Cleaners.

20752/10 Oct. 27, 1909 Improvements in or relating to Machines for Compressing Toplifts.

French Patents.

Number	Date	Title
374,239	Oct. 22, 1906	Sole Rounding Machine
374,396	Dec. 8, 1906	Improvements in Tools for Driving Tacks or Nails.

378,788	Aug. 21, 1906	Improvements in Buffing Machines.
378,790	Aug. 21, 1906	Sole Leveling Machine.
379,001	Aug. 27, 1906	Improvements in Machines for making or for making and driving fasteners.
379,184	Aug. 31, 1906	Improvements in Machines for making or for finishing stitch impressions.
379,774	July 10, 1907	Improvements in finishing machines used in the manufacture of boots and shoes.
380,564	Oct. 10, 1906	Feeler mechanism for adjusting the work guide in rough rounder and channeling machines.
380,565	Oct. 10, 1906	Pattern mechanism for adjusting the cutter knife relatively to the guide in rough rounder machines.
380,566	Oct. 10, 1906	Feed mechanism and channeling knife for rough rounder machines.
381,563	Nov. 12, 1906	Improvements in heeling machines.
381,564	Nov. 12, 1906	Improvements in heeling machines
381,565	Nov. 12, 1906	Improvements in heeling machines.
381,794	May 8, 1907	Insole slashing machine.
8,505	Aug. 23, 1907	Patent of addition to Patent No. 381,794 for insole slashing machine.
382,028	July 1, 1907	Improvements in machines for finishing boot and shoe uppers. (Boot treeing machine.)
382,233	Sept. 26, 1907	Improvements in boot and shoe sewing machines.
10,860	Mar. 15, 1909	Patent of addition to Patent No. 382,233 for Improvements in boot and shoe sewing machines.
382,276	Mar. 30, 1907	Improvements in channel laying machines.
382,277	Apr. 4, 1907	Improvements in sole channeling machine.
384,584	Dec. 2, 1907	Improvements in welting machines or other machines for attaching a band of material.

10,669	Mar. 15, 1909	Patent of Addition to Patent No. 384,584 for Improvements in welting machines or other machines for attaching a band of material.
384,722	Aug. 23, 1907	Improved sole for boots and shoes.
385,787	Oct. 21, 1907	Improved insole and improved method for making same.
387,878	Mar. 6, 1908	Sole reinforcing and forming machine.
388,544	Mar. 27, 1908	Machine for marking the edge of uppers of boots and shoes.
389,978	July 16, 1907	Machine and method for facilitating the assembling of the sole and upper, in the manufacture of boots and shoes.
390,377	May 19, 1908	Improvements in pulling-over machines.
391,650	Mar. 28, 1908	Improvements in machines for operating upon the heel of boots and shoes.
391,788	Sept. 5, 1907	Improved pad covering for buffing machines used in the manufacture of boots and shoes, and method for making said covering.
392,681	Oct. 2, 1907	Machine for forming or moulding an improved covering for pads of buffing machines used in the manufacture of boots and shoes.
393,306	May 19, 1908	Improvements in pulling-over machines.
393,307	May 19, 1908	Improvements in pulling-over machines.
394,669	Dec. 3, 1907	Improvements in rough rounding machines.
392,732	July 27, 1908	Channel lip turning machine.
392,733	July 27, 1908	Channel lip turning machine.
393,132	Aug 4, 1908	Improvements in lasting machines.
394,013	Sept. 7, 1908	Improvements in sole channel moistening devices.
394,226	Sept. 12, 1908	Improvements in thread controlling mechanism for sewing machines.
394,376	Sept. 17, 1908	Improvements in boot and shoe sewing machines.

394,542 Sept. 22, 1908 Improvements in stop mechanism.

394,714 Sept. 26, 1908 Improvements in lock stitch shoe sewing machines.

394,715 Sept. 26, 1908 Improvements in boot and shoe sewing machines.

394,765 Sept. 29, 1908 Improvements in boot and shoe sewing machines.

395,292 Aug. 4, 1908 Improvements in lasting machines.

396,404 Nov. 17, 1908 Improvements in work supports for nailing, slugging or other similar machines used in the manufacture of boots and shoes.

396,411 Nov. 17, 1908 Improvements in heel seat finishing machines or similar machines used in the manufacture of boots and shoes.

396,939 Dec. 1, 1908 Improvements in work supports or jacks used in machines for the manufacture of boots and shoes.

398,582 Dec. 3, 1908 Improvements in machines for applying a reinforcing covering to insoles used in the manufacture of boots and shoes.

398,925 Jan. 29, 1909 Bobbin winder.

409,801 Nov. 30, 1909 Improvements in machines for attaching or applying a welt to the surface of a sole along its edge.

410,469 Dec. 21, 1909 Improvements in heel trimming machines.

410,946 Nov. 22, 1909 Improvements in jacks in sole leveling or sole laying machines.

411,560 Apr. 13, 1909 Improvements in boot treeing machines.

411,960 Jan. 27, 1910 Improvements in the jacks or work supports in toplift slugging or other nailing machines.

411,975 Apr. 21, 1909 Improvements in fastener driving machines used in the manufacture of boots and shoes.

411,961 Jan. 27, 1910 Improvements in apparatus for machines used in the manufacture of boots and shoes for applying cement to canvas for reinforcing insoles of boots and shoes.

412,778 May 10, 1909 Improvements in nail assorting and delivering mechanism used in machines for making boots and shoes.

413,140 May 19, 1909 Improvements in heel or toplift carriers for boot and shoe machines.

413,713 June 1, 1909 Improvements in machines for loading heels with nails for attaching the latter to the shoe.

413,750 June 2, 1909 Improvements in heel carriers used in boot and shoe machines and more particularly in heeling machines.

414,153 June 11, 1909 Improvements in sewing machines.

414,340 June 16, 1909 Improvements in sewing machines and more particularly in so-called welters used in the manufacture of boots and shoes.

414,447 June 18, 1909 Improvements in sole channeling machines.

414,589 June 22, 1909 Improvements in heeling machines.

414,737 June 25, 1909 Improvements in nail assorting and delivering mechanism used in machines for the manufacture of boots and shoes.

415,142 July 5, 1909 Improvements in lasting machines.

416,023 July 27, 1909 Improvements in machines for inserting metallic fasteners.

416,024 July 27, 1909 Improvements in machines for inserting fasteners.

416,272 Aug. 2, 1909 Improvements in insoles for boots and shoes.

415,972 May 14, 1910 Improvements in laying and leveling machines.

415,768 May 10, 1910 Improvements in rotary jacks.

416,009 May 17, 1910 Improvements in sole markers.

French Applications.

Ser. No.			
1,029	Sept.	9, 1909	Patent of Addition to Patent No. 387,878 for sole reinforcing and forming machine.
1,185	Oct.	26, 1909	Patent of Addition to Patent No. 381,794 for insole slashing machine.
7,906	Sept.	3, 1909	Improvements in heeling machines.
10,211	Nov.	13, 1909	Improvements in sole rounding machines.
16,909	May	13, 1909	Sole leveling and laying machine.
17,294	May	24, 1910	Heeling Machine.
17,726	June	4, 1910	Improvements in ironing and dressing jacks for boots and shoes.
17,959	June	11, 1910	Improvements in sole edge and heel finishing machines.
17,280	June	21, 1910	Improvements in machines for flexing soles.
18,464	June	25, 1910	Improvements in sole edge setting machines.
20,734	Sept.	5, 1910	Improvements in machines for operating on the bottoms of boots and shoes, and more particularly heels (Heel Breaster).
20,736	Sept.	5, 1910	Improvements in machines for preparing the shoe to receive the welt (welt shoe sewing machine).
20,735	Sept.	5, 1910	Improvements in brush cleaners.
20,737	Sept.	5, 1910	Improvements in machines for compressing toplifts.

German Patents.

Number		Date	Title
214,012	Nov.	10, 1908	Insole Reinforcing Machine.
218,943	Nov.	20, 1908	Machine for Operating upon Boots and Shoes.
221,688	July	14, 1909	Lasting Machine.
221,732	May	20, 1909	Nail Assorting and Delivering Machanism.
221,826	Sept.	8, 1908	Channel Moistening Device for Sole Fastening Machines, especially Shoe Sewing Machines.

223,043 Oct. 1, 1908 Sewing Machine for Boots and Shoes with an oscillatory welt guide and a back gauge movable toward and from the work.

223,192 Sept. 10, 1908 Presser-foot for Sewing Machines for Boots and Shoes.

223,193 Sept. 19, 1908 Sewing Machine for Boots and Shoes.

223,575 Jan. 31, 1909 Bobbin Winding Mechanism for Wax-Thread Sewing Machines.

223,877 Aug. 1, 1908 Lasting Machine for Boots and Shoes.

224,650 Sept. 15, 1908 Stopping Mechanism for Sewing and other Machines for Operating upon Boots and Shoes, with fast and loose Clutch Members provided on the Main Shaft.

225,323 Oct. 1, 1908 Back Gauge for Boot and Shoe Sewing Machines.

226,576 July 15, 1909 Machine for Inserting Fastenings.

225,693 July 16, 1909 Boot and Shoe Sewing Machine with welt guide.

200,553 Aug. 26, 1906 Pad for Sole Buffing Machines.

201,394 Nov. 29, 1906 Tack or Nail Driving Device.

201,985 Aug. 31, 1906 Machine for Making and Driving Staples.

201,986 Sept. 11, 1906 Machine for Rounding Soles or the like.

203,301 Aug. 27, 1907 Insole for Boots and Shoes with transverse slashes.

205,732 Oct. 31, 1906 Nail Delivering Device for Heeling Machines or the like.

205,733 Jan. 11, 1908 Insole Reinforcing Machine.

205,877 July 17, 1907 Method and Machine for Facilitating Assembling of Shoe Uppers and Soles.

206,129 Oct. 4, 1907 Machine for Making Pad Covers for Boot and Shoe Buffing Machines or the Like, in which a forming device acts upon a blank held by its edge.

207,800 Aug. 29, 1907 Process for Making Pad Covers for Shoe Bottom Buffing Machines.

207,801 Mar. 26, 1908 Machine for Marking the Edge of Uppers.
208,690 Sept. 7, 1906 Stitch Impression Machine.
209,630 Sept. 21, 1906 Sole Rounding Machine with a Work Holder and a Cutting Knife.
210,050 Oct. 20, 1907 Sewing Machine for Assembling a ribbon-shaped Stripe of Material with the work, especially the Welt of Boots and Shoes with the Upper.
210,186 Sept. 3, 1907 Welt Shoe Sewing Machine with a curved Needle and a Welt Guide.
211,020 Apr. 5, 1907 Machine for Operating upon Shoe Soles, with a feeding mechanism for the Work and a Sole Channeling Device
211,258 Aug. 26, 1906 Sole Leveling Machine with a Leveling Device acting upon the Tread Surface of the Sole.
212,373 July 12, 1907 Shoe Sole Buffing Machine.
214,992 July 2, 1907 Boot Treeing Machine
215,841 Feb. 4, 1909 Sewing Machine for Assembling a Ribbon-shape Stripe of Material with the Work, especially the Welt of Boots and Shoes with the Upper.
216,588 Oct. 22, 1907 Method for Making Insoles for Boots and Shoes, according to which a Channel with upturned Lip is put into the Surface of the Sole.
217,772 May 9, 1907 Sole Slashing Machine.
218,244 Aug. 27, 1907 Sole Slashing Machine.
219,981 Mar. 31, 1908 Heel Breasting Machine or the Like.
220,936 Mar. 31, 1907 Channel Flap Layer.
220,973 Mar. 31, 1908 Machine for Operating upon Boots and Shoes, especially for Breasting Heels.
225,468 Feb. 4, 1909 Welt Shoe Sewing Machine with a curved Needle and a Welt Guide.
226,578 Dec. 31, 1909 Jack for Boot and Shoe Machine.

German Patent Applications

Ser. No.	Date	Title
P. 22240	Nov. 14, 1908	Jack for Boot and Shoe Machines.
P. 22258	Nov. 19, 1908	Workholder or Jack for Boot and Shoe Machines.
P. 23032	Apr. 22, 1909	Machine for Inserting Fastenings.

EXHIBIT C.

Contents of machine-shop located in Pevear Building, 507 Washington Street, Lynn, Mass., fully equipped with large machine tools, small tools, machine-shop equipment, etc. (not including, however, shafting, pulleys, belts, etc., furnished by landlord):

two-thirds of the capital stock of the Bresnahan Shoe Machinery Company, incorporated under the laws of Maine, which is doing a machinery business at said Lynn manufacturing for said Plant, and whose assets are at its place of business in said Lynn and consist principally of machine tools, small tools, machine-shop equipment and machinery.

Patterns, tools, jigs, etc., built for the purpose of manufacturing the Wonder Worker Shoe Machinery in use at said place of business of said Bresnahan Shoe Machinery Company, at said machine-shop in Pevear Building, at the places of business of C. P. Stanbon & Company, Lynn, Mass., Taft-Peirce Manufacturing Company, Woonsocket, R. I., Stanley Manufacturing Company, Lawrence, Mass., National Machine & Tool Company, Boston, Mass., C. H. Cowdrey Machine Works, Fitchburg, Mass., and Lockwood Manufacturing Company, Boston, Mass.

Completed shoe machinery and machinery in process of manufacture, manufactured parts in stocks, parts in process of manufacture and materials located at Bismarck Street, Jamaica Plain, Boston, machine-shop No. 1, Bickford Street, Boston, Mass., at said places of business of said Bresnahan Shoe Machinery Company, C. P. Stanbon & Company, Taft-Peirce Manufacturing Company, National Machine & Tool Company, C. H. Cowdrey Machine Works and Lockwood Manufacturing Company.

Machine tools, small tools, jigs, patterns, machines in process of manufacture, fixtures, office furniture, etc., located at said place of business of said Stanley Manufacturing Company, Lawrence, Mass.

Also all other property which Thomas G. Plant owns and uses in connection with the manufacture of machinery.

EXHIBIT D.

Agreement, made this twenty-ninth day of May A. D. 1905, by and between Charles P. Stanbon, of Lynn, Massachusetts, doing business under the firm name and style of Charles P. Stanbon & Company of the first part, and Manufacturers Machine Company, a corporation duly organized and existing under and by virtue of the

laws of the State of New Jersey, party of the second part, Witnesseth:

That whereas the party of the first part is established in business at Lynn, Massachusetts, in the manufacture and sale of shoe machinery, parts thereof and accessories thereto, and is willing, upon receipt of the bond hereinafter described, to give the party of the second part an option for the purchase of the good-will of the business, the stock, machinery, tools and patents of the party of the first part;

And whereas the party of the second part is willing to give said bond;

Now therefore in consideration of the premises and the covenants and agreements hereinafter contained, and of one dollar each to the other paid, the receipt of which is hereby acknowledged, said parties have agreed as follows: —

1. Said party of the first part, in consideration of the bond of the party of the second part for five thousand dollars hereinafter described, hereby gives to the party of the second part the following described option, viz.: at any time on or before the first day of November, A. D. 1906, to enter into a contract to purchase the entire business, good-will, stock, machinery, parts, tools, patents, inventions, furniture, and everything else forming a part of, used in or accessory to the business of said party of the first part at an inventory value, said inventory to be taken at the time and in the manner herein set forth, to wit: said inventory shall be taken as soon as may be after notice in writing by the party of the second part given to the party of the first part of the desire of the party of the second part to purchase said property under this option, which notice shall constitute a contract for the purchase of the property which is the subject of this agreement; and said notice must be given, if at all, on or before November 1, 1906. Said inventory shall be made up and the purchase price shall be fixed by Harry I. Illingworth, Lynn, Mass., acting as an appraiser, unless some other person should be mutually agreed upon by the parties hereto. In case of the death of said Illingworth, or his refusal to act as an appraiser as aforesaid, and in case the parties hereto

shall fail within fourteen days after the giving of said notice, to agree upon an appraiser, said appraiser shall be selected by Perley R. Glass, Boston, Mass., and said selection shall be final and binding upon all of the parties hereto. The appraiser shall appraise all machinery at a value equivalent to the value thereof as second-hand machinery, sold by a willing seller to a willing purchaser under favorable conditions.

2. Said party of the first part agrees that the good-will, patents and inventions of or owned by said party of the first part, and also those of or owned by any other individual or individuals who may in part or wholly constitute the party of the first part, shall be inventoried at one dollar, it being the intent of said party of the first part to contribute the same at such nominal price to the party of the second part provided the latter avails of this option.

3. The party of the second part agrees, simultaneously with the execution of this agreement, to furnish the party of the first part with a bond with a good and sufficient surety or sureties, in the sum of five thousand dollars, to be paid by the party of the second part to the party of the first part on the first day of November A. D. 1906, or at the time of the transfer of the property which is the subject of this agreement if said transfer shall be made prior to the said first day of November 1906, or subsequent to the first day of November 1906 and following an acceptance in writing of this option. If this option is accepted and the property which is the subject of this agreement is transferred as herein provided, then said sum of five thousand dollars shall be reckoned, considered and taken as part payment on the purchase price of said property at said appraisal. If this option is not accepted, then said sum of five thousand dollars is to be paid over by the party of the second part to the party of the first part on the first day of November 1906 and is to be forfeited: that is to say, the party of the second part is to be considered as having received value to the extent of five thousand dollars by having the option aforesaid until and including the first day of November 1906. In case the option is availed of by the party of the second part the remainder of the purchase price as fixed by said appraisal shall be paid by the party of the second

part to the party of the first part within fourteen (14) days after the completion of said appraisal and its submission to the party of the second part.

4. The said Charles P. Stanbon, of the party of the first part, agrees that, should the party of the second part exercise the option herein given within the time stated and purchase the business of the party of the first part as herein provided for, then and in such event said party of the second part shall have the right and option to acquire the services of said Charles P. Stanbon for the whole or such part of five years next following the acquirement of the property which is the subject of this option and agreement as said services shall be satisfactory to the party of the second part, at the rate of five thousand (5,000) dollars per year, or a proportionate part thereof for a part of any year, as said party of the second part may elect.

5. In the event of the exercise of this option by the party of the second part hereto within the time mentioned, the party of the first part may at his election receive payment for the property referred to in Section 1 hereof at the appraised value in cash or in stock at par of said party of the second part.

In Witness Whereof, the parties hereto have hereunto set their hands and caused their seals to be affixed the day and year first above written.

Charles P. Stanbon [SEAL]

[SEAL] Manufacturers Machine Co.

F. H. Rowsom, Treasurer.

EXHIBIT E.

This agreement, made this 26th day of January, in the year 1910, between the Keighley Company, a corporation organized under the laws of the State of New Jersey and having its principal office and place of business in Vineland, New Jersey, U. S. A., of the first part, and Thomas G. Plant of Boston in the State of Massachusetts, U. S. A., of the second part, witnesseth: —

That the party of the first part, for and in consideration of One Dollar to it paid by the party of the second part, the receipt of

which is hereby acknowledged, and other valuable consideration hereinafter set forth, agrees to furnish to the party of the second part, his successors or assigns, its Rapid Inseam Trimming Machines in such quantities up to twenty-five per cent of its output as the party of the second part may desire from time to time, said machines to be subject to the lease of the party of the first part for a period of forty-nine years without the payment of rental or royalty.

The party of the second part hereby agrees, for himself, his successors or assigns, to pay to the party of the first part the sum of Five Hundred Dollars for each machine so furnished, within 30 days after receipt of same at place of destination, said machines to be delivered by the party of the first part F. O. B. cars at Vineland, New Jersey.

The party of the second part also agrees to pay to party of the first part the sum of Five Dollars per day and all traveling and hotel expenses for the services of a man to set up said machines at place of destination and teach operators to run same, provided the party of the second part desires such services.

The party of the second part also agrees that he will place said machines only in the factories of such shoe manufacturing concerns as equip their factories with his general line of machinery and that he will use his best efforts to induce all users of his machinery to use the said Rapid Inseam Trimming Machines of the party of the first part.

The party of the second part also agrees to purchase all parts, mechanisms and devices used on the machines furnished to him by the party of the first part from them at their regular prices established at the time of purchase less a discount of twenty-five per cent for payment in 30 days from date of shipment.

The party of the second part also agrees to take from the party of the first part thirty or more of said machines during the year 1910 and fifteen or more during each six months thereafter during the life of this agreement.

The party of the first part agrees to deliver to the party of the second part, thirty or more of its Rapid Inseam Trimming Machines

during the year 1910 and fifteen or more during each six months thereafter during the life of this agreement unless prevented by strikes, fire or other acts of Providence.

The party of the first part agrees that it will not sell its business or patents to anyone within one year from date hereof in such manner or to such effect as will interfere in any manner with the performance of this contract.

This agreement shall continue in force until January First 1911 and thereafter until annulled by six months written notice by either party to the other.

In witness whereof the parties hereto have affixed their signatures and seals this 26th day of January 1910.

Vineland, N. J., January 26th, 1910.

This is to certify that we, the undersigned, are the owners collectively of a majority and controlling portion of the capital stock of the Keighley Company, a corporation of the State of New Jersey with its principal office and place of business at Vineland, New Jersey and we do hereby jointly and severally agree, for and in consideration of One Dollar to them paid by Thomas G. Plant of Boston, in the State of Massachusetts, the receipt of which is hereby acknowledged, not to sell, transfer or assign any portion of our holdings as aforesaid, to anyone within one year from the date hereof, in such manner or to such effect as will interfere in any manner with the performance of the contract made between The Keighley Company and Thomas G. Plant.

EXHIBIT F.

This Agreement made this fifteenth day of June, 1910, by and between the Stanley Company, a corporation organized under the laws of the State of Massachusetts, party of the first part, and Thomas G. Plant, of Boston, party of the second part, Witnesseth as follows: —

The said party of the second part hereby covenants and agrees to manufacture in a good and workmanlike manner and of good material, at the machine shops in Lawrence, Massachusetts, that have been leased to him by the Stanley Manufacturing Company, all such gasoline motors and parts of the same as the said party of the first part may need to enable it to meet the demands of its business, and as the party of the second part may find it convenient to make, until this provision of this agreement shall be terminated as hereinafter provided; and he also agrees to keep in good and substantial repair, until the termination of this provision of this agreement, all patterns and special tools of the party of the first part used in the manufacture of such gasoline motors and parts of the same.

The foregoing provision of this agreement shall terminate at the expiration of three months after written notice of election to terminate the same is given at any time by either party hereto to the other.

And for the manufacture of such gasoline motors and parts for the same and for keeping in repair the said gasoline motors, the party of the first part covenants and agrees to pay the party of the second part as follows: —

1. The amount paid for labor;

2. The cost of materials used;

3. An expense account equal to eight cents for each hour of labor on such motors and parts;

and in addition thereto to pay a sum equal to 15% on the aggregate of the above three items — payment to be made by the said party of the first part to said party of the second part, for all such manufacturing and repair work, on or before the fifteenth day of

the next month following that in which the work is completed and is ready for delivery.

And the said party of the second part hereby covenants and agrees to purchase from the said party of the first part, at cost to the said party of the first part, all of the fuel and materials which the said party of the first part now has on hand in the factory of the said Stanley Manufacturing Company at Lawrence, Massachusetts, and which can be used in the manufacture of machinery, and to pay cash for the same on delivery; also to purchase from the said party of the first part all of the unfinished machinery which the said party of the first part now has in process of manufacture in said factory of the Stanley Manufacturing Company at Lawrence, at cost to the said party of the first part, together with a profit of 7 1/2% to be computed on the aggregate of the following items, to wit: —

1. The amount paid for labor;
2. The amount paid for materials entering into the work;
3. An expense account of 8c. for each hour of labor.

Said sum to be paid to the party of the first part by the party of the second part in cash at the time when the said party of the second part shall take possession of said factory at Lawrence, under the lease of said pre ises to him by the said Stanley Manufacturing Company. Also to purchase at cost to said party of the first part, all of the stationery now belonging to the party of the first part and now on hand at said factory of the Stanley Manufacturing Company and to pay for the same in cash at the time of his taking possession of said factory under aforesaid lease. Also to purchase from said party of the first part, at a fair appraisal by three appraisers, all of the office furniture of the party of the first part now in said factory of the Stanley Manufacturing Company and to pay cash for the same at the time when he enters upon his lease of said factory, it being understood and agreed that if the appraisal value of any article or articles of office furniture is not satisfactory to the said party of the first part, the said party of the first part may withdraw said article from said sale.

And inasmuch as the insurance premiums on said factory prop-

erty of the Stanley Manufacturing Company and also the premiums for the Employers' Liability Insurance at said factory have been advanced by the party of the first part for the present term of the existing policies of insurance on said property and for said liability insurance, and as the insurance premiums on the said property and for said liability insurance are to be hereafter paid by the said party of the second part, it is hereby further covenanted and agreed that all of the insurance premiums heretofore advanced by the said party of the first part for the aforesaid policies, shall be adjusted by the party of the second part now paying to the party of the first part for the unexpired term of all of said insurance, a pro rata part of the amount paid for the full term of such insurance, taking last year's adjustment of return premiums as a basis for determining the amount of the premium that will be returned on the present insurance; and at the expiration of the term of the said insurance policies, a final and accurate adjustment of insurance shall be made between the parties hereto and any excess, as now adjusted, which may then be in the hands of either party shall then be repaid to the other.

And it is further covenanted and agreed that for the use of certain machinery, tools and other articles which are the property of the said party of the first part and are now located in the said factory of the Stanley Manufacturing Company, a schedule of which is hereto annexed and marked "B", the said party of the second part shall pay to the said party of the first part a monthly rental equal to one per cent of the cost value, such rental sum to be credited to the party of the first part against any sums due from it to the party of the second part for manufacturing machinery and keeping up repairs, as hereinbefore provided.

And the said party of the second part further covenants and agrees that he will, upon demand by said party of the first part, peaceably and quietly surrender and yield up unto the said party of the first part all and singular the said machinery, tools and other articles enumerated in the aforesaid Schedule "B" and will at once, upon receiving such demand, allow the agents of the said party of the first part to enter and remove all of said personal prop-

erty from the leased premises and upon such removal being made, the said rental shall cease.

And the said party of the first part hereby covenants and agrees that he will, as soon as the amount can be determined, pay to the said party of the second part one-fourth the amount of the taxes assessed by said City of Lawrence upon the real and personal property of the said Stanley Manufacturing Company for the current tax year, said amount being a pro rata part of said taxes for the months of April, May and June in the year beginning April 1, 1910 — during which time, or the greater part thereof, the said party of the first part occupied said premises of the said Stanley Manufacturing Company.

And it is further agreed that covenants and agreements herein contained shall extend to and bind the successors and assigns of the said Stanley Company and the heirs, executors and administrators of the said Thomas G. Plant.

In Witness Whereof the said Stanley Company has caused its corporate name to be signed and its corporate seal to be affixed to this instrument and the said Thomas G. Plant has hereto set his hand and seal to this instrument, in duplicate, on the day and year first above written.

EXHIBIT G.

Whereas the Stanley Manufacturing Company, an unincorporated Association of which Frank F. Stanley is Principal Trustee, and George E. Gilbert as successor to Charles S. Randall, deceased, and Henry F. Tapley as successor to Amos P. Tapley, deceased, are Associate Trustees, has by Instrument dated this day entered into an Agreement with Thomas G. Plant, of Boston, Massachusetts, for the leasing and ultimate sale to said Thomas G. Plant of all its real estate and a large portion of its personal property, all situated in Lawrence, Massachusetts, which Agreement is hereby expressly referred to and made a part hereof; and,

Whereas a certain Agreement dated May 1, 1901, relative to the manufacture of shoe machinery, now exists between the said Stanley Manufacturing Company, unincorporated, and the United Shoe Machinery Company, a corporation established under the laws of the State of New Jersey, a copy of which Agreement is hereto annexed and marked "A".

Now, Therefore, in consideration of the premises and of the sum of one dollar by each of the parties hereto to the other in hand paid, the receipt of which is hereby acknowledged, the said Stanley Manufacturing Company, unincorporated, hereby assigns to the said Thomas G. Plant all its rights, title and interest in and under said agreement, and does hereby agree to turn over to the said Thomas G. Plant for him to execute, all orders for the manufacture and sale of machinery, received from the said United Shoe Machinery Company and all right to manufacture and sell shoe machinery under the terms of and pursuant to said Agreement of May 1, 1901.

And the said Thomas G. Plant, for himself, his heirs, executors and administrators hereby assumes all the liabilities and obligations of the said Stanley Manufacturing Company, unincorporated, under said contract, and covenants and agrees that he or they will, so long as said contract remains in force, accept when received,

and will suitably and promptly execute, all such orders received from said United Shoe Machinery Company, and will manufacture and deliver all machinery ordered under said contract by said United Shoe Machinery Company at the same price and on the same terms and of the same quality and character in all respects as provided for in said Agreement, and that he or they will in all respects be bound by, comply with, fulfil, and perform all the terms and provisions of said contract, which the said Stanley Manufacturing Company, unincorporated, is by said contract required to fulfil and perform, and that he or they will, from this date forward, forever save the said Stanley Manufacturing Company, unincorporated, harmless and indemnified from and against any and all claims of every nature and kind by the said United Shoe Machinery Company against the said Stanley Manufacturing Company, unincorporated, based on or in any way growing out of said contract of May 1, 1901, or of any breach thereof.

And the said Stanley Manufacturing Company, unincorporated, hereby covenants and agrees that it will at any time, upon request in writing of the said Thomas G. Plant, his heirs, executors or administrators, give notice in writing, as provided for in clause 8 of said Agreement of May 1, 1901, to the said United Shoe Machinery Company, of intention to terminate said Agreement; and does also hereby constitute and appoint the said Thomas G. Plant, its attorney in its name and stead and in its behalf, to give such notice in writing at any time hereafter, as provided for in said clause 8, if the said Stanley Manufacturing Company shall itself fail to give such notice within five days after request in writing made upon it by the said Thomas G. Plant so to do.

In Witness Whereof the said Stanley Manufacturing Company, unincorporated, has caused this Instrument to be duly executed, and the said Thomas G. Plant has set his hand and seal to this Instrument, in duplicate, on this fifteenth day of June, 1910.

Stanley Manufacturing Company
Frank F. Stanley, Principal Trustee [SEAL]
George E. Gilbert, Associate Trustee [SEAL]
Henry F. Tapley, Associate Trustee [SEAL]
Thomas G. Plant [SEAL]

"A"

This Agreement made this 1st day of May, 1901, by and between the United Shoe Machinery Company, a corporation under the laws of New Jersey, hereinafter called the United Company, and the Stanley Manufacturing Company, of Massachusetts, an unincorporated Association, of which Frank F. Stanley is Principal Trustee, hereinafter called the Stanley Company, Witnesseth: —

1. The Stanley Company will, for the term of three years from the date of this Agreement, manufacture exclusively for the United Company, and in sufficient quantity to meet the demands of the business to be carried on under this agreement, all of the Boot and Shoe Machinery, and parts for the same, named in the following list: —

List of Machines.

McKay Sewing Machine.
McKay Counter Shaft.
Stanley Horns.
McKay Channeler
Waukenphast Machine
Vrooman Featheredger.
Fisher Channel Flap Turner.
Impression Stitch Machines.
Beading Machines.
Heel Filing Machine.
Sole Rounding Machines.
Tripp Skiving Machine.
Tyler Skiving Machines.
Davis Skiving Machine.
Bottom Buffing Machines.
Forepart Trimming Machines.
Heel Scouring Machines.
Edge Setting Machines (except the Beaudry).
Shank Skiving Machines.
Counter Skiving Machines.
Leather Splitting Machines.
Welt Making Machines.
Pattern Binding Machine.
Corner Cutting Machine.
Zinc Shears.
Seam Pressing Machine.
Watson Skiving Machine.

and during said term will sell such Boot and Shoe Machinery and parts thereof, referred to in the foregoing list of machines, as it now has on hand, exclusively to the United Company.

2. The United Company shall, from time to time as the business shall warrant, order from the Stanley Company all Boot and Shoe Machinery referred to in the foregoing list of machines, and parts thereof, which shall be required to fill such orders as the United

Company shall receive, and which shall be required by the United Company to enable it to keep a supply of the same on hand ample to meet the demands of the business. Such orders shall be filled by the Stanley Company from machines and parts which it now has on hand, and if they cannot be so filled, the Stanley Company shall manufacture for the United Company to fill the same.

The Stanley Company shall keep the United Company informed of the condition of the stock of machines and parts on hand, and shall notify the United Company when the stock shall require replenishing, with machines or parts to amply meet the demands of the business.

3. The United Company shall pay the Stanley Company monthly for machinery and parts to be ordered as above provided (whether its orders are filled from stock on hand or by manufacturing) a price for each such machine and part which shall be the aggregate of the items following, viz. : —

(1) Cost to the Stanley Campany of materials for the same.

(2) Cost to the Stanley Company of labor employed on the same.

(3) Share of factory expense not to exceed 8 cents per hour for each man employed on the same.

(4) 15 per cent. of the sum of items (1), (2) and (3).

4. The United Company will employ the Stanley Company to manufacture, during the continuance of this agreement, such of the machines and parts above referred to as are not at the present time being manufactured in the factories of the United Company and such additional machines as may hereafter be agreed upon, provided, however, that the prices charged by the Stanley Company for such additional machines and parts thereof shall not be in excess of the cost of manufacture in the factories of the United Company, rent, power and taxes included, or the prices charged for the same machines, — workmanship and stock to be of equal excellence, — by other reputable concerns.

5. The United Company shall use its best endeavors to sell such machines and parts as are herein named, and will allow the Stanley Company, at its own expense, to advertise said machines and parts,

and also in all proper ways create a market demand for such machines and parts.

6. The United Company shall purchase from the Stanley Company all Merrick Eyeletting Machines and parts for the same which the Stanley Company has on hand, as fast as the same are required to fill orders received from Boot and Shoe Manufacturers, and pay for the same, — the price to be determined in the same way as for the other machines and parts herein referred to.

7. The United Company, during the continuance of this agreement, shall employ the Stanley Company, upon terms herein referred to, to manufacture such Merrick Eyeletting Machines and parts as the United Company shall have any demand for, to sell or put in use. If at any time after the expiration of this agreement the Stanley Company shall elect to discontinue the manufacture of Boot and Shoe Machinery exclusively for the United Company, then the United Company shall have the right to return any Merrick Eyeletting Machines, Merrick Sewing Machines, or Machines enumerated in the list of machines herein contained, and parts for said machines then on hand and purchased of the Stanley Company, and the Stanley Company shall pay therefor at the price paid to the Stanley Company by the United Company.

8. This agreement shall continue in force for three years from the date hereof and thereafter until one of the parties hereto shall give three months' notice in writing to the other of its intention to terminate the same.

In Witness Whereof the said United Shoe Machinery Company and the said Stanley Manufacturing Company have caused these presents to be duly executed on the day and year as above written.

United Shoe Machinery Co.
by S. W. Winslow, President.

[SEAL] Stanley Manufacturing Co.
F. F. Stanley, Principal Trustee.

EXHIBIT H.

This Indenture made this fifteenth day of June, in the year one thousand nine hundred and ten by and between the Stanley Manufacturing Company, an unincorporated Association, of which Frank F. Stanley is Principal Trustee, and George E. Gilbert as successor to Charles S. Randall, deceased, and Henry F. Tapley, as successor to Amos F. Tapley, deceased, are Associate Trustees, party of the first part, and Thomas G. Plant, of Boston, Massachusetts, party of the second part, Witnesseth:

That the party of the first part does hereby demise and lease unto the party of the second part two certain lots of land containing about forty-six thousand (46,000) square feet more or less with the buildings and improvements thereon situated in Lawrence, in the County of Middlesex in said Commonwealth of Massachusetts, and described as follows: —

First: A lot on the south side of Haverhill Street — the northeast corner thereof being the point of intersection of the south line of said street with the west line of West Street, and bounded northerly two hundred twenty-seven 29/100 feet by the south line of said Haverhill Street, easterly two hundred thirty 23/100 feet by the west line of West Street — southerly one hundred fifty-seven 59/100 feet by land formerly of J. Wiley Edmands — westerly two hundred fifty-one 26/100 feet by the east line of the Boston and Maine Railroad.

Second: A lot bounded as follows: Beginning at the northeasterly corner of the said lot by land of the grantor first above described at a driveway leading from Bradford Street, then running southerly sixty-five 65/100 feet by said driveway to land now or late of the Pacific Mills, thence running westerly at right angles forty-five 19/100 feet on land now or late of said Pacific Mills, thence running northwesterly sixty-eight 27/100 feet by land now or late of the Boston and Maine Railroad Company, thence running easterly sixty-three 89/100 feet by said land of the grantor first above described to the first bound. Being lot numbered ten on a plan of tenement lots of said Pacific Mills dated June 27th, 1884.

Also a right of way over and the right to lay and maintain drains and gas and water pipes under the several driveways and passageways shown on said plan, and the right conveyed by deed of the Pacific Mills to the Stanley Manufacturing Company of Massachusetts, dated July 29th, 1884, to the use of the pump in the driveway near said Bradford Street; all said rights to be exercised in common with other owners of lands shown on said plan.

Being the same premises conveyed to the said Frank F. Stanley, as Principal Trustee, and Amos P. Tapley and Charles S. Randall, as Associate Trustees, by deed dated March 29, 1892, and recorded with Northern District Essex Registry of Deeds, Book 118, Page 17.

Also all the following goods and chattels namely; All the patterns, special fixtures, jigs, and gauges, and all the tools, machinery and appliances of every kind, both common and special now owned by said Stanley Manufacturing Company and situated on the buildings on the above described real estate and itemized in the schedule which is hereto annexed and marked "Exhibit A," together with various other fixtures, tools, implements and small articles, and also sample machines belonging to said Stanley Manufacturing Company and situated in said buildings and not specifically enumerated in said schedule, the receipt of all of which said goods and chattels of every kind, whether or not enumerated in said schedule, is hereby acknowledged by said lessee. Also all the interest and good will of the said Stanley Manufacturing Company in the shoe machinery business; Excepting Only from this lease and Agreement to sell, all labelling and bottling and filling machines, and gasoline motors and all parts of all such machines, both finished and unfinished, and all patterns, jigs, gauges and special tools and implements used for manufacturing such labelling, bottling and filling machines and gasoline motors.

To Have and to Hold the said real estate and the said goods and chattels hereby leased unto the said Thomas G. Plant, his heirs, executors and administrators for the term of five years, beginning on the first day of July in the year one thousand nine hundred and ten; or until said leased real estate and personal property shall be

purchased by the said Thomas G. Plant as hereinafter provided, if that event shall first occur.

Yielding and paying therefor the yearly rental of seven thousand five hundred dollars (7500) during said term, by equal monthly payments of six hundred and twenty-five dollars ($625), the first payment to be made on the first of August, 1910, the same amount on the first day of September, 1910, and the same amount on the first day of each and every month thereafter during the continuance of this lease.

And the said Thomas G. Plant does hereby, for himself, his heirs, executors and administrators, covenant with the said Stanley Manufacturing Company, its successors and assigns, that he or they will during said term pay unto the said Stanley Manufacturing Company, its successors or assigns, the rent hereby reserved at the time herein provided (except only as hereinafter provided); and will pay all taxes, betterments, water rates, and assessments of every kind whatsoever which may be assessed or imposed upon or in respect of the leased premises and property, or any part thereof, during said term; and will also keep all and singular the leased premises and the leased personal property in such repair, order and condition as the same are in at the commencement of said term, or may be put in during the continuance thereof, reasonable wear and tear alone excepted, and will not make or suffer any strip or waste of the leased premises or property and will save the lessor harmless from all loss or damage or claim for damages arising from neglect in not removing snow or ice from the roof of the buildings, or from the side-walks bordering upon the leased premises; and that no unlawful, improper or offensive trade or business shall be carried on upon the leased premises; and that the lessor, its successors and assigns, at all reasonable times, may enter upon the leased premises to view the same; it being expressly understood and agreed, however, that the lessor shall not be bound to make any repairs or improvements or be liable for any damage to property on the leased premises; and that all repairs and improvements of whatever nature to the buildings on the demised premises, inside or outside, and to the personal property hereby leased, are to be

made by and at the expense of the said Thomas G. Plant, his heirs, executors and administrators.

And the said Thomas G. Plant for himself, his heirs, executors and administrators, does also covenant and agree that he or they will not assign this lease or underlet or sublet any part of said leased estate or personal property, without first obtaining the assent in writing of the said Stanley Manufacturing Company, its successors or assigns; and that he, his heirs, executors and administrators will at all times keep the buildings on said leased premises insured against loss by fire and other hazards in companies satisfactory to the lessor, its successors or assigns, by policies approved by and issued and payable to the said Stanley Manufacturing Company, its successors or assigns, but paid for by the said Thomas G. Plant, his heirs, executors or administrators, to the amount of one hundred thousand dollars; and will keep said leased goods and chattels and personal property of every kind insured against loss by fire and other hazards in companies satisfactory to the lessor, its successors or assigns, by policies approved by and issued and payable to it or them, but paid for by the said Thomas G. Plant, his heirs, executors or administrators to the amount of fifty thousand dollars ($50,000); and that, in case he or they do not procure such insurance, the said Stanley Manufacturing Company, its successors or assigns, may forthwith proceed to do so, and that he or they will, on demand, repay all sums paid as premiums for all such insurance by said Stanley Manufacturing Company, its successors and assigns.

And the said Thomas G. Plant does also covenant and agree for himself, his heirs, executors and administrators that on or before the expiration of the term of this lease, to wit, on or before the thirtieth day of June, in the year 1915, he or they will purchase from said Stanley Manufacturing Company, its successors or assigns, said real estate and said personal property hereinbefore described and hereby leased, and will pay therefor to said Stanley Manufacturing Company, its successors or assigns, the full sum of $150,000 in cash; or, in case of loss or damage by fire or other casualty to said leased real estate or said personal property, or to

both, he or they will, on or before said thirtieth day of June, 1915, purchase whatever shall remain of said leased real estate and personal property, and will pay therefor the full sum of $150,000 less such amount as the said Stanley Manufacturing Company, its successors or assigns shall then have received and retained as hereinafter provided, for insurance on the leased personal property so injured or destroyed.

And the said Thomas G. Plant, for himself, his heirs, executors and administrators does further covenant and agree that in case he or they shall, for any reason, at any time, during the continuance of this lease, fail to pay the rent as herein stipulated, or fail to keep said leased premises and leased personal property insured as herein provided for, or in case of any breach on the part of the said Thomas G. Plant, his heirs, executors or administrators, of any of the covenants or agreements contained in this Instrument by him or them to be kept, or performed, then upon written request of the said Stanley Manufacturing Company, made at any time after such breach and while the same continues, he or they will, within thirty days after such request in writing, if such breach shall not have been cured in the meantime, purchase said leased real estate and said personal property and will pay therefor the sum of $150,000 in cash; or in case of any loss or damage by fire or other casualty to the said leased real estate or personal property, or to both, he or they will purchase whatever shall remain of said leased real estate and personal property, and will pay therefor the full sum of $150,000, less such amount as the said Stanley Manufacturing Company, its successors or assigns shall then have received and retained as hereinafter provided, for insurance on the leased personal property so injured or destroyed.

And the said Thomas G. Plant, for himself, his heirs, executors and administrators does further covenant and agree that in case he or they shall, at any time during the continuance of this lease, to-wit, before the thirtieth day of June, 1915, sell his machinery business to the United Shoe Machinery Company, then he or they will forthwith purchase said leased real estate and said personal property and will pay therefor the sum of $150,000 in cash; or in

case of any loss or damage by fire or other casualty to the said leased real estate or personal property, or to both, he or they will purchase whatever shall remain of said leased real estate and personal property, and will pay therefor the full sum of $150,000, less such amount as the said Stanley Manufacturing Company, its successors or assigns shall then have received and retained as hereinafter provided, for insurance on the leased personal property so injured or destroyed.

And the said Stanley Manufacturing Company, for itself, its successors and assigns covenants that in any of the cases aforesaid it will, on the receipt from said Thomas G. Plant, his heirs, executors or administrators, of said sum of $150,000 in cash, as hereinbefore provided; or, in case of loss or damage by fire or other casualty as hereinafter provided, will, on the receipt from him or them of said sum of $150,000, less such amount, as it or its successors or assigns shall have received and retained from insurance, on said leased personal property as aforesaid, execute and deliver a good and sufficient Quitclaim Deed of all said leased real estate and Bill of Sale of said leased personal property, or such portion thereof as may then remain, with covenants of warranty against any and all incumbrances made or suffered by said Stanley Manufacturing Company, its successors or assigns, but against none other.

And it is hereby distinctly understood and agreed that in case any attachment or lien of any kind or nature shall be hereafter made or placed upon the real estate or the personal property hereby leased, in any suit or proceedings founded on or growing out of a certain Instrument, dated May 1, 1901, between the United Shoe Machinery Company and said Stanley Manufacturing Company, such attachment shall not be treated or considered as an incumbrance or lien made or suffered by the said Stanley Manufacturing Company, on said leased real estate and personal property within the meaning of the covenants herein contained regarding a conveyance of said leased real estate and personal property to the said Thomas G. Plant, but any such attachment or lien shall be construed and treated as an obligation to be assumed and discharged

by the said Thomas G. Plant, his heirs, executors or administrators under the covenants by him contained in an Instrument of even date herewith, in and by which said instrument he assumes all the liabilities and obligations of said Stanley Manufacturing Company under said Agreement dated May 1, 1901, and covenanted for himself, his heirs, executors and administrators that he and they will forever hereafter save the said Stanley Manufacturing Company, its successors and assigns, harmless and indemnified from and against any and all claims of every nature and kind by the said United Shoe Machinery Company against the said Stanley Manufacturing Company, based on or in any way growing out of aforesaid contract of May 1, 1901.

And it is hereby further distinctly understood and agreed that in case of any loss or damage by fire or otherwise to the buildings on said leased premises, or to the personal property hereby leased, or to both, during the term of this lease, the said Thomas G. Plant, his heirs, executors or administrators may, at his or their option, at any time within thirty days thereafter, in writing, notify the said Stanley Manufacturing Company, its successors or assigns of his or their election to purchase immediately said leased real estate and what may remain of said leased personal property, and to pay therefor the sum of $150,000 in cash, and upon the said Plant, his heirs, executors or administrators giving such notice and making such payment, he or they shall be entitled to receive from said Stanley Manufacturing Company, its successors or assigns, a Quitclaim Deed of said leased real estate and a Bill of Sale of said leased personal property, with covenants as hereinbefore provided, and also shall be entitled to receive and retain as his own any and all sums received as insurance on the property destroyed or injured, and upon such transfers being made this lease and agreement and all rights of the parties thereunder shall cease and be determined.

And if, in case of any such loss, the said Plant, his heirs, executors or administrators shall not notify the said Stanley Manufacturing Company, its successors or assigns, in writing, within thirty days as aforesaid, of his election at once to purchase all the leased property, both real and personal, and pay for the same as herein-

before provided, then the said Stanley Manufacturing Company, its successors or assigns may, at its election, notify the said Plant, in writing, within thirty days next following the expiration of the option of the said Plant, that it, the said Stanley Manufacturing Company, its successors or assigns, elects to retain all the money received by it for insurance on the property injured or destroyed and to terminate this lease and agreement and to retain, as its own, all the leased property, both real and personal, and thereupon this lease and agreement and all rights of the parties thereunder shall cease and be determined.

And if, in case of such loss or damage, neither the said Plant, his heirs, executors or administrators, nor the said Stanley Manufacturing Company, its successors or assigns, shall give notice to the other in writing as aforesaid of election to take the insurance money and property and to terminate this lease and Agreement as hereinbefore provided may be done, then the said Stanley Manufacturing Company, its successors or assigns shall retain and hold as its own any and all moneys received for insurance or personal property and shall apply the same on account of said sum of $150,000 to be paid as aforesaid and the annual rental of $7500, payable under this lease, shall thereafter be reduced by an amount equal to five per cent per annum on the sum so received and retained by said lessor for insurance on said leased personal property, and the said Thomas G. Plant, his heirs, executors or administrators shall be entitled to receive from said Stanley Manufacturing Company, its successors or assigns all moneys received for insurance on said leased buildings and real estate and shall, as promptly as may be, apply all moneys so received to the restoration and repairing of said leased buildings to their original condition as nearly as may be with such reasonable alterations and improvements therein as may be mutually agreed upon by said lessor and lessee; and except as to the reduction of rental as herein provided all the covenants, conditions and agreements in this instrument shall apply and be in force as to the leased property in all respects as before.

In case of any sale of the premises and property hereby leased being consumated and payment made as herein provided for at any

time before the expiration of said term of five years, this Instrument shall thereupon terminate and be of no further force or effect. And in case of any sale and purchase under any of the terms of this Instrument, as hereinbefore provided, the rental provided for hereunder shall continue to be paid by the said lessee to the lessor, and shall be paid pro rata for any unexpired term, until such sale shall be actually completed and the purchase money of $150,000 shall be paid as hereinbefore provided.

In Witness Whereof the said Stanley Manufacturing Company, unincorporated, has caused this Instrument to be duly executed, and the said Thomas G. Plant has set his hand and seal to this Instrument, in duplicate, on the day and year first above written.

EXHIBIT I.

This Agreement made this fifteenth day of June, 1910, by and between the Stanley Manufacturing Company, an unincorporated Association, of Boston, Massachusetts, party of the first part, and Thomas G. Plant, of said Boston, party of the second part, Witnesseth, as follows:

1. The said party of the second part hereby covenants and agrees to manufacture in a good and workmanlike manner and of good material, for the party of the first part, at the factory in Lawrence, Massachusetts, that has been this day leased to him by the party of the first part, all such labelling, washing and filling machines and parts for the same, as the said party of the first part may hereafter need to enable it to meet the demands of its business and as the party of the second part may find it convenient to make. And the said party of the second part also covenants and agrees to keep in good and substantial repair, so far as he conveniently can, until the first day of January, 1911, all patterns and special tools

of the party of the first part, used in the manufacture of such labelling, washing and filling machines and parts for the same.

2. And for the manufacture of such labelling, washing and filling machines and parts for the same, and for keeping in repair the said patterns and special tools, the party of the first part covenants and agrees to pay to the party of the second part, as follows: (1) The amount paid for labor; (2) The cost of materials used, and (3) An expense account equal to eight cents for each hour of labor on such machines and parts; and in addition thereto to pay a sum equal to 15% on the aggregate of the above three items — payment to be made by the said party of the first part to said party of the second part, for all such manufacturing and repair work, on or before the fifteenth day of the month next following that in which the work is completed and is ready for delivery.

And it is agreed that the covenants and agreements herein contained shall extend to and bind the successors and assigns of the said Stanley Manufacturing Company and the heirs, executors and administrators of the said Thomas G. Plant.

In Witness Whereof the said Stanley Manufacturing Company, unincorporated, has caused this instrument to be duly executed, and the said Thomas G. Plant has set his hand to this Instrument, in duplicate, on the day and year first above written.

Stanley Manufacturing Company

Exhibit XX.

Memorandum in Relation to Thomas G. Plant Company.

Thomas G. Plant Company is a corporation organized under the laws of New Jersey with an outstanding capital stock of $2,500,000. (25,000 shares) preferred stock and $1,250,000. (12,500 shares) common stock; par value of stock $100. per share.

Of the preferred stock, Thomas G. Plant owns 15,000 shares.

Of the common stock, Thomas G. Plant owns 7,500 shares.

Thomas G. Plant Company had as of November 24, 1909 assets and liabilities as per statement herewith attached and had a record of earnings as per schedule of same hereto attached.

Since November 24, 1909 the Company has purchased shoe machinery from Thomas G. Plant at a cost of not over $400,000. and has made expenditures from time to time in connection with running, maintaining and the up-keep of such machinery, and in connection with the same and rearrangement of factory, etc. in connection with the same, and has further made expenditures on account of special advertising and various other special expenses, legal and otherwise, all more or less directly connected with shoe machinery. Other than such expenditures and payments for additions to plant and improvement of plant and grounds, the affairs of the Company have proceeded in a normal manner and no substantial portion of its capital has been withdrawn or paid out other than the usual dividends. The net assets of the Company at this date, September 23, 1910, after payment of all liabilities are in excess of the net assets as shown on annexed statement as of November 24, 1909.

Thomas G. Plant Company Balance Sheet November 24, 1909.

	$54,900.
Stanley Company	
Miscellaneous supplies	$4,000.
Thomas G. Plant	
Wire	$37,500.
Tools, Machine	1,500.
	$97,900.

In addition are drop forgings and other things. The total will not exceed $150.000. (including said $97,900.)

PLAINTIFF'S EXHIBIT 133.

[Put in Evidence, page 591.]

Know all Men by these Presents that I the undersigned, Thomas G. Plant, of Boston, Massachusetts, in consideration of the sum of one dollar ($1.00) and other good and valuable considerations to me in hand paid by the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, the receipt whereof is hereby acknowledged, do hereby sell, assign, transfer, set over and deliver unto said United Shoe Machinery Company, its successors and assigns, one million five hundred thousand dollars ($1,500,000) par (fifteen thousand (15,000) shares) of preferred stock and seven hundred and fifty thousand dollars ($750,000) par (seven thousand five hundred (7,500) shares) of the common stock of the Thomas G. Plant Company, a corporation organized and existing under the laws of said State of New Jersey, and having a usual place of business at Roxbury, Massachusetts, a description of which Company, including a statement concerning its assets, liabilities and earnings is hereto attached marked "XX".

And for the same consideration I the said Thomas G. Plant hereby covenant with and warrant to the said United Shoe Machinery Company, its successors and assigns, that the facts as set forth in said description and statement are true and that the said description and statement correctly show the condition of the said Thomas G. Plant Company as to assets and liabilities.

And for the same consideration I do hereby further covenant and agree to and with the said United Shoe Machinery Company that I will simultaneously with the execution hereof cause the certificates now outstanding representing said shares of stock above provided to be conveyed to be cancelled and new certificates therefor to be issued in the name of said United Shoe Machinery Company or of such persons or corporations as the President of the United Shoe Machinery Company shall designate to receive the same.

And for the same consideration I do hereby further covenant and agree that, inasmuch as I have long been identified as officer and

manager of the said Thomas G. Plant Company with the business of said Thomas G. Plant Company and that as the good will of said Thomas G. Plant Company is a very important asset which might be seriously affected should I hereafter engage in business in competition therewith, I will upon request enter into a covenant with said Thomas G. Plant Company or said United Shoe Machinery Company or with any persons or corporations to whom the said United Shoe Machinery Company shall transfer the above stock, or with any or all of them, that I will not at any time within the period of fifteen (15) years from the date hereof directly or indirectly, in any capacity, individually or in combination with others enter into or be engaged in any business of manufacturing shoes which will in any wise interfere or compete with the business of the said Thomas G. Plant Company, its successors or assigns.

In Witness Whereof I have hereunto set my hand and seal this thirtieth day of September, 1910.

THOMAS G. PLANT [SEAL]

[MEMO BY CLERK. Attached here to Plaintiff's Exhibit 133 is Exhibit XX, but same is not here reproduced as it will be found printed in this record pages 1013 to 1016, inclusive, as a part of Exhibit 132.]

PLAINTIFF'S EXHIBIT 134.

[Put in Evidence, page 591.]

Know all Men by these Presents that I, Thomas G. Plant, of Boston in the State of Massachusetts, in consideration of the sum of one dollar ($1.00) and other good and valuable considerations to me paid by the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, receipt of which in full I hereby acknowledge, have sold and do hereby sell, assign, transfer, set over and deliver unto the said United Shoe Machinery Company, —

(a) All inventions, improvements, Letters Patent of the United States and of other countries, applications for Letters Patent and interests and rights in, to and under inventions, improvements,

Letters Patent and applications for Letters Patent which I the said Thomas G. Plant now own or control or which at any time hereafter within fifteen (15) years from the date hereof I shall make, own or acquire relating to the manufacture of footwear or to machinery, mechanisms, tools or devices, processes, methods or things intended or adapted for use in the manufacture of footwear or in the working or manipulation of leather, or relating to eyelets or to footwear findings of any description whatsoever, or to the manufacture thereof; also any and all rights I now have or may within said fifteen (15) years by agreement or otherwise have to acquire or take over any such inventions, improvements, Letters Patent of the United States and other countries, applications for Letters Patent and interests and rights therein, thereunder or thereto, including herein without prejudice to the generality hereof the entire right, title and interest, free from any and all prior license, grant or other incumbrance whatsoever, in, to and under each and every of the Letters Patent and applications for Letters Patent enumerated in the schedules hereto annexed and marked "Exhibit A" and "Exhibit B" together with the inventions and improvements covered thereby; and any and all trademarks, trade names, labels, marks or trade devices associated or used with or in reference to said inventions, or improvements or any of them or machinery embodying the same or any thereof;

(b) All rights, claims and demands, under agreement or otherwise, for the use of inventions or for infringement of Letters Patent;

(c) All beneficial interests, benefits, privileges, advantages and rights which I have or to which I am entitled under contracts or agreements or otherwise relating in any way to machinery, mechanisms, tools or devices, processes, methods or things intended or adapted for use in the manufacture of footwear or in the working or manipulation of leather, or relating to eyelets or to footwear findings of any description whatsoever or to the manufacture thereof;

(d) The entire contents of the machine shop located in the Pevear Building, 507 Washington Street, Lynn, Massachusetts,

including full equipment of large machine tools, small tools, machine shop equipment, etc., etc., (not including however shafting, pulleys, belts, etc., furnished by the landlord);

(e) All patterns, tools jigs, etc., built for the purpose of manufacturing the "Wonder Worker Shoe Machinery" so-called, including all such patterns, tools, jigs, etc., located at the place of business of the Bresnahan Shoe Machinery Company, in said Lynn, at said machine shop in said Pevear Building, in said Lynn, at the places of business of C. P. Stanbon & Company, Lynn, Massachusetts; Taft-Pierce Manufacturing Company, Woonsocket, Rhode Island; Stanley Manufacturing Company, Lawrence, Massachusetts; National Machine & Tool Company, Boston, Massachusetts; C. H. Cowdray Machine Works, Fitchburg, Massachusetts; and Lockwood Manufacturing Company, Boston, Massachusetts.

(f) All completed shoe machinery and machinery in process of manufacture, manufactured parts in stock, parts in process of manufacture and materials located at Bismarck Street, Jamaica Plain, Boston, Massachusetts; at Machine Shop No. 1, Bickford Street, Boston, Massachusetts; at said places of business of said Bresnahan Shoe Machinery Company, C. P. Stanbon & Company, Taft-Pierce Manufacturing Company, Stanley Manufacturing Company, National Machine & Tool Company, C. H. Cowdray Machine Works, and Lockwood Manufacturing Company;

(g) All machine tools, small tools, jigs, patterns, machines in process of manufacture, fixtures, office furniture, etc., located at said place of business of said Stanley Manufacturing Company, Lawrence, Massachusetts;

(h) And also all right, title and interest which I have or to which I am in anywise entitled in or to any and all other manufacturing equipment, machines, machine tools, tools, special tools, jigs, patterns, drawings, blue prints, fixtures, merchandise, supplies, mechanisms, devices, processes, methods, and other property useful or adapted or designed for use in the manufacture, or in connection with the manufacture, of footwear, or in the manufacture, working or manipulation of leather, eyelets, or footwear findings of any description whatsoever, or useful or designed or

adapted for use in the manufacture, or in connection with the manufacture of machinery, mechanisms, tools, devices, or other things intended or adapted for use in the manufacture, or in connection with the manufacture, of footwear, or the manufacture, working or manipulation of leather, eyelets, or footwear findings of any description whatsoever;

(i) All outstanding insurance relating to any of the foregoing;

To Have and to Hold all of the said inventions, improvements, Letters Patent, property, interests and rights to the said United Shoe Machinery Company, its successors and assigns, to its and their own use and behoof absolutely.

And for the same consideration I the said Thomas G. Plant do hereby covenant with and warrant to the said United Shoe Machinery Company that I am at the date of this instrument the absolute owner free from prior license, grant, claim or other incumbrance whatsoever of the entire right, title and interest in, to and under each of the Letters Patent and applications for Letters Patent mentioned in the schedules hereto annexed and marked "Exhibit A" and "Exhibit B" and the inventions covered thereby and of each and every of the items of property, inrerests and rights hereinbefore enumerated and expressed to be conveyed; that I have good right to sell, assign, transfer, set over and deliver the same as aforesaid and that I will warrant and defend the same against the lawful claims and demands of all persons.

And for the same consideration I the said Thomas G. Plant do hereby covenant and agree to and with the said United Shoe Machinery Company that I will at once promptly and fully disclose to the said United Shoe Machinery Company all inventions, improvements, Letters Patent, applications for Letters Patent and other property, interests and rights hereby conveyed or expressed or agreed to be conveyed that I now have and that I will promptly disclose all other such inventions, improvements, Letters Patent, applications for Letters Patent and other property, interests and rights as and when I acquire or have the same so that such disclosure is possible, will repeat such disclosures and make further disclosures if and when the same shall become necessary or shall

be requested; and that at any and all times hereafter upon request I will execute and cause to be executed any and all applications for Letters Patent, assignments, powers of attorney and other instruments and will perform and cause to be performed any and all other acts which may be necessary or desired by the said United Shoe Machinery Company to enable it to secure the grant to it or its nominees of Letters Patent of the United States and of any and all other countries where the said United Shoe Machinery Company may desire to obtain Letters Patent therefor, covering the inventions and improvements or any of them, now or hereafter owned or controlled by me and hereby conveyed or expressed or agreed to be conveyed, and to fully and completely vest and confirm the full and complete legal and equitable title thereto and to all the inventions, improvements, Letters Patent, applications for Letters Patent, property, interests and rights hereby conveyed or expressed or agreed to be conveyed in the said United Shoe Machinery Company or its nominees, its or their successors or assigns, and to enable the said United Shoe Machinery Company to secure, protect and enjoy the full benefits and advantages thereof — all without further consideration than that now paid and hereinbefore acknowledged, but at the expense of the said United Shoe Machinery Company.

And for the same consideration I the said Thomas G. Plant do hereby irrevocably constitute and appoint the said United Shoe Machinery Company my lawful attorney with power of substitution, with full authority and power in my name or in the name of the said United Shoe Machinery Company or otherwise, but at its or their own expense and cost, to institute, prosecute and defend any actions at law, in equity or otherwise, and to do any and all other acts which the said United Shoe Machinery Company may consider necessary or desirable to secure and to protect and enforce the full benefits and advantages of all the said inventions, improvements, Letters Patent, applications for Letters Patent, property, interests and rights now or hereafter owned, acquired or controlled by me and hereby conveyed or expressed or agreed to be conveyed.

The term "United Shoe Machinery Company" wherever herein

used shall include said United Shoe Machinery Company, its successors and assigns.

All covenants, agreements and warranties on the part of the said Thomas G. Plant herein contained shall be binding upon and enforceable against the said Thomas G. Plant and his personal representatives.

In Witness Whereof I, the said Thomas G. Plant, have hereunto set my hand and seal this thirtieth day of September, 1910.

THOS. G. PLANT [SEAL]

United States of America.
Commonwealth of Massachusetts.
County of Suffolk, ss.

At Boston, in said County and Commonwealth, on this thirtieth day of September, 1910, personally appeared Thomas G. Plant, of Boston, Massachusetts to me known and known to me to be the person described in and who executed the foregoing instrument and acknowledged the foregoing instrument to be his free act and deed, before me

[SEAL] Robert F. Herrick, Notary Public.

[MEMO BY CLERK. Attached here to Plaintiff's Exhibit 134 are Exhibits A and B, but same are not here reproduced as they will be found printed in this record, pages 938 to 971, inclusive, as a part of Exhibit 132.]

PLAINTIFF'S EXHIBIT 135.

[Put in Evidence, page 592.]

This Agreement made this thirtieth day of September, A. D. 1910, by and between the United Shoe Machinery Company, a corporation duly organized and existing under the laws of the State of New Jersey (hereinafter called the "United Company") and Thomas G. Plant of Boston in the County of Suffolk and Commonwealth of Massachusetts: Witnesseth:

That the United Company in consideration of one dollar ($1.00) and other valuable considerations to it paid by the said Plant hereby covenants and agrees with the said Plant that it will indemnify and

save harmless the said Plant from any and all actions, claims, liabilities and demands whatsoever which may at any time arise or grow out of an agreement in writing dated January 26, 1910, made by and between said Plant and the Keighley Company, a corporation organized under the laws of the State of New Jersey, a copy of which agreement is hereto annexed and marked "Exhibit E" by reason or on account of any breach of the conditions of said agreement or of any matter or thing connected therewith, excepting liability for amounts due or by reason of any breach or non-fulfillment of said contract, if any, prior to the date hereof; and in consideration of said covenant the said Plant covenants and agrees with the United Company that he will at all times exercise the rights, powers and privileges secured to him by said agreement solely as the United Company shall direct, and that he will upon request and without further consideration execute and deliver to the United Company a written assignment of said contract and of all rights, privileges, benefits and advantages accruing to him thereunder and also that he will at any time hereafter upon the request of the United Company give to the said Keighley Company six months notice in writing to annul said agreement, as therein provided.

The United Company hereby agrees that upon receipt of notification of any action or suit which may be brought by the said Keighley Company against the said Plant for breach of said contract, the United Company will assume the defence of the same, and will pay and hold the said Plant harmless against any judgment which may be rendered against said Plant therein as well as paying the expense of such defence and any costs which may be taxed against said Plant. It is further agreed that the said Plant shall not be held liable hereunder for failure to perform any act in respect to said contract hereafter, unless he shall have been requested in writing by the United Company to perform such act and omitted to do so after such request.

In Witness Whereof the parties hereto have executed this instrument in duplicate the day and year first above written.

[SEAL] UNITED SHOE MACHINERY COMPANY
By S. W. Winslow, President
THOS. G. PLANT [SEAL]

And Whereas United Shoe Machinery Company, of Paterson, in the State of New Jersey, a corporation duly organized under the laws of said State of New Jersey, and having a place of business at 205 Lincoln Street, in said Boston, in the said State of Massachusetts, hereinafter called the United Company, is desirous of acquiring the entire right, title and interest in, to and under the said Letters Patent, together with any and all inventions therein shown or described and together with any and all reissues, renewals or extensions of the said Letters Patent which may be granted;

Now, Therefore, in consideration of the sum of one dollar ($1.00) and other good and valuable considerations to me paid by the United Company, the receipt whereof is hereby acknowledged, I do hereby sell, assign, transfer and set over unto the United Company, its successors and assigns, the entire right, title and interest in, to and under the said Letters Patent and in and to all inventions therein shown or described, both for the United States and countries foreign thereto, together with any and all reissues, renewals or extensions of the said Letters Patent which may be granted;

To Have, to Hold and to Enjoy the said Letters Patent and the said inventions, reissues, renewals and extensions to said United Shoe Machinery Company, its successors and assigns, to its and their own use and behoof absolutely to the full end of the terms for which the said several Letters Patent and the said reissues, renewals and extensions are or may be granted;

And I do hereby, for myself and for my legal representatives, covenant and agree with the United Company, its successors and assigns, that I am the sole and exclusive owner of the said Letters Patent, that I have good right and title to sell and assign the same, and that I have not granted to others any license or licenses under

the said Letters Patent, except the unassignable right and license (but not exclusive), granted by me to Charles K. Fox, of Haverhill, Massachusetts, upon the twelfth day of February, Nineteen Hundred and Ten, to make and use last jacks embodying the invention or inventions described in claims 1 and 17 of Letters Patent of the United States, No. 958,278, for Shoe Jack, granted to me May 17, 1910, and to sell such jacks solely for use in connection with "Webster Sole Leveling Machines" or "Webster Machines."

And for the same consideration, I do hereby sell, assign, transfer and set over to the United Company, its successors and assigns, all claims and demands both at law and in equity which I have or may hereafter acquire on account of any infringement of the said Letters Patent, or any of them prior to the date hereof, and I do hereby authorize and empower the United Company, its successors and assigns, to sue for and collect the same, using my name if need be, to its and their own and absolute use.

For the same consideration I further sell, assign, transfer and set over unto the United Company any and all other Letters Patent of the United States and of any and all foreign countries and any and all other inventions, and all interests therein or thereunder, that I now own or to which I am or may be entitled, relating to footwear or parts thereof or to tools, machinery, or processes of manufacture for the making of footwear or parts thereof, with the view of vesting in the United Company all my right, title and interest in, to and under such Letters Patent and inventions, whether or not the same are specifically named in the above list.

And for the same consideration, I do hereby, for myself and for my legal representatives covenant and agree with the United Company, its successors and assigns, that I will and my legal representatives shall do all things and execute and deliver any and all application papers, assignments, and other instruments which in the opinion of counsel for the United Company may be necessary or convenient to carry out the terms and intent of this instrument, to secure reissues and renewals of said Letters Patent and to vest and confirm in the United Company, its successors and assigns, the full and complete legal and equitable title to the said Letters Patent

and to the said inventions, reissues, renewals and extensions without further consideration than now paid, but at the expense of the United Company, its successors or assigns.

In Witness Whereof, I the said Thomas G. Plant, have hereunto set my hand and affixed my seal this 27th day of September 1910.

THOMAS G. PLANT [SEAL]

United States of America.
State of Massachusetts.

County of Suffolk: ss. Boston, September 27, 1910.

Then personally appeared the above-named Thomas G. Plant, to me personally known, and known by me to be the person described in and who executed the foregoing instrument, and acknowledged the same to be his free act and deed. Before me,

[SEAL] Frederick L. Emery, Notary Public

PLAINTIFF'S EXHIBIT 137.

[Put in Evidence, page 592.]

Know all Men by these Presents that Whereas I, the undersigned, Thomas G. Plant, of Boston, Commonwealth of Massachusetts, have made certain claims against the United Shoe Machinery Company, a corporation organized under the laws of the State of New Jersey, and have planned to bring certain suits against said United Shoe Machinery Company;

Now Therefore in consideration of One Dollar and other good and valuable considerations, the receipt of which is hereby acknowledged, I, the said Thomas G. Plant, do hereby remise, release and forever discharge the said United Shoe Machinery Company, its successors and assigns, of and from all and all manner of actions and causes of action, suits, debts, dues, accounts, claims, liabilities, and demands of every name and nature in law or equity, which I ever had or may have or which my heirs, executors, administrators or assigns hereafter may have for or by reason of any cause, reason, matter or thing whatsoever arising prior to September 23rd, 1910, including any and all claims, demands or suits of any nature

held for me by others or in which I am entitled to the beneficial interest.

In Witness Whereof I have hereunto set my hand and seal this thirtieth day of September, 1910.

THOS. G. PLANT [SEAL]

PLAINTIFF'S EXHIBIT 138.

[Put in Evidence, page 598.]

This Agreement made this thirtieth day of September, 1910, by and between the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, party of the first part, and Thomas G. Plant, of Boston, party of the second part,

Whereas, the Manufacturers' Machine Company, a corporation duly organized and existing under the laws of the State of New Jersey, has entered into a certain agreement with Charles P. Stanbon, doing business under the firm name and style of Charles P. Stanbon & Company, dated May 29, 1905, a copy of which is hereto annexed marked "Exhibit D", providing, among other things, that said Manufacturers' Machine Company shall have an option to purchase the business, machinery, etc., of said Charles P. Stanbon at an inventory value, which agreement has been extended until November 1, 1910, and which agreement has been assigned and transferred by said Manufacturers' Machine Company, to said Plant, said transfer having been duly assented to by said Stanbon; and

Whereas, Manufacturers' Machine Company, as recited in said agreement, furnished the said Stanbon with a certain bond for five thousand dollars ($5,000), on which bond said Plant is responsible; and

Whereas, said Plant has this day notified said Stanbon of his intention to exercise the said option;

Now Therefore, it is agreed by and between the parties hereto as follows: —

1. Said Plant will at once assign to the United Shoe Machinery Company all his rights as assignee and all the rights of the said

Manufacturers' Machine Company of every name and nature under said contract with Charles P. Stanbon, expressly including the right to take the good will of the business of the said Charles P. Stanbon, stock, machinery, tools and patents and the right to require the services of said Charles P. Stanbon, all as provided in said agreement between said Manufacturers' Machine Company and Charles P. Stanbon.

2. United Shoe Machinery Company will assume all agreements, obligations and liabilities of said Plant under said contract with said Charles P. Stanbon and will save and indemnify said Manufacturers' Machine Company and said Plant harmless against the same, and particularly will procure the cancellation of the said bond and the release and discharge of all liability of the said Manufacturers' Machine Company and the said Thomas G. Plant thereon without cost or expense to the said Plant.

In Witness Whereof, the parties have hereunto set their hands and seals the day and year first above written.

THOS. G. PLANT [SEAL]

[SEAL] UNITED SHOE MACHINERY CO.

By S. W. Winslow, President.

[MEMO BY CLERK. — Attached here to Plaintiff's Exhibit 138 is Exhibit D, but same is not here reproduced as it will be found printed in this record, pages 972 to 975, inclusive, as a part of Exhibit 132.]

PLAINTIFF'S EXHIBIT 139.

[Put in Evidence, page 593.]

Know all Men by these Presents that whereas the United Shoe Machinery Company, a corporation organized under the laws of the State of New Jersey, has brought various suits and made various claims against Thomas G. Plant, of Boston, in the Commonwealth of Massachusetts;

Now Therefore in consideration of the sum of One Dollar and other good and valuable considerations, the receipt whereof is hereby acknowledged, the said United Shoe Machinery Company

does hereby remise, release and forever discharge the said Thomas G. Plant, his heirs, executors and administrators of and from all and all manner of actions and causes of action, suits, debts, accounts, agreements, claims, liabilities and demands whatsoever in law or equity, which it ever had or which it, its successors or assigns or any of them hereafter may have for or by reason of any matter, cause or thing whatsoever arising prior to September 23rd, 1910, including any and all claims, demands or suits of any nature held for it by others or in which it may be entitled to the beneficial interest.

In Witness Whereof the United Shoe Machinery Company has hereunto set its hand and seal this thirtieth day of September, 1910.

UNITED SHOE MACHINERY CO. [SEAL]
by S. W. Winslow, President.

PLAINTIFF'S EXHIBIT 140.

[Put in Evidence, page 593.]

This Agreement, made this thirtieth day of September, 1910, by and between Thomas G. Plant, of Boston, Massachusetts, and the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, Witnesseth:

Whereas, by a certain agreement dated the fifteenth day of June 1910, by and between the said Thomas G. Plant and the Stanley Manufacturing Company, an unincorporated Association, in said agreement more fully described (a copy of which agreement is hereto attached marked "Exhibit H") a lease of certain property, real and personal, was made by the Stanley Manufacturing Company to the said Thomas G. Plant and certain agreements were entered into relating to the purchase by the said Thomas G. Plant from the said Stanley Manufacturing Company of said real estate and other property; and

Whereas, by a certain other agreement, dated said fifteenth day of June, 1910, by and between the said Thomas G. Plant and the said Stanley Manufacturing Company (a copy of which agreement is hereto attached marked "Exhibit G") the said Stanley Manu-

facturing Company purported to convey to the said Thomas G. Plant all its rights, title and interest in and under an agreement (a copy of which is thereto attached marked "A") dated the first day of May 1901, between the said Stanley Manufacturing Company and the said United Shoe Machinery Company, and the said Thomas G. Plant agreed to indemnify the said Stanley Manufacturing Company against certain obligations thereunder; and

Whereas, an agreement as hereinafter set forth has been made between the said Thomas G. Plant and the said United Shoe Machinery Company;

Now, Therefore, this Instrument Witnesseth: That the said Thomas G. Plant and said United Shoe Machinery Company, each in consideration of the covenants and agreements on the part of the other herein contained, do hereby covenant and agree each with the other as follows: —

(1) The said Plant hereby sells, assigns, transfers, and sets over unto the said United Shoe Machinery Company said agreements with said Stanley Manufacturing Company, a copy of each of which is hereto attached marked respectively "Exhibit G" and "Exhibit H", and all his rights, titles, benefits and interests thereunder.

(2) The said United Shoe Machinery Company hereby assumes said agreements (G and H) and agrees to hold the said Plant, his heirs, executors and administrators harmless from and against all liability to the said Stanley Manufacturing Company thereunder, excepting liability for amounts due or by reason of any breach or non-fulfillment of said contracts if any prior to the date hereof.

(3) The said Plant hereby constitutes and appoints the said United Shoe Machinery Company his lawful attorney with power of substitution in his name, or in the name of the United Shoe Machinery Company, or otherwise, but at the sole expense and cost of said United Company to take any actions and to do any things which may be necessary or desired by the said United Shoe Machinery Company to secure, protect, and enforce all of said benefits, advantages and rights and to defend against any and all claims arising under said contracts or either of them, and hereby agrees, if so requested, to co-operate with the said United Shoe Machinery

Company in adjusting or disposing, as the said United Shoe Machinery Company desire, of all interest, rights, claims, demands and liabilities under said contracts or either of them.

In Witness Whereof, the parties hereto have duly executed this instrument in duplicate the day and year first above written.

THOMAS G. PLANT [SEAL]
UNITED SHOE MACHINERY CO. [SEAL]
by S. W. Winslow President.

[MEMO BY CLERK. — Attached here to Plaintiff's Exhibit 140 are Exhibits G and H, but same are not here reproduced as they will be found printed in this record, pages 983 to 1012, inclusive, as a part of Exhibit 132.]

PLAINTIFF'S EXHIBIT 141.

[Put in Evidence, page 593.]

Know all Men by these Presents

Whereas, United Shoe Machinery Company has simultaneously with the delivery hereof delivered to me, Thomas G. Plant, a general release of all claims which it may have against me, arising prior to September 23, 1910, and

Whereas, said United Shoe Machinery Company has entered into various other contracts and agreements with me, the said Plant; and

Whereas, the Bresnahan Shoe Machinery Company has simultaneously herewith executed a transfer to the said United Shoe Machinery Company of all its property and assets of every name and nature, including its notes and accounts receivable and all other indebtedness due it; and

Whereas, I, the said Plant, am indebted to the said Bresnahan Shoe Machinery Company,

Now, Therefore, I the said Thomas G. Plant, hereby covenant and agree with the said United Shoe Machinery Company, its successors and assigns that nothing in said release delivered by said United Shoe Machinery Company to me, and nothing in any other

agreements or documents executed and delivered by said United Shoe Machinery Company to me, shall be deemed or held to be a release of any sums or indebtedness owing by me to said Bresnahan Shoe Machinery Company, or deemed to be a release of any other claims which said Bresnahan Shoe Machinery Company has against me, and which have been so assigned, or intended to be so assigned to said United Shoe Machinery Company, I hereby agreeing that I, the said Thomas G. Plant, will pay all claims or indebtedness so due by me in full.

In Witness Whereof, I have hereunto set my hand and seal this thirtieth day of September 1910.

THOMAS G. PLANT [SEAL]

PLAINTIFF'S EXHIBIT 142.

[Put in Evidence, page 593.]

This Agreement made this thirtieth day of September A. D. 1910, by and between Thomas G. Plant of Boston, County of Suffolk and Commonwealth of Massachusetts, and United Shoe Machinery Company, a corporation duly organized and existing under the laws of the State of New Jersey (hereinafter called the "United Company"), Witnesseth:

That in consideration of one dollar ($1.00) and other valuable considerations to him paid by the United Company, the receipt whereof is hereby acknowledged, the said Plant does hereby assign, transfer and set over unto the United Company two (2) certain contracts both dated the fifteenth day of June, 1910, one made by and between the said Plant and The Stanley Company, a corporation organized under the laws of the State of Massachusetts and relating to the manufacture of gasoline motors and other matters and things as therein set forth, and the other made by and between said Plant and the Stanley Manufacturing Company, an unincorporated association and relating to the manufacture of labelling, washing and filling machines, and all interests, benefits, advantages and rights arising out of said contracts or either of them, or in any way accruing to the said Plant by reason thereof.

To Have and to Hold the same to the said United Company and its successors and assigns to their own use and behoof forever.

And in consideration of the foregoing assignment the United Company assumes the obligations of said Plant in said contracts and agrees to indemnify and save harmless the said Plant and his heirs, executors and administrators forever from any and all manner of actions, claims, liabilities and demands which may hereafter arise or grow out of said contracts or either of them, or the nonfulfilment or breach thereof except by reason of any breach in the performance or observance of said contracts or either of them by said Plant or those having his interest in the premises occurring prior hereto.

And for the same consideration the said Plant hereby covenants and agrees that all conditions, stipulations and agreements contained in said contracts by him to be observed and performed prior hereto have been fully and completely observed and performed and that all sums of money which by the terms of said first mentioned contract should have been paid by the said Plant to said The Stanley Company prior hereto have been fully paid and satisfied and that at the date of this instrument the said Plant is not in default under said contracts or either of them by reason or on account of any matter or thing whatsoever.

And for the same consideration the said Plant further covenants and agrees to and with the United Company that the two papers hereto annexed and marked respectively "Exhibit F" and "Exhibit I" are true and complete copies of said contracts of June 15, 1910, above referred to, and set forth the entire agreements of the parties thereto relative to the matters and things therein included and that neither of said contracts has been in any way extended or modified.

And for the same consideration the said Plant hereby irrevocably constitutes and appoints the United Company his attorney with power of substitution, in his name or otherwise but at its own cost to prosecute or defend any actions at law or in equity to execute and deliver all instruments in writing, and generally to perform all acts which may be necessary, proper or desirable to enable

the United Company or its assigns to secure, protect and enforce the interests, benefits, advantages and rights hereby transferred.

In Witness Whereof the said parties have executed this instrument in duplicate this day of September 1910.

THOMAS G. PLANT [SEAL]

[SEAL] UNITED SHOE MACHINERY COMPANY
by S. W. Winslow, President.

[MEMO BY CLERK.— Attached here to Plaintiff's Exhibit 142 is Exhibit F, but same is not here reproduced as it will be found printed in this record, pages 978 to 983, inclusive, as a part of Exhibit 132.]

EXHIBIT I.

This Agreement made this fifteenth day of June, 1910, by and between the Stanley Manufacturing Company, an unincorporated Association, of Boston, Massachusetts, party of the first part, and Thomas G. Plant, of said Boston, party of the second part, Witnesseth, as follows:

1. The said party of the second part hereby covenants and agrees to manufacture in a good and workmanlike manner and of good material, for the party of the first part, at the factory in Lawrence, Massachusetts, that has been this day leased to him by the party of the first part all such labelling, washing and filling machines and parts for the same, as the said party of the first part may hereafter need to enable it to meet the demands of its business and as the party of the second part may find it convenient to make. And the said party of the second part also covenants and agrees to keep in good and substantial repair, so far as he conveniently can, until the first day of January, 1911, all patterns and special tools of the party of the first part, used in the manufacture of such labelling, washing and filling machines and parts for the same.

2. And for the manufacture of such labelling, washing and filling machines and parts for the same, and for keeping in repair the said patterns and special tools, the party of the first part covenants

and agrees to pay to the party of the second part, as follows: (1) The amount paid for labor; (2) The cost of materials used, and (3) An expense account equal to eight cents for each hour of labor on such machines and parts; and in addition thereto to pay a sum equal to 15% on the aggregate of the above three items — payment to be made by the said party of the first part to said party of the second part, for all such manufacturing and repair work, on or before the fifteenth day of the month next following that in which the work is completed and is ready for delivery.

And it is agreed that the covenants and agreements herein contained shall extend to and bind the successors and assigns of the said Stanley Manufacturing Company and the heirs, executors and administrators of the said Thomas G. Plant.

In Witness Whereof the said Stanley Manufacturing Company, unincorporated, has caused this Instrument to be duly executed, and the said Thomas G. Plant has set his hand to this Instrument, in duplicate, on the day and year first above written.

PLAINTIFF'S EXHIBIT 143.

[Put in Evidence, page 594.]

This agreement made this twenty-second day of November, A. D. 1910, by and between Adam H. Prenzel of Halifax, Pennsylvania, United States of America, (hereinafter called the "vendor") and the United Shoe Machinery Company, a corporation duly organized and existing under the laws of the State of New Jersey, (hereinafter called the "United Company"), Witnesseth:

That Whereas the vendor has represented to the United Company that he has heretofore invented new and useful improvements relating to footwear and to methods, machinery, mechanisms, processes and devices useful or adapted for use in the manufacture of

footwear and more particularly of that class of footwear known as "turned" footwear and that he is the owner free from encumbrances of certain Letters Patent of the United States of America and of certain applications for such Letters Patent, all as set forth in the Schedule hereto annexed and marked "Schedule A" and of the inventions and improvements covered thereby,

And Whereas the vendor has also represented to the United Company that he is the owner of the entire right, title and interest, free from encumbrances in Letters Patent of the United States, No. 965,656, dated July 26, 1910, and of a fractional interest in three (3) certain other Letters Patent of the United States, all as set forth in the Schedule hereto annexed and marked "Schedule B",

And Whereas the vendor desires to dispose of all said inventions and improvements, Letters Patent of the United States and applications for and fractional interest in Letters Patent, and also all the property, interest, benefits and rights hereinafter mentioned, and the United Company desires to acquire said inventions, improvements, Letters Patent, applications for and interests in Letters Patent, property, interests, benefits and rights, and also to secure the benefit of the covenants and agreements on the part of the vendor hereinafter contained.

Now, Therefore, the vendor, in consideration of the sum of eight thousand dollars ($8,000) to him in hand paid by the United Company, the receipt whereof is hereby acknowledged, and in further consideration of the covenants and agreements on the part of the United Company hereinafter contained, does hereby sell, assign, transfer, set over and convey to the United Company free from all prior grants, licenses or other encumbrances whatsoever, all the inventions and improvements above mentioned, all rights, benefits and interests in, to and under the Letters Patent of the United States of America and the applications for Letters Patent of the United States of America mentioned in "Schedule A" and the interests in the Letters Patent of the United States of America as mentioned in said "Schedule B", and does likewise sell, assign, transfer, set over and convey to the United Company, free from all prior grants, licenses or other encumbrances whatsoever any and

all other inventions, improvements, Letters Patent and applications for Letters Patent, both of the United States of America and of any and all other countries, and interests and rights in, to or under inventions, improvements, Letters Patent or applications for Letters Patent which may in any way relate to or be intended or adapted for use in or in connection with footwear or relate to or be intended or adapted for use in or in connection with machinery, tools, mechanisms, appliances, devices, findings, supplies, methods, processes or things relating or pertaining to or designed or adapted for use in or in the manufacture of footwear or the working or manipulation of leather which the vendor now owns or has any right, by agreement or otherwise, to take over or which the vendor shall make, own, acquire or have any right by agreement or otherwise to acquire or take over at any time prior to the expiration of the full term of the Letters Patent mentioned in said "Schedule A" or which may be obtained upon any applications for Letters Patent mentioned in said "Schedule A", which shall last expire, or the expiration of the full term of any extensions, re-issues or renewals thereof.

And for the same consideration the vendor hereby sells, and delivers unto the United Company all machinery, tools, mechanisms, devices, jigs, drawings, blueprints, patterns and other articles or things in his possession or control which are designed or adapted for use in or in connection with the inventions and improvements above mentioned, including all the machines and parts of machines embodying said inventions and improvements heretofore made or constructed or now in process of construction, and all material intended therefor, including especially, without prejudice to the generality of the foregoing conveyance, the machinery mentioned in the Schedule hereto annexed and marked "Schedule C."

To Have and to Hold all said inventions, improvements, Letters Patent, applications for and interests in Letters Patent, property, interests, benefits and rights to the said United Company and its successors and assigns to its and their own use and behoof forever.

1. And for the same consideration the vendor hereby covenants and agrees with the United Company that he is the owner, free

from any and all grants, licenses or other encumbrances, whatsoever, of the entire legal and equitable right, title and interest in, to and under the Letters Patent and applications for Letters Patent enumerated in said "Schedule A" and in the inventions covered thereby and of the interests in Letters Patent as set forth in said "Schedule B" and the inventions and improvements covered thereby, and that he will warrant and defend the same to the United Company against the lawful claims and demands of all persons whomsoever.

2. And for the same consideration the vendor hereby further covenants and agrees to and with the United Company that he will forthwith fully and completely disclose to the United Company and all such of its officers and patent solicitors as may be designated by the United Company therefor, all inventions, improvements, Letters Patent, applications for Letters Patent, interests and rights which are included within the terms of the foregoing assignment now owned by him or which he has any right by agreement or otherwise to acquire or take over, and that at any and all times hereafter, upon making, acquiring or owning or obtaining any right by agreement or otherwise to acquire or take over any invention, improvement, Letters Patent, applications for or interests in Letters Patent, interest or right, hereinbefore conveyed or expressed or agreed to be conveyed he will promptly disclose the same to the United Company, its officers and patent solicitors, that he will repeat such disclosures when and as often as may be requested and that at any and all times upon request he will execute and cause to be executed any and all preliminary statements, applications, powers of attorney, assignments and other instruments and will perform or cause to be performed any and all acts necessary or desired by the United Company to obtain Letters Patent of the United States and of any and all countries in which the United Company may desire to obtain Letters Patent covering in such form as the United Company may desire, the inventions and improvements or any of them by this instrument conveyed or expressed or agreed to be conveyed and to fully and completely vest and confirm in the United Company or its nominee all such Letters

Patent and all inventions, improvements, Letters Patent, applications for and interests in Letters Patent, property, interests, benefits and rights, whether heretofore or hereafter made or acquired by this instrument conveyed or expressed or agreed to be conveyed and to enable the United Company to enjoy the full benefits and advantages thereof, all without further consideration; but the United Company shall, however, assume and pay the entire expense of hereafter obtaining Letters Patent covering said inventions and improvements by this instrument conveyed or expressed or agreed to be conveyed.

3. Subject to the provisions herein contained the United Company hereby covenants and agrees with the vendor that, during the continuance in force and apparent validity of any of the Letters Patent mentioned in "Schedule A" hereto annexed or of any Letters Patent of the United States of America which may be obtained by the United Company by virtue hereof covering the inventions and improvements included in the applications for Letters Patent mentioned in "Schedule A" or any of them, of any extensions, re-issues or renewals thereof, the United Company will pay to the vendor one-fourth part of any rent or royalty received by the United Company for the use of said inventions or any of them from lessees holding under lease from it machines, mechanisms or devices embodying the inventions and improvements protected by such Letters Patent or any of them included in said "Schedule A" and leased by the United Company for use in the United States of America.

4. The United Company hereby agrees that whenever in any quarter year ending with the last day of December, March, June, or September in any year any payment shall have become due to the vendor under the provisions of the preceding paragraph hereof, the United Company will on or before the last day of the next succeeding calendar month render to the vendor a statement showing the amount so due and at the same time will accompany such statement with payment thereof.

5. In case and whenever at any time the total amounts paid to

the vendor by the United Company under the provisions of this agreement, including the sum of eight thousand dollars ($8,000) which is paid on the day of the execution hereof, have together reached the total amount of seventy-five thousand dollars ($75,000) all obligations of the United Company under this agreement shall immediately cease and determine and the vendor thereafter shall have no claim to the payment of any further sum or sums of money or otherwise ander this agreement or in respect to the inventions, improvements, Letters Patent, applications for Letters Patent, and interests in Letters Patent, property, interests, benefits and rights hereby conveyed or expressed or agreed to be conveyed.

6. The expense, if any, of defending the inventions purporting to be covered by the Letters Patent or any of them referred to in paragraph 3 hereof against claims of infringement, if any such claims shall be made, of Letters Patent owned by others, shall be borne by the vendor, including the satisfaction of judgments, if any, which may be obtained by reason thereof against the United Company or its licensees.

The expense, if any, of prosecuting claims by the United Company of infringement by others of the Letters Patent or any of them referred to in said paragraph 3 hereof, shall be divided between the United Company and the vendor in the proportion of three-fourths (¾) to the United Company and one-fourth (¼) to the vendor.

The United Company shall, if it so elects, take charge of any such litigation, either by or against it or its licensees, and may if it so elects pay all the expenses thereof in the first instance, and the vendor shall (to the extent above provided) reimburse the United Company therefor.

7. The expression "United Company" wherever herein used shall include the said United Shoe Machinery Company, its successors and assigns, and all agreements herein contained binding upon the vendor shall be binding upon him and his heirs, executors, administrators and assigns.

In Witness Whereof the parties have hereto and to another

instrument of like tenor set their hands and seals the day and year first above written.

PLAINTIFF'S EXHIBIT 144.

[Put in Evidence, page 597.]

This agreement, made this nineteenth day of December, A. D., 1910, by and between Maurice V. Bresnahan, William H. Bresnahan and John J. Donlan, all of Lynn in the County of Essex and Commonwealth of Massachusetts (hereinafter referred to as "the parties of the first part"), both individually and as they are copartners doing business in said Lynn and elsewhere under the firm name and style of "M. V. Bresnahan & Co.", and the United Shoe Machinery Company, a corporation duly organized and existing under the laws of the State of New Jersey, having a usual place of business in Boston in the County of Suffolk and Commonwealth of Massachusetts (hereinafter called the "United Company"), Witnesseth: —

That whereas said parties of the first part have heretofore been engaged, jointly or severally, in the business of developing and dealing in and with machinery, tools, mechanisms and devices, useful or intended or adapted for use in the manufacture of boots and shoes and are jointly or severally the owners of property relating to such business and desire to dispose of all said business with the good-will thereof and property as hereinafter set forth to the said

United Company and to enter into the warranties, covenants and agreements hereinafter set forth:

Now, therefore, the parties of the first part and each of them, in consideration of the payment hereinafter provided to be made and the covenants and agreements on the part of the said United Company hereinafter contained, and the said United Company in consideration of the sales, transfers and assignments hereinafter set forth and the warranties, covenants and agreements on the part of the said parties of the first part hereinafter contained, do hereby covenant and agree, each with the other, as follows:

1. The parties of the first part and each of them do hereby jointly and severally sell, assign, transfer, set over and deliver to the United Company any and all business heretofore carried on by them or any of them relating or pertaining in any way to manufacturing or dealing in machinery, mechanisms, tools or devices intended or adapted for use in the manufacture of boots and shoes, including herein without prejudice to the generality of the foregoing the said business heretofore carried on under the firm name and style of "M. V. Bresnahan & Co." together with the goodwill of all the business hereby conveyed and all property, interests and rights of every name and nature relating or pertaining thereto, whether owned or possessed by the parties to the first part jointly or severally, including herein without prejudice to the generality of the foregoing all trade names, marks and brands, inventions, improvements, Letters Patent and applications for Letters Patent of the United States and of any and all other countries and any and all interests and rights therein, thereunder or thereto, whether jointly or severally owned, all machinery, mechanisms, tools and devices intended or adapted for use in the manufacture of boots and shoes, all stock on hand, raw, wrought or in process of manufacture, all patterns, blue prints, drawings, jigs, tools, special tools, furniture, supplies, manufacturing machinery and equipment, relating or pertaining in any way to or used in any such business; excepting however, cash on hand or on deposit and bills and accounts receivable on account of business done prior to the date of this sale.

To Have and to Hold all of said property, interests and rights to said United Shoe Machinery Company, its successors and assigns, to its and their own use and behoof absolutely.

An inventory of property of the said M. V. Bresnahan & Co. has been prepared by the parties of the first part as of the first day of December, 1910, which is identified by the signatures of the parties of the first part and by the signature of Geo. H. Vose in behalf of the United Company and a summary of the same is hereto attached and marked "Schedule A"; and the parties of the first part do hereby jointly and severally covenant with and warrant to the said United Company, that the property hereby conveyed includes (together with other property, interests and rights) all of the property set forth in said inventory, excepting such as has been used by the said parties of the first part in the regular and useful course of business since the said first day of December, 1910; that they are the sole owners of the entire right, title and interest in all said property; that they have good right to convey the same as aforesaid; that said property is free from all incumbrances; and that they will and their heirs and executors shall warrant and defend the same to the United Company against the lawful claims and demands of all persons; and further that they will forthwith discharge or cause to be discharged all liabilities, direct or contingent, of said partnership or relating or pertaining in any way to any of the property, interests or rights hereby conveyed or expressed or agreed so to be.

2. The parties of the first part and each of them do hereby jointly and severally sell, assign, transfer and set over to the said United Company any and all inventions, improvements, Letters Patent of the United States and of any and all other countries and interests and rights in, to and under inventions, improvements, Letters Patent and applications for Letters Patent relating or pertaining in any way to boots or shoes or to machinery, methods, processes, mechanisms, tools or devices intended or adapted for use in the manufacture thereof, which they or either or any of them now have or have any right by agreement or otherwise to acquire or take over, or which they or either or any of them shall at any time

within ten (10) years from the date hereof or at any time during the continuance of the employment of them or any of them by the said United Company, or at any time within ten (10) years after the termination of any such employment, make (whether or not during regular working hours and whether upon the premises of the United Company or elsewhere), own, control or have any right by agreement or otherwise to acquire or take over.

3. The parties of the first part and each of them do hereby jointly and severally covenant and agree to and with the said United Company that they will forthwith disclose to the said United Company any and all inventions, improvements, Letters Patent, applications for Letters Patent, property, interests and rights now possessed by them or any of them or which they or any of them now have or have any right by agreement or otherwise to acquire or take over which are included in the terms of the foregoing assignments; and that at any and all times hereafter upon making any invention or improvement, or acquiring any invention, improvement, Letters Patent, application for Letters Patent, interest or right, included within the terms of the foregoing assignment they will forthwith disclose the same to the said United Company, its officers and patent solicitors; that they will repeat any and all such disclosures when and as often as requested, and that they will, upon request, execute and cause to be executed any and all proper applications for Letters Patent, assignments and other instruments, and will perform and cause to be performed any and all other proper acts which may be necessary or desired by the said United Company to enable the said United Company or its nominees to obtain Letters Patent for said inventions or any of them in whatever countries the United Company may so desire, and to fully and completely vest and confirm in the said United Company or its nominees all of the inventions, improvements, Letters Patent, property, interests and rights hereby conveyed or expressed or agreed so to be conveyed —all without further compensation but at the expense of the United Company.

4. It is hereby covenanted and agreed by and between the United Company and each of the parties of the first part that each of the

parties of the first part shall forthwith enter the employ of the United Company and shall be given employment by the United Company. Each of the parties of the first part does hereby covenant and agree to and with the United Company that during the continuance of his employment by the United Company he will well and faithfully serve the United Company and that he will during the continuance of such employment devote his time, services and skill exclusively to the accomplishment of such purposes and the performance of such duties as shall be assigned to him by the United Company.

The said Maurice V. Bresnahan is to be employed (during the continuance of his employment by the said United Company) by the said United Company for at least six (6) months in each year, or less at his option, and for such employment the said United Company are to pay the said Maurice V. Bresnahan at the rate of Ten Thousand Dollars ($10,000) per year, payment at such rate to be made for such portions of each year only as the said Maurice V. Bresnahan shall be engaged in active work for the said United Company.

The said William H. Bresnahan shall, during the continuance of his employment devote his entire time to the duties of his said employment under the direction of Charles H. Willson, now of the United Company, and shall receive compensation at the rate of not less than One Thousand Dollars ($1,000) per year.

The said John J. Donlan, during the continuance of his employment by the said United Company, shall devote his entire time to the duties of said employment in the United States unless otherwise mutually agreed and shall receive compensation for said employment at the rate of not less than Forty Dollars ($40.00) per week.

The employment of each of the respective parties of the first part by the United Company shall continue for the term of three (3) years from the respective dates at which they shall begin work for the said United Company and thereafter for such further period or periods as may be mutually desired until terminated by notice from either party to the other.

5. The parties of the first part and each of them do hereby covenant and agree to and with the said United Company that, excepting as employees of the United Company, they will not nor will either or any of them at any time within ten (10) years from the date hereof or at any time during the continuance of the employment of them or any of them by the said United Company or at any time within ten (10) years after the termination of any such employment, without the consent in writing of the United Company first obtained, directly or indirectly, in any capacity, individually or in combination with another or others, as officer or stockholder of a corporation, as owner, principal, agent, employee or otherwise, enter into or be engaged or interested in or financially or otherwise assist any person, firm or corporation, in entering into, developing or carrying on any business which relates or pertains in any way to manufacturing, selling or otherwise dealing in any machinery, tools, mechanisms, methods, devices or processes useful or adapted for use in the manufacture of boots or shoes, or inventions, improvements, or Letters Patent relating or pertaining thereto or in any business which will in any way interfere or compete with the business of the said United Company therein or in imitating or infringing any trade name, mark or brand or any Letters Patent owned by said United Company.

6. The parties of the first part and each of them do hereby remise, release and forever discharge the United Company and every corporation owned or controlled by the United Company, and its and their officers and agents, of and from all manner of actions, causes of action, suits, debts, accounts, agreements, bonds, liabilities, judgments, claims and demands whatsoever, at law or in equity, which they or any of them now have or have ever had or which they or any of them, their heirs, executors, administrators or assigns, hereafter may have for or by reason of any matter, cause or thing whatsoever arising prior to the date of this instrument, whether brought in their names or in the names of any of them, or in the name of the Bresnahan Shoe Machinery Company or in the name of M. V. Bresnahan & Co., or otherwise, including any and all claims, demands and suits of any nature held for them

or any of them by others or in which they or any of them may be entitled to the interest.

7. The United Company, as full consideration for the covenants, warranties and agreements on the part of the parties of the first part, and each of them herein contained, and for the transfers and assignments herein made or provided for, hereby covenants and agrees to pay to the parties of the first part immediately upon the execution hereof the sum of twenty-five thousand dollars ($25,000) which payment may be made to Maurice V. Bresnahan as representing the parties of the first part who is hereby authorized by said parties of the first part to receive and receipt for the same, and the United Company shall not be in any way responsible for the application or apportionment thereof among the parties of the first part.

8. The term "United Company" as herein used shall be held to include the said United Shoe Machinery Company and its successors and assigns, and all covenants, warranties and agreements binding upon the parties of the first part shall be binding on them and on ther legal representatives.

In Witness Whereof, the parties hereto have hereunto set their hands and seals the day and year first above written.

[Put in Evidence, page 599.]

[Letter-Head of C. P. Stanbon & Co.]

270 Broad Street, Lynn, Mass., April 22, 1911.

Received from United Shoe Machinery Company One Hundred Twenty two thousand Seven hundred and Thirty five and 82/100 ($122735.82) in full of purchase price for business property good-will as per instruments executed this day. Other instruments to be executed if called for. The bond for $5000 referred to in agreement of May 29, 1905 between the undersigned and Manufacturers Machine Co. is hereby cancelled and released.

CHAS. P. STANBON.

Know all Men by these Presents:

That I, Charles P. Stanbon, of Lynn, in the County of Essex and Commonwealth of Massachusetts, heretofore engaged in the business of manufacturing and dealing in and with machinery, tools, mechanisms, parts, devices, findings, supplies, and things for use in the manufacture of footwear (hereinafter referred to as "shoe machinery") under the firm name and style of Charles P. Stanbon & Company, in consideration of the sum of One Dollar ($1.00) and other good and valuable considerations to me in hand paid by the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, and having a usual place of business in Boston, Massachusetts, (hereafter called the "United Company"), the receipt whereof is hereby acknowledged, have sold and do hereby sell, assign, transfer, set over, and deliver to the said United Company all my said business together with the good-will thereof and all stock on hand raw, wrought or in process of manufacture, machinery, tools, mechanisms, parts, devices, supplies, findings, and things, all manufacturing equipment, leases, contracts, and other agreements which I now have or in which I have any beneficial interest, office furniture and equipment, inventions, improvements, Letters Patent, application for Letters Patent (of the United States and other countries)

and all interests and rights therein, thereunder or thereto which I now own or which I have any right to acquire or take over, convey or cause to be conveyed in or relating to shoe machinery and any and all inventions, improvements, Letters Patent, applications for Letters Patent (both of the United States and other countries) interests and rights which I may at any time hereafter so long as in the employ of the United Company make, own, acquire or have any right by agreement or otherwise to take over, convey or cause to be conveyed in, relating or pertaining to shoe machinery, all jigs, tools, special tools, patterns, blue-prints and drawings, and any and all other property forming a part of, used in or accessory to, or in any way relating or pertaining to said business and particularly, all and singular the property referred to in an appraisal made by Harry I. Illingworth of said Lynn, copies of which are now in my possession and in the possession of the said United Company.

To have and to hold all and singular the property, interests and rights hereby conveyed to the said United Shoe Machinery Company, its successors and assigns to its and their own use and behoof forever.

And for the same consideration I do hereby covenant with and warrant to the said United Shoe Machinery Company that I am the true and lawful owner of all the property, interests and rights hereby conveyed; that I have good right to sell and assign the same as aforesaid; that the same are free from any and all encumbrances and that I will and my heirs, executors and administrators shall warrant and defend the same to the said United Shoe Machinery Company, its successors and assigns against the lawful claims and demands of all persons.

And for the same consideration I, the said Stanbon, do hereby covenant and agree to and with the said United Company that I will not at any time so long as in the employ of the United Co., directly or indirectly, individually or in combination with another or others, as principal, partner, agent, owner, manager, employee, or representative or as stockholder or officer of the corporation or otherwise, in any way whatsoever, enter into or be engaged or

interested in, or financially or otherwise assist any other person, firm or corporation in entering into, engaging in, dealing in, developing or carrying on any business which consists in whole or in part of, or relates or pertains in any way to manufacturing or dealing in shoe machinery, or which will in anywise compete or interfere with the business of the said United Company, its successors or assigns.

And for the same consideration I, the said Stanbon, do hereby covenant and agree to and with the said United Company, that I will promptly disclose to the said United Company, its officers, attorneys or patent solicitors, any and all inventions, improvements, Letters Patent, applications for Letters Patent, (of the United States and of all other countries) and interests or rights therein, thereuder or thereto, which I now own or control or have any right by agreement or otherwise to acquire, take over, convey or cause to be conveyed, in or relating or pertaining in any way to shoe machinery, will repeat such disclosures and fully explain the same as often as may be requested, and that I will and my heirs, executors and administrators shall perform or cause to be performed all such acts and will execute or cause to be executed any and all such applications, specifications, powers of attorney, assignments or other instruments in such manner and form as the said United Company or its counsel for the time being shall deem proper to obtain the grant of Letters Patent of the United States and of any and all other countries where it may be desired to obtain Letters Patent covering the inventions and improvements, or any of them, hereby conveyed or provided to be conveyed, and to fully and completely vest and confirm in the said United Company, its nominee or nominées, so far as is within my power or the power of my heirs, executors or administrators, full and complete right, title and interest in, to and under all such inventions, improvements, Letters Patent, applications for Letters Patent, property, interests and rights, hereby conveyed or provided so to be, and to enable the said United Company to secure and enjoy the full benefits and advantages thereof.

In Witness Whereof I, the said Charles P. Stanbon, have here-

unto set my hand and seal this twenty-second day of April, A. D. 1911.

CHAS. P. STANBON [SEAL]

Commonwealth of Massachusetts.

Essex, ss. Lynn, April 22, 1911.

Then personally appeared the above named Charles P. Stanbon, to me known and known to me to be the person described in and who executed the foregoing instrument and acknowledged that he executed the same as his free act and deed. Before me,

[SEAL] Harold G. Donham, Notary Public

[Put in Evidence, page 726.]

UNITED SHOE MACHINERY CO.
Albany Building
205 Lincoln Street
Boston, Mass.

To the Lessees of the United Shoe Machinery Company: —

When the United Shoe Machinery Company was organized in 1899, it adopted this comprehensive policy: "To furnish a better service and equipment year by year at a constantly diminishing expense to its lessees."

To this policy it has consistently adhered in spite of the fact that the world was then entering on a period of high prices which has lasted ever since. While the leather and labor which go into the making of a shoe have grown more and more costly, there has been a steady decline in the cost to manufacturers of the machinery and supplies which the Company has provided.

It has furnished its lessees with the very best equipment attainable.

It has substituted improved machines for those which have become out of date.

It has substantially done away with payments for installation of machines.

It has reduced its rentals and royalties, sometimes directly, sometimes indirectly by furnishing auxiliary machines without additional royalty charge.

It has increased the number of its branch offices and the extent and efficiency of the service and assistance rendered to its lessees by its experts.

In order promptly to meet the requirements of its lessees and so give them a better service, it has increased its factory facilities from year to year and has just begun to build an addition containing more than two acres of floor space.

By reason of its large expenditures and investments, far in excess of the ability of any small corporation to make, it is to-day serving its customers, and through them the public, more effectively than would have been thought possible at the time of its formation; yet with less expense to manufacturers than ever before in the history of the trade.

The organization of the Company in 1899 resulted almost immediately in the lowering of the average royalty per pair paid by manufacturers who prior to its organization would have leased the same number and kind of machines from the different constituent companies out of which the United Shoe Machinery Company was formed. In no instance since that time have the average rates of royalty been raised, although the Company has expended several million dollars in improving the machines with which its lessees have been supplied, and, without additional royalty charge, has placed in factories numerous auxiliary machines. The average royalty direct and indirect now received by the Company for all classes of shoes is less than $2\frac{3}{4}$ cents per pair; and, in fact, an average payment of $2\frac{3}{4}$ cents per pair will cover the entire cost to shoe manufacturers of the mechanical equipment furnished by the Company, including all charges for depreciation, for the constant employment by the Company of the best experts of the world in the care and maintenance of machines and the instruction of operators, and of a large corps of inventors exclusively engaged in developing and improving machines. The Company keeps the entire outfit of the manufacturer at the highest point of efficiency

daily and hourly and places at his disposal all its facilities for that purpose.

Every year since its formation the Company has expended from $300,000 to $750,000 in maintaining its corps of inventors in the Experimental Department, and in the purchase and development of new inventions.

Nearly one hundred new machines have been produced by the Company, all of them materially better than the machines formerly in use and sixteen of them performing operations which, before their introduction, required skilled hand workmen. By the use of these new machines and improved devices, manufacturers can save annually in cost of production an amount greater than the entire amount of royalties paid at the time the Company was organized. The "Ideal Clicking Machine" alone, which has recently been introduced and which does work hitherto done by hand, should enable the manufacturer using it to save a sum equal to the average royalty now paid for the use of all machines leased by him from the Company. The economies in labor resulting from the use of other new machines range from ten per cent to fifty per cent, and usually with a marked improvement in the quality of the work.

Immediately after its formation, the Company was confronted with a proposition to increase to its lessees the price of material used in the machines of the Metallic Department (the profit on which constitutes the rental and royalty received by the Company from the machines in this department) such an increase having been determined upon by one of its constituent companies which made and leased Metallic Machines and which, had it remained a separate organization, would have been compelled to resort to an increase in the price of wire and fastenings in order to meet a marked advance in the price of copper. The United Shoe Machinery Company, relying upon economies in other departments, was able to maintain the existing rates and assumed the increased cost of production without imposing any part of the increase upon its customers. The policy then adopted has been followed consistently ever since, regardless of the market price of materials, and in many individual instances the Company has found it possible to lower its charges.

In its General Department alone, for instance, there has been a reduction in the price of seven hundred and fifty-five commodities, comprising findings and shoemakers' supplies, averaging 25.6 per cent.

Thus the shoe manufacturers, and through them the public, have benefitted substantially from the magnitude and great diversity of the Company's business. The fact that several companies of limited scope, each confined in its work to a particular class of operations, were gathered into a single large company of ample range and abundant facilities capable of supplying to its customers a complete and perfect system of machinery, has been an unqualified advantage to the trade.

Initial charges for the installation of machines were almost universal prior to 1899. Such charges have been gradually abolished; to the obvious advantage of the manufacturer. For example: — Under the lease premium formerly in force, machines of the Goodyear Department, for making five hundred pairs of Goodyear Welt shoes per day, required an initial payment of $2,845.00 for installation. Under the loan lease now in force, this payment has been replaced by a yearly rental of only $106.00. There is a corresponding saving to the manufacturer in equipping his factory with machines of all other departments in which initial payments have been abolished. Substantially the last of these payments was removed recently, when the Company began to offer to its lessees machines of the General Department, on rental terms so low as merely to care for the items of depreciation and replacement, without yielding any return for its services in looking after the machines.

Benefits of a character similar to those enumerated have marked the course of the Company from the very beginning; but it has never been its purpose to confine within limits determined in advance, its ability to enhance the prosperity of the trade. Always recognizing that it has a common interest with its lessees and that its prosperity depends upon theirs, it has long had in contemplation the following plan, which, now that the elimination of initial charges has been effected, it is prepared to put into operation —

a plan which is in conformity with its established policy and which it believes will result in the expansion of its own business through the increased business of its customers.

Beginning with January 1, 1910, the Company will create a fund by investing each year, for three years, in the common stock of the United Shoe Machinery Corporation a percentage, increasing each year, of the amounts received from its lessees for the use of its Goodyear Welting, Goodyear Stitching and Goodyear Turn Sewing Machines in the United States, and will add to that fund from time to time the dividends which shall have been paid in the meantime upon such stock, or shares of the common stock of the Corporation purchased with such dividends. At the end of three years from that date it will distribute the entire amount of stock held in the fund among those lessees who use the Goodyear Welting, Goodyear Stitching and Goodyear Turn Sewing Machines in the United States and who shall have faithfully observed the covenants of their leases; each lessee of these classes of machines to receive a share of the entire fund proportionate to the amounts paid by him for the use of such machines.

The beneficial interest of each lessee in the stock held in the fund, while undistributed, shall not be assignable by his own act or by operation of law, or be subject to attachment on mesne process, execution, or any legal process, and in the distribution thereof the Company will only recognize the lessees and their executors and administrators as entitled to share therein.

In the determination of all questions which may arise concerning the said fund and the distribution thereof, the Company reserves to itself the right of final decision.

Of the amount received from the use of Goodyear Welters and Stitchers in the United States, during the year ending December 31, 1910, not less than fifteen per cent will be invested in accordance with the foregoing plan, and of the amount so received from the use of the Goodyear Turn Sewing Machines, not less than 10 per cent will be so invested.

By order of the Board of Directors,

S. W. WINSLOW, President.

Boston, Mass., June 10, 1910.

PLAINTIFF'S EXHIBIT 147.

[Put in Evidence, page 819.]

THE FOLLOWING STATEMENT BY CHARLES H. JONES APPEARED IN THE SHOE AND LEATHER REPORTER, MAY 24, 1906.

The policy of the United Shoe Machinery Co. has not changed since that time.

[From Shoe & Leather Reporter, May 24, 1906.]

Bill relating to Machinery Leases — Many Interesting Points brought out in the Interview with Charles H. Jones, President of the Commonwealth Shoe and Leather Company.

Charles H. Jones, President of the Commonwealth Shoe and Leather Company, of Boston, with factories at Whitman, Mass., and in Maine, in an interview concerning the bill now before the Massachusetts Legislature, numbered 1297, in relation to the lease of machinery, alleged to be directed against the United Shoe Machinery Company, said:

"My attention was called especially to this bill yesterday morning by a neighbor, whose factories are not in the State of Massachusetts, with the request that I read the bill carefully and see where it was going to place Massachusetts manufacturers. Previous to that time I had only heard through newspaper reports that such a bill had passed the House, and presuming that it would be in some ways a benefit to the trade, had given it no further attention, but on looking it over with care it was soon apparent that while it was probably directed against the United Shoe Machinery Co. it would prove in fact, if passed, a serious blow to Massachusetts shoe manufacturers."

Replies of Mr. Jones to Questions Submitted.

"Q. Would it not be an advantage to the manufacturers if they could obtain, by legislation, free competition in shoe machinery, instead of the practical monopoly that is now understood to exist? — A. Anything would undoubtedly be a benefit to the shoe trade of Massachusetts that enabled them to obtain their shoe machinery

cheaper, or on more favorable terms, and if this bill was calculated to produce this result, you may be sure it would have the warmest support of all shoe manufacturers. Its actual result in practice, however, would be exactly the opposite.

"Q. To anyone not acquainted with the shoe business, this last statement seems very surprising. Would you mind explaining how it would operate against the interests of manufacturers here? — A. I shall be very glad to explain it, as I think every manufacturer in Massachusetts should be fully aware of the risk he is running if this bill becomes a law. If you will read the bill, you will find in substance that it forbids the United Shoe Machinery Co. from trying to bind, either by lease or by the giving of discounts, manufacturers to use their machinery exclusively. If this means anything, it means that if the United Shoe Machinery Co. sell or lease their machinery at prices so low, or on terms so favorable that manufacturers are compelled by their own interest to buy all their machinery of them, then under this law competing machinery manufacturers may show that such prices and discounts are unreasonable and force the company to advance them. If competition was to be promoted by causing some dealers to sell us our machinery on better terms, shoe manufacturers would be very glad to assist in passing the bill; but if present conditions are to be changed by compelling the United Shoe Machinery Co. to ask as much for their machinery as competing manufacturers see fit to ask, it means simply that we should have to pay more for our shoe machinery than we now pay, and we do not wish to have the State of Massachusetts force us, by law, to do any such thing. Of course, the word 'unreasonable' as applied to discounts on machinery or royalties is one which I cannot apply with any exactness, and so, of course, do not know what discount would be considered unreasonable and what would be considered reasonable; but I wish to obtain, both on machinery and royalties, the greatest possible discount, and do not want my privilege to do this to be curtailed by any law of the State.

"Of course, the proposed law would have no effect outside of the State of Massachusetts, and, if it should pass, the United Shoe

Machinery Co. would be undoubtedly put to some inconvenience and trouble in readjusting their leases to comply with the change in the law. It is inconceivable, however, that in its readjustment the manufacturers of Massachusetts would be allowed by them to obtain an advantage over the manufacturers in other States. The practical effect of the law would undoubtedly be this. The policy of the Machinery Co. would remain unchanged the world over, except in the case of Massachusetts. In this State we would be put to some disadvantage; how great or how little it is impossible for anyone to foresee today, but it is clearly evident that whatever inconvenience and increased expense the machinery company was caused by this bill, we manufacturers should have to pay.

"If that would be the result of the bill to shoe manufacturers, can you tell what interest is back of the bill? Who originated it and who is backing it for passage? — A. Of that I can only speak from hearsay. It is obvious that the only parties benefited would be the manufacturers of machinery who desire to compete with the United Shoe Machinery Co. The terms which the Machinery Co. have recently offered their patrons on certain lines of machinery are so liberal that the outsiders cannot compete. They apparently wish the company to be forced by law to change these terms to their level, and as the parties who would derive the benefit are usually the ones who cause the legislation, I think it is fair to assume that the statements which are publicly made, that the outside shoe machinery interests are back of this bill, are correct. It is certain that the shoe manufacturers, either individually or as a body, are not back of it. I personally never heard of it until after it had passed the House of Representatives, and in conversation with other manufacturers, during the past two days, have not found a single man who had ever been consulted, or, in fact, had any knowledge whatever in regard to it.

"Q. Is it not a fact, as claimed by the advocates of this bill, that the Shoe Machinery Co. is very arbitrary in its dealings with the shoe manufacturers, and that its large earnings are a heavy tax on the industry? — A. There are, undoubtedly, some clauses in the different leases which manufacturers are required to sign with the

Machinery Co. that give the impression that the company desires to bind the manufacturers, and limit them in their business action to an unreasonable extent. At the time of the organization of the Machinery Co. I resented very deeply what seemed to me the extreme and unfair advantage that they were taking of the power which they undoubtedly held over shoe manufacturers; but in the six or seven years, during which they have been in operation, I must say that I have waited in vain for any unfair or arbitrary use of this power on the part of the company; in fact, their dealings with us have been marked by more consideration than was formerly shown us by many of the constituent companies. It is a fact that must not be overlooked, that if the company is a despotism, it has been, up to this time, of the most benevolent type. It has actually reduced the prices on many of its machines; it has placed others in our hands on a rental system that has saved us a very large investment of capital; it has certainly given more faithful care and attention to the running of the machines and keeping them in order; and in our country factories, where we employ a large proportion of inexperienced help, they have given us more constant and faithful attention in instructing new operators, and in the supervision of the machinery under trying conditions, than we ever obtained from any of the constituent companies.

"Q. Has the charge for such service as you describe been increased over what you formerly paid?—A. I cannot say that it has. As far as I recall them, the royalties demanded by the company are the same, exactly in amount, that we have always paid. It is only fair to add that they have supplied us with many additional machines to do the minor parts of the work, without any charge at all. These machines have been of considerable value to us, both in the saving of labor and increasing the uniformity of the goods, and are such machines as would undoubtedly have cost us a round sum if the United Shoe Machinery Co. had not been in position to furnish them to us gratis.

"Q. The newspaper reports of the hearings at the Legislature made quite prominent the statement that exorbitant prices have been charged by the company for supplies. The prices of tacks

and nails in the open market and the price charged by the Shoe Machinery Co. were compared. Do these statements show the facts as they actually exist?— A. I did not see the statements, and so cannot answer that question; but if you wish to know whether the company is charging us an unfair price for tacks and nails, will say that this is entirely untrue. The royalty on some of their machines is derived from the price of the tacks and nails used on them; consequently, the price which they charge for the tacks and nails is certainly greater than the same thing could be bought in the market, for use by hand; but, as a matter of fact, the Shoe Machinery Co. charges us no more for tacks to-day than they did many years ago, when tacks in the open market were much cheaper than to-day; in fact, my impression is that they have actually reduced the price of tacks between 25 and 30 per cent., while every one knows that the cost of tacks and nails in the open market has advanced.

"Also in regard to eyelets, which they now manufacture extensively, we are paying them from 10 to 20 per cent. less than we formerly paid, although it is perfectly well known that the copper and spelter from which they are manufactured have advanced in price nearly 50 per cent. since 1899.

"Q. You do not seem to be one of the manufacturers who regard this trust as one of the burdens on the industry?— A. I must say that that is not my view to-day. I am by no means convinced that all their methods are the best, or that their policies might not be changed to make them more liberal in some respects; but I am very glad to say that the expectations I had of what was to be the result of this combination when it was formed have not been borne out by our experience. Up to this time, I do not believe any manufacturer who has been honest and straightforward in his dealings with the company can show any clear grievance against the company, or can make out the slightest case of crowding or coercion. On the contrary, I can say for ourselves, that the question of royalties and machinery, which was formerly one of the most vexatious and exacting departments of our business, has ceased to give us any concern at all. We were formerly

obliged to examine new inventions, and were forced to make experiments with machines for months at a time, with the result that we obtained more or less bad work and were put to much useless expense, and the thought and attention of our best men was given to deciding between the merits of the old and new. We were obliged to dicker and trade with every different manufacturer of machinery all the time with the moral certainty that somebody who had more time and attention to give to it would get a better bargain than we were able to obtain; and with it all there was an enormous and perpetual shrinkage on account of the changes made necessary by the introduction and adoption of machinery that was not thoroughly and satisfactorily developed before being placed on the market. To-day this is all changed. If we want a machine, we simply notify the company. Their agent confers with our foreman. The best machine known for doing the work is installed with little or no expense to us. We are obliged to pay a rental in some cases, which would amount to about the same as the yearly shrinkage in value of the machine if we had had to buy it, but the capital which we would formerly have been called upon to invest is still in our possession for use in our regular business. We are confident that we are getting the machine on as favorable terms as any competitor, and we are enabled to employ our own time and ability in the legitimate branches of our business, and we have not, up to this time, been obliged to pay as much for this privilege as we formerly paid, for the very much less satisfactory condition. It may be true that the Shoe Machinery Co. suppresses inventions, but my own experience with outside manufacturers during the past five or six years has gone quite a way toward convincing me that the outside inventor gets all the consideration from the company to which he is entitled. We have encouraged a few of them that we thought had good things, only to be sold out by them as soon as they could made a satisfactory trade with the company.

"I think it quite likely that the company buys and pays a good price for all that is valuable in the way of invention that is offered to them, and they certainly stand between the manufacturer and the inventor of crude and incomplete machines, and guarantee to us

that whatever is put on the market is a complete mechanical contrivance, capable of doing what they recommend. I have heard it stated that one of the strongest advocates before the Legislature for the passage of this bill was a man who had failed to force the Machinery Co. to pay him a salary of $5,000 a year for services which were worth nothing like that amount. This is perhaps what they call suppressing invention.

"Q. In your opinion, would this bill be a serious blow to the Machinery Co. if passed? — A. It would certainly cause them some inconvenience, in readjusting their leases and royalties, to comply with the change in the law, but nothing can prevent a company which has machinery of such value as theirs from making arrangements with manufacturers who desire to use it, which will be profitable to them. This bill will certainly not prevent them from doing this. They will accomplish exactly what they accomplish now in another way, and the manufacturer will simply have to pay the cost of the change. If it should prove on the passage of this bill that manufacturers in other States were able to get their machinery on more favorable terms, we should certainly know of it, as we have two factories located in the State of Maine. The margin on shoes to-day is so small, that even a fraction of the royalty we pay would necessitate our removing our factories from Massachusetts to Maine, or some other State, and I can see no way in which such a result as this would be a benefit to Massachusetts or any of her people."

PART OF PLAINTIFF'S EXHIBIT 148.

[Put in Evidence, page 903.]

To the Boston Lasting Machine Co., 110 Lincoln Street.

Boston, Mass.

We hereby order and agree to accept Two of your Lasting Machines, and to pay One Hundred and Fifty Dollars each for the same in Thirty Days from the date of their delivery to us. We further agree to sign your Company's usual lease at the time of payment above stated.

If the above machines are reshipped from our factory to the Bos-

ton Lasting Machine Co. within thirty days from our receipt of the same, then this agreement shall be null and void.

PLAINTIFF'S EXHIBIT 148.

[Put in Evidence, page 903.]

License and Lease, No.

This Lease and Agreement made the *Fifteenth* day of *April* A. D. 18*89*, by and between the Boston Lasting Machine Company, a corporation incorporated under the laws of the State of Maine, Lessors, and parties of the first part, and *Selz Schwab & Co. doing business Cor. Superior & Larabe St, Chicago Ill.* Lessee and party of the second part, witnesseth that

Whereas, the Lessors are the owners of the following Letters Patent of the United States, viz: —

No. 246,437, August 30, 1881, to Erastus Woodward.
" 248,544, October 18, 1881, to Erastus Woodward.
" 248,553, October 18, 1881, to John O. Bond.
" 251,755, January 3, 1882, to Erastus Woodward.
" 251,756, January 3, 1882, to Erastus Woodward.
" 254,421, February 28, 1882, to Erastus Woodward.
" 254,621, March 7, 1882, to Joseph E. Crisp.
" 254,756, March 7, 1882, to Erastus Woodward.
" 264,247, September 12, 1882, to Joseph E. Crisp.
" 389,275, September 11, 1888, to Erastus Woodward.

And others.

And Whereas, The Lessees desire to use the hereinafter described machines belonging to the Lessors,

Now, Therefore, the Lessors, in consideration of One Dollar to them paid by the Lessee, the receipt whereof is hereby acknowledged, and in further consideration of the stipulations and conditions hereinafter contained on the part of the Lessees, to be kept and performed, do lease unto the Lessees, the machines designated by their numbers in the following schedule, the said machines embodying the foregoing named patents or some of them: —

Lasting Machine Number Fifty Two (52)
" " " *Thirty Five (35)*

And the Lessors do hereby license the Lessees, and operatives in *Our* employment, to use said patented machines upon the terms and conditions herein set forth; provided, however, and this lease is made and this license granted on the express condition that the Lessees shall faithfully keep and perform all the conditions and stipulations herein contained on *Our* part to be kept and performed, and upon breach of the same or either of them by the Lessees, the Lessors may, at their option, cancel and terminate this lease and license, and upon written notice thereof by the Lessors or either of them, to the Lessees, or to any one in the possession of the machines, this lease and license shall terminate, and possession of said machines shall revest in the Lessors.

The following are agreed to as terms and conditions of the lease and license of said machines: —

First. The Lessees are by this lease and license authorized to use said machines only by *us;* or operatives in *Our* direct employ, and only in *Our Factory at Chicago Ill.*

We shall not add to nor subtract from said machines any mechanism whatever, nor make, nor allow to be made, any change or alteration in the same, without the written consent of the Lessors, and shall at all times, at *Our* own expense, keep and maintain said machines in substantially as good working order as the same are now in, or may hereafter be put in, by the Lessors.

Second. The lessors and their agents may, at all reasonable times, have convenient access to the machines to examine and inspect the same.

Third. The Lessees agree to require each laster to keep, in books to be furnished by this Company, a daily record of all the boots and shoes lasted, in whole or in part, upon or by the aid of any of the machines belonging to this Company, herein leased, or which may be in the possession of the Lessee, and to make oath to the correctness of said record when required so to do; and to permit the representatives of this Company, at all reasonable times, to inspect such daily records.

Fourth. The Lessees agree to pay to the Lessors, as rent or royalty for the machines hereby leased, or any one or more of them, and for the use of the patents hereby licensed, the sum of one cent for each and every pair of boots or shoes lasted by the aid of said machines, or any of them; provided, however, that in all cases when the Lessee shall remit or pay to the Lessors on or before the fifteenth day of each month, one half of a cent for each and every pair of boots or shoes thus lasted during the month preceding the month when such payment is made, and shall also have transmitted within the first five days of each month a true and accurate statement of the number of pairs of boots or shoes thus lasted in the month preceding, and shall have complied with all other conditions and requirements of this lease, then such payment of one half of a cent for each and every pair of boots or shoes shall be accepted in lieu of the full royalty of one cent per pair of boots or shoes thus lasted. And it is expressly understood that this abated royalty will not be accepted, except upon the conditions herein expressed.

Fifth. Said machines cannot be transferred, and this lease and license is not assignable by the Lessees by *their* own act or by operation of law.

Sixth. A transfer or removal of said machines can only be made with the written consent of the Lessors.

Seventh. All the rights and interests which, under this instrument and by reason of the ownership of said machines and patents and patent-rights belong to the Lessors, shall be deemed to belong to and may be enforced by the Lessors, their representatives and assigns, and all the stipulations binding on the Lessees shall be binding on his or their representatives.

Eighth. It is agreed that in case of the termination of this lease by written notice to the Lessees, as herein-before provided, and the taking possession by the Lessors of the machines herein leased, for breach of the conditions herein, the Lessors shall pay the Lessee the price paid to the Lessors for the possession of the machines under this lease, deducting therefrom

1st. Twenty per cent. for deterioration.

2d. Whatever expenses the Lessors may have been to in setting up said machines in the factory of the Lessees, together with the cost of repairing such machines and putting them in good condition.

Ninth. This lease and license shall continue (provided the Lessees comply with the terms and conditions thereof) until the expiration of all the Letters Patent which the Lessees *are* hereby licensed to use or any extensions or renewals of the same, and upon the expiration thereof the Lessees shall deliver to the Lessors said machines in good order, natural wear and tear excepted, and the Lessees shall thereupon, if *they have* kept all the conditions of this lease, have the right to purchase said machines for the sum of One Dollar.

In witness whereof, the parties aforesaid have hereunto put their hands and seals the day and year first above written.

Goodyear Department. [Form M. G. A., 1–205.]

Lease and License Number *5053 "J"*.

Full Set.

This Lease and Agreement made at Boston, in the State of Massachusetts, this *fourth* day of *April* 1905, between the United Shoe Machinery Company, a corporation organized under the laws of the State of Maine, having an office in said Boston, hereinafter referred to as the lessor, of the one part, and *Selz, Schwab and*

Company of *Chicago* in the State of *Illinois*, hereinafter referred to as the lessee, of the other part:

Witnesseth, that the lessor, in consideration of the covenants and agreements on the part of the lessee herein contained, does hereby lease to and license the lessee under its patents to use the machine or machines known as "Goodyear Department" machinery now or hereafter delivered to the lessee and designated by number or numbers in the following schedule, viz.: —

SCHEDULE OF MACHINES.

Goodyear Welt and Turn Shoe Machine, No.
Goodyear Universal Inseam Sewing Machine, No.
Goodyear Bobbin Winder (Universal), No.
Goodyear Outsole Rapid Lockstitch Machine, No.
Goodyear Bobbin Winder (Rapid), No.
Extension Edge Attachment (A), No.
Extension Edge Attachment (B), No.
Welt Beveling Attachment, No.
Goodyear Welt Grooving and Beveling Machine, No.
Goodyear Welt Splitting Machine, No.
Goodyear Channeler, { Turn / Insole / Outsole } No.
Goodyear Universal Welt Beater, No.
Goodyear Welt Beating and Slashing Machine, No.
Goodyear Universal Shank Skiving Machine, No.
Goodyear Universal Inseam Trimming Machine, No.
Goodyear Universal Rounding and Channeling Machine, No. *879*,
Goodyear Channel Opening Machine, No.
Goodyear Automatic Sole Leveling Machine, No.
Goodyear Rotary Sole Laying Machine, No.
Hadaway Stitch Separating Machine, No.
Goodyear Channel Laying Machine, No.
Goodyear Flexible Sole Machine, No.
Goodyear Moulding Machine, No.
Goodyear Turn Shoe Trimming Machine, No.

Goodyear Lip Turning Machine, No.
Goodyear Improved Sole Laying Machine, No.
Goodyear Shank Welt Skiving Machine, No.
Goodyear Forepart Turning Machine, No.
Goodyear Heel Turning Machine, No.

and any duplicate parts, extras, mechanisms and devices, relating thereto, or used in connection therewith, now attached to or delivered with the said designated machine or machines, or which may at any time hereafter be obtained from the lessor, or be added thereto with the consent of the lessor, (the whole of which machine or machines, duplicate parts, extras, mechanisms and devices, held by the lessee under these presents, whether now or hereafter delivered to or in the possession of the lessee, is hereinafter referred to as the "leased machinery"), subject to the conditions hereinafter contained.

And that the following are agreed to as conditions of the lease and license of the leased machinery, all of which the lessee covenants and agrees to keep and perform: —

One. The leased machinery shall at all times remain and be the sole and exclusive property of the lessor, and the lessee shall have no right of property therein but only the right to use the same, upon the conditions herein contained. The leased machinery shall be used only by the lessee himself, or by operatives in his direct employ, and only in the factory now occupied by him at *Chicago*, in the State of *Illinois*. The leased machinery shall not be transferred or delivered or sublet to any other person or corporation, and neither the lease nor the license hereby granted can be assigned by the lessee by his own act or by operation of law. If the lessee becomes insolvent or bankrupt, or has a receiving order made against him, or makes or executes any bill of sale, deed of trust or assignment for the benefit of his creditors, or if a sale or lease or removal of the leased machinery, or any part thereof, without the consent in writing of the lessor, be made or attempted, or if any distress or execution or attachment be levied thereon, then and in each such case this lease and license and any other lease or license then existing between the lessor and the lessee, whether as the

result of assignment to the lessor or otherwise, shall at the option of the lessor cease and determine, and the possession of and full right to and control of all the leased machinery, and any machinery held by the lessee under any other lease or license from the lessor, whether as the result of assignment to the lessor or otherwise, shall thereupon revest in the lessor free from all claims or demands whatsoever. The lessor and its agents and employees shall at all times be given access to the leased machinery for the purpose of inspecting it or watching its use and operation, or of altering, repairing, improving, or adding to it, or determining the nature or extent of its use, and the lessee shall afford all reasonable facilities therefor.

Two. The lessee shall at all times and at his own expense keep the leased machinery in good and efficient working order and condition, and shall not permit anyone to injure or deface or remove any plate, or dates, numbers, or other inscriptions now or hereafter impressed on or affixed to the leased machinery by the lessor. The lessee shall obtain from the lessor exclusively and shall pay therefor at the regular prices from time to time established by the lessor, all the duplicate parts, extras, mechanisms and devices, of every kind needed or used in operating, repairing, or renewing the leased machinery, and the same shall form part of the leased machinery, and the lessee shall not otherwise make or allow to be made any addition, subtraction or alteration to, from, or in the leased machinery without the consent in writing of the lessor, nor interfere with the proper operation of the same.

Three. The lessee shall pay all taxes and assessments which shall be assessed in respect to the leased machinery or other machinery of the lessor held by the lessee under lease or license upon whomsoever assessed. All taxes or assessments in respect to leases, licenses or agreements covering machinery, or the rights to payments thereunder, shall be construed, for the purposes of this article, to be assessed in respect to the machinery itself. In case at any time any unapportioned tax or assessment shall be assessed to the lessor in respect in part but not wholly to machinery of the lessor in the possession of the lessee the lessee shall pay to the lessor

such proportionate part of the total amount of said unapportioned tax or assessment as the fair valuation, to be determined by the lessor, of said machinery of the lessor in the possession of the lessee bears to the fair valuation, to be determined by the lessor, of all machinery (excepting machinery, if any, in the lessor's own possession) in respect to which the unapportioned tax or assessment has been assessed; provided, however, that if such unapportioned tax or assessment includes any tax or assessment in respect to tangible property in the lessor's own possession the amount thereof, based, at the established rate, upon the fair valuation, to be determined by the lessor, of such property, shall first be deducted and the lessee shall pay his proportionate part as aforesaid of the balance only of said unapportioned tax or assessment after such deduction has been made.

Four. The leased machinery shall be used only in the manufacture of boots, shoes and other footwear, known in the trade as "Goodyear Welts," which are or shall be welted and the soles stitched on welt sewing and stitching machines hereby, or by other instrument, heretofore or hereafter, leased to the lessee by the lessor or its assignor, or in the manufacture of boots, shoes or other footwear, known in the trade as "Goodyear Turns," the soles of which are or shall be attached to their uppers by turn sewing machines hereby, or by other instrument, heretofore or hereafter, leased to the lessee by the lessor or its assignor. The lessee shall use all Goodyear Welt and Turn Shoe Machines, Goodyear Universal Inseam Sewing Machines and Goodyear Outsole Rapid Lockstitch Machines hereby leased or held by him under other lease or license or agreement from the lessor, whether as the result of assignment to the lessor or otherwise, to their full capacity, limited only by the number of welted or turned boots, shoes and other footwear made by or for him.

Five. The lessee shall pay to the lessor immediately after the execution hereof, as a lease premium, the sum of *three hundred* Dollars and the lessee shall also pay to the lessor on the last day of each calendar month as rent or royalty the rental or royalty set forth in the following schedule for each pair of boots, shoes or other foot-

wear or portions thereof manufactured or prepared during the next preceding calendar month in any way, whether wholly or in part by the aid of the leased machinery or any part thereof: —

SCHEDULE OF RENTS AND ROYALTIES FOR GOODYEAR WELTS AND TURNS.

	Sizes From No.	To No.	Welts.	Turns.
Children's	1	10½ inclusive.	3 cents.	1 cent.
Misses'	11	2 "	4 "	1½ cents.
Women's	2½	and over.	6 "	1½ "
Youths'	9	13½ inclusive.	4 "	1½ "
Boys'	1	5 "	6 "	1½ "
Men's	5½	and over.	8 "	1½ "

provided, however, that in all cases when the lessee shall pay to the lessor on or before the fifteenth day of the calendar month the rent or royalty due for the use of the leased machinery for the next preceding calendar month, the lessor will, in consideration of such prompt payment, grant a discount of fifty per cent. from such rent or royalty due for such preceding calendar month.

Six. The lessor may attach to the leased machinery, or any thereof, an indicator or indicators to register the number of revolutions or movements of any part or parts thereof, and the lessee shall not allow any person (other than the lessor or its agents) to disturb or interfere with such indicator or indicators. In case any indicator thus attached shall from any cause cease to correctly indicate or register, or shall be disturbed or out of repair, or if the glass covering any such indicator shall be removed or broken or injured, then, and as often as the same shall happen the lessee shall immediately by writing notify the lessor, and at the same time explain the circumstances under which the same has happened. In case any such indicator ceases to indicate or becomes or remains inaccurate, or the glass covering becomes or remains removed, broken, or injured, because of any fault of the lessee or anyone in his employ, or because of the failure of the lessee to give promptly the notice hereinbefore provided for, then, without prejudice to any other rights of the lessor hereunder, the lessee shall pay the

lessor as rent or royalty, without the right to any discount, eight cents per pair for each pair of boots, shoes and other footwear, or portions thereof in the manufacture of which the leased machinery or any part thereof shall have been used. The lessee shall keep full and accurate accounts, independently of any indicators that may be placed upon the leased machinery, showing the number and kind of boots, shoes, and other footwear or portions thereof in the manufacture of which the leased machinery or any part thereof shall have been used, and shall allow the lessor at all times by its agents or attorneys, to examine and to take copies of such accounts and entries of the lessee as may serve to determine the total number of boots, shoes, or other footwear, or portions thereof, made by the aid of the leased machinery or any part thereof, and the lessee shall produce all such accounts and entries upon request. The lessee shall require each of his operators upon the leased machinery or any part thereof to keep, upon blanks or blank books to be furnished by the lessor, accurate daily records of the number and kind of boots, shoes, and other footwear, or portions thereof, in the making of which he has used the leased machinery or any part thereof, and shall require his operators to sign such records, and if requested so to do by the lessor, shall verify the same under oath and shall also furnish any further information called for by said blanks or blank-books; and the lessee shall send to the office of the lessor in Boston, on or before the fifth day of each calendar month, the original records for the next preceding calendar month kept by his operators as above provided for; and, in case in any calendar month, none of the leased machinery has been used, the lessee shall notify the lessor in writing of the fact, on or before the fifth day of the next succeeding calendar month.

And that the following agreements, stipulations and provisions are agreed to: —

Seven. If at any time the lessee shall fail or cease to use exclusively welt sewing and outsole stitching machinery held by him under lease from the lessor, in the manufacture of all "welted" boots, shoes, or other footwear made by or for him, the welts or soles of which are sewed by the aid of machinery, or shall fail or

cease to use exclusively turn sewing machinery held by him under lease from the lessor in the manufacture of all "turn" boots, shoes or other footwear, the soles of which are sewed by the aid of machinery, the lessor, although it may have waived or ignored prior instances of such failure or cessation, may at its option terminate forthwith by notice in writing this lease and license and any other lease or license of "Goodyear Department" machinery then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise; and the possession of and full right to and control of all the leased machinery and all "Goodyear Department" machinery held by the lessee under lease or license from the lessor or its assignor shall thereupon revest in the lessor free from all claims and demands whatsoever.

Eight. This lease and license shall continue, unless sooner terminated by the lessor because of breach thereof on the part of the lessee, or otherwise as herein provided, for seventeen years from the date hereof. But if any breach or default shall be made in the observance of any one or more of the conditions herein contained or contained in any other lease or license agreement subsisting between the lessor and the lessee whether as the result of assignment to the lessor or otherwise and expressed to be obligatory upon the lessee, the lessor shall have the right, by notice in writing to the lessee to terminate forthwith this lease and license, and also if the lessor so elects any other lease or license agreements then in force between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and this notwithstanding that previous breaches or defaults may have been unnoticed, waived, or condoned by or on behalf of the lessor. If, upon the expiration of the full term of this lease, the lessor does not request the return of the leased machinery, then the leased machinery shall continue to be held and used under and in accordance with the conditions of this lease and license, which shall thereupon be extended indefinitely as to term; but thereafter either the lessee or the lessor, upon sixty days' notice in writing to the other, may terminate this lease and license, whereupon the leased machinery shall be delivered forthwith to the lessor, as herein pro-

vided. Upon the expiration of this lease and license or any extension thereof or its termination by notice or by reason of any default on the part of the lessee as to the terms of this lease and license or any other lease or license from the lessor or otherwise in any manner whatsoever, the lessee shall forthwith deliver the leased machinery to the lessor at its office or factory in good order, reasonable wear and tear alone excepted; and the lessee for himself, his heirs, executors and administrators, hereby grants to the lessor, its successors and assigns, full right, power and authority to enter upon the premises and into any factory, room, or any place where the leased machinery, or any part thereof, may be, and take possession thereof, and take away the same; and the lessee shall have no claim for the repayment of any sum or sums, or any part thereof, which he shall have paid as consideration for the grant of this lease and license or for rent or royalty, or otherwise in respect to the leased machinery.

Nine. A notice in writing, signed by the president, a vice-president, the treasurer or the assistant treasurer of the lessor or by any assignee of the lessor's rights hereunder, and posted by prepaid letter, addressed to the lessee or delivered at his usual or last known place of abode or business, that the lease and license hereby granted is determined or shall be determined at the expiration of a certain period, shall be a sufficient determination of the lease and license from the time of posting or delivering such notice, or from the expiration of the period therein mentioned, as the case may be. Any termination of this lease and license shall not release the lessee from his obligation to pay rent or royalty for the period prior to such termination, and shall be without prejudice to any other rights or remedies which the lessor may have for violation of contract, use of machines without right, or use of patented inventions without license.

Ten. The lessee admits the validity for the full term expressed in the grant thereof (and every extension and renewal thereof) of each and every of the Letters Patent of the United States of America, owned by the lessor or under which it is licensed, any of the inventions of which are or hereafter may be embodied in the

leased machinery. The lessee also agrees that he will not directly or indirectly infringe or contest the validity for the full term expressed in the grant thereof or of any extension or renewal thereof, of any of the Letters Patent referred to in the "Schedule of Patents" hereto annexed or the title of the lessor thereto. The expiration of this agreement or any extension thereof or the termination or cesser of the lease and license hereby granted shall not in any way affect the provisions of this clause, or release or discharge the lessee from the admissions and estoppels herein set forth.

Eleven. None of the terms or conditions of this lease and license shall be held to have been waived by any act or knowledge of the lessor, its agents or employees, but only by an instrument in writing, signed by the president, a vice-president, the treasurer or the assistant treasurer of the lessor.

Twelve. The term "lessor" shall include the said United Shoe Machinery Company and its successors and assigns. All the conditions and agreements binding on the lessee shall be binding on and enforceable against his legal representatives. In the construction of this instrument, words relating to the number and gender of the parties shall be read according to their real number and gender.

In witness whereof, the parties hereto have duly executed this instrument in duplicate, the day and year first above written.

PLAINTIFF'S EXHIBIT 151.

[Put in Evidence, page 927.]

Boston, Massachusetts, February 15, 1899.

To the Stockholders of the McKay Shoe Machinery Company:

The undersigned, Directors of the McKay Shoe Machinery Company, have entered into an agreement with the United Shoe Machinery Company for the exchange of the stock of the McKay Shoe Machinery Company for shares of the United Shoe Machinery Company, upon the basis of $5.50 of the preferred stock and $5.50 of the common stock of the United Shoe Machinery Company for each share of the McKay Shoe Machinery Company, so that the stockholders of the McKay Company will receive $11 of the stock of the United Company (half common and half preferred) for each share of the capital stock of the McKay Company held by them.

The United Shoe Machinery Company has been organized under the laws of New Jersey with an authorized capital of 1,000,000

shares, one half six per cent preferred stock and one half common stock. The par value of both common and preferred shares is $25, and the common and preferred shares have equal voting power.

The United Company has contracted for the purchase of a majority of the stock or the purchase outright of the following companies: —

McKay Shoe Machinery Company; Consolididated & McKay Lasting Machine Company; Goodyear Shoe Machinery Company; International Goodyear Shoe Machinery Company; Goodyear Shoe Machinery Company of Canada; Eppler Welt Machine Company; International Eppler Welt Machinery Company; Davey Pegging Machine Company.

The entire floating debts of the above companies will be paid, and there will remain in the treasury of the new company, after acquiring the above-named companies, at least $500,000 in cash, and 150,000 shares of the preferred and 150,000 shares of the common stock.

Stockholders of the McKay Shoe Machinery Company who desire to exchange their stock in the McKay Company for stock in the United Company must assign at once to the United Shoe Machinery Company their certificate or certificates of shares in the McKay Shoe Machinery Company, and deliver said certificates to James W. Brooks, 76 Lincoln Street, Boston, Mass., and the proper amount of stock in the United Company will be returned in exchange for the shares thus assigned and delivered.

No certificates and no receipts will be issued for fractions of shares, but fractions of the stock in the United Company will be paid for in cash at par, and checks for such fractions of shares will be sent to shareholders with the new certificates.

The officers of the United Shoe Machinery Company are as follows: —

Sidney W. Winslow, President; John H. Hanan, Vice-President; Wallace F. Robinson, Vice-President; Orlando E. Lewis, Vice-President; George W. Brown, Treasurer and General Manager; Lewis H. Baker, Secretary.

Directors: Louis D. Brandeis, Josiah H. Clark, George E.

Keith, Orlando E. Lewis, Rudolph Matz, Gordon McKay, James J. Storrow, Wallace F. Robinson, George W. Brown, Sidney W. Winslow, William H. Coolidge, William S. Eaton, Edward P. Hurd, Samuel Weil, Frederick G. King, Charles H. Cole, John H. Hanan, William Barbour, Edwin H. Mathewson, Elmer P. Howe, Alfred R. Turner, Jr.

Executive Committee: William Barbour, George W. Brown, Elmer P. Howe, Edward P. Hurd, James J. Storrow, Sidney W. Winslow.

As the United Shoe Machinery Company expects to begin at once the payment of dividends at the rate of 6 per cent per annum on the preferred stock, and 8 per cent per annum on the common stock, it will be seen that the annual return upon the $11 of the new stock received for each share in the McKay Company will be 77 cents, instead of the 60 cents per share which is the present annual dividend paid upon each share of the McKay stock.

The undersigned have agreed to exchange all the stock in the McKay Company which they hold personally, and recommend the other stockholders in the McKay Shoe Machinery Company to also exchange their shares, for shares in the United Shoe Machinery Company, because they believe that not only will shareholders receive an increase in dividends, but that the dividends will be rendered more permanent and more secure in the future.

PLAINTIFF'S EXHIBIT 152.

[Put in Evidence, page 928.]

Boston, Mass., February 8, 1899.

To the Stockholders of Goodyear Shoe Machinery Company:

The great advantages to be secured by the control in one corporation, both in the United States and in foreign countries, of the most efficient types of shoe machinery, have been for several years recognized by the officers of the principal shoe-machinery companies. For more than a year your Directors and large shareholders have been in negotiation to accomplish this end.

After a thorough investigation of the financial condition and the business of the shoe-machinery companies named below, the organization of a corporation has been effected under the laws of the State of New Jersey, to be known as

United Shoe Machinery Company.

This corporation has an authorized capital stock of $25,000,000, divided into shares of the par value of $25 each. $12,500,000 of the capital stock will be preferred stock, entitled to cumulative quarterly dividends at the rate of 6 per cent. per annum.

The remaining $12,500,000 of the authorized capital stock will be common stock.

The shares of preferred and common stock will have equal voting power.

Application will be made to list the shares of the United Company on the Boston and New York Stock Exchanges.

Only $8,625,000 of preferred stock and $8,625,000 of common stock will be issued at present.

The United Shoe Machinery Company has already contracted for more than a majority of the capital stock of

Goodyear Shoe Machinery Company,
Consolidated & McKay Lasting Machine Company,
McKay Shoe Machinery Company,
Goodyear Shoe Machinery Company of Canada.
International Goodyear Shoe Machinery Company,
Eppler Welt Machine Company,

1091

International Eppler Welt Machine Company,
Davey Pegging Machine Company,

besides stocks in other shoe-machinery companies, letters patent and other property.

The United Company will also from time to time acquire other shoe-machinery properties, either by direct ownership or by purchase of shares of their stock.

A syndicate has been formed which will take common and preferred stock, in equal amounts, of the United Shoe Machinery Company, at par, sufficient to pay the floating debts of the corporations above mentioned, and leave at least $500,000 in cash as working capital in the new company. The syndicate will assume and pay all the expenses of the organization of the new company.

The United Company will issue for the acquisition of the entire capital stock of the corporations above named, for the payment of the floating debt of these corporations and providing a conservative working capital, and for the payment of expenses of organization and acquirement of said properties:

Cumulative preferred six per cent. stock . .	$8,625,000
Common stock	8,625,000
Total	$17,250,000
It will require to pay quarterly dividends at six per per cent. on the preferred stock . . .	$517,500
To pay eight per cent. dividends on the common stock	690,000
	$1,207,500

The net earnings of the above companies for 1898 were in excess of $1,600,000, and it is confidently believed that from the start the new company will, by reason of economies in administration alone, earn a much larger sum.

Arrangements have been made whereby the

American Loan and Trust Company,
53 State Street, Boston, Mass.

will issue in exchange for One Share of the stock of the Goodyear

Shoe Machinery Company, Eight Tenths (8/10) of a share of the fully-paid and non-assessable Preferred Stock of the United Company, and Eight Tenths (8/10) of a share of the fully-paid and non-assessable Common Stock of the United Company (or for 100 shares of Goodyear stock, 80 shares of preferred and 80 shares of common stock of the United Company), provided that certificates of said Goodyear stock are presented on or before March 1, 1899, to said Trust Company, duly endorsed or assigned to United Shoe Machinery Company, and with proper revenue stamps affixed and canceled.

Scrip will be issued for fractions of shares.

In the event of delay in issuing the engraved certificates of the United Company, temporary certificates will be issued, exchangeable for the engraved certificates when issued.

Fifty cents per share will be paid to those holders of Goodyear shares, who exchange for shares of the United Company, on or before February 18, 1899, to compensate them for the usual dividend of the Goodyear Company, payable February 23, 1899.

The United Company intends to declare regular quarterly dividends at 6 per cent. on its preferred stock and at least at 8 per cent. on its common stock, beginning April 1, 1899.

All the members of the present board of Goodyear Directors will be Directors in the United Company.

The undersigned, being all the Directors of Goodyear Shoe Machinery Company, believe that the United Shoe Machinery Company will show much larger net earnings than the aggregate net earnings of the several companies whose stock is to be acquired, by reason of increase in business, economies in administration and decrease in expenses, and cessation of litigation between the companies, which has been expensive to them and annoying to shoe manufacturers. They believe that these results can be attained without increase of cost to the users of machinery made by the Company and that better attention to the care of machines and assistance to the users can be afforded.

They confidently expect that the shares of the United Company will prove to be a more valuable and better-paying investment

than the stock in the Goodyear Company, and, having exchanged their stock in the Goodyear Company for stock in the United Company on the above-named basis, they recommend to Goodyear stockholders to likewise deposit and exchange their shares.

PLAINTIFF'S EXHIBIT 153.

[Put in Evidence, page 929.]

Boston, Mass., February 18, 1899.

To the Stockholders of International Goodyear Shoe Machinery Company:

The organization of a corporation has been effected under the laws of the State of New Jersey, known as

United Shoe Machinery Company.

This corporation has an authorized capital stock of $25,000,000, divided into shares of the par value of $25 each. $12,500,000 of the capital stock will be preferred stock, entitled to cumulative quarterly dividends at the rate of 6 per cent per annum.

The remaining $12,500,000 of the authorized capital stock will be common stock.

The shares of preferred and common stock will have equal voting power.

Application will be made to list the shares of the United Company on the Boston and New York Stock Exchanges.

Only $8,625,000 of preferred stock and $8,625,000 of common stock will be issued at present.

The United Shoe Machinery Company has already contracted for more than a majority of the capital stock of

Goodyear Shoe Machinery Company,
Consolidated & McKay Lasting Machine Company,
McKay Shoe Machinery Company,

Goodyear Shoe Machinery Company of Canada,
International Goodyear Shoe Machinery Company,
Eppler Welt Machine Company,
International Eppler Welt Machine Company,
Davey Pegging Machine Company,

besides stocks in other shoe-machinery companies, letters patent and other property.

The United Company will also from time to time acquire other shoe-machinery properties, either by direct ownership or by purchase of shares of their stock.

A syndicate has taken common and preferred stock, in equal amounts, of the United Shoe Machinery Company, at par, sufficient to pay the floating debts of the corporations above mentioned and leave at least $500,000 in cash as working capital in the new company. The syndicate will assume and pay all the expenses of the organization of the new company.

The United Company will issue for the acquisition of the entire capital stock of the corporations above named, for the payment of the floating debt of these corporations and providing a conservative working capital, and for the payment of expenses of organization and acquirement of said properties:

Cumulative preferred six per cent stock . .	$8,625,000
Common stock	8,625,000
Total	$17,250,000
It will require to pay quarterly dividends at six per cent on the preferred stock . . .	$517,500
To pay eight per cent dividends on the common stock	690,000
	$1,207,500

The net earnings of the above companies for 1898 were in excess of $1,600,000, and it is confidently believed that from the start the new company will, by reason of economies in administration alone, earn a much larger sum.

Arrangements have been made whereby the

American Loan and Trust Company,
53 State Street, Boston, Mass.,

will issue in exchange for One Share of the stock of the International Goodyear Shoe Machinery Company, Eight Dollars and Seventy-five Cents ($8.75), at par, of the fully-paid and non-assessable Preferred Stock of the United Company, and Eight Dollars and Seventy-five Cents ($8.75), at par, of the fully-paid and non-assessable Common Stock of the United Company (or for 100 shares of International Goodyear Stock, 35 shares of preferred and 35 shares of common stock of the United Company), provided the certificates of said International Goodyear stock are presented on or before March 1, 1899, to said Trust Company, duly endorsed or assigned to United Shoe Machinery Company, and with proper revenue stamps affixed and canceled.

Scrip will be issued for fractions of shares.

In the event of delay in issuing the engraved certificates of the United Company, temporary certificates will be issued, exchangeable for the engraved certificates when issued.

The United Company intends to declare regular quarterly dividends at 6 per cent on its preferred stock, and at least at 8 per cent on its common stock, beginning April 1, 1899.

It will be seen that the annual return upon the $17.50 of the stock of the United Company received for each share in the International Goodyear Company will be $1.22, instead of the present dividends of the International Company which amount to $1.00 per year.

The officers of the United Shoe Machinery Company are as follows: —

Sidney W. Winslow, President; John H. Hanan, Vice President; Wallace F. Robinson, Vice President; Orlando E. Lewis, Vice President; George W. Brown, Treasurer and General Manager; Lewis H. Baker, Secretary.

Directors: Louis D. Brandeis, Josiah H. Clark, George E. Keith, Orlando E. Lewis, Rudolph Matz, Gordon McKay, James J. Storrow, Wallace F. Robinson, George W. Brown, Sidney W. Winslow, William H. Coolidge, William S. Eaton, Edward P. Hurd,

Samuel Weil, Frederick G. King, Charles H. Cole, John H. Hanan, William Barbour, Edwin H. Mathewson, Elmer P. Howe, Alfred R. Turner, Jr.

Executive Committee: William Barbour, George W. Brown, Elmer P. Howe, Edward P. Hurd, James J. Storrow, Sidney W. Winslow.

It is believed that the United Shoe Machinery Company will show much larger net earnings than the aggregate net earnings of the several companies whose stock is to be acquired, by reason of increase in business, economies in administration and decrease in expenses, and cessation of litigation between the companies, which has been expensive to them and annoying to shoe manufacturers, and that these results can be attained without increase of cost to the users of machinery made by the Company, and that better attention to the care of machines and assistance to the users can be afforded.

More than three-fourths
Many of the International Stockholders have already agreed to exchange their stock in the International Goodyear Company for stock in the United Company on the above named basis, and they recommend to other International Goodyear stockholders to likewise deposit and exchange their shares.

WILLIAM BARBOUR, President.

PLAINTIFF'S EXHIBIT 154.

[Put in Evidence, page 999.]

Lease premium leases ~~are to~~ should be written so ~~as to~~ that each lease will cover only the individual machine which is the subject of the lease and ~~are~~ should not to apply in any way to other machines or machinery which may be held by the lease.

Lessee ~~are to~~ should have the right to exchange existing leases for the type above referred to.

Lessees ~~shall not~~ should not be obligated in any way to use exclusively machines or machinery made ~~be~~, leased or sold by the ~~U. S.~~ United Shoe Machinery Company.

We recognize fully the great economic advantages possessed by you in the fact that you now enjoy practically a monopoly of the shoe machinery business — but we submit that your patrons should be permitted to share in these advantages, by you so modifying your charges for the service rendered, as to return only a fair amount on your invested capital.

PLAINTIFF'S EXHIBIT 155.

[Put in Evidence, page 1031.]

St. Louis, June 14, 1911.

United Shoe Machinery Co., Boston, Mass.

Attention Mr. S. W. Winslow.

Gentlemen:—In the personal conversation between you and the writer when I was last in Boston, I stated there was nothing more that we could do in Boston, but in a short while we would write you about any conclusion that might be reached.

The shoe manufacturers are contemplating another meeting very soon. To take up the matter intelligently, some additional information is necessary. The result of our meeting in Boston was that you submitted to us —

1st. A memorandum separating the entire system into seven independent units.

2nd. You submitted figures relating to the machines now in use by the Roberts, Johnson & Rand Shoe Co., which figures would apply if the machines were installed under your proposed plan.

Are we to consider that the memorandum (in connection with the figures tabulated under the terms of the memorandum) was a definite proposal from the United Shoe Machinery Company; if so, what change, if any, in present royalty was contemplated?

Kindly advise me regarding the above, and oblige

Yours truly,

F. C. Rand, Sec'y.

PLAINTIFF'S EXHIBIT 156.

[Put in Evidence, page 1031.]

Boston, Mass., June 19, 1911.

Mr. F. C. Rand, Sec'y., Shoe Mfgrs. Alliance, St. Louis, Mo.

Dear Sir: Replying to yours of the 14th inst I note your reference to the fact that when in Boston you stated that in a short while you would write me any conclusion which might have been reached, but that another meeting is contemplated very soon and that you desire further information.

You state that:

"the result of our meeting in Boston was that you submitted to us:
1st: a memorandum separating the entire system into seven independent units."

In order that there may be no misunderstanding, I understand this to mean:

1. Goodyear Machines, including auxiliaries;

2nd. Rex Pulling-Over System, including auxiliary machines.

3d. Lasting Machines

4th Metallic Machines;

5th Heeling Machines;

6th Clicking Machines;

7th General Department Machines.

In your letter you also state:

"2nd: you submitted figures relating to the machines now in use by the Roberts, Johnson & Rand Shoe Company which figures would apply if the machines were installed under your proposed plan."

And, you ask:

"Are we to consider that the memorandum (in connection with the figures tabulated under the terms of the memorandum) was a definite proposal from the United Company; if so, what change, if any, in the present royalty was contemplated?"

In reply to your question I would say that no change in the present royalty was or is contemplated (excepting as explained to you in the substitute form of memorandum in reference to the Rex

Pulling-Over System and as stated therein). This was stated very fully to your Committee while in Boston.

No definite proposal was made to Roberts, Johnson & Rand.

Should, however, the manufacturers who were present at the conference express their approval of the plan which was submitted, I think there should be no difficulty in our making equitable arrangements by which Roberts, Johnson & Rand, and such other manufacturers as may desire to have the Company adopt the plan referred to, may re-arrange their leases in accordance with the basis of the memorandum. Yours sincerely,

S. W. WINSLOW, Pres.

[Put in Evidence, page 1198.]

AGREEMENT BETWEEN DREW, SELBY & COMPANY AND THE UNITED SHOE MACHINERY CO.

In consideration of the sum of two thousand (2,000) dollars, to be placed to the credit of Drew, Selby & Company, on the books of the United Shoe Machinery Company, the two Bay State Turn Sewing Machines, now in the factory of Drew, Selby & Company, become the property of the United Shoe Machinery Company.

If at any time Drew, Selby & Company desire to use the Bay State inseamers or machines for the same purpose other than ours they are to refund to the United Shoe Machinery Company the two thousand (2,000) dollars allowed them in consideration of this agreement, upon payment of which the title in the two Bay State Machines reverts to Drew, Selby & Company.

The rate of royalty to be paid by Drew, Selby & Company on Goodyear Turn Inseamers not to exceed three quarters (3/4) of a cent per pair and the rate of royalty to be paid by Drew, Selby & Company on Hand Method Welt Lasting Machines to be five-eighths (5/8) of a cent per pair (except on misses' and children's, which will be one-half (1/2) of a cent per pair) ~~this reduction in Lasting royalty to depend upon the use by Drew, Selby & Company of the welt system of the United Shoe Machinery Company~~.

If Drew, Selby & Company use the United Shoe Machinery

Company's machines exclusively, the United Shoe Machinery Company agrees to refund to Drew, Selby & Company at the end of every quarter, the amount paid in royalty by Drew, Selby & Company on the Gem Insole Machinery during the preceding quarter of three months.

[In lead pencil:] 3-3-04 Duplicate forwarded to Brandeis, Dunbar & Nutter to be served 3-4-04. H. G. D.

Boston, Mass., March 3, 1904.

Messrs. Peter Tessier & Co., Haverhill, Mass.

Gentlemen: — You are hereby notified that in the exercise of our rights in the premises we have elected to terminate all leases and licenses which have heretofore been granted to you covering machinery belonging to us, including herein specifically the following leases and licenses, viz: —

Metallic Department Lease and License, No. 803, dated April 6, 1901;

Metallic Department Lease and License, No. 803A, dated January 4, 1904;

Goodyear Department Lease and License, No. 5486, dated December 18, 1902;

and to terminate all right and privilege to use any of the machines belonging to us which have heretofore been delivered into your possession.

The said leases and licenses and said rights and privileges are accordingly hereby terminated, revoked and annulled; and we hereby forbid you to use or to permit the use by any other person of said machines or any of them hereafter, or to further use any of the patented inventions embodied in said machines and which by said lease and licenses you were authorized to use.

And we do further hereby demand that you forthwith deliver to us at our factory in Boston, Massachusetts, in accordance with your undertaking and agreement, all of such machines, including therein specifically the machines designated by name and number as follows, viz:—

Grip Slugging Machine, No. 777
Universal Slugging Machine, No. 2022
Knife Grinder, No. 5571
Goodyear Welt and Turn Shoe Machine, No. 417
Goodyear Turn Channelers, No. 742–2125
Goodyear Moulding Machine, No. 293

Very truly yours,

UNITED SHOE MACHINERY COMPANY,
S. W. Winslow, President.

PLAINTIFF'S EXHIBIT A FOR IDENTIFICATION.

[Put in Evidence, page 1438.]

Know all Men by these Presents:

That Whereas, as, Charles K. Fox, Edwin A. Webster and Charles R. Towle, of Haverhill, Massachusetts, are now, jointly or severally, the owners of certain interests in inventions relating to machinery and devices for attaching the heels of boots, shoes or other footwear made or acquired by us or one or more of us, and desire to sell to the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, having a place of business at Boston, Massachusetts (hereafter called the "United Company") all present and further inventions heretofore or hereafter within a period of fifteen (15) years from the date hereof made, owned or acquired by us or by any of

us relating to heel attaching machinery and devices; and the said United Company desires to acquire the same and to secure the benefits of the covenants and agreements hereinafter set forth:—

Now, Therefore, this Instrument Witnesseth that in consideration of the sum of ten thousand dollars and other good and valuable considerations to us, the said Fox, Webster and Towle, and each of us, paid by the said United Company, the receipt of which we hereby acknowledge, we, the said Fox, Webster and Towle, and each of us, have sold and do hereby sell, assign, transfer and set over unto the said United Company, its successors and assigns, all inventions, improvements, Letters Patent, and applications for Letters Patent, of the United States and of any and all other countries, and all interests and rights in, to and under inventions, improvements, Letters Patent and applications for Letters Patent now had by us, or which we or any of us have any right by agreement or otherwise to acquire or take over, or which at any time hereafter within a period of fifteen (15) years from the date hereof we or any of us may make, own, acquire or have any right by agreement or otherwise to acquire or take over which consist of or relate to or are useful in machinery or devices for attaching the heels of boots, shoes or other footwear, including herein without prejudice to the generality hereof the following designated applications for Letters Patent of the United States, the inventions covered thereby, and any and all Letters Patent of the United States and of any and all foreign countries which have been or may be granted upon said applications or for the inventions covered thereby, or any of them, together with any and all reissues, renewals or extensions of the said Letters Patent, or any of them, which may be granted, viz:

Applications Serial Nos. 226,960 and 270,297, filed on or about October 3, 1904 and July 18, 1905, respectively, for inventions of Edwin A. Webster and Charles R. Towle in Cementing Attachments for Heel Nailing Machines;

Application Serial No. 226,959, Filed on or about October 3, 1904, for inventions of Edwin A. Webster in Heel Nailing Machines;

Application Serial No. 226,961, Filed on or about October

3, 1904, for inventions of Charles R. Towle in Heel Nailing Machines.

To Have and to Hold all of the foregoing inventions, improvements, Letters Patent, applications, interests and rights to the said United Shoe Machinery Company, its successors and assigns, to its and their own use and behoof absolutely.

And for the same Consideration we, the said Fox, Webster and Towle, and each of us, do hereby covenant and agree to and with the said United Company, its successors and assigns, that we and each of us will forthwith fully and completely disclose to the said United Company, its officers and patent solicitors, all inventions, improvements, Letters Patent, and applications for Letters Patent, of the United States and of any and all other countries, and interests and rights therein, now had by us or any of us, or which we or any of us have any right by agreement or otherwise to acquire or take over relating to heel attaching machinery or devices; and that hereafter at any and all times upon making, owning, acquiring or obtaining any right by agreement or otherwise to acquire or take over any invention, improvement, Letters Patent or application for Letters Patent, interest or right, included within the terms of the assignment hereinbefore contained, we and each of us will promptly disclose the same to the said United Company, its officers and patent solicitors; will repeat all such disclosures when and as often as requested; and at any and all times hereafter will execute and cause to be executed any and all applications, assignments and other instruments, and will perform and cause to be performed any and all acts which in the opinion of counsel for the said United Company, its successors or assigns, may be necessary or desirable to enable the said United Company, its successors, assigns or nominees, to obtain Letters Patent of the United States and of such other countries as the said United Company, its successors or assigns, may desire, covering in such form as shall be approved by counsel for the United Company, its successors or assigns, the inventions and improvements or any of them included within the terms of the foregoing assignment, and to fully and completely vest and confirm in the said United Company, its successors,

assigns or nominees, such Letters Patent and all inventions, improvements, Letters Patent, interests and rights included within the terms of the foregoing assignment, and to enable the said United Company, its successors and assigns, to secure and enjoy the full benefits and advantages thereof — all without further consideration than that already paid but the expense of obtaining such such Letters Patent to be borne by the said United Company, its successors or assigns.

In Witness Whereof we, the said Charles K. Fox, Edwin A. Webster and Charles R. Towle, have hereunto set our respective hands and seals this day of A. D. 1905.

Commonwealth of Massachusetts.

County of ss. 1905.

Then personally appeared the above named Charles K. Fox, and acknowledged the foregoing instrument to be his free act and deed.

Before me,

Notary Public.

Whereas United Shoe Machinery Company, of Paterson, in the State of New Jersey, a corporation duly organized under the laws of said State of New Jersey, and having a place of business at 205 Lincoln Street, in Boston in said Commonwealth of Massachusetts, hereinafter called the United Company, is desirous of acquiring each and all of the said inventions, the said applications, and any and all Letters Patent of the United States and of all other countries which may be granted on the said applications or for the said inventions, or any of them, together with any and all reissues, renewals or extensions of said Letters Patent or any of them which may be granted.

Now, Therefore, in consideration of the sum of one dollar ($1.00) and other and good and valuable considerations to each of them paid by said United Company, the receipt whereof is hereby acknowledged, they, the said Webster, the said Towle and the said Fox, do hereby sell, assign, transfer and set over unto the said United Company the entire right, title and interest in and to each

of said inventions, said applications for United States Letters Patent, and any and all Letters Patent of the United States or of any foreign countries which may be granted for the said inventions or any of them, together with any and all reissues, renewals or extensions of the said Letters Patent or any of them which may be granted.

To Have, to Hold and to Enjoy the said inventions, applications, Letters Patent, reissues, renewals and extensions to said United Company, its successors and assigns, to its and their own use and behoof forever.

And the said Webster, the said Towle and the said Fox do hereby authorize and request the Commissioner of Patents of the United States to issue any United States Letters Patent which may be granted on the said applications or for the said inventions or on any divisional or renewal applications to said United Shoe Machinery Company, its successors and assigns, as assignee of the entire right, title and interest therein and thereto;

And for the same consideration the said Webster, the said Towle and the said Fox do hereby, jointly and severally, covenant and agree for themselves and for their legal representatives with said United Company, its successors and assigns, that they and each of them have granted no license to make, use or sell any of the said inventions, that their right, title and interest as aforesaid in the said inventions has not been encumbered, and that they have good right and title to sell and assign the same as aforesaid and that they will not execute any instrument in conflict herewith;

And the said Webster, the said Towle and the said Fox do hereby, jointly and severally, for themselves and for their legal representatives further covenant and agree with said United Company, its successors and assigns, that upon request they will, and their legal representatives shall, execute divisional, renewal or reissue applications, amended specifications or rightful oaths; communicate to said United Company, its successors and assigns, any facts known to them relating to the said inventions or the history thereof; execute preliminary statements and testify in any interference proceedings; execute and deliver any application

papers, assignments, or other instruments; and do all other acts which in the opinion of counsel for said United Company may be necessary or convenient to secure the grant of Letters Patent to said United Company in the United States and in all other countries where said United Company may desire to patent said inventions or any of them, with specifications and claims in such form as shall be approved by counsel for said United Company, and to vest and confirm in said United Company, its successors and assigns, the full and complete legal and equitable title to all such Letters Patent without further consideration than now paid but at the expense of said United Company, its successors and assigns.

In Witness Whereof the said Webster, the said Towle and the said Fox have hereunto set their respective hands and seals this day of August, 1905.

Commonwealth of Massachusetts.

ss. August 1905.

Then personally appeared the above-named Charles K. Fox, Edwin A. Webster and Charles R. Towle, to me personally known, and known by me to be the persons described in and who executed the foregoing instrument, and severally acknowledged the same to be their free act and deed. Before me,

Notary Public.

Registrar of Stock

City Trust Co., Boston

Report of the President to the Annual Meeting, 1908

To the Stockholders: —

Balance sheets showing the assets and liabilities of the Corporation and of the United Shoe Machinery Company are herewith submitted.

The earnings of the United Shoe Machinery Company and its subsidiary companies, from which the income of the Corporation is derived, have been satisfactory in view of the general depression in business. The volume of business, taking the entire business into account, is greater than for the last fiscal year.

The number of machines out on lease in this country, March 1, 1908, was 65,509, an increase for the year of 7,732.

The addition to the factory of the United Shoe Machinery Company, at Beverly, which was reported last year, is now occupied, and substantially all of the machinery manufacturing of the company in the United States is carried on at this plant. The foreign companies have largely increased their manufacturing capacity, and this fact, together with the lessened demand for machinery in this country, owing to the depression in the boot and shoe trade, has somewhat relieved the pressure of work at Beverly factory.

In carrying out the policy established at the date of its organization, and ever since continued, of supplying to its customers the most efficient machines obtainable without regard to the loss occasioned to it by the displacement of its existing machines, the United Shoe Machinery Company has taken advantage of the opportunity afforded by the conditions of its manufacturing business at Beverly to hasten the production of new machines, some of which will perform steps in the manufacture of boots and shoes heretofore carried out by hand, and others of which, by reason of greater rapidity and perfection of operation, will prove to be of great benefit to the trade.

By order of the Board of Directors.

S. W. WINSLOW, President.

Paterson, N. J., June 27, 1908.

Report of the President to the Annual Meeting, 1909.

To the Stockholders: —

Balance sheets are herewith submitted showing the assets and

liabilities of the Corporation and of the United Shoe Machinery Company on March 1, 1909.

The past fiscal year opened in the midst of general business depression, but the business of the company has shown a gradual improvement during the year, and owing to the introduction of new machines and the general extension of the business by the operating company, the total volume of business for the year was scarcely more than 1 per cent less than for the year previous, and the net earnings of the company exceeded those of the previous year.

The number of machines out on lease in this country March 1, 1909, was 70,353, an increase for the year of 4,844, or about 7½ per cent.

The business of the foreign companies in which your company is interested has been well maintained, and shows a satisfactory increase over the business of the previous year.

During the year several new machines have been brought out, and others are in process of construction. In this connection it is worthy of mention that the McKay Sewing Machine, one of the earliest successful machines used in the manufacture of boots and shoes, has been completely reconstructed by us and put into a form so different from the original, and even from the latest previous pattern, as to make it virtually a new machine.

The Ideal Clicking Machine for cutting uppers was introduced at the beginning of the past year and has already revolutionized the art of cutting shoes, an operation which was previously performed only by hand. The demand for this machine is probably unprecedented in the history of shoe machinery, and has taxed the capacity of this department of our manufacturing plant to the utmost. During the year covered by this report, more than 1,200 of these machines were installed in the factories of our lessees, and the demand is steadily increasing.

The machine is placed with our lessees without initial charge, and its use effects a saving of from one to four cents per pair in the cost of manufacture of shoes.

The factory at Beverly is running on full time, with upwards of 3,000 hands.

By order of the Board of Directors.

S. W. WINSLOW, President.

Report of the President to the Annual Meeting, 1910.

To the stockholders of the United Shoe Machinery Corporation:—

Balance sheets are herewith submitted, showing the assets and liabilities of the Corporation and of the United Shoe Machinery Company, on March 1, 1910.

The past fiscal year has been marked by an uninterrupted improvement in the business of the Company. Each succeeding month has shown an increase over the corresponding month of any preceding year in the amounts received from royalties, rentals and sales. The volume of business for the year was 14 per cent greater than that for the year preceding, and there was likewise a substantial increase in net earnings.

The number of machines out on lease in the United States on March 1, 1910, was 80,734, an increase for the year of 10,381, or 14⅞ per cent.

The business of the foreign companies, in which the Company is interested, shows a satisfactory increase over the business of the previous year.

The factory at Beverly is running on full time, and since May 1, 1910, has been obliged to run night shifts. More hands are now employed at the factory than at any previous time in the history of the Company. The demand upon the capacity of the factory has been so great that contracts have been made for the immediate construction of an addition containing 91,200 square feet of floor space.

The Company has continued its liberal expenditures for the improvement of existing machines and the development and purchase of new inventions. In the Goodyear Department important new machines are at present undergoing practical tests; the result of which, it is already evident, will justify the Company in offering them to the trade. These machines will greatly facilitate the operations upon Goodyear Welt Shoes, and will enable the manufacturers using them to keep fully abreast of the demands of the trade. The Ideal Clicking Machine continues to fulfill the expectations aroused by its introduction. During the year over 1,600 machines were installed in factories, more than doubling the number in use by the Company's lessees at the beginning of the year.

In view of the excellent condition of the Company and in conformity with its established policy, to furnish a better service and equipment year by year at less expense to its lessees, it has addressed to all lessees a letter announcing the Company's decision to put into operation a plan long in contemplation which, it believes, will result in the further expansion of its own business through the increased business and prosperity of its customers.

A copy of the letter announcing the adoption of the plan accompanies this report.

By order of the Board of Directors.

S. W. WINSLOW, President.

Registrar of Stock

Old Colony Trust Co., Boston

Report of the President to the Annual Meeting, 1911

To the Stockholders of the United Shoe Machinery Corporation: —

Balance sheets are herewith submitted, showing the assets and liabilities of the Corporation, and of the United Shoe Machinery Company on March 1, 1911.

The past fiscal year has shown a continued improvement in the business of the Company and of the foreign companies in which the Company is interested. The factory at Beverly has turned out a greater number of machines than during any other period of equal length in the Company's history. The number of machines on lease in the United States on March 1, 1911, was 90,276, an increase for the year of 11.82 per cent. During the year the Com-

pany brought in from shoe factories over four thousand of its machines which were broken up and thrown on the scrap heap in order that they might be replaced with machines embodying the latest improvements — an expense which the Company assumes under its present system of doing business, but which would otherwise have to be borne by the shoe manufacturers.

Since our last annual meeting contracts have been made for the construction of further additions to the factory. The Beverly plant with the additions constructed during the year and those now under contract will have a floor space of twenty-one acres as against seventeen acres a year ago. About five thousand hands are now employed at the factory, and the average weekly pay-roll is over $75,000.

The Company has continued its liberal expenditures for the improvement of existing machines and the development and purchase of new inventions so that it is now in a better position than ever before to furnish shoe manufacturers with the very latest and most improved machines. In pursuance of this policy it has acquired inventions and patents formerly controlled by Thomas G. Plant, some of which were found on examination to cover improvements which might with advantage to the shoe manufacturing industry be utilized in conjunction with inventions already in the Company's possession and with improvements in process of development so as to permit the construction of machines of a new type or of increased efficiency. In acquiring these patents it became necessary to purchase a majority of the stock of the Thomas G. Plant Company, manufacturers of shoes. The Corporation has purchased this stock which it intends to retain only until it can be disposed of advantageously.

In the Experimental Department of the Company the development has been greater than ever before. Machines which were undergoing practical tests a year ago have since then been placed at the disposal of the trade. The Company from the beginning has expended large sums of money in developing all types of machines in that department of shoe manufacturing to which it gives especial attention — confined chiefly to machines used in the "Bot-

toming Room." It has placed the perfected results of its experiments at the disposal of shoe manufacturers under terms which enable the manufacturer to equip his factory with a greater variety of the most advanced type of machines than was possible at the time of the organization of the Company, and at a smaller cost to him per pair of shoes than he was called upon to pay at that time for the use of fewer machines. The only important item of cost in the construction of a shoe which has not increased during the twelve years since the Company was formed is the item of machinery. The shoe manufacturer pays less per pair of shoes for his machinery equipment than ever before, although the cost of leather and labor and almost everything about a shoe which the Company does not provide is higher; and the Company itself in most instances pays more for what it has to buy.

The amounts paid per pair of shoes for the use of all the principal royalty machines furnished by this Company for the manufacture of different classes of shoes when accounts are paid within thirty days are substantially as follows:

Goodyear Welts, men's work	.05694
Goodyear Welts, women's work	.04694
Goodyear Turn Shoes, women's and misses'	.01972
Children's Goodyear Turn Shoes	.005
Men's and Women's McKay Shoes	.01746
Children's McKay Sewed Shoes	.01391

From the royalties for "Goodyear Welts" and "Goodyear Turns" should be deducted 6/10c per pair for men's Goodyear Welts; for women's Goodyear Welts, 45/100c; and for women's and misses' Goodyear Turns, 75/1000c; which is to be invested in stock of the Corporation and given to lessees under the terms of a circular letter of the Corporation to its lessees, dated June 10, 1910.

The foregoing royalties substantially cover everything which the Company receives for the use of its principal machines from those manufacturers who use its machines in making Goodyear Welt, Goodyear Turn or McKay sewed shoes. In return for the rentals and royalties which it receives, the Company assumes the whole cost

of invention, experimental work, development, manufacture and depreciation of machines; the cost of unremitting care of the machines to keep them at the highest point of efficiency through its force of over five hundred experts who devote their entire time to this service; the purchase of patents, and the cost of administration. That is to say, it assumes items of expense and risk which under any other system yet suggested the shoe manufacturer would be compelled to assume himself, thus subjecting his business to a higher machinery cost per pair of shoes than the average royalty he now pays. The Metallic Machines which insert slugs, nails and wire in heels or soles are placed in factories by the Company without charge to the shoe manufacturer and the only return to the Company is from the indirect royalty, averaging in the case of Goodyear Welts, Turns and McKays, less than one-half a cent per pair of shoes, which is included in the foregoing royalties and is calculated from the difference between the cost to the Company of the material used with the machines and the price which the manufacturer pays the Company for this material.

It has been repeatedly asserted that a shoe manufacturer cannot lease any of the Company's machines without agreeing to take all his machines from the Company, and that he is thus completely within the Company's control, so far as his machinery equipment is concerned. This statement is not true and it never was true. The Company now makes over three hundred different machines, some of which are leased to manufacturers, many of which are sold outright, and most of which can be either leased or purchased as the shoe manufacturer may prefer. In constructing a Goodyear Welt Shoe, which is the highest type of shoe now generally worn, the indispensable machines which the Company supplies exclusively are the Goodyear Welting Machine and the Goodyear Stitching Machine. These are the machines by which the sole and the upper are sewed together after the manner in which they would be sewed by hand. In signing a lease for the use of these two machines the shoe manufacturer does not agree to lease or buy any other machines from the Company, and he may obtain all the rest of his machinery equipment from other companies if he finds elsewhere machines which he likes.

In addition to the Goodyear Welting and Stitching Machines the Company has perfected a series of more than twenty auxiliary machines which have been especially designed to reduce the cost or improve the quality of operations in the manufacture of a Goodyear Welt Shoe and which a shoe manufacturer can use in connection with the Goodyear Welting and Stitching Machines without the payment of additional royalty, the only charge being a nominal annual rental which is no more than sufficient to reimburse the Company for the depreciation of these machines. In short, the Company furnishes the Goodyear Welter and Stitcher and over twenty auxiliary machines for a royalty of substantially four cents per pair of shoes in the manufacture of men's Goodyear Welts and three cents per pair in the manufacture of women's Goodyear Welts. In view of the fact that the Company receives no profit from the use of the auxiliary machines it of course expects the shoe manufacturer who takes them to use them only in conjunction with the Welter and Stitcher from which it receives its profit; but the shoe manufacturer is not obliged to take them and if he finds machines more to his liking anywhere for doing the work of the auxiliary machines he can get those machines wherever he chooses. The Company makes a great variety of machines for performing different operations in different kinds of shoes and any manufacturer can use the Company's most important machines without being obliged to use any other machine which the Company makes.

The Corporation now has 7106 individual stockholders, of whom 2789 are holders of Common Stock only, and 2803 are holders of Preferred Stock only, while 1514 are holders of both Preferred and Common Stock. The par value of the average holding in Common Stock is $6645. The par value of the average holding in Preferred Stock is $2206.

By order of the Board of Directors.

S. W. WINSLOW, President.

Lease and License Number .

Consolidated Hand Method Machine.

This Lease and Agreement made at Boston, in the State of Massachusetts, this day of 19 , between the United Shoe Machinery Company, a corporation organized under the laws of the

State of New Jersey, having an office in said Boston, hereinafter referred to as the lessor, of the one part, and of in the State of , hereinafter referred to as the lessee, of the other part:

Witnesseth, that the lessor, in consideration of the covenants and agreements on the part of the lessee herein contained, does hereby lease to and license the lessee under any letters patent belonging to the lessor or under which the lessor has the right to grant such license affecting any inventions which are now or hereafter shall be embodied therein or employed in the operation thereof, to use

Consolidated Hand Method Lasting Machin(s) No(s) ,

now, or hereafter delivered to the lessee and any duplicate parts, extras, mechanisms and devices relating thereto, or used in connection therewith, now attached to or delivered with the said designated machine or machines, or which may at any time hereafter be obtained from the lessor, or be added thereto with the consent of the lessor (the whole of which machine or machines, duplicate parts, extras, mechanisms and devices, held by the lessee under these presents, whether now or hereafter delivered to or in the possession of the lessee, is hereinafter referred to as the "leased machinery"), subject to the conditions hereinafter contained.

And that the following are agreed to as conditions of the lease and license of the leased machinery, all of which the lessee covenants and agrees to keep and perform: —

One. The leased machinery shall at all times remain and be the sole and exclusive property of the lessor, and the lessee shall have no right of property therein, but only the right to use the same, upon the conditions herein contained. The leased machinery shall be used only by the lessee himself or by operatives in his direct employ, and only in the factory now occupied by him at in the State of . The leased machinery shall not be transferred or delivered or sublet to any other person or corporation, and neither the lease nor the license hereby granted can be assigned by the lessee by his own act or by operation of law. If the lessee becomes insolvent or bankrupt, or has a receiving order made against him, or makes or executes any bill of sale, deed of trust or

assignment for the benefit of his creditors, or if a sale, mortgage, lease or removal of the leased machinery, or any part thereof, be made or attempted, or if any distress or execution or attachment be levied thereon, then and in each such case any or all leases of or licenses to use machinery then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, shall at the option of the lessor cease and determine, and the possession of and full right to and control of all machinery the leases or licenses of which are so terminated, shall thereupon revest in the lessor fee from all claims or demands whatsoever. The lessor and its agents and employees shall at all times be given access to the leased machinery for the purpose of inspecting it or watching its use and operation, or of altering, repairing, improving, or adding to it, or determining the nature or extent of its use, and the lessee shall afford all reasonable facilities therefor.

Two. The lessee shall at all times and at his own expense keep the leased machinery in good and efficient working order and condition, and shall not permit any one to injure or deface or remove any plate, or dates, numbers, or other inscriptions now or hereafter impressed on or affixed to the leased machinery by the lessor. The lessee shall obtain from the lessor exclusively, and shall pay therefor at the regular prices from time to time established by the lessor, all the duplicate parts, extras, mechanisms and devices, of every kind needed or used in operating, repairing, or renewing the leased machinery, and the same shall form part of the leased machinery, and the lessee shall not otherwise make or allow to be made any addition, subtraction or alteration to, from, or in the leased machinery, nor interfere with the proper operation of the same.

Three. The leased machinery shall at all times, until the expiration or termination of the lease thereof and license to use the same hereby granted and the re-delivery of the leased machinery into the possession of the lessor as hereinafter provided, be held at the sole risk of the lessee from injury, loss or destruction, and in case any machine or machines hereby leased shall be destroyed by fire or

otherwise before such expiration or termination and re-delivery, the lessee shall pay to the lessor the sum of Two Hundred Dollars ($200) for each machine so destroyed as partial reimbursement to the lessor for such destruction, and the lessee shall forthwith return whatever remains of the machinery so destroyed to the lessor at Beverly, Massachusetts. The lessee shall pay all taxes and assessments which shall be assessed in respect to the leased machinery or other machinery of the lessor held by the lessee under lease or license upon whomsoever assessed. All taxes or assessments in respect to leases, licenses or agreements covering machinery, or the rights to payments thereunder, shall be construed, for the purposes of this article, to be assessed in respect to the machinery itself. In case at any time any unapportioned tax or assessment shall be assessed to the lessor in respect in part but not wholly to machinery of the lessor in the possession of the lessee the lessee shall pay to the lessor such proportionate part of the total amount of said unapportioned tax or assessment as the fair valuation, to be determined by the lessor, of said machinery of the lessor in the possession of the lessee bears to the fair valuation, to be determined by the lessor, of all machinery (excepting machinery, if any, in the lessor's own possession) in respect to which the unapportioned tax or assessment has been assessed; provided, however, that if such unapportioned tax or assessment includes any tax or assessment in respect to tangible property in the lessor's own possession the amount thereof, based, at the established rate, upon the fair valuation, to be determined by the lessor, of such property, shall first be deducted and the lessee shall pay his proportionate part as aforesaid of the balance only of said unapportioned tax or assessment after such deduction has been made.

Four. The lessee shall use the leased machinery to its full capacity on all boots, shoes, and other footwear made in his factory in the manufacture of which it can be used, except that the leased machinery shall not, nor shall any part thereof, be used in the manufacture of any welt boots, shoes, or other footwear which are or shall be welted, or the soles stitched on welt sewing or sole stitching machines not leased to the lessee by the lessor or its

assignor, or in the manufacture of any turn boots, shoes, or other footwear, the soles of which are or shall be attached to their uppers by turn sewing machines not leased to the lessee by the lessor or its assignor.

Five. The lessee shall pay to the lessor on the last day of each calendar month as rent or royalty the sum of one (1) cent for each pair of misses' and children's and one and one quarter (1¼) cents for each pair of all other kinds of boots, shoes, or other footwear, or portions thereof, lasted or manufactured or prepared during the next preceding calendar month in any way, whether wholly or in part, by the aid of the leased machinery or any part thereof; **provided, however, that in all cases when the lessee shall pay to the lessor on or before the fifteenth day of the calendar month the rent or royalty due for the use of the leased machinery for the next preceding calendar month, the lessor will in consideration of such prompt payment grant a discount of fifty per cent. from such rent or royalty due for such preceding calendar month.** The lessee guarantees that the rent or royalty herein provided (less all abatements) shall amount in each calendar year, ending December 31, to at least fifteen (15) dollars for each calendar month for each machine hereby leased, and at the end of each such calendar year the lessee shall pay to the lessor the amount, if any, by which the rent or royalty paid for said year is less than such guaranteed rent or royalty; provided, however, that if in any calendar year the factory of the lessee remains wholly idle for any entire calendar month, then the amount of rent or royalty guaranteed for that year shall be reduced by one twelfth for each such month that the factory thus remains wholly idle.

Six. The lessor may attach to the leased machinery, or any thereof, an indicator or indicators to register the number of revolutions or movements of any part or parts thereof, and the lessee shall not allow any person (other than the lessor or its agents) to disturb or interfere with such indicator or indicators. In case any indicator thus attached shall from any cause cease to correctly indicate or register, or shall be disturbed or out of repair, or if the glass covering any such indicator shall be removed or broken or

injured, then, and as often as the same shall happen, the lessee shall immediately, by writing, notify the lessor, and at the same time explain the circumstances under which the same has happened. In case any such indicator ceases to indicate, or becomes or remains inaccurate, or the glass covering becomes or remains removed, broken, or injured, because of any fault of the lessee or anyone in his employ, or because of the failure of the lessee to give promptly the notice hereinbefore provided for, then, without prejudice to any other rights of the lessor hereunder, the lessee shall pay the lessor as rent or royalty, without the right to any discount, one and one quarter (1¼) cents per pair for each pair of boots, shoes, or other footwear, or portions thereof, in the manufacture of which the leased machinery or any part thereof shall have been used. The lessee shall keep full and accurate accounts, independently of any indicators that may be placed upon the leased machinery, showing the number of each kind of boots, shoes, and other footwear, or portions thereof, in the manufacture of which the leased machinery or any part thereof shall have been used, and shall allow the lessor at all times, by its agents or attorneys, to examine and to take copies of such accounts and entries of the lessee as may serve to determine the total number of boots, shoes, or other footwear or portions thereof made by the aid of the leased machinery or any part thereof, and the lessee shall produce all such accounts and entries upon request. The lessee shall require each of his operators upon the leased machinery or any part thereof to keep upon blanks or blank books to be furnished by the lessor accurate daily records of the number of each kind of boots, shoes, and other footwear, or portions thereof, in the making of which he has used the leased machinery or any part thereof, and shall require his operatives to sign such records, and if requested so to do by the lessor, shall verify the same under oath; the lessee shall send to the office of the lessor in Boston, on or before the fifth day of each calendar month the original records for the next preceding calendar month kept by his operators as above provided for; and in case, in any calendar month, any of the machines leased hereby has been entirely idle the lessee on or before the fifth day of the next

succeeding calendar month shall send to the office of the lessor in Boston the blank for said month for each such idle machine marked "not in use" and signed by the lessee. The lessee shall also furnish any further information which may be called for in relation to the leased machinery or the use thereof.

And the following agreements, stipulations, and provisions are agreed to: —

Seven. If at any time the lessee shall fail or cease to use exclusively lasting machinery held by him under lease from the lessor for lasting all boots, shoes, and other footwear made by or for him which are lasted by the aid of machinery or shall fail or cease to use exclusively tacking mechanisms and appliances held by him under lease from the lessor, for doing all work in the manufacture of all boots, shoes, and other footwear made by or for him which is done by the aid of tacking mechanisms and appliances, the lessor, although it may have waived or ignored prior instances of such failure or cessation, may, at its option, terminate forthwith by notice in writing this lease and license and any other lease or license of lasting machines, lasting machinery, last mechanisms, or lasting devices then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise; and the possession of and full right to and control of all the leased machinery and all lasting machines, lasting machinery, lasting mechanisms, and lasting devices held by the lessee under lease or license from the lessor or its assignors shall thereupon revest in the lessor free from all claims and demands whatsoever.

Eight. This lease and license shall continue, unless sooner terminated by the lessor because of breach thereof on the part of the lessee, or otherwise as herein provided, for seventeen years from the date hereof. But if any breach or default shall be made in the observance of any one or more of the conditions herein contained or contained in any other lease or license agreement subsisting between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and expressed to be obligatory upon the lessee, the lessor shall have the right, by notice in writing to the lessee, to terminate forthwith this lease and license, and also

if the lessor so elects any other lease or license agreements then in force between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and this notwithstanding that previous breaches or defaults may have been unnoticed, waived or condoned by or on behalf of the lessor. If, upon the expiration of the full term of this lease, the lessor does not request the return of the leased machinery, then the leased machinery shall continue to be held and used under and in accordance with the conditions of this lease and license, which shall thereupon be extended indefinitely as to term; but thereafter either the lessee or the lessor, upon sixty days' notice in writing to the other, may terminate this lease and license, whereupon the leased machinery shall be delivered forthwith to the lessor, as herein provided. Upon the expiration of this lease and license or any extension thereof or its termination by notice or by reason of any default on the part of the lessee as to the terms of this lease and license or any other lease or license from the lessor, or otherwise in any manner whatsoever, the lessee shall forthwith deliver the leased machinery to the lessor at Beverly, Massachusetts, complete and in good order, reasonable wear and tear alone excepted; and shall thereupon pay to the lessor the sum of One Hundred and Fifty Dollars ($150) for each machine hereby leased as compensation for setting up the leased machinery in his factory, for instructing operators, and for deterioration of the leased machinery; and the lessee, for himself, his heirs, executors and administrators, hereby grants to the lessor, its successors and assigns, full right, power, and authority to enter upon the premises and into any factory, room, or any place where the leased machinery or any part thereof may be, and take possession thereof, and take away the same; and the lessee shall have no claim for the repayment of any sum or sums, or any part thereof, which he shall have paid as consideration for the grant of this lease and license or for rent or royalty, or otherwise in respect to the leased machinery.

Nine. A notice in writing, signed by the president, a vice-president, the treasurer or an assistant treasurer of the lessor, or by any assignee of the lessor's rights hereunder and posted by pre-paid

letter, addressed to the lessee or delivered at his usual or last known place of abode or business, that the lease and license hereby granted is determined or shall be determined at the expiration of a certain period, shall be a sufficient determination of the lease and license from the time of posting or delivering such notice, or from the expiration of the period therein mentioned, as the case may be. Any termination of this lease and license shall not release the lessee from his obligation to pay rent or royalty for the period prior to such termination, and shall be without prejudice to any other rights or remedies which the lessor may have for violation of contract, use of machines without right, or use of patented inventions without license.

Ten. The lessee admits the validity for the full term expressed in the grant thereof (and every extension and renewal thereof) of each and every of the Letters Patent of the United States of America owned by the lessor or under which it is licensed, any of the inventions of which are or hereafter may be embodied in the leased machinery. The lessee also agrees that he will not directly or indirectly infringe or contest the validity for the full term expressed in the grant thereof or of any extension or renewal thereof, of any of the Letters Patent referred to in the "Schedule of Patents" hereto annexed or the title of the lessor thereto. The expiration of this agreement or any extension thereof or the termination or cesser of the lease and license hereby granted shall not in any way affect the provisions of this clause, or release or discharge the lessee from the admissions and estoppels herein set forth.

Eleven. None of the terms or conditions of this lease and license shall be held to have been waived by any act or knowledge of the lessor, its agents or employees, but only by an instrument in writing, signed by the president, a vice-president, or the treasurer of the lessor.

Twelve. The term "lessor" shall include the said United Shoe Machinery Company, and its successors and assigns. All the conditions and agreements binding on the lessee shall be binding on and enforceable against his legal representatives. In the construction of this instrument, words relating to the number and gender

of the parties shall be read according to their real number and gender.

In witness whereof, the parties hereto have duly executed this instrument in duplicate, the day and year first above written.

☞ If lessee is a corporation, add corporate seal.

Lease and License Agreement Number

This Agreement made at Boston, in the State of Massachusetts, this day of 19 , between the United Shoe Machinery Company, a corporation organized under the laws of the State of New Jersey, having an office in said Boston, hereinafter referred to as the lessor, of the one part, and of in the State of , hereinafter referred to as the lessee, of the other part:

Witnesseth, that the lessor, in consideration of the covenants and agreements on the part of the lessee herein contained, does hereby lease to and license the lessee under any letters patent belonging to the lessor or under which the lessor has the right to grant such license affecting any inventions which are now or hereafter shall be embodied therein or employed in the operation thereof, to use

Boston Lasting Machine(s) No(s). ,

now or hereafter delivered to the lessee and any duplicate parts, extras, mechanisms and devices relating thereto, or used in connection therewith, now attached to or delivered with the said designated machine or machines or which may at any time hereafter be obtained from the lessor, or be added thereto by or with the consent of the lessor (the whole of which machine or machines, duplicate parts, extras, mechanisms and devices, held by the lessee under these presents, whether now or hereafter delivered to or in the possession of the lessee, is hereinafter referred to as the "leased machinery"), subject to the conditions hereinafter contained.

And that the following are agreed to as conditions of this agreement, all of which the lessee covenants and agrees to keep and perform: —

One. The leased machinery shall at all times remain and be the sole and exclusive property of the lessor, and the lessee shall have no right of property therein, but only the right to use the same, upon the conditions herein contained. The leased machinery shall

be used only by the lessee himself, or by operatives in his direct employ, and only in the factory now occupied by him at in the State of . The leased machinery shall not be transferred or delivered or sublet to any other person or corporation, and neither this agreement nor the lease nor the license hereby granted can be assigned by the lessee by his own act or by operation of law. If the lessee becomes insolvent or bankrupt, or has a receiving order made against him, or makes or executes any bill of sale, deed of trust or assignment for the benefit of his creditors, or if a sale, mortgage, lease or removal of the leased machinery, or any part thereof be made or attempted, or if any distress or execution or attachment be levied thereon, then and in each such case any or all leases of or licenses to use machinery then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, shall at the option of the lessor cease and determine, and the possession of and full right to and control of all machinery the leases or licenses of which are so terminated, shall thereupon revest in the lessor free from all claims or demands whatsoever. The lessor and its agents and employees shall at all times be given access to the leased machinery for the purpose of inspecting it or watching its use and operation, or of altering, repairing, improving, or adding to it, or determining the nature or extent of its use, and the lessee shall afford all reasonable facilities therefor.

Two. The lessee shall at all times and at his own expense keep the leased machinery in good and efficient working order and condition, and shall not permit any one to injure or deface or remove any plate, or dates, numbers, or other inscriptions now or hereafter impressed on or affixed to the leased machinery by the lessor. The lessee shall obtain from the lessor exclusively, and shall pay therefor at the regular prices from time to time established by the lessor, all the duplicate parts, extras, mechanisms and devices of every kind needed or used in operating, repairing, or renewing the leased machinery, and the same shall form part of the leased machinery, and the lessee shall not otherwise make or allow to be made any addition, subtraction, or alteration to, from, or in the

leased machinery without the consent in writing of the lessor nor interfere with the proper operation of the same.

Three. The leased machinery shall at all times, until the expiration or termination of the lease thereof and license to use the same hereby granted and the re-delivery of the leased machinery into the possession of the lessor as hereinafter provided, be held at the sole risk of the lessee from injury, loss or destruction, and in case the same or any thereof shall be destroyed by fire or otherwise before such expiration or termination and re-delivery, the lessee shall pay to the lessor upon demand the sum of Fifty Dollars ($50) for each machine so destroyed as partial reimbursement to the lessor for such destruction, and the lessee shall forthwith return whatever remains of all the machinery so destroyed to the lessor at Beverly, Massachusetts.

Four. The lessee shall pay all taxes and assessments which shall be assessed in respect to the leased machinery or other machinery of the lessor held by the lessee under lease or license upon whomsoever assessed. All taxes or assessments in respect to leases, licenses or agreements covering machinery, or the rights to payments thereunder, shall be construed, for the purposes of this article, to be assessed in respect to the machinery itself. In case at any time any unapportioned tax or assessment shall be assessed to the lessor in respect in part but not wholly to machinery of the lessor in the possession of the lessee the lessee shall pay to the lessor such proportionate part of the total amount of said unapportioned tax or assessment as the fair valuation, to be determined by the lessor, of said machinery of the lessor in the possession of the lessee bears to the fair valuation, to be determined by the lessor, of all machinery (excepting machinery, if any, in the lessor's own possession) in respect to which the unapportioned tax or assessment has been assessed: provided, however, that if such unapportioned tax or assessment includes any tax or assessment in respect to tangible property in the lessor's own possession the amount thereof, based, at the established rate, upon the fair valuation, to be determined by the lessor, of such property, shall first be deducted and the lessee shall pay his proportionate part as aforesaid of the balance only of

said unapportioned tax or assessment after such deduction has been made.

Five. The leased machinery is delivered to the lessee for use other than for lasting boots, shoes or other footwear, and the leased machinery shall not nor shall any part thereof be used for lasting in whole or in part or for performing any operation in connection with the lasting of any boots, shoes or other footwear, nor shall the leased machinery be used in the manufacture of any welted boots, shoes or other footwear which have been or shall be welted or the soles stitched by the aid of any welt sewing or sole stitching machinery not held by the lessee under lease from the lessor, or in the manufacture of any turned boots, shoes or other footwear the soles of which have been or shall be attached to their uppers by the aid of any turn sewing machinery not held by the lessee under lease from the lessor, or in the manufacture of any boots, shoes or other footwear which have been or shall be lasted, pegged, slugged, heel seat nailed, or otherwise partly made by the aid of any lasting or pegging or "Metallic" machinery or mechanisms not held by the lessee under lease from the lessor or in the manufacture of any boots, shoes or other footwear the heels of which have been or shall be compressed or prepared by the lessee in whole or in part or have been or shall be attached by the aid of any heeling machinery not held by the lessee under lease from the lessor.

Six. The lessee shall pay to the lessor as rent or royalty for the leased machinery the sum of dollars per year for each machine hereby leased for each and every year during the continuance of this lease and license, which sum shall be paid in equal monthly payments of dollars each for each machine hereby leased, made to the lessor at its office in Boston, Massachusetts, on or before the fifteenth day of each calendar month.

Seven. The lessor may attach to the leased machinery, or any thereof, an indicator or indicators to register the number of revolutions or movements of any part or parts thereof, and the lessee shall not allow any person (other than the lessor or its agents) to disturb or interfere with any such indicator or indicators.

And that the following stipulations and provisions are agreed to: —

Eight. The term of this agreement shall be seventeen years from the date hereof. The lease of the leased machinery and license to use the same hereby granted shall continue, unless sooner terminated by the lessor because of breach thereof on the part of the lessee, or otherwise as herein provided, for the full term of this agreement; but, inasmuch as the leased machinery is supplied to the lessee without cash payment covering the cost of manufacture, the lessor may at any time cancel and terminate this lease and license by giving to the lessee sixty days' notice in writing of its intention so to do. If any breach or default shall be made in the observance of any one or more of the conditions in this agreement contained or contained in any other lease or license agreement subsisting between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and expressed to be obligatory upon the lessee, the lessor shall have the right, by notice in writing to the lessee, to terminate forthwith any or all leases of or licenses to use machinery then in force between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and this notwithstanding that previous breaches or defaults may have been unnoticed, waived, or condoned by or on behalf of the lessor. If, upon the expiration of the full term of this agreement, the lessor does not request the return of the leased machinery, then the leased machinery shall continue to be held and used under and in accordance with the conditions, stipulations and provisions in this agreement contained and this agreement and the lease and license herein contained shall thereupon be extended indefinitely as to term; but thereafter either the lessee or the lessor, upon sixty days' notice in writing to the other, may terminate this agreement and the lease and license herein contained, whereupon the leased machinery shall be delivered forthwith to the lessor, as herein provided. Upon the expiration or termination of the lease hereby granted or any extension thereof by notice or by reason of any default on the part of the lessee as to the terms of this agreement or any other lease or license agreement from the

lessor or otherwise in any manner whatsoever, the lessee shall forthwith at his own expense deliver the leased machinery to the lessor at Beverly, Massachusetts, complete and in good order, reasonable wear and tear alone excepted; and shall thereupon pay to the lessor such sum as may be necessary to put the leased machinery in suitable order and condition to lease to another lessee; and the lessee, for himself, his heirs, executors and administrators, hereby grants to the lessor, its successors and assigns, full right, power, and authority to enter upon the premises and into any factory, room, or any place where the leased machinery or any part thereof may be, and take possession thereof, and take away the same.

Nine. A notice in writing, signed by the president, a vice-president, the treasurer or an assistant treasurer of the lessor or by any assignee of the lessor's rights hereunder and posted by prepaid letter, addressed to the lessee or delivered at his usual or last known place of abode or business, that the lease and license hereby granted is terminated or shall be terminated at the expiration of a certain period, shall be a sufficient termination of the lease and license from the time of posting or delivering such notice, or from the expiration of the period therein mentioned, as the case may be. Any termination of this agreement or the lease and license hereby granted shall not release the lessee from his obligation to pay rent or royalty for the period prior to such termination, and shall be without prejudice to any other rights or remedies which the lessor may have for violation of contract, use of machines without right, or use of patented inventions without license.

Ten. The lessee admits the validity for the full term expressed in the grant thereof (and every extension and renewal thereof) of each and every of the Letters Patent of the United States of America, owned by the lessor or under which it is licensed, any of the inventions of which are or hereafter may be embodied in the leased machinery. The lessee also agrees that he will not directly or indirectly infringe or contest the validity for the full term expressed in the grant thereof or of any extension or renewal thereof, of any of the Letters Patent referred to in the "Schedule of Pat-

ents" hereto annexed or the title of the lessor thereto. The expiration of this agreement or any extension thereof or the termination or cesser of the lease and license hereby granted shall not in any way affect the provisions of this clause, or release or discharge the lessee from the admissions and estoppels herein set forth.

Eleven. None of the conditions, stipulations or provisions of this agreement shall be held to have been waived by any act or knowledge of the lessor, its agents or employees, but only by an instrument in writing, signed by the president, a vice-president, or the treasurer of the lessor.

Twelve. The term "lessor" shall include the said United Shoe Machinery Company and its successors and assigns. All the conditions, stipulations and provisions binding on the lessee shall be binding on and enforceable against his legal representatives. In the construction of this instrument, words relating to the number and gender of the parties shall be read according to their real number and gender.

In witness whereof, the parties hereto have duly executed this instrument in duplicate, the day and year first above written.

[Put in Evidence, page 1765.]

General Department. [Form A. H. H., 1113.]

Lease and License Number .

This Lease and Agreement made at Boston in the State of Massachusetts this day of 19 , between the United Shoe Machinery Company, a corporation organized under the laws of the State of New Jersey, having an office in said Boston, hereinafter referred to as the lessor, of the one part, and of in the State of , hereinafter referred to as the lessee, of the other part:

Witnesseth, that the lessor, in consideration of the covenants and agreements on the part of the lessee herein contained, does hereby lease to and license the lessee under any letters patent belonging to the lessor or under which the lessor has the right to grant such license affecting any inventions which are now or hereafter shall be embodied therein or employed in the operation thereof to use

McKay Sewing Machine(s) (Model B), No(s). ,

and any duplicate parts, extras, mechanisms and devices relating thereto, or used in connection therewith, now attached to or delivered with the said designated machine or machines, or which may at any time hereafter be obtained from the lessor, or be added thereto by or with the consent of the lessor (the whole of which machine or machines, duplicate parts, extras, mechanisms and devices, held by the lessee under these presents, whether now or hereafter delivered to or in the possession of the lessee, is hereinafter referred to as the "leased machinery"), subject to the conditions hereinafter contained.

And that the following are agreed to as conditions of the lease and license of the leased machinery, all of which the lessee covenants and agrees to keep and perform:—

One. The leased machinery shall at all times remain and be the sole and exclusive property of the lessor, and the lessee shall have no right of property therein, but only the right to use the same, upon the conditions herein contained. The leased machinery shall be used only by the lessee himself or by operatives in his direct employ, and only in the factory now occupied by him at in the State of . The leased machinery shall not be transferred or delivered or sublet to any other person or corporation, and neither the lease nor the license hereby granted can be assigned by the lessee by his own act or by operation of law. If the lessee becomes insolvent or bankrupt, or has a receiving order made against him, or makes or executes any bill of sale, deed of trust or assignment for the benefit of his creditors, or if a sale, mortgage, lease or removal of the leased machinery, or any part thereof, be made or attempted, or if any distress or execution or attachment be levied thereon, then and in each such case any or all leases of or licenses to use machinery then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, shall at the option of the lessor cease and determine, and the possession of and full right to and control of all machinery the leases or licenses of which are so terminated, shall thereupon revest in the lessor free from all claims or demands whatsoever. The lessor and its agents and employees shall at all times be given access to the leased machinery for the purpose of inspecting it or watching its use and operation, or of altering, repairing, improving, or adding to it, or determining the nature or extent of its use, and the lessee shall afford all reasonable facilities therefor.

Two. The lessee shall at all times and at his own expense keep the leased machinery in good and efficient working order and condition, and shall not permit any one to injure or deface or remove any plate, or dates, numbers, or other inscriptions now or hereafter impressed on or affixed to the leased machinery by the lessor. The lessee shall obtain from the lessor exclusively, and shall pay

therefor at the regular prices from time to time established by the lessor, all the duplicate parts, extras, mechanisms and devices, of every kind needed or used in operating, repairing, or renewing the leased machinery, and the same shall form part of the leased machinery, and the lessee shall not otherwise make or allow to be made any addition, subtraction or alteration to, from, or in the leased machinery without the consent in writing of the lessor, nor interfere with the proper operation of the same.

Three. The lessee shall pay all taxes and assessments which shall be assessed in respect to the leased machinery or other machinery of the lessor held by the lessee under lease or license upon whomsoever assessed. All taxes or assessments in respect to leases, licenses or agreements covering machinery, or the rights to payments thereunder, shall be construed, for the purposes of this article, to be assessed in respect to the machinery itself. In case at any time any unapportioned tax or assessment shall be assessed to the lessor in respect in part but not wholly to machinery of the lessor in the possession of the lessee the lessee shall pay to the lessor such proportionate part of the total amount of said unapportioned tax or assessment as the fair valuation, to be determined by the lessor, of said machinery of the lessor in the possession of the lessee bears to the fair valuation, to be determined by the lessor, of all machinery (excepting machinery, if any, in the lessor's own possession) in respect to which the unapportioned tax or assessment has been assessed; provided, however, that if such unapportioned tax or assessment includes any tax or assessment in respect to tangible property in the lessor's own possession the amount thereof, based, at the established rate, upon the fair valuation, to be determined by the lessor, of such property, shall first be deducted and the lessee shall pay his proportionate part as aforesaid of the balance only of said unapportioned tax or assessment after such deduction has been made.

Four. The leased machinery shall not nor shall any part thereof be used in the manufacture of any boots, shoes, or other footwear which have been or shall be lasted by the aid of any machines or devices not held by the lessee under lease from the lessor.

Five. The lessee shall pay to the lessor immediately after the execution hereof, as a lease premium, the sum of one hundred dollars ($100) for each machine hereby leased. The lessee shall also pay to the lessor as rental or royalty for the leased machinery the fixed sum of five dollars ($5) per month for each machine hereby leased, payable on the fifteenth day of each calendar month in respect to the preceding calendar month.

Six. The lessor may attach to the leased machinery, or any thereof, an indicator or indicators to register the number of revolutions or movements of any part or parts thereof, and the lessee shall not allow any person (other than the lessor or its agents) to disturb or interfere with such indicator or indicators. In case any indicator thus attached shall from any cause cease to correctly indicate or register, or shall be disturbed or out of repair, or if the glass covering any such indicator shall be removed or broken or injured, then and as often as the same shall happen the lessee shall immediately by writing notify the lessor and at the same time explain the circumstances under which the same has happened. The lessee shall, if so requested by the lessor at any time, keep full and accurate accounts independently of any indicators that may be placed upon the leased machinery showing the number of boots, shoes and other footwear, or portions thereof, in the manufacture or preparation of which the leased machinery or any part thereof shall be used, and shall, upon request, allow the lessor at any and at all times, by its agents or attorneys, to examine and take copies of all such accounts and entries of the lessee as may aid in determining the number of boots, shoes and other footwear, or portions thereof, operated upon by the leased machinery or any part thereof; and the lessee shall produce all such accounts and entries upon request. The lessee shall, if so requested by the lessor at any time, render to the lessor such statements and furnish to the lessor such other information as may be called for with reference to the leased machinery or the use thereof.

And that the following agreements, stipulations, and provisions are agreed to: —

Seven. This lease and license shall continue, unless sooner ter-

minated by the lessor because of breach thereof on the part of the lessee, or otherwise as herein provided, for seventeen years from the date hereof. But if any breach or default shall be made in the observance of any one or more of the conditions herein contained or contained in any other lease or license agreement subsisting between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise and expressed to be obligatory upon the lessee, the lessor shall have the right by notice in writing to the lessee to terminate forthwith this lease and license, and this notwithstanding that previous breaches or defaults may have been unnoticed, waived, or condoned by or on behalf of the lessor. If, upon the expiration of the full term of this lease, the lessor does not request the return of the leased machinery, then the leased machinery shall continue to be held and used under and in accordance with the conditions of this lease and license, which shall thereupon be extended indefinitely as to term; but thereafter either the lessee or the lessor, upon sixty days' notice in writing to the other, may terminate this lease and license, whereupon the leased machinery shall be delivered forthwith to the lessor, as herein provided. Upon the expiration of this lease and license or any extension thereof or its termination by notice or by reason of any default on the part of the lessee as to the terms of this lease and license or any other lease or license from the lessor, or otherwise in any manner whatsoever, the lessee shall forthwith deliver the leased machinery to the lessor at Beverly, Massachusetts, in good order, reasonable wear and tear alone excepted; and the lessee for himself, his heirs, executors and administrators, hereby grants to the lessor, its successors and assigns, full right, power and authority to enter upon the premises and into any factory, room, or any place where the leased machinery, or any part thereof, may be, and take possession thereof, and take away the same; and the lessee shall have no claim for the repayment of any sum or sums or any part thereof which he shall have paid as consideration for the grant of this lease and license or for rent or royalty, or otherwise in respect to the leased machinery.

Eight. A notice in writing, signed by the president, a vice-president, the treasurer or the assistant treasurer of the lessor or

by any assignee of the lessor's rights hereunder, and posted by prepaid letter, addressed to the lessee or delivered at his usual or last known place of abode or business, that the lease and license hereby granted is determined or shall be determined at the expiration of a certain period, shall be a sufficient determination of the lease and license from the time of posting or delivering such notice, or from the expiration of the period therein mentioned, as the case may be. Any termination of this lease and license shall not release the lessee from his obligation to pay rent or royalty for the period prior to such termination and shall be without prejudice to any other rights or remedies which the lessor may have for violation of contract, use of machines without right or use of patented inventions without license.

Nine. The lessee admits the validity for the full term expressed in the grant thereof (and every extension and renewal thereof) of each and every of the Letters Patent of the United States of America, owned by the lessor or under which it is licensed, any of the inventions of which are or hereafter may be embodied in the leased machinery and also that he will not directly or indirectly infringe or contest the validity for the full term expressed in the grant thereof or of any extension or renewal thereof, of any of said Letters Patent or the title of the lessor thereto. The expiration of this agreement or any extension thereof or the termination or cesser of the lease and license hereby granted shall not in any way affect the provisions of this clause, or release or discharge the lessee from the admissions and estoppels herein set forth.

Ten. None of the terms or conditions of this lease and license shall be held to have been waived by any act or knowledge of the lessor, its agents or employees, but only by an instrument in writing, signed by the president, a vice-president or the treasurer of the lessor.

Eleven. The term "lessor" shall include the said United Shoe Machinery Company and its successors and assigns. All the conditions and agreements binding on the lessee shall be binding on and enforceable against his legal representatives. In the construction of this instrument, words relating to the number and gender

of the parties shall be read according to their real number and gender.

In witness whereof, the parties hereto have duly executed this instrument in duplicate, the day and year first above written.

Lease and License Agreement Number .

Ensign Lacing Machine.

This Agreement made at Boston, in the State of Massachusetts, this day of 19 , between the United Shoe Machinery Company, a corporation organized under the laws of the State of New Jersey, having an office in said Boston, hereinafter referred to as the lessor, of the one part, and of in the State of , hereinafter referred to as the lessee, of the other part:

Witnesseth, that the lessor, in consideration of the covenants and agreements on the part of the lessee herein contained, does hereby lease to and license the lessee under any letters patent belonging to the lessor or under which the lessor has the right to grant such license affecting any inventions which are now or hereafter shall be embodied therein or employed in the operation thereof, to use

Ensign Lacing Machine(s), No(s). ,

and any duplicate parts, extras, mechanisms and devices relating

thereto, or used in connection therewith, now attached to or delivered with the said designated machine or machines or which may at any time hereafter be obtained from the lessor, or be added thereto by or with the consent of the lessor (the whole of which machine or machines, together with all duplicate parts, extras, mechanisms and devices held by the lessee under these presents, whether now or hereafter delivered to or in the possession of the lessee, is hereinafter referred to as the "leased machinery"), subject to the conditions hereinafter contained.

And that the following are agreed to as conditions of this agreement, all of which the lessee covenants and agrees to keep and perform: —

One. The leased machinery shall at all times remain and be the sole and exclusive property of the lessor, and the lessee shall have no right of property therein, but only the right to use the same, upon the conditions herein contained. The leased machinery shall be used only by the lessee himself or by operatives in his direct employ, and only in the factory now occupied by him at in the State of unless the lessor shall by an instrument in writing signed by its president, vice-president or treasurer authorize the lessee to remove the leased machinery and to use the same elsewhere. The leased machinery shall not be transferred or delivered or sublet to any other person or corporation, and neither this agreement nor the lease nor the license hereby granted can be assigned by the lessee by his own act or by operation of law. If the lessee becomes insolvent or bankrupt, or has a receiving order made against him, or makes or executes any bill of sale, deed of trust or assignment for the benefit of his creditors, or if a sale, mortgage, lease or unauthorized removal of the leased machinery, or any part thereof, be made or attempted, or if any distress or execution or attachment be levied thereon, then and in each such case any or all leases of or licenses to use machinery then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, shall at the option of the lessor cease and determine, and the possession of and full right to and control of all machinery the leases or licenses of which are so terminated,

shall thereupon revest in the lessor free from all claims or demands whatsoever. The lessor and its agents and employees shall at all times be given access to the leased machinery for the purpose of inspecting it or watching its use and operation, or of altering, repairing, improving, or adding to it, or determining the nature or extent of its use, and the lessee shall afford all reasonable facilities therefor.

Two. The lessee shall at all times and at his own expense keep the leased machinery in good and efficient working order and condition, and shall not permit any one to injure or deface or remove any plate, or dates, numbers, or other inscriptions now or hereafter impressed on or affixed to the leased machinery by the lessor. The lessee shall obtain from the lessor exclusively, and shall pay therefor at the regular prices from time to time established by the lessor, all the duplicate parts, extras, mechanisms and devices, of every kind needed or used in operating, repairing, or renewing the leased machinery, and the same shall form part of the leased machinery, and the lessee shall not otherwise make or allow to be made any addition, subtraction or alteration to, from, or in the leased machinery, nor interfere with the proper operation of the same.

Three. The leased machinery shall at all times, until the expiration or termination of the lease thereof and license to use the same hereby granted and the re-delivery of the leased machinery into the possession of the lessor as hereinafter provided, be held at the sole risk of the lessee from injury, loss or destruction, and in case any machine or machines hereby leased shall be destroyed by fire or otherwise before such expiration or termination and re-delivery, the lessee shall pay to the lessor upon demand in respect to each machine so destroyed the sum of One Hundred Fifty Dollars ($150) as partial reimbursement to the lessor for such destruction, and the lessee shall forthwith return whatever remains of the machinery so destroyed to the lessor at Beverly, Massachusetts.

Four. The lessee shall pay all taxes and assessments which shall be assessed in respect to the leased machinery or other machinery of the lessor held by the lessee under lease or license upon whomsoever assessed. All taxes or assessments in respect to leases,

licenses or agreements covering machinery, or the rights to payments thereunder, shall be construed, for the purposes of this article, to be assessed in respect to the machinery itself. In case at any time any unapportioned tax or assessment shall be assessed to the lessor in respect in part but not wholly to machinery of the lessor in the possession of the lessee the lessee shall pay to the lessor such proportionate part of the total amount of said unapportioned tax or assessment as the fair valuation, to be determined by the lessor, of said machinery of the lessor in the possession of the lessee bears to the fair valuation, to be determined by the lessor, of all machinery (excepting machinery, if any, in the lessor's own possession) in respect to which the unapportioned tax or assessment has been assessed; provided, however, that if such unapportioned tax or assessment includes any tax or assessment in respect to tangible property in the lessor's own possession the amount thereof, based, at the established rate, upon the fair valuation, to be determined by the lessor, of such property, shall first be deducted and the lessee shall pay his proportionate part as aforesaid of the balance only of said unapportioned tax or assessment after such deduction has been made.

Five. The leased machinery shall be used only for inserting lacings in the uppers of boots, shoes and other footwear which have been or shall be lasted by the use of Lasting Machines held by the lessee under lease from the lessor, and the leased machinery shall not nor shall any part thereof be used in the manufacture or preparation of any welted boots, shoes or other footwear or portions thereof which have been or shall be welted or the soles stitched by the aid of any welt sewing or sole stitching machinery not held by the lessee under lease from the lessor, or in the manufacture or preparation of any turned boots, shoes or other footwear or portions thereof the soles of which have been or shall be attached to their uppers by the aid of any turn sewing machinery not held by the lessee under lease from the lessor.

Six. The lessee as and by way of rent or royalty for the leased machinery shall pay to the lessor the fixed sum of one dollar and fifty cents ($1.50) per month for each machine hereby leased upon

the fifteenth day of each calendar month. Independently of and in addition to said fixed rent or royalty of one dollar and fifty cents ($1.50) per month for each machine hereby leased the lessee shall also pay to the lessor an additional rent or royalty of one-tenth of one cent per pair for each pair of boots, shoes or other footwear in the manufacture or preparation of which the leased machinery shall be used, such additional royalty to be due and payable on the last day of each calendar month in respect to all boots, shoes or other footwear in the manufacture or preparation of which the leased machinery shall have been used during the next preceding calendar month, **provided, however, that in all cases when the lessee shall pay to the lessor on or before the fifteenth day of the calendar month such additional rent or royalty in respect to all boots, shoes or other footwear operated upon by the leased machinery during the next preceding calendar month the lessor will, in consideration of such prompt payment, grant to the lessee a discount of fifty per cent. from such additional rent or royalty for such preceding calendar month.**

Seven. The lessor may attach to the leased machinery, or any thereof, an indicator or indicators to register the number of revolutions or movements of any part or parts thereof, and the lessee shall not allow any person (other than the lessor or its agents) to disturb or interfere with such indicator or indicators. In case any indicator thus attached shall from any cause cease to correctly indicate or register, or shall be disturbed or out of repair, or if the glass covering any such indicator shall be removed or broken or injured, then, and as often as the same shall happen, the lessee shall immediately, by writing, notify the lessor, and at the same time explain the circumstances under which the same has happened. In case any such indicator ceases to indicate, or becomes or remains inaccurate, or the glass covering becomes or remains removed, broken, or injured, because of any fault of the lessee or anyone in his employ, or because of the failure of the lessee to give promptly the notice hereinbefore provided for, then, without prejudice to any other rights of the lessor hereunder, the lessee shall pay the lessor without the right to any discount, in lieu of the rental or

royalty of one-tenth of one cent per pair hereinbefore provided for the sum of one-eighth of one cent per pair for each pair of boots, shoes or other footwear, or portions thereof in the manufacture or preparation of which the leased machinery or any part thereof shall have been used. The lessee shall keep full and accurate accounts, independently of any indicators that may be placed upon the leased machinery, showing the number of boots, shoes, and other footwear, or portions thereof, in the manufacture or preparation of which the leased machinery or any part thereof has been used, and shall allow the lessor at all times, by its agents or attorneys, to examine and to take copies of such accounts and entries of the lessee as may serve to determine the total number of such boots, shoes and other footwear or portions thereof, made or prepared by the aid of the leased machinery or any part thereof, and the lessee shall produce all such accounts and entries upon request. The lessee shall require each of his operators upon the leased machinery or any part thereof to keep upon blanks or blank books to be furnished by the lessor accurate daily records of the number of boots, shoes, and other footwear, or portions thereof, in the making or preparation of which he has used the leased machinery or any part thereof, and shall require his operators to sign such records, and, if requested so to do by the lessor, shall verify the same under oath. The lessee shall send to the office of the lessor in Boston, on or before the fifth day of each calendar month the original records for the next preceding calendar month kept by his operators as above provided for; and in case, in any calendar month, any one or more of the machines hereby leased has been entirely idle, the lessee on or before the fifth day of the next succeeding calendar month shall send to the affice of the lessor in Boston the blank for each such idle machine marked "not in use," and signed by the lessee. The lessee shall also furnish any further information which may be called for in relation to the leased machinery or the use thereof.

And that the following stipulations and provisions are agreed to: —

Eight. If at any time the lessee shall fail or cease to use exclu-

sively lacing machinery held by him under lease from the lessor for doing all work in the manufacture of all boots, shoes and other footwear made by or for him, which is of the kind which lacing machinery put out by the lessor is adapted to perform and which is done by or for the lessee by the aid of machinery, the lessor, although it may have waived or ignored prior instances of such failure or cessation, may at its option terminate forthwith by notice in writing any or all leases of or licenses to use lacing machinery then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise; and the possession of and full right to and control of all machinery the leases or licenses of which are so terminated shall thereupon revest in the lessor free from all claims and demands whatsoever.

Nine. The term of this agreement shall be seventeen years from the date hereof. The lease of the leased machinery and license to use the same hereby granted shall continue, unless sooner terminated by the lessor because of breach thereof on the part of the lessee, or otherwise as herein provided, for the full term of this agreement. But if any breach or default shall be made in the observance of any one or more of the conditions in this agreement contained or contained in any other lease or license agreement subsisting between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and expressed to be obligatory upon the lessee, the lessor shall have the right, by notice in writing to the lessee, to terminate forthwith any or all leases of or licenses to use machinery then in force between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and this notwithstanding that previous breaches or defaults may have been unnoticed, waived, or condoned by or on behalf of the lessor. If, upon the expiration of the full term of this agreement, the lessor does not request the return of the leased machinery, then the leased machinery shall continue to be held and used under and in accordance with the conditions, stipulations, and provisions in this agreement contained, and this agreement and the lease and license herein contained shall thereupon be extended indefinitely as to term; but thereafter either the lessee or the lessor,

upon sixty days' notice in writing to the other, may terminate this agreement and the lease and license herein contained, whereupon the leased machinery shall be delivered forthwith to the lessor, as herein provided. Upon the expiration or termination of the lease hereby granted or any extension thereof, by notice or by reason of any default on the part of the lessee as to the terms of this agreement or of any other lease or license agreement from the lessor or otherwise in any manner whatsoever, the lessee shall forthwith at his own expense deliver the leased machinery to the lessor at Beverly, Massachusetts, complete and in good order, reasonable wear and tear alone excepted; and shall thereupon pay to the lessor without prejudice to any other rights or remedies of the lessor the sum of One Hundred Dollars ($100) for each machine hereby leased as partial reimbursement to the lessor for deterioration of the leased machinery, expenses in connection with the installation thereof and instruction of operators; and the lessee for himself, his heirs, executors and administrators, successors and assigns hereby grants to the lessor, its successors and assigns, full right power and authority to enter upon the premises and into any factory, room, or any place where the leased machinery, or any part thereof, may be, and take possession thereof, and take away the same; and the lessee shall have no claim for the repayment or offset of any sum or sums or any part thereof which shall have been paid in any wise in respect to this lease and license or the leased machinery.

Ten. A notice in writing, signed by the president, a vice-president, the treasurer or an assistant treasurer of the lessor or by any assignee of the lessor's rights hereunder, and posted by prepaid letter, addressed to the lessee or delivered at his usual or last known place of abode or business, that the lease and license hereby granted is terminated or shall be terminated at the expiration of a certain period, shall be a sufficient termination of the lease and license from the time of posting or delivering such notice, or from the expiration of the period therein mentioned, as the case may be. Any termination of this agreement or of the lease and license hereby granted shall not release the lessee from his obligation to pay rent or royalty

for the period prior to such termination and shall be without prejudice to any other rights or remedies which the lessor may have for violation of contract, use of machines without right or use of patented inventions without license.

Eleven. The lessee admits the validity for the full term expressed in the grant thereof (and every extension and renewal thereof) of each and every of the Letters Patent of the United States of America, owned by the lessor or under which it is licensed, any of the inventions of which are or hereafter may be embodied in the leased machinery. The lessee also agrees that he will not directly or indirectly infringe or contest the validity for the full term expressed in the grant thereof or of any extension or renewal thereof, of any of the Letters Patent referred to in the Schedule of Patents hereto annexed or the title of the lessor thereto. The expiration of this agreement or any extension thereof or the termination or cesser of the lease and license hereby granted shall not in any way affect the provisions of this clause, or release or discharge the lessee from the admissions and estoppels herein set forth.

Twelve. None of the conditions, stipulations or provisions of this agreement shall be held to have been waived by any act or knowledge of the lessor, its agents or employees, but only by an instrument in writing, signed by the president, a vice-president or the treasurer of the lessor.

Thirteen. The term "lessor" shall include the said United Shoe Machinery Company and its successors and assigns. All the conditions, stipulations and provisions binding on the lessee shall be binding on and enforceable against his legal representatives. In the construction of this instrument, words relating to the number and gender of the parties shall be read according to their real number and gender.

In witness whereof, the parties hereto have duly executed this instrument in duplicate, the day and year first above written.

Eyeletting Department. [Form A. F. S., 1170.]

Lease and License Agreement Number .

This Agreement made at Boston, in the State of Massachusetts, this day of 19 , between the United Shoe Machinery Company, a corporation organized under the laws of the State of New Jersey, having an office in said Boston, hereinafter referred to as the lessor, of the one part, and of in the State of hereinafter referred to as the lessee, of the other part:

Witnesseth, that the lessor, in consideration of the covenants and agreements on the part of the lessee herein contained, does hereby lease to and license the lessee under any letters patent belonging to the lessor or under which the lessor has a right to grant such license affecting any inventions which are now or hereafter shall be embodied therein or employed in the operation thereof, to use

Duplex Eyeletting Machine(s) No(s).

now or hereafter delivered to the lessee, and any duplicate parts, extras, mechanisms and devices relating thereto, or used in connection therewith, now attached to or delivered with the said desig-

nated machine or machines, or which may at any time hereafter be obtained from the lessor, or be added thereto by or with the consent of the lessor (the whole of which machine or machines, duplicate parts, extras, mechanisms and devices, held by the lessee under these presents, whether now or hereafter delivered to or in the possession of the lessee, is hereinafter referred to as the "leased machinery"), subject to the conditions hereinafter contained.

And that the following are agreed to as conditions of this agreement, all of which the lessee covenants and agrees to keep and perform: —

One. The leased machinery shall at all times remain and be the sole and exclusive property of the lessor, and the lessee shall have no right of property therein, but only the right to use the same, upon the conditions herein contained. The leased machinery shall be used only by the lessee himself or by operatives in his direct employ, and only in the factory now occupied by him at in the State of . The leased machinery shall not be transferred or delivered or sublet to any other person or corporation, and neither this agreement nor the lease nor the license hereby granted can be assigned by the lessee by his own act or by operation of law. If the lessee becomes insolvent or bankrupt, or has a receiving order made against him, or makes or executes any bill of sale, deed of trust or assignment for the benefit of his creditors, or if a sale, mortgage, lease or removal of the leased machinery, or any part thereof, be made or attempted, or if any distress or execution or attachment be levied thereon, then and in each such case any or all leases of or licenses to use machinery then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, shall at the option of the lessor cease and determine, and the possession of and full right to and control of all machinery the leases or licenses of which are so terminated, shall thereupon revest in the lessor free from all claims or demands whatsoever. The lessor and its agents and employees shall at all times be given access to the leased machinery for the purpose of inspecting it or watching its use and operation, or of altering,

repairing, improving, or adding to it, or determining the nature or extent of its use, and the lessee shall afford all reasonable facilities therefor.

Two. The lessee shall at all times and at his own expense keep the leased machinery in good and efficient working order and condition, and shall not permit any one to injure or deface or remove any plate, or dates, numbers, or other inscriptions now or hereafter impressed on or affixed to the leased machinery by the lessor. The lessee shall obtain from the lessor exclusively, and shall pay therefor at the regular prices from time to time established by the lessor, all the duplicate parts, extras, mechanisms and devices, of every kind needed or used in operating, repairing or renewing the leased machinery, and the same shall form part of the leased machinery, and the lessee shall not otherwise make or allow to be made any addition, subtraction or alteration to, from, or in the leased machinery without the consent in writing of the lessor, nor interfere with the proper operation of the same.

Three. The leased machinery shall at all times, until the expiration or termination of the lease thereof and license to use the same hereby granted and the re-delivery of the leased machinery into the possession of the lessor as hereinafter provided, be held at the sole risk of the lessee from injury, loss or destruction, and in case the same or any thereof shall be destroyed by fire or otherwise before such expiration or termination and re delivery, the lessee shall pay to the lessor in respect to each machine so destroyed the sum of Two Hundred Dollars ($200) as partial reimbursement to the lessor for such destruction, and the lessee shall forthwith return whatever remains of the machinery so destroyed to the lessor at Beverly, Massachusetts.

Four. The lessee shall pay all taxes and assessments which shall be assessed in respect to the leased machinery or other machinery of the lessor held by the lessee under lease or license upon whomsoever assessed. All taxes or assessments in respect to leases, licenses or agreements covering machinery, or the rights to payments thereunder, shall be construed for the purposes of this article, to be assessed in respect to the machinery itself. In case at

any time any unapportioned tax or assessment shall be assessed to the lessor in respect in part but not wholly to machinery of the lessor in the possession of the lessee the lessee shall pay to the lessor such proportionate part of the total amount of said unapportioned tax or assessment as the fair valuation, to be determined by the lessor, of said machinery of the lessor in the possession of the lessee bears to the fair valuation, to be determined by the lessor of all machinery (excepting machinery, if any, in the lessor's own possession) in respect to which the unapportioned tax or assessment has been assessed; provided, however, that if such unapportioned tax or assessment includes any tax or assessment in respect to tangible property in the lessor's own possession the amount thereof, based, at the established rate, upon the fair valuation, to be determined by the lessor, of such property, shall first be deducted and the lessee shall pay his proportionate part as aforesaid of the balance only of said unapportioned tax or assessment after such deduction has been made.

Five. The lessee shall use the leased machinery to its full capacity on all boots, shoes, footwear and other articles made in his factory in the manufacture of which it can be used, but the leased machinery shall not nor shall any part thereof be used in the manufacture of any welted boots, shoes, or other footwear which have been or shall be welted or the soles stitched by the aid of any welt sewing or sole stitching machinery not held by the lessee under lease from the lessor, or in the manufacture of any turn boots, shoes, or other footwear the soles of which have been or shall be attached to their uppers by the aid of any turn sewing machinery not held by the lessee under lease from the lessor or in the manufacture of any boots, shoes, or other footwear which have been or shall be lasted, pegged, slugged, heel seat nailed, or otherwise partly made by the aid of any lasting or pegging or "Metallic" machinery or mechanisms not held by the lessee under lease from the lessor or in the manufacture of any boots, shoes, or other footwear the heels of which have been or shall be compressed or prepared by the lessee in whole or in part, or have been or shall be

attached by the aid of any "heeling" machinery not held by the lessee under lease from the lessor.

Six. The lessee, as rent or royalty for the leased machinery, shall purchase exclusively of the lessor or its authorized agents, at the prices from time to time established by the lessor, all eyelets used by him in or in connection with the leased machinery, and shall pay therefor upon the regular terms established by the lessor therefor.

Seven. The lessor may attach to the leased machinery or any thereof an indicator or indicators to register the number of revolutions or movements of any part or parts thereof, and the lessee shall not allow any person (other than the lessor or its agents) to disturb or interfere with such indicator or indicators. In case any indicator thus attached shall from any cause cease to correctly indicate or register, or shall be disturbed or out of repair, or if the glass covering any such indicator shall be removed or broken or injured, then and as often as the same shall happen the lessee shall immediately by writing notify the lessor and at the same time explain the circumstances under which the same has happened. The lessee shall keep full and accurate accounts, independently of any indicators that may be placed upon the leased machinery, showing the number of boots, shoes, footwear, and other articles, or portions thereof in the manufacture or preparation of which the leased machinery or any part thereof shall have been used, and shall allow the lessor at all times, by its agents or attorneys, to examine and to take copies of such accounts and entries of the lessee as may serve to determine the total number of boots, shoes, fortwear, and other articles, or portions thereof, made or prepared or operated upon by the aid of the leased machinery or any part thereof, and the lessee shall produce all such accounts and entries upon request. The lessee shall also furnish any further information which may be called for in relation to the leased machinery or the use thereof.

And that the following stipulations and provisions are agreed to: —

Eight. The term of this agreement shall be seventeen years from the date hereof. The lease of the leased machinery and license to

use the same hereby granted shall continue, unless sooner terminated by the lessor because of breach thereof on the part of the lessee, or otherwise as herein provided, for the full term of this agreement; but in case at any time the lessee shall discontinue or suspend the operation of said factory, or shall discontinue or suspend the manufacture in said factory in the regular course of business of articles in the manufacture of which the leased machinery can be used, or if at any time or for any reason the lessee shall fail or cease to make regular use of the leased machinery in the ordinary course of business, then the lessor shall have the right at its option, by notice in writing to the lessee, to terminate forthwith the lease and license hereby granted, and in case at any time any breach or default shall be made in the observance of any one or more of the conditions in this agreement contained or contained in any other lease or license agreement subsisting between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise and expressed to be obligatory upon the lessee, the lessor shall have the right by notice in writing to the lessee to terminate forthwith any or all leases of or licenses to use machinery then in force between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and this notwithstanding that previous breaches or defaults may have been unnoticed, waived, or condoned by or on behalf of the lessor. If, upon the expiration of the full term of this agreement, the lessor does not request the return of the leased machinery, then the leased machinery shall continue to be held and used under and in accordance with the conditions, stipulations and provisions in this agreement contained and this agreement and the lease and license herein contained shall thereupon be extended indefinitely as to term; but thereafter either the lessee or the lessor, upon sixty days' notice in writing to the other, may terminate this agreement and the lease and license herein contained, whereupon the leased machinery shall be delivered forthwith to the lessor, as herein provided. Upon the expiration or termination of the lease hereby granted or any extension thereof by notice or by reason of any default on the part of the lessee as to the terms of this agreement or of any other lease or license agreement from

the lessor or otherwise, in any manner whatsoever, the lessee shall forthwith at his own expense deliver the leased machinery to the lessor at Beverly, Massachusetts, complete and in good order, reasonable wear and tear alone excepted; and shall thereupon pay to the lessor such sum as may be necessary to put the leased machinery in suitable order and condition to lease to another lessee, and in addition thereto the lessee shall also, without prejudice to any other rights or remedies of the lessor hereunder, pay to the lessor the sum of One Hundred Dollars ($100) for each machine hereby leased as compensation for setting up the leased machinery in his factory, for instructing operators, and for deterioration of the leased machinery; and the lessee for himself, his heirs, executors and administrators, hereby grants to the lessor, its successors and assigns, full right, power and authority to enter upon the premises and into any factory, room, or any place where the leased machinery, or any part thereof, may be, and take possession thereof, and take away the same.

Nine. A notice in writing, signed by the president, a vice-president, the treasurer or an assistant treasurer of the lessor or by any assignee of the lessor's rights hereunder and posted by prepaid letter, addressed to the lessee or delivered at his usual or last known place of abode or business, that the lease and license hereby granted is terminated or shall be terminated at the expiration of a certain period, shall be a sufficient termination of the lease and license from the time of posting or delivering such notice, or from the expiration of the period therein mentioned, as the case may be. Any termination of this agreement or of the lease and license hereby granted shall not release the lessee from his obligation to pay rent or royalty for the period prior to such termination, and shall be without prejudice to any other rights or remedies which the lessor may have for violation of contract, use of machines without right, or use of patented inventions without license.

Ten. The lessee admits the validity for the full term expressed in the grant thereof (and every extension and renewal thereof) of each and every of the Letters Patent of the United States of America owned by the lessor or under which it is licensed, any of

the inventions of which are or hereafter may be embodied in the leased machinery. The lessee also agrees that he will not directly or indirectly infringe or contest the validity for the full term expressed in the grant thereof or of any extension or renewal thereof, of any of the Letters Patent referred to in the Schedule of Patents hereto annexed or the title of the lessor thereto. The expiration of this agreement or any extension thereof or the termination or cesser of the lease and license hereby granted shall not in any way affect the provisions of this clause, or release or discharge the lessee from the admissions and estoppels herein set forth.

Eleven. None of the conditions, stipulations or provisions of this agreement shall be held to have been waived by any act or knowledge of the lessor, its agents or employees, but only by an instrument in writing, signed by the president, a vice-president or the treasurer of the lessor.

Twelve. The term "lessor" shall include the said United Shoe Machinery Company and its successors and assigns. All the conditions, stipulations and provisions binding on the lessee shall be binding on and enforceable against his legal representatives. In the construction of this instrument, words relating to the number and gender of the parties shall be read according to their real number and gender.

In witness whereof, the parties hereto have duly executed this instrument in duplicate, the day and year first above written.

Lease and License Agreement Number .

This Agreement made at Boston, in the State of Massachusetts, this day of 19 , between the United Shoe Machinery Company, a corporation organized under the laws of the State of New Jersey, having an office in said Boston, hereinafter referred to as the lessor, of the one part, and of in the State of , hereinafter referred to as the lessee of the other part:

Witnesseth, that the lessor, in consideration of the covenants and agreements on the part of the lessee herein contained, does hereby lease to and license the lessee under any letters patent belonging to the lessor or under which the lessor has the right to grant such license affecting any inventions which are now or hereafter shall be embodied therein or employed in the operation thereof, to use

Vulcan Foot Power Eyeletting Machine(s) No(s).

Duplex Eyeletting Machine(s) No(s).

now or hereafter delivered to the lessee, and any duplicate parts, extras, mechanisms and devices relating thereto, or used in connection therewith, now attached to or delivered with the said

designated machine or machines, or which may at any time hereafter be obtained from the lessor, or be added thereto by or with the consent of the lessor (the whole of which machine or machines, duplicate parts, extras, mechanisms and devices, held by the lessee under these presents, whether now or hereafter delivered to or in the posssession of the lessee, is hereinafter referred to as the "leased machinery"), subject to the conditions hereinafter contained.

And that the following are agreed to as conditions of this agreement, all of which the lessee covenants and agrees to keep and perform: —

One. The leased machinery shall at all times remain and be the sole and exclusive property of the lessor, and the lessee shall have no right of property therein, but only the right to use the same, upon the conditions herein contained. The leased machinery shall be used only by the lessee himself or by operatives in his direct employ, and only in the factory now occupied by him at in the State of . The leased machinery shall not be transferred or delivered or sublet to any other person or corporation, and neither this agreement nor the lease nor the license hereby granted can be assigned by the lessee by his own act or by operation of law. If the lessee becomes insolvent or bankrupt, or has a receiving order made against him, or makes or executes any bill of sale, deed of trust or assignment for the benefit of his creditors, or if a sale, mortgage, lease or removal of the leased machinery, or any part thereof, be made or attempted, or if any distress or execution or attachment be levied thereon, then and in each such case any or all leases of or licenses to use machinery then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, shall at the option of the lessor cease and determine, and the possession of and full right to and control of all machinery the leases or licenses of which are so terminated, shall thereupon revest in the lessor free from all claims or demands whatsoever. The lessor and its agents and employees shall at all times be given access to the leased machinery for the purpose of inspecting it or watching its use and operation,

or of altering, repairing, improving or adding to it, or determining the nature or extent of its use, and the lessee shall afford all reasonable facilities therefor.

Two. The lessee shall at all times and at his own expense keep the leased machinery in good and efficient working order and condition, and shall not permit any one to injure or deface or remove any plate, or dates, numbers, or other inscriptions now or hereafter impressed on or affixed to the leased machinery by the lessor. The lessee shall obtain from the lessor exclusively, and shall pay therefor at the regular prices from time to time established by the lessor, all the duplicate parts, extras, mechanisms and devices, of every kind needed or used in operating, repairing, or renewing the leased machinery, and the same shall form part of the leased machinery, and the lessee shall not otherwise make or allow to be made any addition, subtraction or alteration to, from, or in the leased machinery without the consent in writing of the lessor, nor interfere with the proper operation of the same.

Three. The lessee shall pay all taxes and assessments which shall be assessed in respect to the leased machinery or other machinery of the lessor held by the lessee under lease or license upon whomsoever assessed. All taxes or assessments in respect to leases, licenses or agreements covering machinery, or the rights to payments thereunder, shall be construed, for the purpose of this article, to be assessed in respect to the machinery itself. In case at any time any unapportioned tax or assessment shall be assessed to the lessor in respect in part but not wholly to machinery of the lessor in the possession of the lessee the lessee shall pay to the lessor such proportionate part of the total amount of said unapportioned tax or assessment as the fair valuation, to be determined by the lessor, of said machinery of the lessor in the possession of the lessee bears to the fair valuation, to be determined by the lessor, of all machinery (excepting machinery, if any, in the lessor's own possession) in respect to which the unapportionated tax or assessment has been assessed; provided, however, that if such unapportioned tax or assessment includes any tax or assessment in respect to tangible property in the lessor's own possession the amount

thereof, based, at the established rate, upon the fair valuation, to be determined by the lessor, of such property, shall first be deducted and the lessee shall pay his proportionate part as aforesaid of the balance only of said unapportioned tax or assessment after such deduction has been made.

Four. The lessee shall use the leased machinery to its full capacity on all boots, shoes, footwear and other articles made in his factory in the manufacture of which it can be used.

Five. The lessee shall pay to the lessor immediately after the execution hereof, as a lease premium, the sum of dollars for each machine hereby leased, and the lessee shall also, as rent or royalty for the leased machinery, purchase exclusively of the lessor or its authorized agents, at the prices from time to time established by the lessor, all eyelets used by him in or in connection with the leased machinery, and shall pay therefor upon the regular terms established by the lessor therefor.

Six. The lessor may attach to the leased machinery or any thereof an indicator or indicators to register the number of revolutions or movements of any part or parts thereof, and the lessee shall not allow any person (other than the lessor or its agents) to disturb or interfere with such indicator or indicators. In case any indicator thus attached shall from any cause cease to correctly indicate or register, or shall be disturbed or out of repair, or if the glass covering any such indicator shall be removed or broken or injured, then and as often as the same shall happen the lessee shall immediately by writing notify the lessor and at the same time explain the circumstances under which the same has happened.

And that the following stipulations and provisions are agreed to : —

Seven. The term of this agreement shall be seventeen years from the date hereof. The lease of the leased machinery and license to use the same hereby granted shall continue, unless sooner terminated by the lessor because of breach thereof on the part of the lessee, or otherwise, as herein provided, for the full term of this agreement ; but in case at any time the lessee shall discontinue or suspend the operation of said factory, or shall discontinue or sus-

pend the manufacture in said factory in the regular course of business of articles in the manufacture of which the leased machinery can be used, or if at any time or for any reason the lessee shall fail or cease to make regular use of the leased machinery in the ordinary course of business, then the lessor shall have the right at its option, by notice in writing to the lessee, to terminate forthwith the lease and license hereby granted, and in case at any time any breach or default shall be made in the observance of any one or more of the conditions in this agreement contained or contained in any other lease or license agreement subsisting between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise and expressed to be obligatory upon the lessee, the lessor shall have the right by notice in writing to the lessee to terminate forthwith any or all leases of or licenses to use machinery then in force between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and this notwithstanding that previous breaches or defaults may have been unnoticed, waived or condoned by or on behalf of the lessor. If, upon the expiration of the full term of this agreement, the lessor does not request the return of the leased machinery, then the leased machinery shall continue to be held and used under and in accordance with the conditions, stipulations and provisions in this agreement contained and this agreement and the lease and license herein contained shall thereupon be extended indefinitely as to term; but thereafter either the lessee or the lessor, upon sixty days' notice in writing to the other, may terminate this agreement and the lease and license herein contained, whereupon the leased machinery shall be delivered forthwith to the lessor, as herein provided. Upon the expiration or termination of the lease hereby granted or any extension thereof by notice or by reason of any default on the part of the lessee as to the terms of this agreement or of any other lease or license agreement from the lessor or otherwise, in any manner whatsoever, the lessee shall forthwith at his own expense deliver the leased machinery to the lessor at Beverly, Massachusetts, complete and in good order, reasonable wear and tear alone excepted; and the lessee for himself, his heirs, executors and administrators, hereby grants

to the lessor, its successors and assigns, full right, power and authority to enter upon the premises and into any factory, room, or any place where the leased machinery, or any part thereof, may be, and take possession thereof, and take away the same; and the lessee in addition and without prejudice to any other rights or remedies of the lessor hereunder shall thereupon pay to the lessor such sum as may be necessary to put the leased machinery in suitable order and condition to lease to another lessee.

Eight. A notice in writing, signed by the president, a vice-president, the treasurer or an assistant treasurer of the lessor or by any assignee of the lessor's rights hereunder, and posted by prepaid letter, addressed to the lessee or delivered at his usual or last known place of abode or business, that the lease and license hereby granted is terminated or shall be terminated at the expiration of a certain period, shall be a sufficient termination of the lease and license from the time of posting or delivering such notice, or from the expiration of the period therein mentioned, as the case may be. Any termination of this agreement or of the lease and license hereby granted shall not release the lessee from his obligation to pay rent or royalty for the period prior to such termination and shall be without prejudice to any other rights or remedies which the lessor may have for violation of contract, use of machines without right or use of patented inventions without license.

Nine. The lessee admits the validity for the full term expressed in the grant thereof (and every extension and renewal thereof) of each and every of the Letters Patent of the United States of America, owned by the lessor or under which it is licensed, any of the inventions of which are or hereafter may be embodied in the leased machinery. The lessee also agrees that he will not directly or indirectly infringe or contest the validity for the full term expressed in the grant thereof or of any extension or renewal thereof, of any of the Letters Patent referred to in the Schedule of Patents hereto annexed or the title of the lessor thereto. The expiration of this agreement or any extension thereof or the termination or cesser of the lease and license hereby granted shall not in any way affect the provisions of this clause, or release or dis-

charge the lessee from the admissions and estoppels herein set forth.

Ten. None of the conditions, stipulations or provisions of this agreement shall be held to have been waived by any act or knowledge of the lessor, its agents or employees, but only by an instrument in writing, signed by the president, a vice-president or the treasurer of the lessor.

Eleven. The term "lessor" shall include the said United Shoe Machinery Company and its successors and assigns. All the conditions, stipulations and provisions binding on the lessee shall be binding on and enforceable against his legal representatives. In the construction of this instrument, words relating to the number and gender of the parties shall be read according to their real number and gender.

In witness whereof, the parties hereto have duly executed this instrument in duplicate, the day and year first above written.

Lease and License Agreement Number

This Agreement made at Boston, in the State of Massachusetts, this day of 19 , between the United Shoe Machinery Company, a corporation organized under the laws of the State of New Jersey, having an office in said Boston, hereinafter referred to as the lessor, of the one part, and of in the State of , hereinafter referred to as the lessee, of the other part:

Witnesseth, that the lessor, in consideration of the covenants and agreements on the part of the lessee herein contained, does hereby lease to and license the lessee under any letters patent belonging to the lessor or under which the lessor has the right to grant such license affecting any inventions which are now or hereafter shall be embodied therein or employed in the operation thereof, to use

Vulcan Foot Power Eyeletting Machine(s) No(s).

now or hereafter delivered to the lessee and any duplicate parts, extras, mechanisms and devices relating thereto, or used in connection therewith, now attached to or delivered with the said designated machine or machines or which may at any time hereafter be obtained from the lessor, or be added thereto by or with the consent of the lessor (the whole of which machine or machines, duplicate parts, extras, mechanisms and devices, held by the lessee under these presents, whether now or hereafter delivered to or in the possession of the lessee, is hereinafter referred to as the "leased machinery"), subject to the conditions hereinafter contained.

And that the following are agreed to as conditions of this agreement, all of which the lessee covenants and agrees to keep and perform : —

One. The leased machinery shall at all times remain and be the sole and exclusive property of the lessor, and the lessee shall have no right of property therein, but only the right to use the same, upon the conditions herein contained. The leased machinery shall be used only by the lessee himself, or by operatives in his direct employ, and only in the factory now occupied by him at .in the State of . The leased machinery shall not be transferred or delivered or sublet to any other person or corporation, and neither this agreement nor the lease nor the license hereby granted can be assigned by the lessee by his own act or by operation of law. If the lessee becomes insolvent or bankrupt, or has a receiving order made against him, or makes or executes any bill of sale, deed of trust or assignment for the benefit of his creditors, or if a sale, mortgage, lease or removal of the leased machinery, or any part thereof be made or attempted, or if any distress or execution or attachment be levied thereon, then and in each such case any or all leases of or licenses to use machinery then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, shall at the option of the lessor cease and determine, and the possession of and full right to and control of all machinery the leases or licenses of which are so terminated, shall thereupon revest in the lessor free from all claims and demands whatsoever. The lessor and its agents and employees shall at all times be given access to the leased machinery for the purpose of inspecting it or watching its use and operation, or of altering, repairing, improving, or adding to it, or determining the nature or extent of its use, and the lessee shall afford all reasonable facilities therefor.

Two. The lessee shall at all times and at his own expense keep the leased machinery in good and efficient working order and condition, and shall not permit any one to injure or deface or remove any plate, or dates, numbers, or other inscriptions now or hereafter impressed on or affixed to the leased machinery by the lessor.

The lessee shall obtain from the lessor exclusively, and shall pay therefor at the regular prices from time to time established by the lessor, all the duplicate parts, extras, mechanisms and devices of every kind needed or used in operating, repairing or renewing the leased machinery, and the same shall form part of the leased machinery, and the lessee shall not otherwise make or allow to be made any addition, subtraction, or alteration to, from, or in the leased machinery without the consent in writing of the lessor, nor interfere with the proper operation of the same.

Three. The lessee shall pay all taxes and assessments which shall be assessed in respect to the leased machinery or other machinery of the lessor held by the lessee under lease or license upon whomsoever assessed. All taxes or assessments in respect to leases, licenses or agreements covering machinery, or the rights to payments thereunder, shall be construed, for the purposes of this article, to be assessed in respect to the machinery itself. In case at any time any unapportioned tax or assessment shall be assessed to the lessor in respect in part but not wholly to machinery of the lessor in the possession of the lessee the lessee shall pay to the lessor such proportionate part of the total amount of said unapportioned tax or assessment as the fair valuation, to be determined by the lessor, of said machinery of the lessor in the possession of the lessee bears to the fair valuation, to be determined by the lessor, of all machinery (excepting machinery, if any, in the lessor's own possession) in respect to which the unapportioned tax or assessment has been assessed; provided, however, that if such unapportioned tax or assessment includes any tax or assessment in respect to tangible property in the lessor's own possession the amount thereof, based, at the established rate, upon the fair valuation, to be determined by the lessor, of such property, shall first be deducted and the lessee shall pay his proportionate part as aforesaid of the balance only of said unapportioned tax or assessment after such deduction has been made.

Four. The lessee shall use the leased machinery to its full capacity on all boots, shoes, footwear and other articles made in his factory in the manufacture of which it can be used.

1193

Five. The lessee shall pay to the lessor immediately after the execution hereof, as a lease premium, the sum of dollars for each machine hereby leased, and the lessee shall also as rent or royalty for the leased machinery purchase exclusively of the lessor or its authorized agents at the prices from time to time established by the lessor all eyelets used by him in or in connection with the leased machinery and shall pay therefor upon the regular terms established by the lessor therefor.

Six. The lessor may attach to the leased machinery or any thereof an indicator or indicators to register the number of revolutions or movements of any part or parts thereof, and the lessee shall not allow any person (other than the lessor or its agents) to disturb or interfere with such indicator or indicators. In case any indicator thus attached shall from any cause cease to correctly indicate or register, or shall be disturbed or out of repair, or if the glass covering any such indicator shall be removed or broken or injured, then and as often as the same shall happen the lessee shall immediately by writing notify the lessor and at the same time explain the circumstances under which the same has happened.

And that the following stipulations and provisions are agreed to: —

Seven. The term of this agreement shall be seventeen years from the date hereof. The lease of the leased machinery and license to use the same hereby granted shall continue, unless sooner terminated by the lessor because of breach thereof on the part of the lessee or otherwise as herein provided, for the full term of this agreement; but in case at any time the lessee shall discontinue or suspend the operation of said factory, or shall discontinue or suspend the manufacture in said factory, in the regular course of business, of articles in the manufacture of which the leased machinery can be used, or if at any time or for any reason the lessee shall fail or cease to make regular use of the leased machinery in the ordinary course of business, then the lessor shall have the right at its option, by notice in writing to the lessee, to terminate forthwith the lease and license hereby granted, and in case at any time any breach or default shall be made in the observance of any one or

more of the conditions in this agreement contained or contained in any other lease or license agreement subsisting between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and expressed to be obligatory upon the lessee, the lessor shall have the right, by notice in writing to the lessee, to terminate forthwith any or all leases of or licenses to use machinery then in force between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and this notwithstanding that previous breaches or defaults may have been unnoticed, waived, or condoned by the lessor. If, upon the expiration of the full term of this agreement, the lessor does not request the return of the leased machinery, then the leased machinery shall continue to be held and used under and in accordance with the conditions, stipulations and provisions in this agreement contained, and this agreement and the lease and license herein contained shall thereupon be extended indefinitely as to term; but thereafter either the lessee or the lessor, upon sixty days' notice in writing to the other, may terminate this agreement and the lease and license herein contained, whereupon the leased machinery shall be delivered forthwith to the lessor, as herein provided. Upon the expiration or termination of the lease hereby granted or any extension thereof by notice or by reason of any default on the part of the lessee as to the terms of this agreement or of any other lease or license agreement from the lessor or otherwise in any manner whatsoever, the lessee shall forthwith, at his own expense, deliver the leased machinery to the lessor at Beverly, Massachusetts, complete and in good order, reasonable wear and tear alone excepted; and the lessee, for himself, his heirs, executors, administrators, hereby grants to the lessor, its successors and assigns, full right, power and authority to enter upon the premises and into any factory, room, or any place where the leased machinery or any part thereof may be, and take possession thereof and take away the same; and the lessee in addition and without prejudice to any other rights or remedies of the lessor hereunder shall thereupon pay to the lessor such sum as may be necessary to put the leased machinery in suitable order and condition to lease to another lessee.

Eight. A notice in writing, signed by the president, a vice-president, the treasurer or an assistant treasurer of the lessor, or by any assignee of the lessor's rights hereunder and posted by prepaid letter, addressed to the lessee or delivered at his usual or last known place of abode or business, that the lease and license hereby granted is terminated or shall be terminated at the expiration of a certain period, shall be a sufficient termination of the lease and license from the time of posting or delivering such notice, or from the expiration of the period therein mentioned, as the case may be. Any termination of this agreement or of the lease and license hereby granted shall not release the lessee from his obligation to pay rent or royalty for the period prior to such termination, and shall be without prejudice to any other rights or remedies which the lessor may have for violation of contract, use of machines without right or use of patented inventions without license.

Nine. The lessee admits the validity for the full term expressed in the grant thereof (and every extension and renewal thereof) of each and every of the Letters Patent of the United States of America, owned by the lessor or under which it is licensed, any of the inventions of which are or hereafter may be embodied in the leased machinery. The lessee also agrees that he will not directly or indirectly infringe or contest the validity for the full term expressed in the grant thereof, or of any extension or renewal thereof, of any of the Letters Patent referred to in the Schedule of Patents hereto annexed or the title of the lessor thereto. The expiration of this agreement or any extension thereof or the termination or cesser of the lease and license hereby granted shall not in any way affect the provisions of this clause, or release or discharge the lessee from the admissions and estoppels herein set forth.

Ten. None of the conditions, stipulations or provisions of this agreement shall be held to have been waived by any act or knowledge of the lessor, its agents or employees, but only by an instrument in writing, signed by the president, a vice-president or the treasurer of the lessor.

Eleven. The term "lessor" shall include the said United Shoe Machinery Company and its successors and assigns. All the con-

ditions, stipulations and provisions binding on the lessee shall be binding on and enforceable against his legal representatives. In the construction of this instrument, words relating to the number and gender of the parties shall be read according to their real number and gender.

In witness whereof, the parties hereto have duly executed this instrument in duplicate, the day and year first above written.

PLAINTIFF'S EXHIBIT 175.

[Put in Evidence, page 1774.]

Boston, Mass., February 11, 1899.

To the Stockholders of the Consolidated & McKay Lasting Machine Company: —

The United Shoe Machinery Company, organized under the laws of the State of New Jersey, with an authorized capital of 1,000,000 shares, one half six per cent preferred stock, one half common stock with equal voting power, each share of the par value of $25, has already contracted for the control of the property or stock of the following companies: —

Consolidated & McKay Lasting Machine Company,
Goodyear Shoe Machinery Company,
McKay Shoe Machinery Company,
International Goodyear Shoe Machinery Company,
Goodyear Shoe Machinery Company of Canada,
Eppler Welt Machine Company,
International Eppler Welt Machine Company,
Davey Pegging Machine Company,

The entire floating debt of the above companies will be paid, and there will remain in the treasury of the new company after acquiring the above-named companies at least $500,000 in cash, and at least 150,000 shares of the preferred stock, and 150,000 shares of the common stock.

For each share of Preferred Stock of the Consolidated & McKay Lasting Machine Company will be given one and two-thirds shares of the preferred stock of the United Company, and $1.00 in cash;

For each share of the Common Stock of the Consolidated & McKay Lasting Machine Company will be given one share of common stock, and one-half share of preferred stock of the United Company, and $4.50 cash;

Provided, that certificates of Consolidated & McKay Lasting Machine Company stock, duly endorsed and assigned to the United Shoe Machinery Company with proper revenue stamps affixed and canceled, are delivered on or before March 1, 1899, to the

American Loan and Trust Company,
No. 53 State Street, Boston.

Temporary certificates of the United Shoe Machinery Company will be issued until engraved certificates can be prepared, and scrip will be issued for fractions of shares.

The United Company will apply for the listing of its shares upon the Boston and New York Stock Exchanges, and expects to pay dividends at the rate of six per cent upon the preferred stock, and at the rate of at least eight per cent upon the common stock, the first dividend to be paid April 1, 1899.

The officers of the new company are: —

Sidney W. Winslow	President.
John H. Hanan, Wallace F. Robinson, Orlando E. Lewis, . .	Vice-Presidents.
George W. Brown .	Treasurer and General Manager.
Louis H. Baker	Secretary.

The undersigned Directors of the Consolidated & McKay Lasting Machine Company believe that the United Shoe Machinery Company will show much larger net earnings than the aggregate net earnings of the several companies whose stock is to be acquired, by reason of increase in business, economies in administration and decrease in expenses, and cessation of patent litigation between the companies, which has been expensive to them and annoying to shoe manufacturers; and believe that these results can be attained without increase of cost to the users of machinery made by the Company, and that better attention to the care of machines and greater assistance to the users can be afforded.

They confidently expect that the shares of the United Company will prove to be more valuable and a better paying investment than the stock of the Consolidated & McKay Lasting Machine Company, and, having exchanged their stock in the Consolidated & McKay Lasting Machine Company for stock in the United Company on the above-named basis, they recommend to Consolidated & McKay Lasting Machine Company stockholders likewise to deposit and exchange their shares.

WALLACE F. ROBINSON, President.
GEORGE W. BROWN, Treasurer.
SIDNEY W. WINSLOW.
WILLIAM H. COOLIDGE.
WILLIAM S. EATON.
EDWARD P. HURD.
SAMUEL WEIL.
FRANK WOOD.

[Put in Evidence, page 1835.]

Post-office address of Company in Massachusetts: Eppler Welt Machine C. 125 Kingston St Boston Mass.

[Acts of 1891, Chap. 341.]

Section 1. All corporations chartered or organized under the laws of another state or country and having a usual place of business in this Commonwealth, shall annually in the month of March make and file in the office of the secretary of the Commonwealth a certificate, signed and sworn to by its president, treasurer, and at least a majority of its directors, stating the amount of its capital stock as it then stands fixed by the corporation, the amount then paid up, and the assets and liabilities of the corporation, in such form as the commissioner of corporations shall require or approve. This section shall not apply to railroad companies, nor to mining and manufacturing companies actually conducting their mining and manufacturing operations wholly without the Commonwealth, nor to those foreign corporations which are required to make annual returns to other officers of the Commonwealth than the commissioner of corporations.

Section 2. Repealed.

Sections 3 and 4 provide for certificates of increase and decrease of capital stock.

Section 5. Every certificate required to be filed by this act shall, before filing, be submitted to the commissioner of corporations, who shall examine the same, and if it appears to him to be a suffi-

cient compliance with the requirements of this act he shall certify his approval thereof by endorsement upon the same.

Section 9. The fee to be paid by the corporation for filing the certificate of condition required by this act shall be five dollars, . . . [Approved May 16, 1891.]

[Acts of 1894, Chap. 541.]

Section 1. Every corporation which shall omit to file the annual statement required by section one of chapter three hundred and forty-one of the acts of the year eighteen hundred and ninety-one shall forfeit not less than five nor more than ten dollars for each and every day for fifteen days after the first day of April, and not less than ten nor more than two hundred dollars for each and every day thereafter while said omission continues, to be recovered by an information brought in the supreme judicial court in the name of the attorney-general, at the relation of the commissioner of corporations; and upon such information the court may issue an injunction restraining the further prosecution of the business of the corporation named therein until the sums so forfeited are paid with interest and costs, and until the returns required by this act are made.

See also Acts of 1895, Chaps. 157, 311, and Acts of 1896, Chap. 391.

We, Andrew Eppler Vice President, George Strong Treasurer, and Chas Curtis W F Halsall W H Stacy & H A Harrington being a majority of the Directors of[a] Eppler Welt Machine Co a Corporation organized under the laws of the State of Maine having a usual place of business in Boston in the Commonwealth of Massachusetts, in compliance with the provisions of chapter three hundred and forty-one of the Acts of 1891, do hereby certify, that the amount of capital stock as it stood fixed by said Corporation on the 1st day of March, A. D. 1896 was six hundred thousand dollars.

That the amount thereof then paid in was[b] $600,000.00 dollars.

That the assets and liabilities of the Corporation[c] at that date were as follows: —

Assets.		Liabilities.	
Real Estate, viz.:	$	Capital stock,	$600000.00
Land		Debts	20397.52
Buildings		Reserves,	
Machinery estimated,	4675.00	Balance Profit and Loss	
Other Assets, viz.:			
Cash and debts receivable	9200.78		
Manufactures, merchandise, material and stock in process estimated	4000.00		
Patent rights	558766.74		
Loans secured by mortgage

Taper Nail Tacking Machine (S. H.), No.
String Nail Tacking Machine, No. *589*

Power Welt Tacking Machine, No.
Cable Tacking Machine, No.
Universal Quilting Machine, No.
Heel Protector Driving Machine, No.
Grip Slugging Machine, No.
Grip Clinch Machine, No.
Grip Tacking Machine, No.
Lewis Nailing Machine, No.
Spatter Quilting Machine, No.
National Slugging Machine, No.
Simplex Slugging Machine, No.
Champion Heel Seat Nailing Machine, No.
Champion Slugging Machine, No.
Staple Fastening Machine, No.
Automatic Staple Nailing Machine, No.
Universal Double Clinch Machine, No.
Gordon Staple Tacking Machine, No.
Corrugated Wire Tacking Machine, No.

and any duplicate parts, extras, mechanisms and devices, relating thereto, or used in connection therewith, now attached to or delivered with the said designated machine or machines, or which may at any time hereafter be obtained from the lessor, or be added thereto with the consent of the lessor (the whole of which machine or machines, duplicate parts, extras, mechanisms and devices, held by the lessee under these presents, whether now or hereafter delivered to or in the possession of the lessee, is hereinafter referred to as the "leased machinery"), subject to the conditions hereinafter contained.

And that the following are agreed to as conditions of the lease and license of the leased machinery, all of which the lessee covenants and agrees to keep and perform: —

One. The leased machinery shall at all times remain and be the sole and exclusive property of the lessor, and the lessee shall have no right of property therein, but only the right to use the same, upon the conditions herein contained. The leased machinery shall be used only by the lessee himself, or by operatives in his direct

employ, and only in the factory now occupied by him at *Reading* in the State of *Pennsylvania*. The leased machinery shall not be transferred or delivered or sublet to any other person or corporation, and neither the lease nor the license hereby granted can be assigned by the lessee by his own act or by operation of law. If the lessee becomes insolvent or bankrupt, or has a receiving order made against him, or makes or executes any bill of sale, deed of trust, or assignment for the benefit of his creditors, or if a sale or lease or removal of the leased machinery, or any part thereof, without the consent in writing of the lessor, be made or attempted, or if any distress or execution or attachment be levied thereon, then and in each such case this lease and license and any other lease or license then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, shall at the option of the lessor cease and determine, and the possession of and full right to and control of all the leased machinery and any machinery held by the lessee under any other lease or license from the lessor, whether as the result of assignment to the lessor or otherwise, shall thereupon revest in the lessor free from all claims or demands whatsoever. The lessor and its agents and employees shall at all times be given access to the leased machinery for the purpose of inspecting it or watching its use and operation, or of altering, repairing, improving, or adding to it, or determining the nature or extent of its use, and the lessee shall afford all reasonable facilities therefor.

Two. The lessee shall at all times and at his own expense keep the leased machinery in good and efficient working order and condition, and shall not permit any one to injure or deface or remove any plate, or dates, numbers, or other inscriptions now or hereafter impressed on or affixed to the leased machinery by the lessor. The lessee shall obtain from the lessor exclusively and shall pay therefor at the regular prices from time to time established by the lessor, all the duplicate parts, extras, mechanisms and devices, of every kind needed or used in operating, repairing, or renewing the leased machinery, and the same shall form part of the leased machinery, and the lessee shall not otherwise make or allow to be made any

addition, subtraction or alteration to, from, or in the leased machinery without the consent in writing of the lessor, nor interfere with the proper operation of the same.

Three. The lessee shall pay all taxes and assessments which shall be levied in respect to the leased machinery, or in respect to this lease and license or the right to payments hereunder, upon whomsoever assessed. The lessee shall at his own expense insure against loss by fire and keep insured to the full value thereof the leased machinery, and in case of loss shall pay forthwith to the lessor a sum equal to the full amount of the loss occasioned to the lessor.

Four. **The lessee, as rent and royalty for the leased machinery, shall purchase exclusively of the lessor all the fastening material by him in or in connection with the leased machinery, and shall pay the lessor in cash on delivery the regular and uniform prices therefor as established from time to time by the lessor, which shall not be more than ten (10) per cent. in excess of the prices to be established from time to time by the lessor for like fastening material to be used in its Metallic Department machinery by lessees who shall agree not to use the Metallic Department machinery leased to them in the manufacture of boots or shoes which are lasted on machines other than those leased from the lessor, or of welted boots or shoes which are not welted and stitched on welt sewing and sole stitching machines leased from the lessor, or of turned shoes the soles of which are not attached by turn sewing machines leased from the lessor.**

Five. The lessor may attach to the leased machinery an indicator or indicators to register the number of revolutions or movements of any part or parts thereof, and the lessee shall not allow any person (other than the lessor or its agents) to disturb or interfere with such indicator or indicators. The lessee shall keep full and accurate accounts, independently of any indicators that may be placed upon the leased machinery, showing the number of boots, shoes and other footwear or portions thereof in the manufacture of which the leased machinery or any part thereof shall be used, and shall allow the lessor at all times by its agents or attorneys to examine and to take copies of such accounts and entries of the

lessee as may serve to indicate the total number of boots, shoes and other footwear or portions thereof made by the aid of the leased machinery or any part thereof and the lessee shall produce all such papers and books upon request.

And that the following agreements, stipulations and provisions are agreed to: —

Six. The lessee for a period of five years from the date of this lease and license shall use the leased machinery to its full capacity so far as the number and kind of boots and shoes made in his factory will permit, and his failure to use the leased machinery to its full capacity shall render him liable in damages to the lessor. During the remainder of the term of this lease and license after five years from the date hereof, the lessee shall continue to use the leased machinery to its full capacity so far as the number and kind of boots and shoes made in his factory will permit.

In case the lessee has more work of the kind which can be performed by any of the machines belonging to the Metallic Department of the lessor than the capacity of the Metallic Department machinery which he has under lease from the lessor will permit, then the lessee shall take from the lessor under a like lease and license sufficient additional Metallic Department machinery to perform the work, and the lessor shall lease such additional Metallic Department machinery to the lessee from time to time when required by the lessee, under a like lease and license if this lease and license is then in force, and if the lessee is not then in default in respect to any of the conditions, agreements, stipulations, and provisions in this lease and license contained.

Whenever for a period of three consecutive months the lessee shall fail to use all the leased machinery to an amount that will give to each machine at least three-fourths of a fair day's work during such period, the lessee from time to time and at all times upon the written request of the lessor, shall return to the lessor by delivery at its office or factory, such of the leased machinery as, in the opinion of the lessor, shall not be reasonably required by the lessee in the operation of his said factory, and shall pay to the lessor such

sums as may be necessary to put the machinery so returned in suitable order and condition to lease to another lessee.

The lessee hereby agrees that for each machine hereby leased the amount of fastening material used by him and purchased from the lessor in accordance with the terms hereof shall not be less than four hundred (400) pounds during each calendar year embraced by this lease, excepting that a reduction of thirty-three (33) pounds from the amount thus guaranteed for each machine shall be allowed at the end of the year for each calendar month during which the factory of the lessee has remained wholly idle. Upon any breach or default on the part of the lessee in the observance of the agreements, stipulations and provisions in this article "Six" contained, the lessor, although it may have waived or ignored prior breaches or defaults, may, at its option, terminate forthwith by notice in writing this lease and license and any other lease or license of Metallic Department machines, machinery or devices, like those or any of them mentioned in the foregoing Schedule of Machines, then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise; and the possession of and full right to and control of all Metallic Department machinery held by the lessee under lease or license from the lessor or its assignors shall thereupon revest in the lessor, free from all claims and demands whatsoever, and the lessee shall thereupon pay to the lessor such sum as shall be necessary to put all such machinery in suitable order and condition to lease to another lessee; but a breach or default on the part of the lessee in the observance of his agreements in respect to the extent of the use of the leased machinery and the amount of fastening material to be purchased by him in this article "Six" contained shall not entitle the lessor to any other remedy than the right to terminate this lease and license and any other lease or license of Metallic Department machinery as above provided, except the right to damages for breach of the first agreement, covering the term of five years, in this article "Six" contained and therein expressly given.

Seven. This lease and license shall continue, unless sooner terminated by the lessor because of breach thereof on the part of the

lessee, or otherwise as herein provided, for seventeen years from the date hereof. But if any breach or default shall be made in the observance of any one or more of the conditions herein contained or contained in any other lease or license agreement subsisting between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise and expressed to be obligatory upon the lessee, the lessor shall have the right by notice in writing to the lessee to terminate forthwith this lease and license, and also, if the lessor so elects, any other lease or license agreements then in force between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and this notwithstanding that previous breaches or defaults may have been unnoticed, waived, or condoned by or on behalf of the lessor. If, upon the expiration of the full term of this lease, the lessor does not request the return of the leased machinery, then the leased machinery shall continue to be held and used under and in accordance with the conditions of this lease and license, which shall thereupon be extended indefinitely as to term, but thereafter either the lessee, or the lessor, upon sixty days' notice in writing to the other, may terminate this lease and license, whereupon the leased machinery shall be delivered forthwith to the lessor, as herein provided. Upon the expiration or termination of this lease and license or any extension thereof by notice or by reason of any default on the part of the lessee as to the terms of this lease and license or any other lease and license from the lessor, or otherwise as herein provided, the lessee shall forthwith deliver the leased machinery to the lessor at its office or factory in good order, reasonable wear and tear alone excepted; and the lessee for himself, his heirs, executors and administrators, hereby grants to the lessor, its successors and assigns, full right, power and authority to enter upon the premises and into any factory, room, or any place where the leased machinery, or any part thereof, may be, and take possession thereof, and take away the same; and the lessee, in addition and without prejudice to any other rights and remedies of the lessor hereunder, shall thereupon pay to the lessor such sum as may be necessary to put the leased machinery in suitable order and condition to lease to another lessee.

Eight. Whenever the right to terminate this lease and license shall have accrued to the lessor, a notice in writing, signed by the president, a vice-president, or the treasurer of the lessor, or by any assignee of the lessor's rights hereunder and posted by prepaid letter, addressed to the lessee or delivered at his usual or last known place of abode or business, that the lease and license hereby granted is determined or shall be determined at the expiration of a certain period, shall be a sufficient determination of the lease and license from the time of posting or delivering such notice, or from the expiration of the period therein mentioned, as the case may be. Any termination of this lease and license shall not release the lessee from his obligation to pay rent or royalty for the period prior to such termination, and shall be without prejudice to any other rights or remedies which the lessor may have for violation of contract, use of machines without right, or use of patented inventions without license.

Nine. The lessee admits the validity of each and every of the Letters Patent of the United States of America owned by the lessor or under which it is licensed, any of the inventions of which are or hereafter may be embodied in the leased machinery. The lessee also agrees that he will not directly or indirectly infringe or contest the validity of, or the title of the lessor to, any of the patents referred to in the "Schedule of Patents" hereto annexed. The termination or cesser of this lease and license from any cause whatever shall not in any way affect the provisions of this clause, or release or discharge the lessee from the admission and estoppel herein set forth, so far as any act committed during the existence of this lease and license is concerned.

Ten. None of the terms or conditions of this lease and license shall be held to have been waived by any act or knowledge of the lessor, its agents or employees, but only by an instrument in writing, signed by the president, a vice-president, or the treasurer of the lessor.

Eleven. The term "lessor" shall include the said United Shoe Machinery Company, and its successors and assigns. All the conditions and agreements binding on the lessee shall be binding on

and enforceable against his legal representatives. In the construction of this instrument, words relating to the number and gender of the parties shall be read according to their real number and gender.

Twelve. The lessee, if not in default in respect to any of the conditions, agreements, stipulations and provisions herein contained, upon giving six months' notice in writing to the lessor of his intention so to do, shall have the privilege of surrendering this lease and license, by executing such other form of lease and license agreement in respect to the leased machinery as the lessor shall have in use at the time of such surrender.

In witness whereof, the parties hereto have duly executed this instrument in duplicate, the day and year first above written.

THE COMMONWEALTH SHOE & LEATHER CO. BOSTON

April 5, 1911.

Mr. F. W. Merrick, Pres., 229 Marginal St., E. Boston, Mass.

Dear Sir:— Your favor of the 5th, offering to supply us with a Curved Needle Sole Stitcher, was duly received. I have seen your machine in operation and it looks like an exceedingly useful stitcher. Its simplicity appeals to me, and the proposition you make would interest us at once, if we were at liberty to use any machinery except that produced by the United Shoe Machinery Co. You know, their leases bind us absolutely to confine our operations wholly to machines produced by them.

I have long felt that these leases were illegal, and not, therefore, enforceable. We might, perhaps, consider the use of your machine in spite of the leases, except for the fact that we fear the power of the United Co. to destroy our business. They have bought out and closed up so many outside machinery manufacturers, that it would be impossible for us to supply ourselves with such other machinery as was needed, in case they saw fit to remove their machinery now in operation in our factory. This, you know,

they have a right to do under the rider attached to the leases issued in this state. It would clearly be possible for them to put us entirely out of business, if we should undertake to use your machine, and threats to this effect which they have frequently made in dealings with other concerns, indicate a hazard in doing business with you, far too serious for us to consider.

Regretting very much the existence of this condition, and hoping at some time to be relieved of this unreasonable restraint, we are

Yours very truly,

THE COMMWEALTH SHOE & LEATHER CO.
Chas. H. Jones, Pres.

Dear Sir: — Replying to your favor of recent will say, we do not doubt in the least but what your curved needle out sole stitching machine is capable of doing all you say it can do, but at the present, however, we are not in position to consider your machine on account of the lease signed with the United Shoe Machinery Co. Perhaps we can come together at some future time.

Yours very truly,

Capital $5,000,000.00
Full Paid.

St. Louis, Mo., May 9, 1911.

Mr. C. E. Merrick, President, Union Lock Stitch Co., Boston, Mass.

Dear Sir: Sometime ago we received a circular letter, referring to a Curved Needle Stitcher which you were going to put on the market, which we would be very much interested in but for the fact that we hold leases of the Goodyear Machinery that the United Shoe Machinery own.

These leases you are no doubt very well conversant with and knowing the terms and conditions under which we operate, you of course are aware that we could not use your machine because of obligations in these leases that prevent our doing so. Whether or not these leases are binding is a question that has never yet been fully decided; however, we are loath for business reasons to contemplate a test of their legality.

We are somewhat of the opinion that it would be very difficult to introduce any other Stitcher in competition until the matter of the leases referred to is decided.

Owing to the situation just at this time we do not see any way to even consider the matter of putting in your machine.

Respectfully yours,

ROBERTS, JOHNSON & RAND SHOE CO.

JJH J. Johnson, President.

[Put in Evidence, page 1933.]

BOOTH BROTHERS COMPANY. 1908

This corporation was formed under the laws of the State of New York.

Its authorized capital is $25,000, divided into 250 shares of the par value of $100.00 each, all of which is issued and owned by the United Shoe Machinery Company.

This was the incorporation of the business conducted by Irving E. and Quentin W. Booth as co-partners doing business under the name of Booth Brothers. It operates a manufacturing plant at Rochester, N. Y. Prior to the acquisition by the United Shoe Machinery Company of the Booth Brothers business, the British United Shoe Machinery Company, and other foreign companies, in which the United Shoe Machinery Company was interested, acted as agent for the Booth machines in certain foreign countries.

BOSTON BLACKING COMPANY. 1900

This is a corporation organized under the laws of the State of Maine. It is engaged in the business of manufacturing and dealing in cement, blackings and stains for shoes.

Its authorized capital stock is $600,000, divided into 6,000 shares of the par value of $100. each. The United Shoe Machinery Company owns slightly less than one-half of the stock.

BRITISH UNITED SHOE MACHINERY COMPANY, LTD. 1899

This corporation formed under the British Companies' Acts, was organized by the United Shoe Machinery Company to take over its existing agencies in Great Britain.

Its authorized capital stock is £400,000, divided into 400,000 shares of par value of £1 each. Of these 150,000 shares of par value of £150,000 are preference and 250,000 shares of the par value of £250,000 are ordinary shares. 103,494 preference shares and 250,000 ordinary shares have been issued.

The United Shoe Machinery Company owns a majority of the issued capital stock. The Company operates a manufacturing plant at Leicester, England.

CAMPBELL-BOSWORTH MACHINERY CO. 1898

This is a corporation organized under the laws of the State of Maine to engage in the business of manufacturing and dealing in harness making machinery.

Its authorized capital stock is $500,000, divided into 20,000 shares of the par value of $25. each. Of this authorized capital stock 4,000 shares of the par value of $100,000. are held in the treasury of the Company; the balance, 16,000 shares of the par value of $400,000. is issued and outstanding. The United Shoe Machinery Company owns 8,000 shares of the par value of $200,000.

It does not manufacture machines but has its machines built for it under contract.

W. W. CROSS & CO., INC. 1902

This corporation was formed under the laws of the State of Maine.

Its authorized capital stock is $200,000, divided into 2,000 shares of the par value of $100.00 each. Of these 2,000 shares 1,000 are preferred and 1,000 common shares. The entire 2,000 shares are issued and outstanding. The United Shoe Machinery Company owns a majority of this capital stock.

It operates a tack and nail manufacturing plant in the City of Brockton, Massachusetts, manufacturing for the United Shoe Machinery Company certain kinds of tacks and certain kinds of nails used in the manufacture of shoes. It sells practically its entire output to the United Shoe Machinery Company.

DEUTSCHE VEREINIGTE SCHUHMASCHINEN GESELLSCHAFT, G. m. b. H. 1900

The Deutsche Vereinigte Schuhmaschinen Gesellschaft, formed under the laws of Germany, was organized by the United Shoe Machinery Company to take over its agencies in Germany.

The United Shoe Machinery Company owns the entire interest in this business. The Company operates a manufacturing plant at Frankfurt a Main, Germany.

FAGUS G. m. b. H. 1911

Fagus g. m. b. H., formed under the laws of Germany, has been organized by the United Shoe Machinery Company to develop and carry on in Germany a business of manufacturing and dealing in lasts, shoe trees and dies.

A majority of the capital is owned by the United Shoe Machinery Company.

S. A. FELTON & SON COMPANY. 1902

This corporation was formed under the laws of the State of Maine to carry on the partnership business of S. A. Felton & Son.

Its authorized capital stock is $100,000, divided into 1,000 shares of a par value of $100. each. Of this authorized capital 400 shares, of the par value of $40,000, have been issued and are outstanding. The United Shoe Machinery Company owns 200 shares of the par value of $20,000.

It operates a brush manufacturing plant in the city of Manchester, N. H., for the manufacture of brushes used in making shoes. Its business is chiefly within the United States, but it has also some slight export business.

J. K. KRIEG COMPANY. 1903

This corporation was formed under the laws of the State of New York.

Its authorized capital stock is $50,000.00, divided into 500 shares of the par value of $100.00 each. The United Shoe Machinery Company owns the entire capital stock.

Prior to the formation of the United Shoe Machinery Company the partnership J. K. Krieg & Company had acted as agents in New York for the McKay Shoe Machinery Company and the Consolidated & McKay Company, and thereafter for the United Shoe Machinery Company. The corporation was formed to carry on this business and operates a store for the sale of findings and general merchandise in the City of New York.

O. A. MILLER TREEING MACHINE COMPANY. 1902.

This corporation, formed in the year 1902, under the laws of the State of Maine, was organized by the United Shoe Machinery

Company to conduct the business of O. A. Miller in manufacturing and dealing in Treeing Machines and shoe trees.

Its authorized capital stock is $500,000. divided into 5,000 shares of the par value of $100. each. Of this authorized capital 2,000 shares of the par value of $200,000 have been issued and are outstanding. The United Shoe Machinery Company owns the majority of the outstanding capital stock.

It operates a machine shop and turning factory in the City of Brockton, Massachusetts, for the manufacture of its Treeing Machines and shoe trees.

MILLS TRANSFER COMPANY. 1906

This corporation, formed under the laws of the State of Massachusetts, was organized by the United Shoe Machinery Company to engage in express or transfer business, chiefly for the purpose of transferring machinery, etc., between its factory and offices located at Lynn and Boston. Its business is entirely local.

The authorized capital stock is $10,000 divided into 100 shares of $100 each. The entire stock is owned by the United Shoe Machinery Company.

ROSS-MOYER MANUFACTURING COMPANY. 1889.

This corporation was organized under the laws of the State of Ohio.

Its authorized capital stock is $350,000, divided into 3,500 shares of the par value of $100. each. Of this authorized capital 1974 shares of the par value of $197,400 are issued and outstanding. The United Shoe Machinery Company owns the entire issued and outstanding capital stock.

Prior to the formation of the United Shoe Machinery Company the Ross-Moyer Manufacturing Company was the agent in Ohio of the McKay Shoe Machinery Company and the Consolidated McKay Company. After the formation of the United Shoe Machinery Company that Company purchased the entire outstanding capital stock of the Ross-Moyer Manufacturing Company and the Company now operates as an agent for the United Shoe Machinery Company. It also deals in various findings and manufacturing accessories.

J. C. RHODES & CO., INC. 1901

A corporation formed under the laws of the State of Maine engaged in the business of manufacturing and dealing in eyelets for shoes.

The authorized capital stock is $600,000 divided into 60,000 shares of the par value of $10 each; all of which is issued and owned by the United Shoe Machinery Company.

The United Shoe Machinery Company acquired from the firm of J. C. Rhodes & Co., in 1901, the manufacturing plant and business of that firm and incorporated the business under the above name, J. C. Rhodes & Co., Inc.

SCHWEIZ. VEREINIGTE SCHUHMASCHINEN A.-G. 1900

This Corporation, formed under the laws of Switzerland, was organized by the United Shoe Machinery Company to take over its agencies in Switzerland.

The authorized capital stock in 100,000 francs, all of which is issued and owned by the United Shoe Machinery Company.

SECURITY EYELET COMPANY. 1903

This corporation was formed under the laws of the State of Maine.

Its authorized capital stock is $2,500,000, divided into 25,000 shares of the par value of $100. each. Of this 25,000 shares 10,000 shares of the par value of $1,000,000 are preferred, and 15,000 shares of the par value of $1,500,000 are common stock. Of the authorized capital stock there are issued and outstanding 6,577 shares preferred stock of the par value of $657,700. and 8,083 shares of common stock of the par value of $808,300. The United Shoe Machinery Company owns or controls a majority of the issued capital.

The company has never done any business in the United States.

S. O. & C. CORPORATION. 1901

This corporation was formed under the laws of the State of Maine to engage in the business of manufacturing and dealing in certain kinds of eyelets.

Its authorized capital stock is $740,000 of which 1600 shares are first preferred, 800 second preferred and 5000 common, all of the par value of $100.00 each. The United Shoe Machinery Company owns a majority of the stock.

The corporation was formed to take over the business of the S. O. & C. Company, a Conn. Corporation, operating a manufacturing plant at Ansonia, Conn.

T. G. Plant Company. 1901

This is a corporation formed under the laws of the State of New Jersey for the manufacture of footwear.

Its capital stock is $3,750,000 made up of $2,500,000 (25,000 shares at a par value of $100. each) preferred stock, and $1,250,000 (12,500 shares at a par value of $100. each) common stock. The United Shoe Machinery Corporation is the owner of 15,000 shares, par value of $1,500,000 of preferred stock, and 7,500 shares at a par value of $750,000 of the common stock, having acquired said stock from Mr. Thomas G. Plant in September, 1910.

United Awl & Needle Company. 1902

This corporation was formed under the laws of the State of Maine. It is engaged in the business of manufacturing and dealing in certain kinds of needles, awls, drivers, used in making shoes, raw hide mallets and various articles of a similar nature.

The authorized capital stock was $200,000, divided into 2,000 shares of the par value of $100. each. Of these 2,000 shares 1,000 shares were preferred and 1,000 shares were common stock. Of this authorized stock there are issued and outstanding 137 shares of preferred stock of the par value of $13,700, and 424 shares of common stock of the par value of $42,400. The United Shoe Machinery Company owns a majority of the stock issued and outstanding.

It operates a factory in the town of West Medway, Massachusetts, for the manufacture of articles of the kinds above enumerated.

United Fast Color Eyelet Company. 1900

This corporation was organized in the year 1900 under the laws of the State of Maine. It is engaged in the business of manufac-

turing and selling certain patented eyelets and eyelets made by patented process coated with celluloid or other plastic material.

Its authorized capital stock is $1,500,000 divided into 15,000 shares of the par value of $100.00 each. Of these 15,000 shares 5,000 shares of the par value of $500,000.00 are preferred and 10,000 shares of the par value $1,000,000. are common shares. Of this authorized capital 4786 shares of the par value of $478,600 of the preferred stock and the entire common stock (10,000 shares of the par value of $1,000,000) are issued and outstanding. The United Shoe Machinery Company owns a majority of the stock.

The Company does not operate its own manufacturing plant but has its eyelets manufactured for it by manufacturing companies.

UNITED SHOE MACHINERY COMPANY OF CANADA 1893.

This is a corporation organized under the laws of the State of New Jersey carrying on the United Shoe Machinery Company's shoe machinery business in Canada.

It is necessary to manufacture in Canada to hold patents there.

Its authorized capital stock is $225,000 divided into 9,000 shares at a par value of $25. each, all of which is issued and owned by the United Shoe Machinery Company.

It operates a manufacturing plant at Montreal in the Province of Quebec.

UNITED SHOE MACHINERY COMPANY DE FRANCE 1900.

The United Shoe Machinery Company de France, formed under the laws of France, was organized by the United Shoe Machinery Company to take over its agencies in France and Belgium.

Its authorized capital stock is 3,736,000 francs divided into 7,472 shares of the par value of 500 francs each, all of which with the exception of a few shares is issued and owned by the United Shoe Machinery Company.

The Company operates a manufacturing plant at Ivry sur Seine, France.

UNITED SHOE MACHINERY COMPANY (MAINE) 1899.

This is a corporation organized under the laws of the State of Maine.

Its authorized capital stock is $3,000,000, divided into 120,000

shares at a par value of $25. each, all of which is issued and owned by the United Shoe Machinery Company. The Company operates as a branch of the United Shoe Machinery Company.

UNITED SHOE MACHINERY COMPANY OF MEXICO 1901.

This is a corporation organized under the laws of the State of Maine.

Its authorized capital stock is $10,000, divided into 1000 shares at a par value of $10.00 each; all of which is issued and owned by the United Shoe Machinery Company.

The Company was organized to conduct the business of the United Shoe Machinery Company in Mexico.

UNITED SHOE MACHINERY COMPANY OF SOUTH AMERICA 1902.

This corporation, formed under the laws of the State of Maine, was organized by the United Shoe Machinery Company as its agent, in South America.

The authorized capital stock is $5,000, divided into 50 shares at a par value of $100. each; all of which is issued and owned by the United Shoe Machinery Company.

UNITED SHOE REPAIRING MACHINE COMPANY 1908.

This corporation, formed under the laws of the State of Maine, was organized by the United Shoe Machinery Company to take over and carry on that part of the business of the United Shoe Machinery Company which consisted in supplying machines to "cobblers" and others for use in repairing shoes.

Its authorized capital stock is $50,000 divided into 500 shares of $100 each; all of which is issued and owned by the United Shoe Machinery Company.

UNITED-XPEDITE FINISHING COMPANY 1902.

This corporation was formed in the year 1902 under the laws of the State of Maine. It was a re-organization to take over the business of the Xpedite Machine Company, a Maine corporation formed some years before. The Xpedite Machine Company and its successor, the United-Xpedite Finishing Company, engaged in the business of manufacturing and dealing in the heel finishing machine known as the Xpedite Finishing Machine.

The authorized capital stock of the United-Xpedite Finishing Company is $1,000,000, divided into 200,000 shares of the par value of $5. each. This entire capital stock is issued and outstanding. The United Shoe Machinery Company owns 110,000 shares of the par value of $550,000.00.

The Company does not manufacture its machines but has them constructed for it under contract.

AKTIESELSKABET UNITED SHOE MACHINERY COMPANY OF COPENHAGEN 1909.

This corporation, formed under the laws of Denmark, was organized by the United Shoe Machinery Company to operate its local agencies in Norway, Sweden and Denmark.

Its authorized capital stock is 1,000,000 kroner, divided into 200 shares at a par value of 5,000 kroner each. This entire capital stock is issued and the United Shoe Machinery Company owns a majority.

PLAINTIFF'S EXHIBIT 189.

[Put in Evidence, page 1945.]

Agreement made this 11th day of September 1899 between United Shoe Machinery Company, a corporation organized and existing under the laws of the State of New Jersey, having an office in Boston, Massachusetts, hereinafter called the United Company, as party of the first part and Henry W. Peabody, of said Boston, together with Charles D. Barry, Frederick W. Lincoln and John R. Bradlee, of the City, County and State of New York, merchants and co-partners doing business under the firm name of Henry W. Peabody & Company, in said Boston, and in the City of New York, and at Sydney, New South Wales, and at Melbourne, Victoria.

Whereas, the United Company has acquired control of the boot and shoe and leather working machinery made by the following named corporations doing business in said Boston, namely:—

Goodyear Shoe Machinery Company,

Consolidated and McKay Lasting Machine Company,
McKay Shoe Machinery Company
Eppler Welt Machine Company
Goddu Metal Fastening Company,
Gordon Staple Lasting and Tacking Company,
Davey Pegging Machine Company,
Gem Flexible Insole Company,
Boot and Shoe Sole Laying Company,

and contemplates acquiring the control of other lines of boot and shoe and leather working machinery and boot and shoe findings except leather, linings, lasts and finished boots and shoes.

And Whereas, Messrs. Peabody & Company have been and are now engaged in introducing and dealing in boot and shoe machinery and findings in the several colonies of Australasia, and have in their employ in that department of their business, under a written contract, which expires on the day of May, 1902, Mr. C. H. B. Corbett.

And Whereas, the United Company, having established offices at Sydney and Melbourne aforesaid, and being about to extend its business throughout the several colonies of Australia desires to secure the co-operation of Messrs. Peabody & Company and the goodwill of the business which they have established as factors and dealers in boot and shoe and leather working machinery and boot and shoe findings in the colonies of Australasia;

Now it is Agreed as follows: —

1. Messrs. Peabody & Company, in consideration of the agreements of the United Company hereinafter contained, do hereby sell, assign and transfer to the United Company the goodwill of their business of dealing in boot and shoe findings, except leather, boot and shoe linings, lasts and finished boots and shoes, and agree that, while this instrument remains in force, they will not directly or indirectly engage or be engaged in manufacturing and dealing in boot and shoe or leather working machinery, or boot and shoe findings (except leather, boot and shoe linings, lasts and finished boots and shoes) except as brokers for the United Company to solicit and take orders for the same, and to transmit such orders to

the United Company at its offices in Sydney, New South Wales, or in Melbourne, Victoria, or in Boston, Massachusetts, U. S. A., and except also that Messrs. Peabody & Company reserve the right to purchase boot and shoe findings of other parties than the United Company, if they can make such purchase at a lower price or on better terms than the United Company will sell the same kind and quality of findings. And Messrs. Peabody & Company agree that, while this agreement remains in force, they will use their best efforts to secure for the United Company orders for the boot and shoe and leather working machinery, machines, appliances, and boot and shoe findings, dealt in or made by or for the corporations, individuals or firms controlled by it, and to that end do agree that said Corbett, until the expiration of his said contract, shall devote as much of his time and energy to obtaining such orders as he has heretofore given to the prosecution of the boot and shoe machinery and shoe findings business of Messrs. Peabody & Company. But Messrs. Peabody & Company are not to concern themselves about filling the orders which they shall secure and transmit, or about the instalment or supervision of the machinery or goods, or receiving or collecting the consideration to be paid by the vendees or lessees thereof.

2. The United Company in consideration of the premises agrees to pay Messrs. Peabody & Company the sum of Eighteen Hundred Dollars (1800), in each year during the unexpired term of the contract between Messrs. Peabody & Company and said Corbett in quarterly payments of Four Hundred and Fifty Dollars (450) each on the first days of January, April, July and October, the first of said payments to be made January 1st, 1900. It is agreed that this sum of Eighteen Hundred Dollars per year shall cover and satisfy the liability of the United Company to Messrs. Peabody & Company for the salary of said Corbett and for his personal and travelling expenses during the term of his said contract.

3. The United Company further agrees to pay to Messrs. Peabody & Company a sum equal to two and one-half (2½) per cent of the gross receipts of the United Company from leases, sales, or other disposition to customers or lessees in Australasia of

boot and shoe or leather working machinery, machines, or appliances, and boot and shoe findings.

4. The accounts between the parties hereto shall be made up on the first days of April and October every year, and the United Company agrees to keep accurate accounts of its gross receipts from leases, sales or other disposition to customers or lessees in Australasia of said machinery and findings, and to render a full statement of the same to Messrs. Peabody & Company in the month of August in each year, of such gross receipts in the half year ending on the first day of April next previous, and in the month of February in each year, of such gross receipts in the half year ending on the first day of October next previous and at the time of rendering each such account, to pay to Messrs. Peabody & Company a sum equal to two and one half per cent of such gross receipts; and in the account which shall be rendered in February 1901, if two and one half per cent on such gross receipts received by the United Company during the year ending on the first day of October, 1900, plus the amount paid in that year on account of the salary and expenses of said Corbett, does not aggregate Five Thousand Dollars, the United Company agrees in the settlement of the account to be rendered in February 1901 to pay to Messrs. Peabody & Company an amount necessary to make up the deficiency.

5. All contracts now in existence between Messrs. Peabody & Company and the Consolidated & McKay Lasting Machine Company or the companies mentioned in the preamble of this agreement shall be terminated on September 30, 1899.

6. This agreement shall take effect October 1st, 1899 and shall remain in force for a term of five years from that date.

7. It is understood and agreed that nothing in this contract shall debar Messrs. Henry W. Peabody & Company, as commission merchants, from dealing in, or executing such orders as may be placed with them for machinery or findings not controlled or handled by the United Company, which do not compete with the articles dealt in or made by the United Company; or from executing orders or findings of a special brand or manufacture, in cases where the

special brand or manufacture ordered by their customers is not handled by the United Company.

In Witness Whereof said United Shoe Machinery Company has caused these presents to be signed by its Treasurer and the parties of the second part have signed the same with their firm signature the day and year first above written.

Executed in duplicate.

PLAINTIFF'S EXHIBIT 190.

[Put in Evidence, page 2016.]

GOODYEAR WELT AND TURN SHOE MACHINE

This machine sews the welt on the shoe, fastening together with a chain-stitch the welt, upper and insole. It practically duplicates the work of the hand welt sewer. This machine is immensely popular and its use is constantly increasing. It has been improved and developed to the point of perfection. It measures the thread to the needle perfectly, thereby preventing all abrasion to the thread. After the needle has drawn the loop through the work, and has returned again through the stock, the take-up tightens the stitch by pulling on the supply end of the thread while the needle firmly supports the leather between stitches against the sawing action of the thread. This is the only method yet discovered for tightening the chain-stitch without destroying the "between substance." The chain of the stitch is placed on the outside of the welt, or, in the case of the turned shoe, on the outside of the lining of the upper (before turning). This method of forming and tightening stitches gives a perfect result, such as can be obtained in no other way.

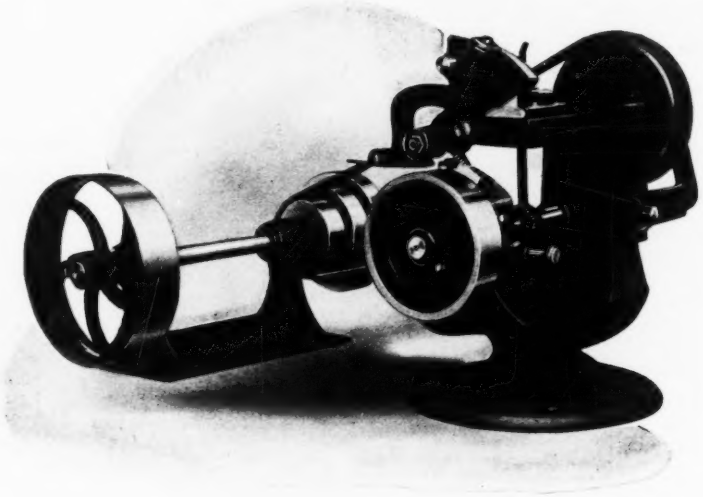
Receiving shaft runs	375 revolutions per minute
Pulley	8 x 2½ inches
10-inch friction runs machine	312 revolutions per minute
11-inch friction runs machine	345 revolutions per minute
12-inch friction runs machine	375 revolutions per minute
Net weight	297 pounds
Gross weight	340 pounds

MEASURES

Length	1 foot 10 inches
Width	1 foot 10 inches
Height	5 feet 10 inches

PLAINTIFF'S EXHIBIT 192.

[Put in Evidence, page 2036.]

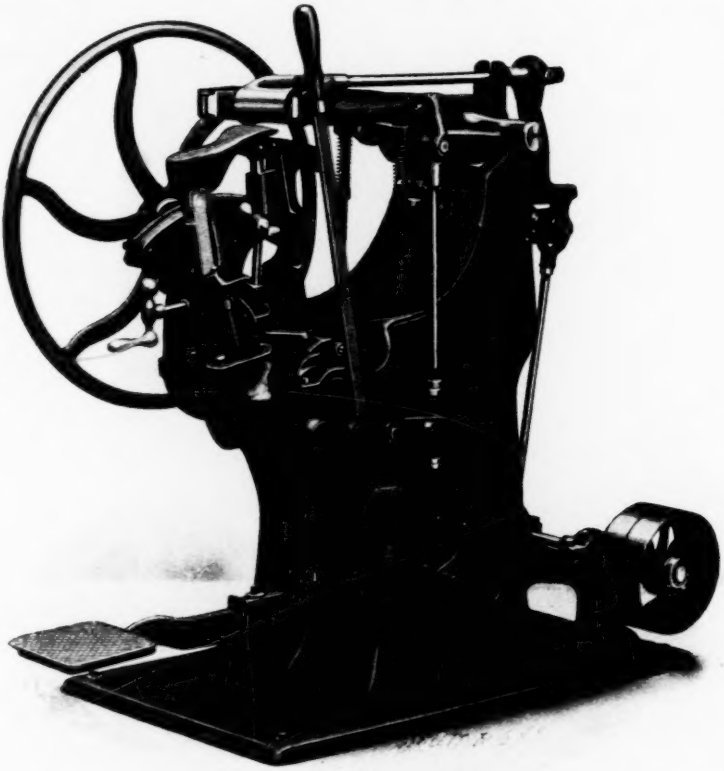


CARVER VAMP SKIVING MACHINE

This machine is used for skiving heavy vamps and box toes. On the lighter grades of work we would not recommend its use.

PLAINTIFF'S EXHIBIT 195.

[Put in Evidence, page 2055.]



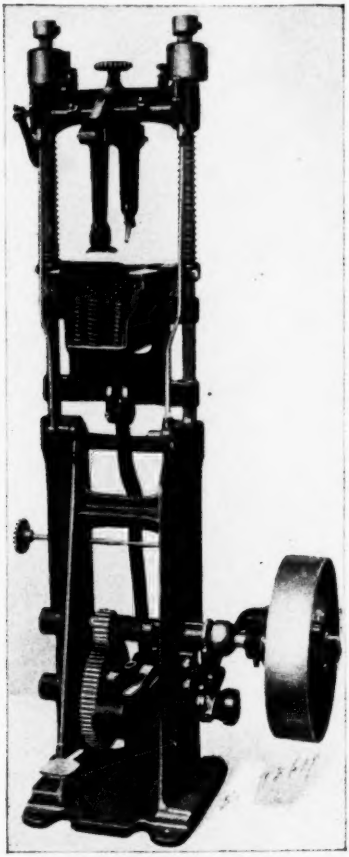
STAR LEVELING MACHINE

This machine is particularly adapted for leveling turn boots, shoes and slippers. The movements of the roll and the pressure are at all times under complete control of the operator. The roll is so adjusted that it leaves the toe of the shoe without injury to the last or sole.

Receiving shaft runs . . . 450 to 500 revolutions per minute
Pulleys . . . . . 10 x 2 inches, tight and loose
Belt . . . . . 2 inches, flat
Net weight . . . . . 850 pounds
Gross weight . . . . . 950 pounds
Measures: Length, 3 feet 11 inches; width, 2 feet 8 inches; height, 4 feet 1 inch

PLAINTIFF'S EXHIBIT 196.

[Put in Evidence, page 2055.]



GOODYEAR IMPROVED SOLE LAYING MACHINE

In laying soles with this machine, strong rubber cement is used under pressure. This does away with the use of the sole-laying nails, which on fine goods is considered objectionable. By using two of these machines side by side, the operator works continuously, one sole being under pressure while another one is being adjusted. In this way the double capacity is 1200 pairs per day.

Receiving shaft runs . . . . 150 revolutions per minute
Pulley . . . . . 14 x 3 inches (clutch)
Net weight . . . . . 380 pounds
Gross weight . . . . . 430 pounds
Measures: Length, 1 foot 8 inches; width, 2 feet 4 inches; height, 5 feet 3 inches

PLAINTIFF'S EXHIBIT 197.

[Put in Evidence, page 2061.]

PLAINTIFF'S EXHIBIT 197.

[Put in Evidence, page 2061.]

GOODYEAR UNIVERSAL ROUNDING AND CHANNELING MACHINE

After the outsole has been laid by the Sole Layer, this machine rounds and trims off the surplus welt and outsole stock, at the same time cutting the channel in the outsole, giving either a flat or English channel, as may be desired. Either blocked or died stock may be used. As the machine automatically shapes the sole and cuts the channel, gauging from the edge of the last, the Baltimore Extension, Scotch Edges, or any special shape desired may be accurately obtained. This is one of the most important machines in shoemaking, as the general style and character of the shoe is given in rounding. In one operation it simultaneously rounds, channels and automatically shapes the sole.

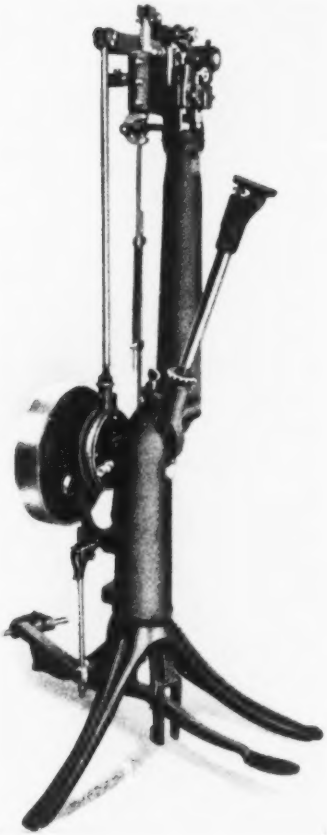
Receiving shaft runs	400 revolutions per minute
Pulley	8 x 2½ inches
Net weight	224 pounds
Gross weight	275 pounds

MEASURES.

Length	2 feet
Width	2 feet 1 inch
Height	5 feet 2 inches

PLAINTIFF'S EXHIBIT 198.

[Put in Evidence, page 2065.]



PLAINTIFF'S EXHIBIT 198.

[Put in Evidence, page 2065.]

POWER HEEL BREASTING MACHINE

This machine is a decided innovation in the breasting of heels, being a power machine and very rapid and accurate in its work. It can be quickly adjusted to breast any size shoe from the smallest sized children's to the largest sized men's, of all heights, and either straight or concave, doing the work with one smooth and accurate cut.

In operation, the shoe is held firmly in position by a leveling plate, fitted with adjustments which make it possible to breast on any angle either on or off the wooden last. The knife is very simple in construction, easily changed, and can be filed up handily.

There are also adjustments which regulate perfectly the depth of cut so that the possibility of cutting into the sole is reduced to the minimum.

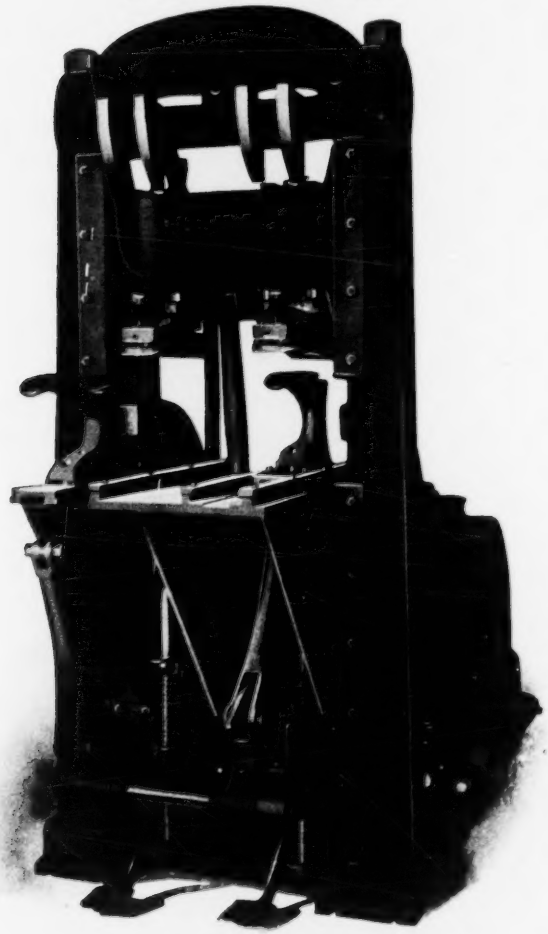
Receiving shaft runs	130 revolutions per minute
Pulley	15 x 2¼ inches
Belt	2 inches, flat
Net weight	265 pounds
Gross weight	300 pounds

MEASURES

Length	3 feet 7 inches
Width	2 feet 4 inches
Height	5 feet 2 inches

PLAINTIFF'S EXHIBIT 199.

[Put in Evidence, page 2068.]



ATLAS LEVELING MACHINE—MODEL A

This machine is designed for the purpose of leveling McKay Sewed Shoes. It is of the type known as a Direct Pressure machine. From the illustration it will be seen that it is a twin machine, one shoe being under pressure while the operator is getting another one ready for the other side. The varying thicknesses of soles in no way affects its work, as the pressure is always the same. It is a heavy and well constructed machine.

GOODYEAR OUTSOLE RAPID LOCKSTITCH MACHINE

This machine fastens the outsole to the welt with a lockstitch seam. It is the very latest lockstitch machine produced and in it are embodied all the best features of the sewing machine art.

The thread is accurately measured to the needle and there is no abrasion of the thread in the operation of drawing the loop through the stock. A sufficient amount of thread to form each stitch is accurately pulled from the wax pot, this being automatically controlled according to the amount of thread needed. The stitch is perfect and the regulation of the feed is under instant control of the operator. It will stitch the lightest or the heaviest sole with equal facility and there is plenty of room for the operator to manipulate the shoe.

Receiving shaft runs	375 revolutions per minute
Pulley	8 x 2½ inches

UNITED STATES CIRCUIT COURT OF APPEALS FOR THE FIRST CIRCUIT.

OCTOBER TERM, 1906.

No. 689.

UNITED SHOE MACHINERY COMPANY, COMPLAINANT, APPELLANT,

v.

DUPLESSIS SHOE MACHINERY COMPANY, DEFENDANT, APPELLEE.

Appeal from the Circuit Court of the United States for the District of Massachusetts, from Final Decree (Lowell, J.), July 10, 1906.

Before Colt, Putnam and Brown, JJ.

OPINION OF THE COURT.

AUGUST 2, 1907.

PUTNAM, J. This is a bill in equity based on an alleged infringement of Letters Patent No. 412,704, covering an invention for an alleged improvement in sewing machines, and issued to Zachary T. French and William C. Meyer on October 8, 1889, on an application filed on July 30, 1888. The bill was filed on December 21, 1903, and it alleged infringements on and after October 1, 1903. The decree below was for the respondent.

The only question we need consider is whether, under section 4887 of the Revised Statutes, with its various amendments, the patent in suit was terminated on September 17, 1902, by reason of the termination of a certain British patent on that day. The legal questions involved relating to the identity of the patenting were fully discussed by us in *Westinghouse Electric Co.* v. *Stanley Instrument Co.*, 138 Fed. Rep. 823, in an opinion passed down on June 14, 1905, and in *Thomson-Houston Electric Co.* v. *McLean*, in an opinion passed down on April 11, 1907. The learned judge of the Circuit Court correctly applied the principles stated in these opinions to the facts of this case. We have no occasion to reconsider anything said by him on that issue. This especially applies to his observation, not limited to any particular claim in either pat-

ent, but relating to the whole of each patent, to the effect as follows: "I can find in neither patent here in question evidence of 'an essential, novel and patentable improvement on what was claimed' in the other."

The complainant maintains that the British patent was taken out by an intermeddler. The position on this point is as follows: It is not questioned that Mr. Gregory, a patent solicitor, was authorized to represent the inventor in England, and that he sent instructions to Brooks, his correspondent there, the purpose of which was to secure simultaneous patenting. At some time, not named, a letter was discovered from one Munyon and one Goodyear to Brooks of September 14, 1888, directing Brooks to disregard Gregory's instructions, and to file the application in each country as soon as possible. There is a failure to directly prove any authority of Munyon and Goodyear to thus override Gregory. Nevertheless, the Circuit Court, and we on appeal, proceeding on a bill in equity of this character as finders of the facts, have as wide a range for drawing inferences as a jury. There is no evidence that the inventor, or whoever controlled the invention, ever repudiated the British patent until after this suit was commenced, or attempted to do so. As he, whoever he was, knew that there was to be an application for a British patent, and that there was a purpose to take it out, it is beyond reasonable probability to assume that he never informed himself as to the issue of such a patent. On the other hand, the Circuit Court, and we, are entitled to assume that he obtained knowledge of what was done and acquiesced therein. Any hypothesis which would reject the conclusion of the Circuit Court in this respect, to the effect that the British patent was properly taken out, would be unreasonable.

The only other topic which we need consider is covered by the proposition of the complainant based on a series of conventions, or treaties, for the "international protection of industrial property," by which is meant especially trademarks and patents. The first was signed at Paris on March 20, 1883, between various nations, to which ratification by the United States was completed on March 29, 1887. Articles III, IV and V of this treaty relate to patents

for inventions. A subsequent treaty, which is of no consequence in this connection, as it related only to some details, was signed at Madrid on April 15, 1891. The treaty in which we are particularly interested was signed at Brussels on December 14, 1900, and was proclaimed by the President of the United States on August 25, 1902. 32 Stat. 1936. By the agreement among the ratifying governments, this treaty which is ordinarily called "An Additional Act," went into effect on September 14, 1902, three days before the British patent in question here terminated. 32 Stat. 1943. Article 1, page 1939, reads as follows: —

"The international Convention of March 20, 1883, is modified as follows: —

"I. Article 3 of the Convention shall read as follows: —

"ART. 3. Are assimilated to the subjects or citizens of the contracting States, the subjects of citizens of States not forming part of the Union, who are domiciled or have *bona fide* industrial or commercial establishments upon the territory of one of the States of the Union.

"II. Article 4 shall read as follows: —

"ART. 4. Any one who shall have regularly deposited an application for a patent of invention, of an industrial model, or design, of a trade or commercial mark, in one of the contracting States shall enjoy for the purpose of making the deposit in the other States, and under reserve of the rights of third parties, a right of priority during the periods hereinafter mentioned.

"In consequence, the deposit subsequently made in one of the other States of the Union before the expiration of these periods cannot be invalidated by acts performed in the interval, especially by another deposit, by the publication of the invention or its working, by the sale of copies of the design or model, by the employment of the mark.

"The periods of priority above mentioned shall be twelve months for patents of invention, and four months for design or industrial models, as well as for trade or commercial marks.

"III. There is inserted in the Convention an Article 4 *bis*, as follows: —

"Art. 4 *bis*. Patents applied for in the different contracting States by persons admitted to the benefit of the Convention under the terms of Articles 2 and 3 shall be independent of the patents obtained for the same invention in the other States adherents or non-adherents to the Union.

"This provision shall apply to patents existing at the time of its going into effect.

"The same rule applies, in the case of adhesion of new States, to patents already existing on both sides at the time of the adhesion."

The complainant maintains that the first paragraph of article 4 *bis* relates specifically to the topic we have under consideration, and that the declaration of independency is intended to prohibit any result by virtue of which a patent granted by one nation for a specified statutory term should be abbreviated as to its term by reason of the expiration of any patent granted by another nation. The paragraph relied on is obscure, because there are so many different aspects in which a patent, or anything, may be independent of or dependent on something else.

There were several international conferences between 1883 and 1909 on the topic of patents and trademarks to which we need not refer, except the one at Brussels at which a convention was signed on December 14, 1897, never in force in the United States.

One question is the weight to be given to the article 4 *bis* under the Constitution of the United States. The Constitution speaks of treaties and statutes in the same breath; and they have always been practically put in the same class by the Supreme Court. More than one hundred years ago, in *United States* v. *The Schooner Peggy*, 1 Cranch, 103, 110, the court said: —

"But yet where a treaty is the law of the land, and as such affects the right of parties litigating in court, that treaty as much binds those rights and is as much to be regarded by the court as an act of Congress."

There never has been any doubt on this proposition. Consequently, it was said absolutely in *The Cherokee Tobacco*, 11 Wall. 616, 621: —

"The effect of treaties and acts of Congress, when in conflict, is not settled by the Constitution. But the question is not involved in any doubt as to its proper solution. A treaty may supersede a prior act of Congress, and an act of Congress may supersede a prior treaty."

This has been repeated many times, the last in *Hijo* v. *United States*, 194 U. S. 315, 324. Consequently, so far as judicial action is concerned, a later treaty has the same effect on a prior statute as

a later statute has; and, so far as the conventions pertinent here are concerned, the fact that the Constitution commits to Congress the power "to promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries" is of no consequence, because all the powers of Congress are especially vested, either directly or indirectly, by the Constitution in similar manner; and to hold that a treaty could not abrogate a prior statute regarding patents because this particular legislative power is committed to Congress, could not be permitted so long as the general rule as to statutes superseding treaties, and *vice versa*, declared by the Supreme Court in the way we have pointed out exists. The rules which we have explained with reference to the relation of treaties to statutes, and as to treaties becoming immediately effective, are the necessary sequence of the decisions explained in *United States* v. *Lee Yen Tai*, 185 U. S. 213, 220, 221, 222.

But the respondent, now the appellee, maintains that article 4 *bis* of the Convention of 1900 was not effectual until enacted into a statute by Congress. An examination of the decisions of the Supreme Court on this topic will show there is no practical distinction whatever as between a statute and a treaty with regard to its becoming presently effective, without awaiting further legislation. A statute may be so framed as to make it apparent that it does not become practically effective until something further is done, either by Congress itself or by some officer or commission entrusted with certain powers with reference thereto. The same may be said with regard to a treaty. Both statutes and treaties become presently effective when their purposes are expressed as presently effective; and, on its face, article 4 *bis* of the convention in question is so expressed. A striking illustration of the rule that treaties become effective in the same manner as statutes is found in *United States* v. *The Schooner Peggy*, 1 Cranch. 103, already cited. This vessel was condemned in the Circuit Court on September 23, 1800. A treaty with France became effective on September 30, 1800; and, inasmuch as the judgment of the Circuit Court was

subject to a writ of error which was sued out on October 2, 1800, the Supreme Court held that the treaty annulled the condemnation.

Nevertheless, Congress has legislated on the topic since the treaty was ratified; and, under the rule which we have stated, that subsequent legislation, so far as it expressed any Congressional purpose inconsistent with any claimed construction of article 4 *bis*, or inconsistent with its becoming effective of its own force, that purpose controls; and the purpose of Congress in the act to which we will refer is so marked out by implication, although not stated in express terms, that what construction should be put on article 4 *bis*, and what rule should be applied as to its becoming effective, have become purely academical questions so far as this appeal is concerned. The act to which we refer is that of March 3, 1903, chap. 1019, 32 Stat. 1225, which preceded in time the filing of this bill and the infringements alleged therein.

It becomes necessary in this connection to turn back to Senate Document 331, Fifty-fifth Congress, 2d Session, being a report from the Committee on Foreign Relations, with accompanying papers. This concerns the convention signed at Brussels on December 14, 1897, which we have spoken of, never accepted by the United States. We refer to the report of the United States commissioners who took part in the conference at Brussels, dated December 15, 1897. That stated as follows: "A new article, entitled article 4 *bis*, provides for the mutual independence of patents applied for in the different states of the Union by persons entitled to the rights granted by the convention." It added that the delegates from the United States supported this proposed new article under instructions; but it then proceeded as follows:—

"In order to avoid any confusion in regard to the interpretation hereafter to be given to the second paragraph, which reads, 'This provision shall apply to all patents existing at the time of its entering into force,' we called attention to it in the regular meeting and found that it was the unanimous sense of the conference that the paragraph was not applicable to existing United States patents, but only to those patents whose terms might be shortened by the laws of those states of the Union in which provision is made for a shortening of the term on the lapsing of patents for the same inventions in other states.

"An existing United States patent cannot be affected by what may take place in regard to a patent for the same invention abroad. The limitation of the terms of the United States patents imposed by section 4887 was a determination at the moment of the grant of the patent of its term, and therefore the duration of the patent is unaffected by the subsequent expiration of a foreign patent for the same invention by reason of non-payment of taxes or non-working."

The article in the proposed convention to which these observations related reads as follows: —

"ART. 4 *bis*. Patents applied for in the different contracting states by persons admitted to the benefit of the Convention under the terms of Articles 2 and 3, shall be independent of the patents obtained for the same invention in the other states adhering or not to the Union.

"This provision shall apply to patents existing at the time of its going into effect.

"The same rule applied in the case of adhesion of new states as to patents already existing either in the Union or in the new adhering state at the time of the adhesion."

This language was literally the same as that now under discussion, found in the Convention of December 14, 1900, with the following exceptions: The first sentence now closes with the words, "adherents or non-adherents to the Union," instead of the words, "adhering or not to the Union"; and also the last sentence now ends with the words, "to patents already existing on both sides at the time of the adhesion," instead of the words, "to patents already existing either in the Union or in the new adhering state at the time of the adhesion." It is not possible that these merely literal changes can in any way affect any question which we have before us. It is especially to be noted that the commissioners reported that all the commissioners present were unanimous that this proposed phraseology of the Convention of 1897 would not effect the expiration of United States patents already issued. We have received, through the courtesy of the State Department, a copy of the report of the commissioners who negotiated the treaty of December 14, 1900, but it makes no reference to the topic we are discussing.

Thus the Convention of 1900 and the proposed convention of

1897 alike contained the provisions in reference to patents existing at the time the treaty went into effect, and relative to new adhering states, on which the complainant relies as saving its patent.

The act of 1903, to which we have referred, is entitled "An Act to effectuate the provisions of the additional act of the International Convention for the protection of industrial property." What is there called "the additional act" is the Convention of December 14, 1900. There is no express provision in the statute itself in line with the title; and it is rare that the title is effectual. We all know that Lord Coke said that it ought not be taken into consideration at all; but there are occasions when the language of an act is couched in such general terms that we must go to the title to find its limitations. The Supreme Court has reiterated Lord Coke's observation, but with the qualification which we state, to the effect that, when the mind labors to discover the design of the legislature, it seizes everything from which aid can be derived, and then the title will have its due share of consideration. *The Bark Eudora*, 190 U. S., 169, 172, 173. A very striking illustration of this with reference to the later statutes about aliens appears in the opinion of Judge Gray, in behalf of the Circuit Court of Appeals for the Third Circuit, in *Rodgers* v. *United States*, 152 Fed. Rep. 346, 350. The statutes there in issue use the broad word aliens, and yet the title was availed of by the court to limit them to aliens who were immigrants. We cannot doubt that the act of 1903 to which we refer is to be construed as passed for the purpose named in its title; and, inasmuch as it relates to the same topics involved here as the Convention of December 14, 1900, we can, also, have no doubt that it is to be regarded as covering the entire ground so far as it concerns us. This is the well-settled rule of construction applied under such circumstances to legislation which has the form of codification. The ruling of the Supreme Court in *Dallemagne* v. *Moisan*, 197 U. S. 169, 175, in regard to various treaties respecting consular jurisdiction over crews of vessels of foreign nations, and referring to a statute of the United States enacted in relation thereto, observed as follows:

"This statute having been passed by the United States for the

purpose of executing the treaties it had entered into with foreign governments, must be regarded as the only means proper to be adopted for that purpose."

That observation directly applies here, and fully supports the rule of construction which we have stated with regard to legislation which has the form of codification. Fairly paraphrasing the language of the Supreme Court cited, we may say that the statute of 1903, having been passed for the purpose of executing treaties, must be regarded as expressing the only effect which Congress intended they should have to the extent of the subject-matters to which the act relates. It re-enacts section 4887 in such form as Congress desired, faithfully omitting such parts of the Convention of 1900 as referred to patents existing at the time it went into effect, or as referred to newly adhering states. It is to be borne in mind that treaties with foreign nations have a liberal construction, even at variance with the apparent meaning of the mere letter when interpreted according to the rules of the common law. The purpose is to work out the common intention, including that of peoples who know nothing about the common law, and who use phraseology different from that to which we are accustomed. A noticeable declaration of this fact is found in *United States* v. *Winans*, 198 U. S. 371, 380, where the Supreme Court reiterated that it would sometimes go to the extent of construing a treaty with Indians as they understood it when it was made, rather than according to its letter. Certainly, it would not violate any just rules if either the Executive, the Judiciary or the Congress of the United States, should construe a treaty in accordance with what was clearly the common understanding of all the commissioners who negotiated it. The courts might safely do this; and, perhaps, they would be compelled to when there was a formal protocol of the proceedings of the negotiations expressing it. Under the circumstances here, Congress might well be justified in acting on the report of the commissioners who were concerned in the intended Convention of 1897, to the effect that all present were of the opinion that the proposed article then under consideration could not affect existing patents in the United States, in view of the fact that the same language was

carried forward into the treaty of 1900, without any contravening statement from any of the parties who negotiated it. This may well explain why it is that we find the act of 1903 in the form in which we do find it. At any rate, that act did omit the special provisions with reference to existing patents, and future adhering states, on which the complainant relies; and, for the reasons which we have stated, we must conclude that this was purposely done.

Whatever might have been the condition with reference to a bill in equity filed before the act of 1903, covering infringement prior thereto, we have here a statute passed before filing of the existing bill, and the infringements now alleged, which pronounces the construction we must give the convention of 1900, according to the legislative will declared since it was ratified. In any event, the courts would hesitate before giving a treaty an interpretation differing from that solemnly given it by the Executive or by Congress, even if they would ever do it. According to the law as it stood when the patent in suit issued, it expired with the British patent. To enable it to run its statutory term, retroactive legislation by statute or treaty was necessary. It is not impossible that the Convention of 1900 might have been regarded as retroactive and as reaching this patent; but, before any issue arose between the parties to this appeal, and, therefore, before any rights against the respondent could have vested in the complainant, Congress interposed and pronounced the legislative will, subsequently to the ratification of the convention, that it should not be regarded as retroactive. Consequently, we find no saving clause so far as the litigation here is concerned.

In *Sawyer Spindle Company* v. *Carpenter*, 143 Fed. Rep. 976, in which we passed down an opinion on February 23, 1906, that portion of the act of 1903 which re-enacted section 4887 of the Revised Statutes was held not to be retroactive so far as concerns patents which had then expired, and the general rule that statutes are not to be held retroactive was stated. While it is true that in *Sawyer Spindle Company* v. *Carpenter* the patentee did not rely on any International Convention, and brought none to our attention, yet it is also true that the result reached in that case was in

harmony with the ordinary rules of statutory construction. We are of the opinion that here the Circuit Court was correct, and that there is nothing in the treaties made by the United States, as controlled and construed by the later Federal statute, which saves the complainant.

The decree of the Circuit Court is affirmed; and the appellee recovers its costs of appeal.

UNITED STATES CIRCUIT COURT OF APPEALS FOR THE FIRST CIRCUIT.

OCTOBER TERM, 1906.

No. 689.

UNITED SHOE MACHINERY COMPANY, COMPLAINANT, APPELLANT,

v.

DUPLESSIS SHOE MACHINERY COMPANY, DEFENDANT, APPELLEE.

FINAL DECREE.

AUGUST 2, 1907.

This cause came on to be heard April 25 and 26, 1907, upon the transcript of record of the Circuit Court of the United States for the District of Massachusetts, and was argued by counsel.

On consideration whereof, It is now, to wit, August 2, 1907, here ordered, adjudged and decreed as follows: The decree of the Circuit Court is affirmed; and the appellee recovers its costs of appeal.

By the Court,
JOHN G. STETSON, Clerk.

DEPARTMENT OF THE INTERIOR,
United States Patent Office.

To all persons to whom these presents shall come, Greeting:

This is to certify that the annexed is a true copy from the records of this office of an instrument of writing Recorded May 27, 1893, in Liber S-48, page 122. Said record has been carefully compared with the original and is a correct transcript of the whole thereof.

In Testimony Whereof I have hereunto set my hand and caused the seal of the Patent Office to be affixed at the City of Washington, this 21st day of August, in the year of our Lord one thousand nine hundred and thirteen and of the independence of the United States of America the one hundred and thirty-eighth.

[SEAL] THOMAS EWING Commissioner of Patents.

Liber S 48, Page 122.

Know all Men by these Presents that The Goodyear Shoe Machinery Company, a corporation established under the laws of the State of Connecticut, and located at the Town of Hartford in said State, party hereto of the first part, in consideration of the sum of one dollar and other valuable consideration to it paid by the Goodyear Shoe Machinery Company, a corporation established under the laws of the State of Maine, and located at Portland, in the County of Cumberland and State of Maine, party hereto of the second part, the receipt of which is hereby acknowledged, has sold, assigned, transferred and set over, and doth by these presents, sell, assign, transfer and set over unto said Goodyear Shoe Machinery Company, party hereto of the second part, all and every right, title and interest which it, the party hereto of the first part has in and to or under the several Letters Patent of the United States of America hereinafter described or referred to, namely:

Letters Patent No. 165,506, dated July 13, 1875, granted to

Everett P. Richardson for an Improvement in Machines for Sewing Turned Shoes.

Letters Patent No. 170,547, dated Nov. 30, 1875, granted to The Goodyear Boot and Shoe Sewing Machine Company for an Improvement in Machines for Sewing Boots and Shoes.

Letters Patent No. 190,709, dated May 15, 1877, granted to Christian Dancel for an Improvement in Machines for Sewing Boots and Shoes.

Letters Patent No. 191,387, dated May 29, 1877, granted to Joseph S. Turner for an Improvement in Manufacture of Boots and Shoes.

Letters Patent No. 196,809, dated Nov. 6, 1877, granted to Jeremiah Keith for an Improvement in Wax Thread Sewing Machines.

Letters Patent No. 199,802, dated Jan. 29, 1878, granted to Charles Goodyear, Jr. for an Improvement in Sewing Machines for Boots and Shoes.

Letters Patent No. 199,759, dated Jan. 29, 1878, granted to Joseph S. Turner for an Improvement in Throat Plates for Boot and Shoe Sewing Machines.

Letters Patent No. 200,232, dated Feb. 12, 1878, granted to Joseph S. Turner for an Improvement in Channelling Tools for Boot and Shoe Soles.

Letters Patent No. 213,712, dated Mar. 25, 1879, granted to Joseph S. Turner for an Improvement in Sole Marking Tools for Channelling.

Letters Patent No. 215,547, dated May 20, 1879, granted to Joseph S. Turner for an Improvement in Machines for Pricking and Trimming Soles.

Letters Patent No. 221,660, dated Nov. 18, 1879, granted to Mary A. C. Holmes for an Improvement in Machines for Channelling and Perforating the Soles of Boots and Shoes.

Letters Patent No. 232,382, dated Sept. 21, 1880, granted to Joseph S. Turner for an Improvement in Machines for Trimming and Channelling Boot and Shoe Soles.

Letters Patent No. 236,938, dated Jan. 25, 1881, granted to Michael A. Donovan for an Improvement in Sewing Machines.

Letters Patent No. 239,999, dated Apr. 12, 1881, granted to Joshua F. Ames for an Improvement in Sole Channelling Machines.

Letters Patent No. 240,307, dated Apr. 19, 1881, granted to The Goodyear and McKay Sewing Machine Company for an Improvement in Sole Sewing Machines.

Letters Patent No. 245,712, dated Aug. 16, 1881, granted to Charles W. Glidden for an Improvement in Sole Channelling and Shaping Machines.

Letters Patent No. 249,237, dated Nov. 8, 1881, granted to Charles W. Glidden for an Improvement in Machines for Pricking and Trimming Soles.

Letters Patent No. 249,279, dated Nov. 8, 1881, granted to James W. Brooks, Trustee, for an Improvement in Machines for Pricking, Trimming and Channelling Soles.

Letters Patent No. 251,240, dated Dec. 20, 1881, granted to Socrates Keats and Arthur Keats for an Improvement in Sewing Machines.

Letters Patent No. 254,594, dated Mar. 7, 1882, granted to The Goodyear and McKay Sewing Machine Company for an Improvement in the Method of Lasting and Uniting the Uppers and Soles of Boots and Shoes.

Letters Patent No. 258,696, dated May 30, 1882, granted to Eli Bertrand for an Improvement in Boot or Shoe Holding Jacks.

Letters Patent No. 260,990, dated July 7, 1882, granted to Alphonso Keats for an Improvement in Sewing Machines.

Letters Patent No. 267,798, dated Nov. 21, 1882, granted to Marshall H. Pearson for an Improvement in Boot and Shoe Sewing Machines.

Letters Patent No. 274,091, dated Mar. 13, 1883, granted to The Goodyear and McKay Sewing Machine Company for an Improvement in Lasting Jacks or Holders for Boots and Shoes.

Letters Patent No. 281,258, dated July 17, 1883, granted to The

Goodyear and McKay Sewing Machine Company for an Improvement in Lasting Jacks or Holders for Boots and Shoes.

Letters Patent No. 296,790, dated Apr. 15, 1884, granted to Earle H. Smith for an Improvement in Sewing Machine Shuttles.

Letters Patent No. 317,758, dated May 12, 1885, granted to The Goodyear and McKay Sewing Machine Company for an Improvement in Solo Sewing Machines.

Letters Patent No. 317,759, dated May 12, 1885, granted to The Goodyear and McKay Sewing Machine Company for an Improvement in Sole Sewing Machines.

Letters Patent No. 320,075, dated June 16, 1885, granted to The Goodyear and McKay Sewing Machine Company for an Improvement in Machines for Beating out Welts.

Letters Patent No. 330,928, dated Nov. 24, 1885, granted to James W. Brooks, as Trustee, for an Improvement in Machines for Channelling the Soles of Boots and Shoes.

Letters Patent No. 331,145, dated Nov. 24, 1885, granted to John S. Leavitt for an Improvement in Tools for Channelling Boot and Shoe Soles.

Letters Patent No. 331,214, dated Nov. 24, 1885, granted to James W. Brooks, as Trustee, for an Improvement in Tools for Channelling Soles of Boots and Shoes.

Letters Patent No. 366,935, dated July 19, 1887, granted to The Goodyear and McKay Sewing Machine Company for an Improvement in Sole Sewing Machines.

Letters Patent No. 369,563, dated Sept. 6, 1887, granted to The Goodyear and McKay Sewing Machine Company for an Improvement in Shoe Sole Sewing Machines.

Letters Patent No. 373,391, dated Nov. 15, 1887, granted to John C. Daggett and Charles H. Colburn for an Improvement in Sewing Machine Feed.

Letters Patent No. 412,703, dated Oct. 8, 1889, granted to The Goodyear Shoe Machinery Company for an Improvement in Sewing Machines.

Letters Patent No. 412,704, dated Oct. 8, 1889, granted to The

Goodyear Shoe Machinery Company for an Improvement in Shoe Sewing Machines.

Letters Patent No. 420,441, dated Feb. 4, 1890, granted to Jonathan Munyan for an Improvement in Mechanism for Winding Bobbins.

Letters Patent No. 424,966, dated Apr. 8, 1890, granted to Zachary Taylor French and William Christian Meyer for an Improvement in Shuttles for Sewing Machines.

Letters Patent No. 453,999, dated June 9, 1891, granted to The Goodyear Shoe Machinery Company for an Improvement in Channelling Machines.

Letters Patent No. 459,036, dated Sept. 8, 1891, granted to Christian Dancel for an Impaovement in Sewing Machines.

Letters Patent No. 461,793, dated Oct. 20, 1891, granted to The Goodyear Shoe Machinery Company for an Improvement in Methods of Forming Chain Stitches.

Letters Patent No. 463,967, dated Nov. 24, 1891, granted to The Goodyear Shoe Machinery Company for an Improvement in Rough Rounding and Channelling Machines.

Letters Patent No. 463,982, dated Nov. 24, 1891, granted to The Goodyear Shoe Machinery Company for an Improvement in Rough Rounding and Channelling Machines.

Letters Patent No. 473,870, dated Apr. 28, 1892, granted to The Goodyear Shoe Machinery Company for an Improvement in Sole Sewing Machines.

Letters Patent No. 474,774, dated May 10, 1892, granted to The Goodyear Shoe Machinery Company for an Improvement in Sole Sewing Machines.

Letters Patent No. 480,229, dated Aug. 2, 1892, granted to The Goodyear Shoe Machinery Campany for an Improvement in Sewing Machines.

Letters Patent No. 488,505, dated Dec. 20, 1892, granted to The Goodyear Shoe Machinery Company for an Improvement in Tension Devices for Sewing Machines.

Letters Patent No. 488,508, dated Dec. 20, 1892, granted to

The Goodyear Shoe Machinery Company for an Improvement in Tension Devices for Sewing Machines.

And the party hereto of the first part has sold, assigned and transferred and doth by these presents sell, assign and transfer unto the party of the second part, all rights, claims and demands both at law and in equity to or in respect of damages or profits which can or may be recovered from infringers of said Letters Patent or either or any of them, and doth hereby irrevocably constitute and appoint the party of the second part its attorney, with power of substitution, in its name to demand, sue for, recover and receive for the use of it, the party of the second part, any and all such damages or profits, but so that the party of the first part incurs no expense or liability in respect thereof.

All the said several Letters Patent and rights and interests therein and thereunder to be held and enjoyed by the party hereto of the second part for its own use and behoof, and for the use and behoof of its successors and assigns to the full end of the respective terms for which the said Letters Patent have been or shall hereafter be granted, as fully and entirely as the same would have been held and enjoyed by the party hereto of the first part, had this assignment and sale not been made.

In Witness Whereof, the said The Goodyear Shoe Machinery Company, party hereto of the first part, has caused its corporate seal to be hereto affixed and these presents to be signed in its name by Jonathan Munyan, its President, and Stephen V. A. Hunter, its Treasurer, this ninth day of March, A. D. 1893.

And, Whereas, the Lessee desires a license to use the inventions, or some of them, which are patented in and by the above-recited Letters Patent, and also desires a lease of the machines which are designated by their numbers in the schedule of machines following, viz.:

SCHEDULE OF MACHINES.

Goodyear Welt and Turn Shoe Machine , No.
Goodyear Outsole Stitcher (Lock Stitch "Rapid"), No. *942*
(Welt Bevelling Attachment, No.)
Goodyear Channeler (Insole), No.
Goodyear Channeler (Outsole), No.
Rounding and Channeling Machine , No.
Universal Rounding and Channeling Machine , No. *27*
Channel Lip Turner , No.
Goodyear Channel Opener , No.
Goodyear Welt Beater , No.
Goodyear Shank Skiver , No.
Universal Shank Skiver , No.
Goodyear Bobbin Winder , No.
Goodyear Welt Groover , No.
Goodyear Welt Splitter , No.
Goodyear Basting Machine , No.
Universal Inseam Trimmer , No.
Goodyear Sole Layer , No.
Goodyear Automatic Sole Leveller , No.
Hadaway Stitch Separator , No.

The said machines being the property of the Lessor:

Now, therefore, the Lessor, in consideration of one dollar and other valuable consideration to it paid by the Lessee, the receipt of which is hereby acknowledged, and in further consideration of the agreements and conditions hereinafter contained, on the part of the Lessee to be kept and performed, doth lease unto the Lessee the machines designated by their numbers in the foregoing Schedule of Machines, and doth license the Lessee and the operatives in his employment to use the machines hereby leased, and also such of the inventions patented as aforesaid as are embodied in the said

machines, or either or any of them, but upon the agreements and conditions hereinafter set forth; and this lease and license is granted by the Lessor and accepted by the Lessee on the express condition that the Lessee shall faithfully keep and perform all the agreements and conditions herein contained on his part to be kept and performed, and upon breach of the same, or either or any of them, by the Lessee, the Lessor, notwithstanding any express or implied waiver of any prior breach, may at its option cancel and terminate this lease and license, and upon written notice thereof by the Lessor to the Lessee or to any one in the possession or apparent control of the machines hereby leased, or either or any of them, this lease and license shall terminate, and possession of the said machines shall thereupon re-vest in the Lessor;

And the Lessee hereby agrees to keep and perform all the following conditions of this lease and license:

First. The Lessee hereby agrees to use, and is hereby licensed to use, the machines hereby leased and the inventions patented as aforesaid only in his factory in *Whitman* in the State of *Massachusetts* and only in the manufacture of boots and shoes, and agrees to keep the said machines in working order at his own expense and to procure of the Lessor or its agents all parts for repairing the machines hereby leased, and agrees not to add to or subtract from the said machines any part or mechanism whatever, now or hereafter organized or connected therewith by the Lessor, nor to make nor allow to be made any change or alteration in the same, nor to remove or deface any dates, numbers or inscriptions now or hereafter impressed thereon or affixed thereto by the Lessor.

Second. The Lessee hereby agrees to permit the agents and inspectors of the Lessor, at all reasonable times, to have convenient access to the machines, to examine and inspect the same and the use thereof, and to verify the operator's reports, and to add improvements to the machines as the Lessor may see fit; and the agreements and conditions herein contained shall apply to all improvements which the Lessor shall hereafter add to the machines, and to all patented inventions hereafter embodied therein,

with the same effect as if the patents therefor were included in the foregoing schedule of patents.

Third. The following is the schedule of rents and royalties hereinafter referred to, and which it is understood and agreed is to be paid by the Lessee for each pair of shoes or boots respectively made by the aid of the machines hereby leased, or either or any of them, or by the use of the inventions patented as aforesaid, or either or any of them, viz.:

SCHEDULE OF RENTS AND ROYALTIES FOR GOODYEAR WELTS.

Children's	3 cents per pair.
Misses'	4 " "
Women's	6 " "
Youths'	4 " "
Boys'	6 " "
Men's	8 " "

Fourth. The Lessee hereby agrees to keep proper books of account, and make true and complete entries therein of all transactions relating to the manufacture and sale of all boots and shoes made by him, or by any other person for him or for others, by the aid of the machines hereby leased, or any of them, or by the use of the inventions patented as aforesaid, or either or any of them, and to render an account thereof to the Lessor on or before the tenth day of each month, which account shall specify the number of pairs of boots and shoes made under this lease and license during the calendar month next preceding, and the class to which they belong according to the above schedule of rents and royalties; and the Lessee agrees that he will require the operator or operators on said machines to keep a daily account of all boots or shoes made by the aid of said machines upon the printed forms to be furnished by the Lessor, in duplicate, one copy of which, containing such reports for the calendar month next preceding, the Lessee agrees to send, on or before the tenth day of each month, to the Lessor, and, whenever required by the Lessor, to make oath to the correctness of said returns, and to allow the Lessor, by its agents or attorneys, to examine and take copies or extracts from the original book or

books of account of the Lessee and the accounts kept by the operator or operators as aforesaid; and the Lessee hereby agrees to send to the Lessor, on or before the tenth day of each month, in case the machines hereby leased have not been run during the month next preceding, one of the aforesaid printed forms furnished by the Lessor, marked across the face with the words "not running," or "not in use."

Fifth. The Lessee agrees to pay unto the Lessor as rent for the machines hereby leased, and as royalty for the use of the inventions patented as aforesaid as hereby licensed, the rent and royalty specified in the schedule forming part of Section Third herein, for each pair of boots or shoes of the respective kinds mentioned or described in said schedule, made by the aid of the said machines, or either or any of them, or by the use of the said inventions, or either or any of them; the rents and royalties for all such boots and shoes, made as aforesaid during one calendar month, to be due and payable on the last day of the calendar month next following; but the Lessor hereby agrees that, **if the rents and royalties due on the last day of any month shall be paid on or before the fifteenth day of that month, it will, in consideration thereof grant a discount of fifty per cent. from the rents and royalties specified in the schedule aforesaid.**

Sixth. The Lessee agrees that the machines hereby leased shall be used only in the manufacture of boots or shoes known in the trade as "Goodyear Welts," and that he will not use or permit the use of said machines, or either or any of them, upon boots or shoes in the manufacture of which any sole or welt sewing machine not leased to him by the Lessor is employed, or for any other purpose than the manufacture of Goodyear Welts, unless the consent in writing of the Lessor shall first have been obtained.

Seventh. The Lessee hereby agrees that he will not in any way violate or infringe, or contest the validity of, any of the patents under which he is hereby licensed, or the sufficiency of their specifications, or the validity of the title of the Lessor, or of its successors or assigns, to said patents, or either or any of them.

Eighth. This lease and license is not assignable by the Lessee, by his own act or by operation of law.

Ninth. The following are also agreed to by the parties to this instrument as conditions of this lease and license:

(a) That the power conveyed by this lease and license is only the right to use the said machines, and not the right to make or sell any machines embodying the patented inventions aforesaid, or any of them; and that a transfer or removal of the machines hereby leased, or either or any of them, can only be made with the consent of the Lessor, its successors or assigns; and that if the Lessee is or becomes at any time insolvent or bankrupt, or shall make an assignment for the benefit of his creditors, or if a sale, lease, transfer or removal of said machines, or any of them, shall be made or attempted by the Lessee, or by operation of law, or by any legal officer, representative or assignee, as the property of the Lessee, without the written consent of the Lessor, or its successors or assigns, this lease and license shall thereupon terminate and expire, and the Lessor, its successors or assigns, may take possession of said machines without the Lessee having any claim for the repayment of any part of the sum or sums which he may have paid as consideration for the delivery of this lease and license, or for rent and royalty under this instrument.

(b) That in case the Lessee refuses or neglects to perform, or violates, any of the conditions in this lease and license contained, the Lessor, its successors or assigns, notwithstanding any express or implied waiver of any prior breach, shall have the right to terminate this lease and license by giving written notice as aforesaid that it has elected so to do; and upon the giving of such notice this lease and license shall be terminated, and the possession of said machines shall thereupon re-vest in the Lessor, its successors or assigns, free and discharged of this lease and license; and the Lessor, its successors or assigns, or its authorized agent or agents, may thereupon enter any premises where said machines may be, and may take and remove them, and the Lessee shall have no claim whatever on account of any sum or sums he may have paid for or under this lease or license.

(c) That this lease and license shall continue (provided the Lessee complies with the agreements and conditions herein contained) until the expiration of all and every the Letters Patent referred to in the foregoing Schedule of Patents, or any extensions or renewals of the same, and upon the expiration thereof the Lessee shall deliver to the Lessor, its successors or assigns, the machines hereby leased in good order, natural wear and tear alone excepted.

Tenth. In case any other machines than those hereby leased and licensed, embracing any of the inventions patented in the aforesaid Letters Patent, or any of them, or any inventions or improvements for which Letters Patent shall be granted or assigned to the Lessor, shall hereafter come into possession of the Lessee, by exchange or otherwise, without lease or license from the lessor, its successors or assigns, then in case the Lessor, its successors or assigns, shall so elect, all the covenants herein contained shall apply to such machines, inventions or improvements, and shall govern the parties respectively to the same extent as if the said machines, inventions or improvements had been expressly included in this lease and license. The Lessor shall give written notice of its election as aforesaid after it shall have received written notice from the Lessee of the possession of such machines, but may give such notice without having received notice from the Lessee of the possession of such machines.

Eleventh. The Lessee agrees that he will not disturb or interfere with, nor permit any one else to disturb or interfere with, any indicator which now is or which may be hereafter placed upon the machines hereby leased.

Twelfth. All the rights and interests which, under this instrument, and by reason of the ownership of said machines and patents and patent rights, belong to the lessor, shall be deemed to belong to and may be enforced in the names of the Lessor and its successors and assigns, and all the agreements and conditions binding on the Lessee shall be binding on his legal representatives.

Thirteenth. It is agreed that the numbers of the machines named in this lease may be entered herein by the Lessor after signing; and, in case the Lessee shall require more than one machine, it is

agreed that the termination of words relating to the machines shall be construed and considered as written in the singular or plural, as the number of machines entered in the lease and license may require; and also that this instrument may be used in cases where the party of the second part shall consist of more than one person, and in that case the termination of the words relating to the said party shall be considered as plural or singular as the sense may require; and that when the party of the second part so consists of several persons, and they sign this lease, either individually or by their firm signature, such signature or signatures shall bind them both jointly and severally hereto.

In witness whereof, the Lessor has caused these presents to be signed in its name, and its corporate seal to be affixed hereto by its Treasurer, and the Lessee has set his hand and seal hereto the day and year first above written.

Executed in Duplicate.

And, whereas, the Lessee desires a license to use the inventions, or some of them, which are patented in and by the above-recited Letters Patent, and also desires a lease of the machines which are designated by their numbers in the schedule of machines following, viz.:

SCHEDULE OF MACHINES.

Goodyear Welt and Turn Shoe Machine , No.
Goodyear Outsole Stitcher (Lock Stitch "Rapid"), No.
(Welt Bevelling Attachment, No.)
Goodyear Channeller (Insole), No.
Goodyear Channeller (Outsole), No.
Rounding and Channelling Machine , No.
Universal Rounding and Channelling Machine , No.
Channel Lip Turner , No.
Goodyear Channel Opener , No.
Goodyear Welt Beater , No.
Goodyear Shank Skiver , No.
Universal Shank Skiver , No.
Goodyear Bobbin Winder , No.
Goodyear Welt Groover , No.
Goodyear Welt Splitter , No.
Goodyear Basting Machine , No.
Universal Inseam Trimmer , No.
Goodyear Sole Layer , No. *116*
Goodyear Automatic Sole Leveller , No.
Hadaway Stitch Separator , No.

The said machines being the property of the Lessor:

Now, therefore, the Lessor, in consideration of one dollar and other valuable consideration to it paid by the Lessee, the receipt of which is hereby acknowledged, and in further consideration of the agreements and conditions hereinafter contained, on the part of the Lessee to be kept and performed, doth lease unto the Lessee the machines designated by their numbers in the foregoing Schedule of Machines, and doth license the Lessee and the operatives in his employment to use the machines hereby leased, and also such of the inventions patented as aforesaid as are embodied in the said

machines, or either or any of them, but upon the agreements and conditions hereinafter set forth; and this lease and license is granted by the lessor and accepted by the Lessee on the express condition that the Lessee shall faithfully keep and perform all the agreements and conditions herein contained on his part to be kept and performed, and upon breach of the same, or either or any of them, by the Lessee, the Lessor, notwithstanding any express or implied waiver of any prior breach, may at its option cancel and terminate this lease and license, and upon written notice thereof by the Lessor to the Lessee or to any one in the possession or apparent control of the machines hereby leased, or either or any of them, this lease and license shall terminate, and possession of the said machines shall thereupon re-vest in the lessor;

First. The Lessee hereby agrees to use, and is hereby licensed to use, the machines hereby leased and the inventions patented as aforesaid only in his factory in *Whitman* in the State of *Massachusetts* and only in the manufacture of boots and shoes, and agrees to keep the said machines in working order at his own expense and to procure of the Lessor or its agents all parts for repairing the machines hereby leased, and agrees not to add to or subtract from the said machines any part or mechanism whatever, now or hereafter organized or connected therewith by the Lessor, nor to make nor allow to be made any change or alteration in the same, nor to remove or deface any dates, numbers or inscriptions now or hereafter impressed thereon or affixed thereto by the Lessor.

Second. The Lessee hereby agrees to permit the agents and inspectors of the Lessor, at all reasonable times, to have convenient access to the machines, to examine and inspect the same and the use thereof, and to verify the operator's reports, and to add improvements to the machines as the Lessor may see fit; and the agreements and conditions herein contained shall apply to all improvements which the lessor shall hereafter add to the machines, and to all patented inventions hereafter embodied therein, with the same effect as if the patents therefor were included in the foregoing schedule of patents.

Third. The following is the schedule of rents and royalties here-

inafter referred to, and which it is understood and agreed is to be paid by the Lessee for each pair of shoes or boots respectively made by the aid of the machines hereby leased, or either or any of them, or by the use of the inventions patented as aforesaid, or either or any of them, viz.:

SCHEDULE OF RENTS AND ROYALTIES FOR GOODYEAR WELTS.

Children's	3 cents per pair
Misses'	4 " "
Women's	6 " "
Youths'	4 " "
Boys'	6 " "
Men's	8 " "

Fourth. The Lessee hereby agrees to keep proper books of account, and make true and complete entries therein of all transactions relating to the manufacture and sale of all boots and shoes made by him, or by any other person for him or for others, by the aid of the machines hereby leased, or any of them, or by the use of the inventions patented as aforesaid, or either or any of them, and to render an account thereof to the Lessor on or before the tenth day of each month, which account shall specify the number of pairs of boots and shoes made under this lease and license during the calendar month next preceding, and the class to which they belong according to the above schedule of rents and royalties; and the Lessee agrees that he will require the operator or operators on said machines to keep a daily account of all boots or shoes made by the aid of said machines upon the printed forms to be furnished by the Lessor, in duplicate, one copy of which, containing such reports for the calendar month next preceding, the Lessee agrees to send, on or before the tenth day of each month, to the Lessor, and, whenever required by the Lessor, to make oath to the correctness of said returns, and to allow the Lessor, by its agents or attorneys, to examine and take copies or extracts from the original book or books of account of the Lessee and the accounts kept by the operator or operators as aforesaid; and the Lessee hereby agrees to send to the Lessor, on or before the tenth day of each

month, in case the machines hereby leased have not been run during the month next preceding, one of the aforesaid printed forms furnished by the Lessor, marked across the face with the words "not running," or "not in use."

Fifth. The Lessee agrees to pay unto the Lessor, as rent for the machines hereby leased, and as royalty for the use of the inventions patented as aforesaid as hereby licensed, the rent and royalty specified in the schedule forming part of Section Third herein, for each pair of boots or shoes of the respective kinds mentioned or described in said schedule, made by the aid of the said machines, or either or any of them, or by the use of the said inventions, or either or any of them; the rents and royalties for all such boots and shoes, made as aforesaid during one calendar month, to be due and payable on the last day of the calendar month next following; but the Lessor hereby agrees, that, **if the rents and royalties due on the last day of any month shall be paid on or before the fifteenth day of that month, it will, in consideration thereof, grant a discount of fifty per cent. from the rents and royalties specified in the schedule aforesaid.**

Sixth. The Lessee agrees that the machines hereby leased shall be used only in the manufacture of boots or shoes known in the trade as "Goodyear Welts," and that he will not use or permit the use of said machines, or either or any of them, upon boots or shoes in the manufacture of which any sole or welt sewing machine not leased to him by the Lessor is employed, or for any other purpose than the manufacture of Goodyear Welts, unless the consent in writing of the Lessor shall first have been obtained.

Seventh. The Lessee hereby agrees that he will not in any way violate or infringe, or contest the validity of, any of the patents under which he is hereby licensed, or the sufficiency of their specifications, or the validity of the title of the Lessor, or of its successors assigns, to said patents, or either or any of them.

Eighth. This lease and license is not assignable by the Lessee, by his own act or by operation of law.

Ninth. The following are also agreed to by the parties to this instrument as conditions of this lease and license:

(a) That the power conveyed by this lease and license is only the right to use the said machines, and not the right to make or sell any machines embodying the patented inventions aforesaid, or any of them; and that a transfer or removal of the machines hereby leased, or either or any of them, can only be made with the consent of the Lessor, its successors or assigns; and that if the lessee is or becomes at any time insolvent or bankrupt, or shall make an assignment for the benefit of his creditors, or if a sale, lease, transfer or removal of said machines, or any of them, shall be made or attempted by the Lessee, or by operation of law, or by any legal officer, representative or assignee, as the property of the Lessee, without the written consent of the Lessor, or its successors or assigns, this lease and license shall thereupon terminate and expire, and the Lessor, its successors or assigns, may take possession of said machines without the Lessee having any claim for the repayment of any part of the sum or sums which he may have paid as consideration for the delivery of this lease and license, or for rent and royalty under this instrument.

(b) That in case the Lessee refuses or neglects to perform, or violates, any of the conditions in this lease and license contained, the Lessor, its successors or assigns, notwithstanding any express or implied waiver of any prior breach, shall have the right to terminate this lease and license by giving written notice as aforesaid that it has elected so to do; and upon the giving of such notice this lease and license shall be terminated, and the possession of said machines shall thereupon re-vest in the Lessor, its successors or assigns, free and discharged of this lease and license; and the Lessor, its successors or assigns, or its authorized agent or agents, may thereupon enter any premises where said machines may be, and may take and remove them, and the Lessee shall have no claim whatever on account of any sum or sums he may have paid for or under this lease or license.

(c) That this lease and license shall continue (provided the Lessee complies with the agreements and conditions herein contained) until the expiration of all and every the Letters Patent referred to in the foregoing Schedule of Patents, or any extensions

or renewals of the same, and upon the expiration thereof the Lessee shall deliver to the Lessor, its successors or assigns, the machines hereby leased in good order, natural wear and tear alone excepted.

Tenth. In case any other machines than those hereby leased and licensed, embracing any of the inventions patented in the aforesaid Letters Patent, or any of them, or any inventions or improvements for which Letters Patent shall be granted or assigned to the Lessor, shall hereafter come into possession of the Lessee, by exchange or otherwise, without lease or license from the Lessor, its successors or assigns, then in case the Lessor, its successors or assigns, shall so elect, all the covenants herein contained shall apply to such machines, inventions or improvements, and shall govern the parties respectively to the same extent as if the said machines, inventions or improvements had been expressly included in this lease and license. The Lessor shall give written notice of its election as aforesaid after it shall have received written notice from the Lessee of the possession of such machines, but may give such notice without having received notice from the Lessee of the possession of such machines.

Eleventh. The Lessee agrees that he will not disturb or interfere with, nor permit any one else to distrurb or interfere with, any indicator which now is or which may be hereafter placed upon the machines hereby leased.

Twelfth. All the rights and interests which, under this instrument, and by reason of the ownership of said machines and patents and patent rights, belong to the Lessor, shall be deemed to belong to and may be enforced in the names of the Lessor and its successors and assigns, and all the agreements and conditions binding on the Lessee shall be binding on his legal representatives.

Thirteenth. It is agreed that the numbers of the machines named in this lease may be entered herein by the Lessor after signing; and, in case the Lessee shall require more than one machine, it is agreed that the termination of words relating to the machines shall be construed and considered as written in the singular or plural, as the number of machines entered in the lease and license may require; and also that this instrument may be used in cases where

the party of the second part shall consist of more than one person, and in that case the termination of the words relating to the said party shall be considered as plural or singular as the sense may require; and that when the party of the second part so consists of several persons, and they sign this lease, either individually or by their firm signature, such signature or signatures shall bind them both jointly and severally hereto.

In witness whereof, the Lessor has caused these presents to be signed in its name, and its corporate seal to be affixed hereto by its Treasurer, and the Lessee has set his hand and seal hereto the day and year first above written.

License and Rental Lease No. *2213*

This License and Rental Lease Agreement, made in duplicate the *24th* day of *March* A. D. 1*900*, by and between the

Consolidated & McKay Lasting Machine Company,

a corporation incorporated under the laws of the State of Maine, Licensor and party of the first part, and *Commonwealth Shoe and Leather Co.* of *Skowhegan, Maine*, Licensee and party of the second part, Witnesseth:

Whereas, the Licensor is now the owner of the following Letters Patent of the United States relating to Lasting Machines or auxiliary machines for lasting, to wit: No. 274,207, dated March 20,

1883, No. 281,306, dated July 17, 1883, No. 284,906, dated Sept. 11, 1883, No. 292,575, dated Jan. 29, 1884, No. 312,335, dated Feb. 17, 1885, No. 415,726, dated Nov. 26, 1889, No. 421,954, dated Feb. 25, 1890, No. 423,920, dated March 25, 1890, No. 423,921, dated March 25, 1890, No. 423,922, dated March 25, 1890, No. 423,937, dated March 25, 1890, No. 441,482, dated Nov. 25, 1890, No. 459,899, dated Sept. 22, 1891, No. 482,349, dated Sept. 13, 1892, No. 500,141, dated June 27, 1893, No. 510,972, dated Dec. 19, 1893, No. 510,973, dated Dec. 19, 1893, No. 510,974, dated Dec. 19, 1893, No. 510,975, dated Dec. 19, 1893, No. 510,976, dated Dec. 19, 1893, No. 510,977, dated Dec. 19, 1893, No. 510,-978, dated Dec. 19, 1893, No. 518,933, dated April 24, 1894, No. 523,939, dated July 31, 1894, No. 533,394, dated Jan. 29, 1895, No. 560,767, dated May 26, 1896, No. 562,119, dated June 16, 1896, No. 564,931, dated July 28, 1896, No. 567,566, dated Sept. 8, 1896, No. 584,741, dated June 15, 1897, No. 584,742, dated June 15, 1897, No. 584,743, dated June 15, 1897, No. 584,744, dated June 15, 1897, No. 597,321, dated January 11, 1898, and other patents applied for and now pending, and is, moreover, the owner of or Licensee under other patents not herein enumerated;

And, Whereas, the Licensee desires the right to use, under the terms of this License and Lease Agreement, the hereinafter described machine belonging to and owned by the Licensor, and also any improvements relating to the machine hereby licensed and leased for Rental, which may hereafter be acquired by the Licensor and attached to the machine hereby licensed and leased for Rental, or delivered to the Licensee to be used in connection therewith, and also any other machine, machinery, or device made by or for the Licensor, which may hereafter come into the possession of the Licensee:

Now, Therefore, the Licensor, in consideration of Three Hundred Dollars ($300.00) ~~to be~~ paid ~~for this License~~ by the *Bloomfield Shoe Co.* ~~Licensee~~, and of the stipulations, conditions and agreements herein contained, on the part of the Licensee to be kept and performed, does license unto the licensee, Lasting Machine No. *567*, property of the Licensor, but delivered f. o. b. cars

at Beverly, Mass., into the possession of the Licensee for lasting boots and shoes at the factory of the Licensee in *Skowhegan* State of *Maine* and nowhere else. Said machine is constructed in accordance with and embodies the invention or inventions or some part thereof described in said Letters Patent granted and to be granted, to which Letters Patent when granted this License and Lease agreement shall apply and the parties hereunto shall be bound relatively thereto, the same in all respects as if the patents had been granted and the numbers thereof specially enumerated in this License and Lease agreement before signing.

The Licensor does hereby license the Licensee and the operatives in his employ to use said patented machine upon the terms and conditions herein set forth, and the Licensor does hereby also license the Lecensee to use the inventions of all said patents above enumerated or referred to and all reissues, renewals and extensions of the same embodied in said machine; provided, however, and this License and Lease is granted on the express conditions that the Licensee shall at all times faithfully perform all and every condition herein contained upon his part to be kept and performed, and upon breach of said conditions or any of them by the Licensee, the Licensor at its option may cancel and terminate this License and Lease Agreement and upon written notice thereof to the Licensee or to any one in possession of or apparent control of the machine this License and Lease Agreement shall terminate and the possession of said machine may thereupon be taken by the Licensor or its duly authorized Agents.

And the following are conditions and agreements which the Licensee hereby agrees to keep and perform and upon condition of the faithful performance of which, this License and Lease agreement is granted.

First. — The Licensee agrees that the operator on this machine shall keep a daily account on blanks, furnished by the Licensor for that purpose, of the numbers of pairs of boots and shoes and the kinds thereof lasted on or by the use of said machine or by the use of any of the inventions of said patents or in the making of which any of the inventions of said patents were employed or the machine

performed a part, which account shall be signed by the operator (and verified and signed by the Licensee, if requested by the Licensor) and forwarded by the Licensee to the Licensor on or before the fifth day of each and every month in each and every year during the continuance of this License and Lease Agreement, for the month then next preceding, and on or before the fifth day thereafter the Licensee shall pay to the Licensor as rent for the use of said machine and the use of any of the inventions of said patents, a sum of lawful money equal to one-half (1-2) of one cent for each and every pair of boots and shoes lasted on or by the use of said machine or by the use of any of the inventions of said patents, or in the making of which said machine performed a part, during the month then next preceding, but seventy-two (72) pairs of Misses' and Children's shall be considered equivalent to sixty (60) pairs of other kinds.

Second. — If, for any cause, this machine shall not be in use during twelve (12) consecutive months to the extent of its earning for the said Licensor at the above mentioned rates an amount equal to or in excess of Seventy-five Dollars ($75.00), then said Licensor may by paying to the Licensee a sum of money equal to ~~one-third~~ (one half) (~~1-3~~ ½) of the amount paid by him for this License, cancel and terminate this License and Lease Agreement as hereinbefore specified, this option and condition to be independent of any other options and conditions contained in this License and Lease Agreement.

Third. — The Licensee hereby agrees that he will not in any way violate or infringe or contest the validity of any of the patents he is hereby licensed to use or the sufficiency of their specifications or the validity of the title of the Licensor to said patents or any of them.

Fourth. — This License and Lease Agreement is not assignable and shall not be assigned by the Licensee by his own act or by the operation of law.

Fifth. — The power conveyed by this License and Lease Agreement is only the right to use said machine herein enumerated and embodying any of the inventions of said patents, and not the right

to make, use or sell any other machine embodying any of the inventions of the patents aforesaid; the transfer or removal of the machine hereby licensed and leased can only be made with the consent of the Licensor; and if the Licensee is or becomes at any time insolvent or bankrupt, or a sale, transfer or removal of said machine shall be made or attempted by the Licensee or by the operation of law or by any legal officer, representative, or assigns as the property of the Licensee without the consent in writing of the Licensor, this License and Lease Agreement shall at the option of said Licensor terminate and expire, and said Licensor may take possession of said machine without the Licensee or his representative having any claim for repayment of any of the sum or sums which he may have paid as consideration for the delivery of this License or for rent or royalty under this instrument.

Sixth. — The Licensee agrees that he will allow the Licensor or its Agents at any time hereafter to attach an indicator or other mechanism to any machine embracing any of the inventions of the patents hereby licensed which now is or may hereafter come into the possession of the Licensee for the purpose of recording the number of revolutions of the driving-shaft of said machine, or of otherwise indicating the quantity of boots and shoes operated by said machine or the quantity of work done by said machine, and to examine, modify, repair or replace said indicator, and the Licensee will not disturb or interfere with, or permit anyone else to disturb or interfere with, any indicator which now is or may hereafter be placed upon a machine as aforesaid.

And the Licensee shall not add to or subtract from the machine any mechanism whatever now or hereafter organized or connected therewith by the Licensor, nor make nor allow to be made any change or alteration in the same without the consent thereto in writing of the Licensor, nor interfere with the proper operation of the machine or any mechanism forming a part thereof or attached thereto, or that may be hereafter attached thereto, and shall at all times at his own expense keep and maintain the machine in as good and efficient working order as the same now is or may hereafter be

put by the Licensor, and to obtain from the Licensor or its Agents all duplicate parts for said machine whenever any are needed.

The Licensor and its Agents may at all reasonable times have convenient access to the machine to examine and inspect the same, and the use thereof, and to repair and improve or add to the same so far as it may see fit; and all the covenants, stipulations, conditions and terms of this License and Lease Agreement shall apply to all improvements which the Licensor shall hereafter add to the machine, and to all patents therefor, with the same effect as if such additional patents were enumerated in the previous list herein set forth.

The Licensee hereby further agrees to pay all taxes assessed on said machine and accessories.

Seventh. — In case the Licensee refuses or neglects to perform, or violates any of the conditions of this License and Lease Agreement, the Licensor shall have the right to terminate this License and Lease Agreement, by giving written notice as aforesaid that it has elected so to do, and, upon the giving of such notice, this License and Lease Agreement shall terminate, and it shall be the duty of the Licensee forthwith to deliver the possession of said machine to the Licensor, in good condition, reasonable wear and tear excepted, and without prejudice to any other legal rights or remedies for violation of this contract, use of machine, or use of any of the inventions of said patents without license. The Licensor or its Agents may thereupon enter the premises wherein said machine may be, and take and remove the same, and the Licensee shall have no claim whatever on account of any sum or sums he may have paid for this License, or under this License and Lease Agreement.

Eighth. — This License and Lease Agreement shall continue (provided the Licensee keeps and performs the conditions thereof) until the expiration of all Letters Patent, or any extensions or renewals thereof, now or hereafter owned by the Licensor, or any inventions which are or shall be hereafter embodied in, or used in connection with, said machine; and, upon the expiration of all said Letters Patent, the Licensee shall, ~~upon demand, deliver to the~~

~~Licensor the machine hereby leased or rented, in good order and repair; and the Licensee shall have no claim whatsoever on account of any sum or sums that may have been paid for this License, or under this License and Lease Agreement.~~

have the right to purchase said machines for the sum of one dollar.

All the rights and interests which, under this instrument and by reason of the ownership of said machine and patents and patent rights, belong to the Licensor, shall be deemed to belong to, and may be enforced in its name or otherwise by the Licensor, its successors and assigns and its or their representatives or assigns; all the stipulations and agreements binding on the Licensee shall be binding upon their representatives, successors or assigns.

Ninth. — It is agreed that this instrument may be used for Licensees of the female sex, or for corporations, and in that case the masculine pronoun denoting the Licensee shall, whenever it occurs, be instead of, and indicate the feminine or neuter; and also that this instrument may be used in cases where the party of the second part shall consist of more than one person, and in that case the termination of the words relating to said party shall be considered as plural or singular, as the case may require; and when said party of the second part so consists of several persons, and they sign this License and Lease Agreement, either individually or by their firm signature, such signature or signatures shall bind them, both jointly and severally, to the terms and agreements herein contained, and also that the number of the machine named in this License and Lease Agreement may be entered by the Licensor, after signing, and that as this instrument is designed and intended for use between the parties hereto, in case the Licensee shall require more than one machine, and it is entered in this License and Lease Agreement, it is agreed that the termination of the words relating to the machine shall be construed and considered as written in the singular or plural, as the number of machines entered in this License and Lease Agreement may require.

In witness whereof, the parties aforesaid have hereunto set their hands and seals, the said parties of the second part binding them-

selves, their legal representatives, and assigns, to all the foregoing agreements, both jointly and severally.

Fifty-five words erased and eighteeen words inserted before execution.

Lease and License, No. *1731*

This Lease and Agreement, made this *17th* day of *December* A. D. *1897*, by and between James W. Brooks, Principal Trustee, and John Brooks, Associate Trustee, for the McKay-Bigelow Heeling Machine Association, Lessors, and *Commonwealth Shoe and Leather Company, Whitman, Massachusetts*, Lessee, witnesseth:

Whereas, The Lessors are engaged in the manufacture of shoe machinery, and devices to be used in connection therewith, and particularly machinery and devices useful in the manufacture of the heel portions of boots and shoes; and

Whereas, The Lessors, at great expense, have endeavored, and are constantly endeavoring to improve and render more useful, the machinery and devices manufactured by them, and are the owners of the following Letters Patent of the United States for improvements and inventions relating to machinery and devices for the manufacture of shoes, viz.: E. B. Allen, 310,488, Jan. 6, 1885; 314,411, March 24, 1885; 319,377, June 2, 1885; 332,032, Dec. 8, 1885; 332,984, Dec. 22, 1885; 348,091, Aug. 24, 1886; 348,-092, Aug. 24, 1886; 374,387, Dec. 6, 1887; 374,885, Dec. 13, 1887; 375,913, Jan. 3, 1888; 377,284, 377,285, Jan. 31, 1888; 378,859, March 6, 1888; 384,343, June 12, 1888; 384,734, June 19, 1888. C. H. Benjamin, 388,523, Aug. 28, 1888. H. Bond, 297,787, Feb. 5, 1884. E. Bourgeois, 277,207, May 8, 1883. C. H. Brown and A. B. McCoy, 477,098, June 14, 1892. C. W.

Raymond & Wheeler, 280,861, July 10, 1883. G. T. Demary, 320,050, June 16, 1885; 321,696, July 7, 1885; 342,501, May 25, 1886; 343,703, June 15, 1886; 474,335, May 3, 1892. Towns & Raymond, 346,137, July 27, 1886. J. B. Gardner, 354,125, Dec. 4, 1886; 360,580, April 5, 1887. J. W. Soule, 368,248, April 16, 1887. C. C. Small, 375,209, Dec. 20, 1887; 376,049, Jan. 3, 1888; 413,973, Oct. 29, 1889; 461,853, Oct. 27, 1891; 467,242, Jan. 19, 1892. E. E. Orr, 375,458, Dec. 27, 1887. J. R. Prouty, 383,-

907, 383,908, 383,909, June 5, 1888; 515,175, Nov. 12, 1889. James W. Carver, 401,131, April 9, 1889. Benjamin & Simmons, 503,895, Aug. 22, 1893. S. A. Krewson, 514,852, Feb. 13, 1894; and also are the owners of other inventions relating to machinery and devices for the manufacture of boots and shoes, and intend to secure Letters Patent therefor, some of which inventions, patented or to be patented, are embodied in the machines, or some of them, leased to the Lessee hereunder;

And Whereas, The Lessee desires the right to use, under the terms of this lease and license, the hereinafter described machinery or devices belonging to the Lessors, and also other improvements relating to the machinery hereby leased, which may hereafter be acquired by the Lessors, and attached by or with the permission of the Lessors to the machinery hereby leased or delivered to the Lessee, to be used in connection therewith, and also any other machines, machinery or devices made by or for the Lessors, which may hereafter come into the possession of the Lessee;

Now, therefore, The Lessors, in consideration of one dollar paid by the Lessee, the receipt whereof is hereby acknowledged, and of the covenants and agreements of the Lessee hereinafter contained, do hereby lease unto the Lessee (provided the Lessee keeps and observes the covenants and conditions of this agreement) the machinery or devices described by name and number or numbers, following, and all other machines and machinery made by or for the lessors which may hereafter come into the possession of the lessees with the written consent of the lessors and which are not the subject of another lease between the parties hereto: —

McKay Pricking Machine
McKay Heel Compressing and Loading Machine
Fisher Compressing Machine *No. 79, No. 80.*
Bresnahan Compressing Machine
Heel Trimming and Randing Machine,
Heel Trimming and Randing (including Grinding) Machine,
No. 2 Automatic Heel Nailing and Trimming Machine,
1 Knox Moulder with American Attachment.
Rapid Nailing Machine

Union Heel Trimmer,
Spring Heel Trimmer,

Improved National Nailing Machine
Columbia Nailing Machine,
Automatic Spring-heel Nailing Machine,
Standard Automatic Nailing Machine,
Standard Automatic Nailing Machine, without Pricking Attachment,
Standard Automatic Loading or Compressing and Loading Women's Work Machine,

And the Lessors do hereby license the Lessee to use such machines and devices, and any patented parts, mechanisms or devices connected therewith or relating thereto, whether on said machinery when the same is received, or which may be added thereto by the Lessors, and including such machines, devices and machinery as may hereafter come into the possession of the Lessee with the written consent of the Lessors, under the aforementioned patents or any patents, reissues of patents or renewals, which may hereafter be owned or acquired by the Lessors; the term of said license to be the full term of this lease; but this lease is made and this license is granted, on the express condition that the Lessee shall faithfully keep and observe each and all of the conditions and agreements herein contained, on his part to be kept and observed; and that upon a breach of the same or either of them by the Lessee, the Lessors may, at their option, cancel and terminate this lease and license, and upon written notice thereof by the Lessors to the Lessee, or to any one in the possession or apparent control of the said machines, devices or machinery, this lease and license shall terminate, and the possession of, and the full right to and control of the said

machines, devices and machinery shall thereupon revest in the Lessors.

The word "machinery" as hereinafter used shall be construed as designating any and all machines, devices, tools and machinery held by the Lessee under this lease and license whether now or hereafter delivered to or in the possession of the Lessee, and the covenants and conditions of this lease shall apply to all such machines, devices, tools and machinery.

And the following are agreed to as terms and conditions of the lease and license of the machines, devices, tools and machinery which the Lessee is hereby licensed to use; all of which together with those hereinbefore expressed, the Lessee agrees to keep and perform.

First. The Lessee is by this lease and license authorized to use the "machinery", hereby leased only by himself or operatives in his direct employ and only at his factory, situate at *Whitman, Massachusetts.*

He shall not add to the "machinery", nor subtract therefrom any part, mechanism or device whatsoever now or hereafter forming a part thereof or connected therewith by the Lessors; nor make, nor allow to be made any change or alteration in the said "machinery", without the consent in writing of the Lessors, nor interfere with the proper operation of the same or any mechanism forming a part thereof or attached thereto; nor remove nor deface any dates, numbers, or inscriptions, now or hereafter impressed thereon or affixed thereto by the Lessors; and shall at all times and at his own expense keep the "machinery" in good and efficient working order and condition.

And the Lessee further agrees that he will purchase from the Lessors exclusively at the regular prices from time to time established by the Lessors, all the spare parts, forms, plates, knives, moulds, extras, devices and mechanism of every sort and kind needed or used by him in repairing, renewing, changing the styles, form or nailing, or in operating the "machinery" hereby leased.

Second. The Lessors and their agents may at all reasonable times have convenient access to the "machinery" covered by this lease

to examine and inspect the same and the use thereof, and to repair and improve or add to the same so far as they may see fit; but they shall not be bound to make any repairs or improvements and the covenants, stipulations, conditions and terms of this lease shall apply to all improvements which the Lessors shall hereafter add to the same and to any patents which have been or may be issued thereon with the same effect as if the patents were included in this lease and license with the Letters Patent already referred to.

Third. The Lessee agrees to pay unto the Lessors on the fifteenth day of each month, as rent or royalty for the machinery hereby leased, the sum of one half cent for each and every pair of boot or shoe heels manufactured wholly or in part by the aid or use of any of the machines or machinery hereby leased, said rent or royalty to be paid each month for all boot or shoe heels made during the preceding calendar month, and it is hereby agreed between the parties hereto that said rental or royalty at one half cent per pair is a just, fair and correct value to the Lessee of the use of said machinery, and that the abated royalty hereinafter named is not the true value of the lease and license hereby granted, but is a concession and abatement of such value for and in consideration of the conditions thereto attached; and all agreements herein shall extend to all boot or shoe heels made by or for the Lessee; provided, however, that in all cases where the Lessee shall pay the Lessors on or before the fifteenth day of each month, as an abated royalty, the sum of one quarter of a cent per pair for each and every pair of heels made during the preceding calendar month, said payment so made shall be full payment and satisfaction of said rent or royalty. And it is agreed that in default of the payment of said abated royalty, when due, as aforesaid, the Lessee's right to an abatement of the full royalty of one half cent per pair shall thereby be forfeited, and full royalty shall be due for the same, not as a penalty, but as a liquidated, fixed and settled rental and license fee for the use of said machines or machinery.

And, as the machines leased hereby are supplied to the Lessee without cash payment covering the cost of manufacture, the Lessee hereby guarantees that, during the continuation of this lease, the

abated rent and royalty due and actually paid over to the Lessors under the terms hereof shall not in and for any period of three months be less than *375.00* three hundred and seventy-five dollars dollars. But it is agreed that if, at any time during the continuance of this lease, the Lessee shall pay to the Lessors a sum equal to the amount of insurance hereinafter named, the Lessee shall, provided he has not violated any of the terms of this lease, be freed from his guarantee to pay more than the rent and royalty hereinbefore stipulated for each pair of boot or shoe heels manufactured as aforesaid, all the other terms and conditions of this lease remaining in force as before. And the Lessee cannot avail himself of the provision set forth in this paragraph for anything less than all the machines hereby leased; and he shall not be allowed any diminution of the sum to be paid because of the wear and tear or destruction of any of the machinery hereby leased.

Fourth. It is understood that the Lessors may at any time attach to said "machinery" or any part thereof an indicator, for the purpose of registering the number of boots or shoes in the manufacture of which said "machinery" is utilized, or the number of revolutions or movements of the same or any thereof; and the Lessee agrees that in case an indicator shall be attached to said "machinery" or any part thereof by the Lessors, it shall not be disturbed or interfered with by any person, and that prompt notice will be given to said Lessors in case the same shall be disturbed or inaccurate or out of repair. And the Lessee agrees to keep a full and accurate account independently of any indicators that may be placed upon the "machinery" of all boots and shoes in the manufacture of which said "machinery" is used; and the Lessee further agrees to require each of its operators upon the "machinery" hereby leased to keep upon blanks or blank books to be furnished by the Lessors, accurate daily records of the number of pairs of boots or shoes in the making of which said "machinery" shall have been used, and to require his operator to furnish any further information called for by said blanks or blank books and to sign such daily records and to deliver them to the Lessee; and the Lessee agrees

to send to the office of the Lessors on or before the fifteenth day of each month, the original records for the preceding calendar month kept by his operators as above provided for. And the Lessee agrees to allow the Lessors or their agents to have access at all times to said records kept by his operators and to all accounts kept by him, of the shoes prepared or manufactured by him.

Fifth. The Lessee hereby agrees as an essential part of the consideration for this lease and license, that he will not in any way violate or infringe or contest the validity of any of the patents hereinbefore referred to as belonging to the Lessors or which may now or hereafter be owned by the Lessors, or any reissue or extension of the same, or the title of the Lessors to said patents or any of them.

Sixth. The "machinery" held under this lease cannot be transferred, and this lease and license is not assignable by the Lessee by his own act or by operation of law. The Lessee agrees at his own expense to pay all taxes levied on said "machinery" or on account of this lease and to insure against loss by fire and to keep so insured the "machinery" held by him at any time under this lease in a sum total equal to *Four thousand* dollars, and in case of loss or damage, the Lessee agrees to pay the full amount of the insurance to the Lessors.

Seventh. The power conveyed by this lease and license is only the right to use the said "machinery" and not the right to make or sell any "machinery" embodying the inventions of any of the patents aforesaid or any patent hereafter owned by the Lessors. And a removal of the "machinery" or any portion thereof from the factory of the Lessee can only be made with the written consent of the Lessors, and on conditions satisfactory to the Lessors; and if the Lessee is or becomes at any time insolvent or bankrupt, or if a sale, transfer, removal or lease of said "machinery" or any portion thereof shall be made or attempted without the written consent of the Lessors, then this lease and license and all rights of the Lessee thereunder shall forthwith, at the option of the Lessors, cease and determine, and the possession of said "machinery" shall

revest in the Lessors, and they may take possession of the same without the Lessee having any claim against the Lessors.

Eighth. This lease and license shall, unless cancelled by agreement of the parties hereto, continue, provided the Lessee faithfully keeps and performs the terms and conditions hereof, for seventeen years from the date hereof, and for such further time as may be covered by the term of any Letters Patent now or hereafter owned by the Lessors, and any inventions of which are contained in any of the "machinery" hereby leased or which shall be added to or embodied in said "machinery" or used in connection therewith. But inasmuch as the "machinery" has been delivered by the Lessors to the Lessee without any charge or payment representing its cost (excepting such payments as have been made on account of moulds, dies, forms, clamps, lasts, and other parts or devices used in connection with said "machinery"), it is understood and agreed that the Lessors may at any time, in case the Lessee refuses or neglects to perform or violates any of the conditions of this lease and license, or provides himself with any other machine to do any part of the work which any of said Lessors' machines are capable of doing, terminate this lease upon giving written notice to the Lessee of their election so to do. And immediately upon such notice, this lease and license and all the rights of the Lessee thereunder shall be terminated and the title to and right of possession of said "machinery" and all said moulds, dies, forms, clamps, lasts and other parts or devices used in connection with said "machinery" shall at once vest in the Lessors free and discharged of this lease and license. And the Lessee agrees forthwith to deliver the "machinery" hereby leased and licensed, together with all moulds, dies, forms, clamps, lasts, and other parts or devices used in connection therewith to the lessors, and to pay to the Lessors the sum of fifty dollars for each individual machine then leased to the Lessee, and to pay in addition the expense of transporting the "machinery" to such place of business of the Lessors as the Lessors shall direct, and without prejudice to any other legal rights or remedies for violation of contract, use of "machinery" without right, or use of patents without license, which the Lessors may have; and the

Lessors or their agents may forthwith enter the premises where said "machinery" or any part of it may be, and may take and remove the same, including all said moulds, dies, forms, clamps, lasts and other parts or devices used in connection therewith, and the Lessee shall have no claim whatever against the Lessors under this lease or otherwise.

In case this lease shall run for its full term, then immediately upon its expiration the Lessee shall deliver to the Lessors the "machinery" hereby leased, together with all moulds, dies, forms, clamps, lasts and other parts or devices used in connection with said "machinery", and the Lessee shall have no claim whatever to said "machinery" or to a continuation of his possession or use thereof.

Ninth. In case any other machines, devices, or machinery than those now hereby leased and licensed, embracing or to be used in connection with the inventions of any of the Letters Patent under which a license is hereby granted, or any other patents under which the Lessee may hereafter become licensed by the terms of this agreement, shall hereafter come into the possession of the Lessee without a written lease or license from the Lessors, then, in case the Lessors shall so elect, all the covenants and agreements herein contained, including the obligation to pay a monthly rental or royalty, shall apply to the same and shall govern the parties respectively to the same extent as if the same had been expressly included in this lease and license. The Lessors may write the numbers of any such "machinery" as shall hereafter come into the possession of the Lessors into this lease after the same is executed.

Tenth. All the rights and interests which under this agreement and by reason of the ownership of said "machinery" and patents and patent rights belong to the Lessors shall be deemed to belong to and may be enforced in their name or otherwise by the Lessors' successors and assigns and their representatives and assigns. All of the stipulations and agreements binding on the Lessee shall be binding on his or their representatives and assigns.

Eleventh. It is agreed that this instrument may be used for Lessees of the female sex or for corporations, and that in that case

the masculine pronoun denoting the Lessee shall, whenever it occurs, be instead of and indicate the feminine, or neuter, as the case may be; and also that this instrument may be used in cases where the Lessee shall consist of more than one person, and in that case the termination of the words relating to the Lessees shall be considered as plural or singular, as the sense may require; and that when the Lessees so consist of several persons and they sign this lease either individually or by the firm signature, such signature or signatures shall bind them both jointly and severally to the terms and agreements herein contained.

In Witness Whereof, the parties aforesaid have hereunto set their hands and seals and to another instrument of even date and like tenor, the principal Trustee being authorized to sign for himself and his associate trustee, and to do all acts hereunder, and said Lessee or Lessees under this agreement binding itself, himself, or themselves to all the foregoing agreements, both jointly and severally.

Lease and License, No. *186*

This Lease and Agreement made this *10th* day of *Mar.* A. D. 18*99* by and between the Davey Pegging Machine Company, a corporation existing under the laws of Maine, Lessor, and *Selz, Schwab & Co., Joliet, Ill.* Lessee: Witnesseth:

Whereas, the Lessor is the owner of the following-described Letters Patent of the United States, viz.: —

No. 414501, November 5, 1889, to John F. Davey,

No. 504311, August 29, 1893, to John F. Davey,

No. 555434, February 25, 1896, to John F. Davey,

No. 559532, May 5, 1896, to William W. Kelly,

No. 581066, April 20, 1897, to J. F. Davey and S. W. Ladd,

and others, for improvements in pegging machines and of the inventions shown and described therein, and also is the owner of several other inventions relating to pegging machines, or to be used in connection therewith, and is constantly endeavoring to make improvements on such machines, and devices to be used therewith, and intends to secure Letters Patent therefor;

And Whereas, the Lessee desires the right to use under the terms of this lease and license the hereinafter-described pegging machine or machines belonging to the Lessor, and embodying or to be used in connection with the inventions of the above-mentioned Letters Patent, and also any other patented improvements relating to the machine or machines hereby leased, and which may hereafter be acquired by the Lessor and attached to the machine or machines hereby leased or delivered to the Lessee to be used in connection therewith, and also any other machines, machinery or devices made by or for the Lessor, which may hereafter come into the possession of the Lessee.

Now, Therefore, the Lessor, in consideration of one dollar paid by the Lessee, the receipt whereof is hereby acknowledged, and of the covenants and agreements of the Lessee hereinafter contained, does hereby lease unto the Lessee (provided the Lessee keeps and

observes the covenants and conditions of this agreement) the pegging machine or machines, described by number or numbers, as follows, namely: —

1 Davey Pegging Machine No. 217,
1 " " " " *384,*
1 " " " " *400,*

of which numbers those numbered *217—384—400* are delivered to the Lessee upon the execution of this lease, and also the Lessor does hereby lease all other machines, devices and machinery, made by or for the Lessor, which may hereafter come into the possession of the Lessee from or with the consent of the Lessor; and the Lessor doth hereby license said Lessee and parties in his employ to use only in the manufacture of boots or shoes, said pegging machines, devices and machinery, and any parts, mechanism, or devices connected therewith or relating thereto, whether on said machines and machinery when the same are received, or which may be added thereto by the Lessor for and during the term of this lease, and upon the terms and conditions herein contained, and provided, however, and this lease is made and this license is granted on the express condition that the Lessee shall faithfully keep and observe each and all of the conditions and agreements herein contained on his part to be kept and observed; and that upon a breach of the same, or either of them, by the Lessee, the Lessor may, at his option, cancel and terminate this lease and license, and upon written notice thereof by the Lessor to the Lessee, or to any one in the possession or apparent control of the said machines, devices or machinery, this lease and license shall terminate, and the possession of and the full right to and control of the said machines, devices and machinery shall thereupon revest in the Lessor.

The word "Machine," as hereinafter used, shall be construed as designating any and all machines, devices and machinery held by the Lessee under this lease and license, whether now or hereafter delivered to the Lessee, and the covenants and conditions of this lease shall apply to all such devices, machines and machinery.

And the following are also agreed to as terms and conditions of the lease and license of the machines, devices and machinery which

the Lessee is hereby licensed to use; all of which, together with those hereinbefore expressed, the Lessee agrees to keep and perform: —

First. The Lessee is by this lease and license authorized to use the machine hereby leased only by himself or operatives in his direct employ, and only in his factory situate at *Joliet, Ill.*

He shall not add to the machine nor subtract therefrom any mechanism whatever, now or hereafter forming a part thereof or connected therewith by the Lessor; nor make nor allow to be made any change or alteration in the said machine without the consent, in writing, of the Lessor, nor interfere with the proper operation of the same, or any mechanism forming a part thereof or attached thereto; nor remove nor deface any dates, numbers, or inscriptions now or hereafter impressed thereon or affixed thereto by the Lessor; and shall, at all times and at his own expense, keep the machine in as good and efficient working order as the same now is or may hereafter be put by the Lessor, and shall purchase of the Lessor all spare parts used in repairing the machine.

Second. The Lessor and his agents may, at all reasonable times, have convenient access to the machine covered by this lease to examine and inspect the same and the use thereof, and to repair and improve or add to the same, so far as they may see fit; but he shall not be bound to make any repairs or improvements, and the covenants, stipulations, conditions, and terms of this lease shall apply to all improvements which the Lessor shall hereafter add to the same, and to any patents which have or may be issued thereon, with the same effect as if the patents were included in this lease and license with the Letters Patent already referred to.

Third. The Lessee agrees to pay unto the Lessor, on the fifteenth day of each month, as rent or royalty for the machine hereby leased the sum of two cents for each and every pair of boots or shoes, of any kind, pegged by the aid or use of said machine, or in the pegging or manufacture of which said machine is utilized, said rent or royalty above referred to to be paid on the fifteenth day of each month, for all boots or shoes in the making or manufacture of which said machine shall have been used during the preceding cal-

endar month; and it is hereby agreed between the parties hereto that said rental or royalty, of two cents per pair of boots or shoes, is a just, fair, and correct value to the Lessee of the use of the machine hereby leased to the Lessee, and that the abated royalty of one cent per pair, hereinafter named, is not the true value of the license hereby granted, but is a concession and abatement of such value for and in consideration of the conditions thereto attached; and this agreement and responsibility, and all others in this lease contained, shall extend to and in respect of all boots or shoes pegged by the aid of said machine, or in the making or manufacture of which said machine shall have been used, whether made by the Lessee or by other persons for him; provided, however, that in all cases where the Lessee shall pay the Lessor, on or before the fifteenth day of each month, one cent per pair for each and every pair of boots or shoes, of any kind, pegged in whole or in part, by the aid or use of said machine, or in the manufacture of which said machine shall have been utilized, said payment so duly made, shall be full payment and satisfaction of the rent or royalty for the use of the patents for such boots and shoes in respect to which said payments shall have been so duly made. And it is agreed that, in the default of the payment of said royalty when due, that is, on or before the fifteenth day of each month, the Lessee's right to an abatement of the full royalty of two cents per pair, as herein provided, shall thereby be forfeited; and it is agreed that, for each and every pair of boots or shoes pegged by the aid of said machine, or in the manufacture of which said machine shall have been used, and in respect to which there shall not have been paid the abated rent or royalty, in accordance with the terms hereinbefore set forth, the Lessee shall pay to the Lessor the sum of two cents, as liquidated, fixed, and settled damages. The Lessee hereby guarantees that the abated royalty, due and paid over to the Lessor under the terms herein, shall not be less than ten dollars for each machine, for each calendar month, and in case said abated royalty, in any month, shall be less than ten dollars for each machine, then the Lessee agrees to pay to the Lessor, at the time for the payment of the abated royalty, whatever addi-

tional sum may be necessary to bring the abated royalty for that month up to ten dollars for each machine.

Fourth. It is understood that the Lessor may, at any time, attach to said machine an indicator, for the purpose of registering the number of boots or shoes pegged upon said machine, or the number of revolutions or movements of said machine; and the Lessee agrees that in case an indicator shall be attached to said machine by the Lessor, it shall not be disturbed or interfered with by any person, and that prompt notice will be given to said Lessor in case the same shall be disturbed, or inaccurate, or out of repair. And the Lessee agrees to keep a full and accurate account, independently of any indicator that may be placed upon the machine, of all boots and shoes which shall be pegged upon said machine, or in the manufacture of which said machine shall have been used; and the Lessee further agrees to require each of its operators upon the machine hereby leased to keep upon blanks to be furnished by the Lessor, accurate accounts of the number of pairs of boots or shoes pegged by him each day upon said machine, or in the making of which said machine shall have been used, and tc require his operator to sign such daily records, and deliver them daily to the Lessee, and such account shall be verified by the oath of the operator, if the Lessor shall so require, and the Lessee also agrees to send to the office of the Lessor, on or before the tenth day of each month, a written report for the preceding calendar month of the number of pairs of boots or shoes pegged upon or with the aid of said machine, or in the pegging of which said machine shall have been used, together with the records kept by his operators as above provided for. And the Lessee agrees to allow the Lessor or his agents to have access, at all times, to said records kept by his operators, and to the accounts kept by him of the shoes pegged or manufactured on the machines leased hereby.

Fifth. The Lessee hereby agrees that he will do all the pegging of boots and shoes manufactured by him upon the said machines of the Lessor which are leased hereby, and that in case he has too much work for the machines hereby leased, he will take from the Lessor, under this lease or a similar lease containing the same

terms and provisions, sufficient additional machines to perform the work, which machines shall be in all respects subject to this lease and license as if at the date hereof delivered to the Lessor and named herein.

Sixth. The Lessee hereby agrees that he will not in any way violate or infringe or contest the validity of any of the patents hereinbefore referred to, or now or hereafter owned by the Lessor, or any reissue or extension of the same, or the title of the Lessor to said patents or any of them, and expressly admits the validity and sufficiency thereof, and that the claims are to be construed broadly.

Seventh. This machine cannot be transferred, and this lease and license is not assignable by the Lessee, by his own act or by operation of law. The Lessee agrees to insure and to keep insured each pegging machine held by him, at any time under this lease, in the sum of $200, and in case of loss or damage the Lessee agrees to pay the full amount of the insurance to the Lessor.

Eighth. The power conveyed by this lease and license is only the right to use the said machine, and not the right to make or sell any machine embodying the inventions of the patents aforesaid, or any patent hereafter owned by the Lessor. And a removal of the machine from the factory of the Lessee can only be made with the written consent of the Lessor, and on conditions satisfactory to the Lessor; and if the Lessee is or becomes at any time insolvent or bankrupt, or if a sale, transfer, or lease of said machine, devices or machinery shall be made or attempted without the written consent of the Lessor, then this lease and license, and all rights of the Lessee thereunder, shall forthwith, at the option of the Lessor, cease and determine, and the possession of said machine shall revest in the Lessor, and he may take possession of the same without the Lessee having any claim against the Lessor.

Ninth. In case the Lessee refuses or neglects to perform or violates any of the conditions of this lease and license, the Lessor shall have the right to terminate this lease and license by giving written notice that he has elected so to do; and immediately upon such notice this lease and license and all the rights of the Lessee

thereunder shall be terminated, and the possession of said machine shall thereupon revest in the Lessor, free and discharged of this lease and license. Upon the termination of this lease and license, by the non-performance or breach on the part of the Lessee of any condition or agreement to be kept or performed by the Lessee under the terms hereof, it shall be the duty of the Lessee forthwith to deliver the machine hereby leased and licensed to the Lessor, and to pay to the Lessor the sum of two hundred dollars for each machine hereby leased, and to pay in addition the expense of transporting the machine to such place of business of the Lessor as the Lessor shall direct, and without prejudice to any other legal rights or remedies for violation of contract, use of machine without right or use of patents without license; and the Lessor or his agents may forthwith enter the premises where said machine may be and may take and remove the same, and the Lessee shall have no claim whatever against the Lessor.

Tenth. This lease and license shall continue, provided the Lessee faithfully keeps and performs the terms and conditions thereof, until the expiration of the Letters Patent above referred to, and until the expiration of any extensions or renewals thereof, and the expiration of any Letters Patent now or hereafter owned by the Lessor, any inventions of which shall be added to or embodied in said machines, or used in connection therewith.

But, inasmuch as the machine has been delivered by the Lessor to the Lessee without any charge or payment representing its cost, it is understood and agreed that the Lessor may, at any time, terminate this lease upon giving thirty days' notice to the Lessee of his election so to do, and thereupon all the rights of the Lessee under this lease and license shall terminate, and the Lessor or his agents may forthwith enter the premises where said machine may be, and may take and remove the same, and the Lessee shall have no claim whatever against the Lessor; and it shall be the duty of the Lessee forthwith to deliver the machine hereby leased to the Lessor, but, in case this lease is terminated by the Lessor in pursuance of the provisions of this paragraph, the Lessee shall not be bound to pay any of the expense of transporting said machine from

the factory of the Lessee to the Lessor. The Lessee shall, however, pay to the Lessor whatever sums may be necessary to put the said machine in good repair, and such sums as may be due for royalties unpaid.

In case this lease shall run for its full term, then immediately upon its expiration the Lessee shall deliver to the Lessor the machine hereby leased, and the Lessee shall have no claim whatever to said machine or to a continuation of his possession or use thereof.

Eleventh. In case any other machines, devices or machinery than those now hereby leased and licensed, embracing or to be used in connection with the inventions of any of the Letters Patent under which a license is hereby granted, or any other patents under which the Lessee may hereafter become licensed by the terms of this agreement shall hereafter come into the possession of the Lessee without a written lease or license from the Lessor, then, in case the Lessor shall so elect, all the covenants and agreements herein contained, including the obligation to pay a monthly rental or royalty, shall apply to the same and shall govern the parties respectively to the same extent as if the same had been expressly included in this lease and license. The Lessor may write the numbers of any such machines as shall hereafter come into the possession of the Lessee into this lease, after same is executed.

Twelfth. All the rights and interests which, under this agreement and by reason of the ownership of said machines and patents and patent rights, belong to the Lessor, shall be deemed to belong to, and may be enforced, in his name or otherwise, by the Lessor's successors and assigns, and its or their representatives and assigns. All of the stipulations and agreements binding on the Lessee shall be binding on his or their representatives and assigns.

Thirteenth. It is agreed that this instrument may be used for Lessees of the female sex, or for corporations, and that in that case the masculine pronoun denoting the Lessee shall, whenever it occurs, be instead of and indicate the feminine, or neuter, as the case may be; and also that this instrument may be used in cases where the Lessee shall consist of more than one person, and in that case the pronouns and the termination of the words relating to the

Lessees shall be considered as plural or singular as the sense may require; and that when the Lessee so consists of several persons, and they sign this lease either individually or by the firm signature, such signature or signatures shall bind them both jointly and severally to the terms and agreements herein contained.

In Witness Whereof, the parties aforesaid have hereunto set their hands and seals and to another instrument of even date and like tenor, said Lessee or Lessees, under this agreement, binding itself, himself, or themselves to all the foregoing agreements, both jointly and severally.

1000-3-9-1898-C

License and Rental Lease No. *58G*

This License and Rental Lease Agreement, made in duplicate the *28* day of *Jany.* A. D. 18*99*, by and between the

Consolidated & McKay Lasting Machine Company,

a corporation incorporated under the laws of the State of Maine, Licensor and party of the first part, and *R. H. Long Shoe Mfg. Co.* of *Springfield, Mass.* Licensee and party of the second part, Witnesseth:

Whereas, the Licensor is now the owner of the following Letters Patent of the United States relating to Lasting Machines or auxiliary machines for lasting, to wit: No. 274,207, dated March 20, 1883, No. 281,306, dated July 17, 1883, No. 284,906, dated Sept. 11, 1883, No. 292,575, dated Jan. 29, 1884, No. 312,335, dated Feb. 17, 1885, No. 415,726, dated Nov. 26, 1889, No. 421,954, dated Feb. 25, 1890, No. 423,920, dated March 25, 1890, No. 423,921, dated March 25, 1890, No. 423,922, dated March 25, 1890, No. 423,937, dated March 25, 1890, No. 441,482, dated Nov. 25, 1890, No. 459,-899, dated Sept. 22, 1891, No. 482,349, dated Sept. 13, 1892, No.

500,141, dated June 27, 1893, No. 510,972, dated Dec. 19, 1893, No. 510,973, dated Dec. 19, 1893, No. 510,974, dated Dec. 19, 1893, No. 510,975, dated Dec. 19, 1893, No. 510,976, dated Dec. 19, 1893, No. 510,977, dated Dec. 19, 1893, No. 510,978, dated Dec. 19, 1893, No. 518,933, dated April 24, 1894, No. 523,939, dated July 31, 1894, No. 533,394, dated Jan. 29, 1895, No. 560,767, dated May 26, 1896, No. 562,119, dated June 16, 1896, No. 564,931, dated July 28, 1896, No. 567,566, dated Sept. 8, 1896, No. 584,741, dated June 15, 1897, No. 584,742, dated June 15, 1897, No. 584,743, dated June 15, 1897, No. 584,744, dated June 15, 1897, and other patents applied for and now pending, and is, moreover, the owner of or Licensee under other patents not herein enumerated;

And, whereas, the Licensee desires the right to use, under the terms of this License and Lease Agreement, the hereinafter described machine belonging to and owned by the Licensor, and also any improvements relating to the machine hereby licensed and leased for Rental, which may hereafter be acquired by the Licensor and attached to the machine hereby licensed and leased for Rental, or delivered to the Licensee to be used in connection therewith, and also any other machine, machinery, or device made by or for the Licensor, which may hereafter come into the possession of the Licensee.

Now, Therefore, the Licensor, in consideration of one dollar to it paid by the Licensee, the receipt whereof is hereby acknowledged, and of the agreements and conditions herein agreed upon, to be kept and performed by the Licensee, does hereby license and lease for Rental unto the Licensee the machine herein designated by its number, said machine embodying the inventions of some of the foregoing named patents: —

Lasting Machine No. *2295*.

And the Licensor does hereby license and lease the Licensee and operators in his employ to use said machine, but only upon the terms and conditions herein set forth; Provided, however, and this License and Lease is granted upon the express condition that the Licensee shall faithfully keep and perform all the conditions

and agreements herein contained on his part to be kept and performed; and upon breach of the same or either of them by the Licensee the Licensor may, at its option, cancel and terminate this License and Lease by giving written notice to the Licensee or to any one in possession or apparent control of the machine, that it has elected so to do, and upon the giving of such notice this License and Lease shall terminate, and upon the Licensor taking or demanding possession of this machine, as herein provided, or without concellation of this Agreement, then the possession of said machine shall thereupon revest in the Licensor. And inasmuch as the machine is only leased and rented by the Licensor, and the Licensee pays no purchase price whatsoever for the machine, therefore the said machine does and shall continue to belong exclusively to, and remain wholly the property of, and subject only to the control of the Licensor, and the Licensee acquires no right to buy or retain said machine except by written consent of the Licensor.

Upon the termination of this License and Lease for Rental by lapse of time, cancellation, breach of contract, non-use of machine, or otherwise, the Licensee shall forthwith deliver the machine, hereby licensed and leased, to the Licensor in good condition, reasonable wear and tear excepted, and also pay to the Licensor the sum of One Hundred and Fifty (150) Dollars, as compensation for setting up the machine at his factory, for instructing operators, and deterioration.

And the following terms and conditions of the License and Lease of the machine, together with those hereinbefore expressed, the Licensee hereby agrees to keep and perform:

First.—The Licensee is by this License and Lease for Rental authorized to use the machine herein described, only by himself or operators in his direct employ, and only in *Springfield Mass.* He shall not add to, nor subtract from, the machine any part or mechanism whatever, now or hereafter organized or connected therewith by the Licensor, nor make, nor allow to be made, any change or alteration in the same, without the consent thereto in writing of the Licensor, nor interfere with the proper operation of the machine, nor any mechanism forming a part thereof or attached

thereto, nor any device used in connection therewith, nor remove or deface any dates, numbers, or inscriptions, now or hereafter impressed thereon, or affixed thereto by the Licensor or by its direction, and the Licensee shall at times at his own expense keep and maintain the machine in as good and efficient working order as the same now is or may hereafter be put by the Licensor.

Second.— The Licensor and its agents shall at all reasonable times, have access to the machine to examine and inspect the same and the use thereof, and to repair and improve the same so far as it sees fit, and all covenants, stipulations, and conditions herein contained shall apply to all improvements which the Licensor shall hereafter add to the machine, and to any patents which have or may be issued thereon, with the same effect as if the patents were enumerated in this License and Lease with the Letters Patent previously herein enumerated.

Third.— The Licensee agrees to pay unto the Licensor, on the tenth day of each month, as Rental for the previous month for the machine hereby licensed and leased, and for the use of the inventions of the patents under which a License is hereby granted, a sum of lawful money equal to five-sixths (5-6) of one (1) cent for each and every pair of Misses' and Children's and one (1) cent for each and every pair of all other kinds of boots and shoes lasted by the aid of this machine, or by the use of the inventions of said patents, or any of them, or in the making of which any of the inventions of said patents shall be used; and should such Rental fall short of an average of Fifteen (15) Dollars per month, for any twelve (12) consecutive months (excepting months during the whole of which the factory is idle), then the Licensee agrees to pay, upon demand, such an amount as will make the average Fifteen (15) Dollars per mouth for such twelve (12) consecutive months.

Fourth.— The Licensee agrees that the operator on the machine hereby licensed and leased shall keep a daily account of the number of pairs of boots and shoes lasted by him, and the class to which they belong, which account shall be signed by the operator, and verified and signed by the Licensee, if so requested by the

Licensor, and delivered by the Licensee to the Licensor at Boston, Mass., not later than the fifth of each month, and Rental shall be paid by the Licensee on the basis of said account, and the Licensee agrees to give the Licensor, its successors or assigns, or its or their authorized agents, free access at all times to the premises where the machine hereby licensed and leased is located, for the purpose of verifying the operators' reports, and in case operators' reports shall not be made as provided above, it shall be the right of the Licensor to appoint a competent man to keep the accounts herein required; and all reasonable compensation for the services and expenses of such man, which shall not exceed $3 per day, shall be at the charge of the Licensee, and the Licensee hereby agrees to pay the same upon demand to the Licensor.

The Licensee agrees that he will allow the Licensor, its successors, or assigns, and its and their agents, at any time hereafter, to attach an indicator, or counter, to any machine embracing any of the patents under which a License is hereby granted, which now is or may hereafter come into possession of the Licensee, for the purpose of indicating the number of boots and shoes lasted, and to examine, modify, repair, or replace the said indicator, and that he, the Licensee, will not disturb or interfere with, nor permit any one else to disturb or interfere with, any indicator which now is or may hereafter be placed upon any machine as aforesaid.

Fifth.— The Licensee hereby agrees that he will not in any way violate, or infringe, or contest the validity of any of the patents, or any reissue, or extension of the same, under which he is hereby licensed, or the sufficiency of their specifications, or the validity of the title of the Licensor, to said patents or any of them, and hereby expressly admits the validity and sufficiency thereof as an important part of the consideration for this License and Lease for Rental.

Sixth.— This machine shall not be transferred, and this License and Lease for Rental is not assignable by the Licensee by his own act or by operation of law.

Seventh.— The power conveyed by this License and Lease is only the right to use the said specific machine, and not the right to make, sell, or alter any machine embodying the inventions of the

patents aforesaid, or any of them; and a transfer or removal of the machine hereby licensed and leased shall only be made with the written consent of the Licensor, and if the Licensee is or becomes at any time insolvent or bankrupt, or if a sale, loan, transfer, or removal of said machine shall be made or attempted by the Licensee, or by the operation of law, or by any legal officer, representative, or assignee, as the property of the Licensee, or otherwise, without the written consent of the Licensor, the Licensor may cancel and terminate this License and Lease Agreement, and then the possession of said machine shall thereupon revest in the Licensor, and it may take possession of said machine without the Licensee having any claim for the repayment of any part of the sum or sums which he may have paid as Rent or License under this instrument.

Eighth.— In case any machine hereby licensed shall remain unused for the period of four consecutive months, the Licensor may at any time thereafter, while it remains unused, cancel this License and Lease Agreement, so far as relates to said unused machine, by giving written notice, as herein provided, that it has elected so to do; and upon giving such notice this License and Lease Agreement shall be terminated to the extent aforesaid, and possession of said unused machine shall thereupon revest in said Licensor.

Ninth.— This License and Lease Agreement shall continue until cancelled by the Licensor for breach of condition or otherwise, but in case the Licensee refuses or neglects to perform, or violates any condition of this License and Lease Agreement, the Licensor shall have the right to terminate this License and Lease Agreement by giving written notice, as aforesaid, that it has elected so to do; and upon the giving of such notice for any cause whatsoever, as herein provided for, this License and Lease Agreement shall then terminate, and the possession of said machine shall thereupon revest in the Licensor, free and discharged of this License and Lease. Upon the termination of this License and Lease by lapse of time, cancellation, breach of condition, non-use of machine, or otherwise, it shall be the duty of the Licensee forthwith to deliver the machine hereby licensed and leased to the Licensor in good

condition, reasonable wear and tear excepted, and to pay to the Licensor the sum of One Hundred and Fifty (150) Dollars for each machine so delivered; and upon such termination, and without prejudice to any other legal rights or remedies for violation of contract, use of machine without right, or infringement of patents, the Licensor, or its agents, may thereupon enter the premises where said machine may be and may take and remove the same, and the Licensee shall have no claim whatsoever, against the Licensor under this License and Lease Agreement.

Tenth.— The Licensee also covenants and agrees to keep this machine and accessories insured, for the benefit of the Consolidated & McKay Lasting Machine Company, to the amount of Two Hundred (200) Dollars, and to pay all taxes assessed on said machine. In case this machine is destroyed by fire, the Licensee agrees to pay to the Licensor the sum of Two Hundred (200) Dollars, as partial compensation for such destruction of machine.

Eleventh.— In case any other machine than that hereby licensed and leased, embracing the invention of any of the patents under which the License is hereby granted, shall hereafter come into the possession of the Licensee, without a written License and Lease from the Licensor, then, in case the Licensor shall so elect, all the covenants herein contained shall apply to such machine, and shall govern the parties respectively to the same extent as if the said machine had been expressly included in this License and Lease Agreement. The Licensor shall give written notice of its election, as aforesaid, within thirty (30) days after it shall have received written notice from the Licensee of the possession of such machine, but it may give such notice without having received such notice from the Licensee.

Twelfth.— It is declared and understood that it is the intention of the Licensee to use said machine herein licensed and leased for lasting all the boots and shoes made by him applicable to the said machine, and not to have it in his possession as a means of reducing the price of hand lasting or of controlling hand lasters, or of influencing a trade with any other lasting machine not controlled by the Licensor, or the list price thereon, and the Licensor enters

into this contract because of and by reason of such understanding and agreement on the part of the Licensee. It is therefore agreed that the Licensee shall use such machine hereby licensed and leased for lasting all of his boots and shoes to its full capacity, limited only by the demands of his business; and should the demands of his business require he shall take the license and lease of such additional machines as may be needed to do all his work.

Thirteenth.— It is agreed that the Licensee shall buy of the Licensor, or its authorized agents, and only of it or them, the spare parts for repairing the machine hereby licensed and leased, and shall and does hereby accept delivery of machine at Beverly, Mass., f. o. b. cars.

Fourteenth.— All the rights and interests which, under this instrument and by reason of the ownership of said machines and patents and patent rights, belong to the Licensor, shall be deemed to belong to, and may be enforced, in its name or otherwise, by the Licensor, its successors and assigns, and its or their representatives and assigns. All of the stipulations and agreements binding on the Licensee shall be binding on his or their representatives, successors, and assigns.

Fifteenth.— It is agreed that this instrument may be used for Licensees of the female sex, or for corporations, and in that case the masculine pronoun denoting the Licensee shall, whenever it occurs, be instead of and indicate the feminine, or neuter, as the case may be; and also that when the party of the second part shall consist of more than one person, the termination of the words relating to the said party shall be considered as singular or plural, as the sense may require; and that when the party of the second part so consists of several persons, and they sign this License and Lease for Rental, either individually or by their firm signature, such signature or signatures shall bind them both jointly and severally to the terms and agreements herein contained, and also that the numbers of the machines named in or covered by this License and Lease may be entered herein by the Licensor after signing; and that as this instrument is designed and intended for continuous use between the parties hereto, in case the Licensee

shall have more than one machine, it is agreed that the termination of words relating to the machine shall be considered as written in the singular or plural, as the number of machines entered into this License and Lease Agreement may require.

In witness whereof, the parties aforesaid have hereunto set their hands and seals, the said parties of the second part binding themselves, their legal representatives, and assigns, to all the foregoing agreements, both jointly and severally.

(Ch e Department)

a corporation incorporated under the laws of the State of Maine, Licensor and party of the first part, and *Selz, Schwab & Company* of *Chicago, Ill.*, Licensee and party of the second part, Witnesseth:

Whereas, the Licensor is now the owner of the following Letters Patent of the United States relating to Lasting Machines or auxiliary machines for lasting, to wit: No. 319,784, dated June 9, 1885; No. 337,662, dated March 9, 1886; No. 337,924, dated March 16, 1886; No. 337,925, dated March 16, 1886; No. 338,930, dated March 30, 1886; No. 340,860, dated April 27, 1886; No. 356,619, dated January 25, 1887; No. 356,620, dated January 25, 1887; No. 363,283, dated May 17, 1887; No. 364,088, dated May 31, 1887; No. 376,368, dated January 10, 1888; No. 391,688,

dated October 23, 1888; No. 477,788, dated June 28, 1892; No. 477,789, dated June 28, 1892; No. 478,501, dated July 5, 1892; No. 483,375, dated September 27, 1892; No. 545,052, dated August 27, 1895; No. 558,011, dated April 7, 1896; No. 561,189, dated June 2, 1896; No. 571,404, dated November 17, 1896; No. 569,590, dated October 13, 1896; No. 569,182, dated October 13, 1896; No. 569,231, dated October 13, 1896; No. 571,339, dated November 17, 1896; No. 571,429, dated November 17, 1896; No. 571,509, dated November 17, 1896; and other patents applied for and now pending, and is, moreover, the owner of other patents not herein enumerated;

And, whereas, the Licensee desires to use the hereinafter described machines belonging to the Licensor: —

Now, Therefore, the Licensor, in consideration of one dollar to it paid by the Licensee, the receipt whereof is hereby acknowledged, and of the stipulations and conditions hereinafter contained on the part of the Licensee to be kept and performed, doth loan unto the Licensee the machines designated by their numbers in the following schedule, the said machines embodying some of the foregoing named patents: —

Lasting Machine (Chase) No.

1 Hand Tacker (Chase Stop Motion) No. *747*.

And the Licensor does hereby license the Licensee, and operatives in his employment, to use said specified loaned or rented machines upon the terms and conditions herein set forth: Provided, however, and this loan is made and this license is granted on the expressed Condition, that the Licensee shall faithfully keep and perform all the conditions and stipulations herein contained on his part to be kept and performed, and upon breach of the same or either of them by the Licensee, the Licensor may, at its option, cancel and terminate this loan and license, and upon written notice thereof by the Licensor to the Licensee, or to anyone in the possession or apparent control of the machines, this loan and license shall terminate, and possession of said machines shall thereupon revest in the Licensor. It is also agreed that the Licensor may, at its option, upon breach of any condition herein contained, take

possession of said machines, or any of them, without termination of this agreement.

And the following are also agreed to as terms and conditions of the loan and license of the machines which the Licensee is hereby licensed to use, all of which, together with those hereinbefore expressed, the Licensee hereby agrees to keep and perform:—

First.— The Licensee is by this loan and license authorized to use the machines hereby loaned, only by himself or operatives in his direct employ, and only in *Chicago, Ill.*

He shall not add to nor subtract from the machines any mechanism whatever now or hereafter organized or connected therewith by the Licensor, nor make nor allow to be made any change or alteration in the same without the consent thereto in writing of the Licensor, nor interfere with the proper operation of the machines, nor any mechanism forming a part thereof, or attached thereto, nor remove nor deface any dates, numbers or inscriptions, now or hereafter impressed thereon or affixed thereto by the Licensor, and shall at all times at his own expense, keep and maintain the machines in as good and efficient working order as the same now are or may hereafter be put by the Licensor. All risks and expense of transportation to and from the Licensee's factory shall be assumed by the Licensee. Inasmuch as the machines are only loaned by the Licensor, and the Licensee pays no purchase price for the machines, the said machines do and shall continue to belong exclusively to and remain wholly the property of, and subject to the control of the Licensor, and the Licensee acquires no right to buy or to retain said machines except by the written consent of the Licensor. The Licensee agrees to keep the Lasting Machines and accessories in first-class order and repair at his own expense. The Licensee also hereby covenants and agrees to keep the Lasting Machines and accessories insured by a policy satisfactory to the Chase Department of the Consolidated & McKay Lasting Machine Company for two hundred dollars each, and to pay all taxes assessed on said machines. In case any Lasting Machines are damaged by fire, directly or indirectly, the Licensee agrees to

pay to the Licensor the sum of two hundred dollars for each Lasting Machine, including its accessories, so damaged.

Second. The Licensor and its agents may, at all reasonable times, have convenient access to the machines to examine and inspect the same and the use thereof, and to repair and improve the same so far as it sees fit; and the covenants, stipulations and conditions herein contained shall apply to all improvements which the Licensor shall hereafter add to the machines and to all patents on said improvements, the right to use which shall be owned by the Licensor, with the same effect as if said patents were included in the list of patents hereinbefore set forth.

Third.— The Licensee agrees to pay unto the Licensor, on the fifteenth (15th) day of each month, as rent or royalty for the previous month for the machines hereby loaned, and for the use of the patents hereby licensed, for each and every pair of shoes or boots lasted by the aid of said machines or any of them, or by the use of said patents or any of them, or in the making of which any of said patents shall be used, the sum set forth in the classified schedule hereto annexed in the column headed "Royalty Value"; and said royalty is hereby agreed upon by and between the parties hereto as the just, fair, and correct value to the Licensee for rental of the machines and for use of the patents and inventions hereby licensed to the Licensee by the Licensor, and that the "abated rent or royalty" hereinafter named is not the true value of the license hereby granted, but is a concession and abatement of such value for and in consideration of the conditions hereto attached, and this agreement and responsibility, and all others in this license contained shall extend to and in respect of all shoes or boots made or lasted by the aid of said machines or on any machine embracing any of the patents which the Licensee is hereby licensed to use, whether made by the Licensee or by other persons for him; provided, however, that in all cases when the Licensee shall pay to the Licensor, on or before the fifteenth day of each month, the "abated rent or royalty" as hereinafter set forth, per pair for each and every pair of shoes or boots lasted in whole or in part by the use of said machines or patents, or any of them; said payments so duly made shall be

full payment and satisfaction of the rent or royalty for the use of said machines and of the license for the use of the patents, for such shoes or boots in respect to which said payments shall have been so duly made, and it is agreed that default of payment of said rent or royalty or of any indebtedness to the Licensor when due, that is, on or before the fifteenth (15th) of each month, shall forfeit the Licensee's right to any abatement of the full rent or royalty, as herein provided. And it is hereby agreed that for each and every pair of shoes and boots made or lasted by the aid of the machines hereby loaned, or made by or for the Licensee by the use of the patents hereby licensed, or any of them, and in respect of which there shall not have been paid the "abated rent or royalty" as hereinbefore set forth, the Licensee shall pay to the Licensor the rental or royalty value named in said classified schedule as liquidated, fixed, and settled damages. It is hereby agreed that the monthly rent or royalty returns shall be computed at "abated rent or royalty." In addition to these agreements relating to rent or royalty, and to the "abated rent or royalty" and to payments as liquidated damages of the full rental or royalty value, in case of neglect or default of or refusal to make payment when due, it is agreed by the Licensee that in case he becomes insolvent or makes an assignment for the benefit of creditors, or in case his property or business goes into the hands of a receiver, all rent or royalty due to the Licensor shall be at once computed at the full rent or royalty value, as expressed in the schedule of rentals or royalties herewith attached, and the Licensee expressly agrees to this computation of the rental or royalty value, and further agrees not to contest or dispute any claim for the said full rental or royalty value. It is agreed and covenanted by the Licensee that whenever requested, in writing, by the Licensor, he will pay not less than ten dollars per month, as a minimum amount of rental or royalty for the use of each Lasting Machine, except when his factory is not running. But until further notice, given in writing, it is agreed between the parties hereto that if the Licensee pays the rental or royalty on or before the fifteenth (15th) of the month following the month when the lasting was done, and otherwise keeps all the terms of this License,

there will be a discount made for such payment sufficient to reduce the cost of "abated rent or royalty" on all classes of shoes to one half cent per pair, excepting on long-legged boots, on which the abatement will be sufficient to reduce the cost to three fourths of a cent a pair, but it is specially agreed that this abatement ceases upon written notice given by the Licensor to the Licensee.

Fourth.—The Licensee agrees that the operator on each machine shall keep a daily account of the number of pairs of shoes and boots lasted by him and the class to which they belong; which account shall be signed by the operator and verified and signed by the Licensee and forwarded by the Licensee to the Licensor on the first day of each month, and rental or royalty shall be paid by the Licensee on the basis of said account. And the Licensee agrees to give the Licensor, its successors, or assigns, or its or their authorized agent or agents, free access at all times to the premises where the machines hereby loaned are stored or operated, for the purpose of verifying the operators' reports, and in case operators' reports shall not be made as above provided, it shall be the right of the Licensor to appoint a competent man to keep the accounts herein required; and all reasonable compensation for the services and expenses of such man, which shall not exceed three dollars per day, shall be at the charge of the Licensee, and the Licensee hereby agrees to pay the same.

The Licensee agrees that he will allow the Licensor, its successors, and assigns, and its and their agents at any time hereafter, to attach an indicator or counter to any machine embracing any of the patents hereby licensed, which now is or which may hereafter come into the possession of the Licensee, for the purpose of indicating the number of shoes or boots made, and to examine, modify, repair, or replace the said indicator, and that he, the Licensee, will not disturb or interfere with, nor permit anyone else to disturb or interfere with, any indicator which now is or which may be hereafter placed upon any machine as aforesaid.

Fifth.—The Licensee hereby agrees that he will not in any way violate, or infringe, or contest, the validity of any of the patents, or any reissue or extension of the same, which he is hereby licensed

to use, or the sufficiency of their specifications, or the validity of the title of the Licensor to said patents, or any of them, and expressly admits the validity and sufficiency thereof.

Sixth.—The machines cannot be transferred, and this loan and license is not assignable by the Licensee, by his own act or by operation of law.

Seventh.—The power conveyed by this license is only the right to use the said specific machines, and not the right to make, sell, or alter any machines embodying the patents aforesaid, or any of them; and a transfer or removal of the machines hereby loaned can only be made with the written consent of the Licensor, and if the Licensee is or becomes at any time insolvent or bankrupt, or if a sale, lease, transfer, alteration, or removal of said machines shall be made or attempted by the Licensee, or by operation of law, or by any legal officer, representative, or assignee, as the property of the Licensee, without the written consent of the Licensor, the possession of said machines shall thereupon revest in the Licensor, and it may take possession of said machines without the Licensee having any claim for the repayment of any part of the sum or sums which he may have paid as consideration for the delivery of this license, or for rental or royalty under this instrument, nor shall he be released thereby from any of the conditions of this agreement.

Eighth.—In case any machine hereby loaned shall remain unused for the period of four consecutive months, the Licensor may, at any time thereafter, while it remains unused, cancel this loan and license so far as relates to said unused machines, by giving written notice, as herein provided, that it has elected so to do, and, upon giving such notice, this loan and license shall be terminated to the extent aforesaid, and the possession of said unused machines shall thereupon revest in said Licensor, but, in case of such cancellation and reclamation, the Licensee shall thereupon pay the Licensor the sum stated in article twelfth for deterioration of the machines by use or otherwise, and other expenses in reference to the same.

Ninth.—In case the Licensee refuses or neglects to perform, or violates any of the conditions of this license the Licensor shall have the right to terminate this license by giving written notice as

aforesaid that it has elected so to do; and upon the giving of such notice this license shall be terminated, or upon taking or demanding possession of the machines without cancellation of this agreement, the possession of said machines shall thereupon revest in the Licensor; and upon the termination of the loan and license by lapse of time, cancellation, breach of condition, or otherwise, it shall be the duty of the Licensee forthwith to deliver the machines hereby loaned and licensed, to the Licensor in good condition, reasonable wear and tear excepted; and upon such termination or taking or demanding possession of the machines by the Licensor, and without prejudice to any other legal rights or remedies for violation of contract, use of machines without right, or use of patents without license, the Licensor or its agents may thereupon enter the premises where said machines may be, and may take and remove the same, and the Licensee shall have no claim whatever on account of any sum or sums he may have paid under this license as rent or royalty or otherwise, nor shall he be released from his agreements contained herein regarding sum due for return of machines, repairs, instruction of operators, deterioration, etc., as mentioned in article twelfth.

Tenth.—This license shall continue (unless the Licensor shall cancel this license for breach of condition) until the expiration of all the Letters Patent which the Licensee is hereby licensed to use, and which are or may hereafter be embodied in the hereby loaned machines, and the other patents or improvements referred to shall be considered as included in this license the same as if entered in this license by date and number, or any extensions or renewals of the same; and upon the expiration thereof the Licensee shall deliver to the Licensor the machines and accessories hereby loaned in good order, natural wear and tear alone excepted.

Eleventh.—In case any other machines than those now hereby loaned and licensed, embracing any of the patents hereby licensed, shall hereafter be ordered by, or come into possession of, the Licensee then, in case the Licensor shall so elect, all the covenants herein contained shall apply to such machines, and shall govern the parties respectively to the same extent as if the said machines had

been expressly included in this loan and license. The Licensor shall give written notice of its election as aforesaid, and the entry into and under this License Agreement of all machines in possession of the Licensee is hereby specially agreed to by the Licensee, but this shall not take away the Licensor's right to refuse such entry in case of machines transferred without written consent of the Licensor.

Twelfth.— It is declared and understood that it is the intention of this Licensee to use said machines herein licensed for lasting all of the shoes and boots that shall be made by him applicable to the said machines, and not to have them in his possession as a means of reducing the price of hand-lasting, or of controlling hand-lasters, or of influencing a trade with the owners of any other Lasting Machines or of reducing the price thereof, or the prices for labor thereon, and the Licensor enters into this contract because of and by reason of such understanding and intention on the part of the Licensee. It is agreed that the Licensee shall use such machines hereby loaned for lasting all of his shoes and boots, to their full capacity, limited only by the demands of his business; and should the demands of his business require, he shall take and pay for the loan of such additional machines as may be required to do all his work; and in case any Lasting Machine in this agreement is returned to the Licensor, whether voluntarily or because of the Licensee's insolvency or the appointment of a Receiver for his business, or for non-compliance with this agreement, or otherwise, the Licensee or his assigns shall pay the Licensor one hundred (100) dollars as compensation for setting up each machine at his factory, for instructing operators and other expenses incurred, and he shall also pay, in addition thereto, the cost of putting the machine into good condition and repair, as well as freight expense of returning the same.

Thirteenth.— It is agreed that the Licensee shall buy of the Licensor, and only of it, all the fittings and all the spare parts for repairing the machines hereby licensed, and also all the string-nail, tack-strips, or other fastenings to be driven by any appliance for lasting the shoes or boots, whether lasted in whole or in part by

the aid of any of the machines hereby licensed, or by the use of any of the said patents, or in the making of any of which any of said patents shall be used; and that same shall be sold by the Licensor at the same prices to all Licensees for the time being. The prices and terms for the same to be fixed by the Licensor; and in all cases whenever the machines are returned to the possession of the Licensor all the accessories, which shall include all spare parts and fittings, shall be returned with the machines, free from any claim as to title, and all unused tack-strips remaining in the possession of the Licensee at the time of the return of the machines shall also be returned to the Licensor's possession free from any claim as to title, but credit for such tack-strips shall be given by the Licensor.

Fourteenth. — All the rights and interests which, under this instrument and by reason of the ownership of said machines and patents and patent rights belonging to the Licensor, shall be deemed to belong to and may be enforced by the Licensor, its representatives, and assigns, and all the stipulations binding on the Licensee shall be binding on his or their representatives or assigns.

Fifteenth.— It is agreed that this instrument may be used for Licensees of the female sex, or for corporations, and in that case the masculine pronoun denoting the Licensee shall, whenever it occurs, be instead of and indicate the feminine or neuter, as the case may be; and also that when the party of the second part shall consist of more than one person the termination of the words relating to the said party shall be considered as singular or plural, as the sense may require; and that when the party of the second part so consists of several persons, and they sign this License and Lease for Rental, either individually or by their firm signature, such signature or signatures shall bind them both jointly and severally to the terms and agreements herein contained, and also that the numbers of the machines named in or covered by this License and Lease may be entered herein by the Licensor after signing; and that as this instrument is designed and intended for continuous use between the parties hereto, in case the Licensee shall have more than one machine, it is agreed that the termination of words relat-

ing to the machine shall be considered as written in the singular or plural, as the number of machines entered in this License and Lease Agreement may require.

Office of the
McKAY SHOE MACHINERY COMPANY
No. 76 Lincoln Street.

Heeling Department. Boston, November 2nd, 1898.

Mess. Selz, Schwab & Co., Chicago, Ill.

Gentlemen:— Will you kindly number the lease sent you for the compressor #34 and Mayo rapid nailer #2555 at Joliet, which is now numbered #1593 to #1785, and greatly oblige?

Yours truly,

Dic. McKAY SHOE MACHINERY C[illegible].

Altered 10/4/98

1785 as per letter McK. Shoe Mach. Co. 10, 21, '98.

Lease and License, No. ~~1593~~

This Lease and Agreement, made this *21st* day of *March* A. D. *1898*, by and between James W. Brooks, Principal Trustee, and John Brooks, Associate Trustee, for the McKay-Bigelow Heeling Machine Association, Lessors, and *Selz, Schwab and Company, Joliet, Illinois*, Lessee, witnesseth:

Whereas, The Lessors are engaged in the manufacture of shoe machinery, and devices to be used in connection therewith, and particularly machinery and devices useful in the manufacture of the heel portions of boots and shoes; and

Whereas, The Lessors, at great expense, have endeavored, and are constantly endeavoring to improve and render more useful, the machinery and devices manufactured by them, and are the owners of the following Letters Patent of the United States for improvements and inventions relating to machinery and devices for the manufacture of shoes, viz.: E. B. Allen, 310,488, Jan. 6, 1885; 314,411, March 24, 1885; 319,377, June 2, 1885; 332,032, Dec. 8, 1885; 332,984, Dec. 22, 1885; 348,091, Aug. 24, 1886; 348,092, Aug. 24, 1886; 374,387, Dec. 6, 1887; 374,885, Dec. 13, 1887; 375,913, Jan. 3, 1888; 377,284, 377,285, Jan. 31, 1888; 378,859, March 6, 1888; 384,343, June 12, 1888; 384,734, June 19, 1888. C. H. Benjamin, 388,523, Aug. 28, 1888. H. Bond, 297,787, Feb. 5, 1884. E. Bourgeois, 277,207, May 8, 1883. C. H. Brown and A. B. McCoy, 477,098, June 14, 1892. C. W. Chase, 212,190, Feb. 11, 1879. Prouty, 383,907, 383,908, 383,909, June 5, 1888; 515,175, Nov. 12, 1889. James W. Carver, 401,131, April 9, 1889. Benjamin & Simmons, 503,895, Aug. 22, 1893. S. A. Krewson, 514,852, Feb. 13, 1894; and also are the owners of other inventions relating to machinery and devices for the manufacture of boots and shoes, and intend to secure Letters Patent therefor, some of which inventions, patented or to be patented, are embodied in the machines, or some of them, leased to the Lessee hereunder;

And Whereas, The Lessee desires the right to use, under the

terms of this lease and license, the hereinafter described machinery or devices belonging to the Lessors, and also any other improvements relating to the machinery hereby leased, which may hereafter be acquired by the Lessors, and attached by or with the permission of the Lessors to the machinery hereby leased or delivered to the Lessee, to be used in connection therewith, and also any other machines, machinery or devices made by or for the Lessors, which may hereafter come into the possession of the Lessee;

Now, therefore, The Lessors, in consideration of one dollar paid by the Lessee, the receipt whereof is hereby acknowledged, and of the covenants and agreements of the Lessee hereinafter contained, do hereby lease unto the Lessee (provided the Lessee keeps and observes the covenants and conditions of this agreement) the machinery or devices described by name and number or numbers, following, and all other machines and machinery made by or for the lessors which may hereafter come into the possession of the lessees with the written consent of the lessors and which are not the subject of another lease between the parties hereto: —

McKay Pricking Machine
1 McKay Heel Compressing and Loading Machine *No. 34*,
Fisher Compressing Machine
Bresnahan Compressing Machine
Heel Trimming and Randing Machine,
Heel Trimming and Randing (including Grinding) Machine,
No. 2 Automatic Heel Nailing and Trimming Machine,
1 Rapid Nailing Machine (*Mayo*) *No. 2555*,
Union Heel Trimmer,
Spring Heel Trimmer,
American Lightning Nailing Machine
American Compressing Machine,
Columbia Compressing Machine,
Automatic Heel Loading and Compressing Machine
Improved National Nailing Machine
Columbia Nailing Machine,
Automatic Spring-heel Nailing Machine,

Standard Automatic Nailing Machine,
Standard Automatic Nailing Machine, without Pricking Attachment,
Standard Automatic Loading or Compressing and Loading Women's Work Machine,

And the Lessors do hereby license the Lessee to use such machines and devices, and any patented parts, mechanisms or devices connected therewith or relating thereto, whether on said machinery when the same is received, or which may be added thereto by the Lessors, and including such machines, devices and machinery as may hereafter come into the possession of the Lessee with the written consent of the Lessors, under the aforementioned patents or any patents, reissues of patents or renewals, which may hereafter be owned or acquired by the Lessors; the term of said license to be the full term of this lease; but this lease is made and this license is granted, on the express condition that the Lessee shall faithfully keep and observe each and all of the conditions and agreements herein contained, on his part to be kept and observed; and that upon a breach of the same or either of them by the Lessee, the Lessors may, at their option, cancel and terminate this lease and license, and upon written notice thereof by the Lessors to the Lessee, or to any one in the possession or apparent control of the said machines, devices or machinery, this lease and license shall terminate, and the possession of, and the full right to and control of the said machines, devices and machinery shall thereupon revest in the Lessors.

The word "machinery" as hereinafter used shall be construed as designating any and all machines, devices, tools and machinery held by the Lessee under this lease and license whether now or hereafter delivered to or in the possession of the Lessee, and the covenants and conditions of this lease shall apply to all such machines, devices, tools and machinery.

And the following are agreed to as terms and conditions of the lease and license of the machines, devices, tools and machinery which the Lessee is hereby licensed to use; all of which together

with those hereinbefore expressed, the Lessee agrees to keep and perform.

First. The Lessee is by this lease and license authorized to use the "machinery", hereby leased only by himself or operatives in his direct employ and only at his factory, situate at *Joliet, Illinois.*

He shall not add to the "machinery", nor subtract therefrom any part, mechanism or device whatsoever now or hereafter forming a part thereof or connected therewith by the Lessors; nor make, nor allow to be made any change or alteration in the said "machinery", without the consent in writing of the Lessors, nor interfere with the proper operation of the same or any mechanism forming a part thereof or attached thereto; nor remove nor deface any dates, numbers, or inscriptions, now or hereafter impressed thereon or affixed thereto by the Lessors; and shall at all times and at his own expense keep the "machinery" in good and efficient working order and condition.

And the Lessee further agrees that he will purchase from the Lessors exclusively at the regular prices from time to time established by the Lessors, all the spare parts, forms, plates, knives, moulds, extras, devices and mechanism of every sort and kind needed or used by him in repairing, renewing, changing the styles, form or nailing, or in operating the "machinery" hereby leased.

Second. The Lessors and their agents may at all reasonable times have convenient access to the "machinery" covered by this lease to examine and inspect the same and the use thereof, and to repair and improve or add to the same so far as they may see fit; but they shall not be bound to make any repairs or improvements and the covenants, stipulations, conditions and terms of this lease shall apply to all improvements which the Lessors shall hereafter add to the same and to any patents which have been or may be issued thereon with the same effect as if the patents were included in this lease and license with the Letters Patent already referred to.

Third. The Lessee agrees to pay unto the Lessors on the fifteenth day of each month, as rent or royalty for the machinery hereby leased, the sum of one half cent for each and every pair of boot or

shoe heels manufactured wholly or in part by the aid or use of any of the machines or machinery hereby leased, said rent or royalty to be paid each month for all boot or shoe heels made during the preceding calendar month, and it is hereby agreed between the parties hereto that said rental or royalty at one half cent per pair is a just, fair and correct value to the Lessee of the use of said machinery, and that the abated royalty hereinafter named is not the true value of the lease and license hereby granted, but is a concession and abatement of such value for and in consideration of the conditions thereto attached; and all agreements herein shall extend to all boot or shoe heels made by or for the Lessee; provided, however, that in all cases where the Lessee shall pay the Lessors on or before the fifteenth day of each month, as an abated royalty, the sum of one quarter of a cent per pair for each and every pair of heels made during the preceding calendar month, said payment so made shall be full payment and satisfaction of said rent or royalty. And it is agreed that in default of the payment of said abated royalty, when due, as aforesaid, the Lessee's right to an abatement of the full royalty of one half cent per pair shall thereby be forfeited, and full royalty shall be due for the same, not as a penalty, but as a liquidated, fixed and settled rental and license fee for the use of said machines or machinery.

And, as the machines leased hereby are supplied to the Lessee without cash payment covering the cost of manufacture, the Lessee hereby guarantees that, during the continuation of this lease, the abated rent and royalty due and actually paid over to the Lessors under the terms hereof shall not in and for any period of three months be less than *125* (one hundred and twenty-five dollars) dollars. But it is agreed that if, at any time during the continuance of this lease, the Lessee shall pay to the Lessors a sum equal to the amount of insurance hereinafter named, the Lessee shall, provided he has not violated any of the terms of this lease, be freed from his guarantee to pay more than the rent and royalty hereinbefore stipulated for each pair of boot or shoe heels manufactured as aforesaid, all the other terms and conditions of this lease remaining in force as before. And the

Lessee cannot avail himself of the provision set forth in this paragraph for anything less than all the machines hereby leased; and he shall not be allowed any diminution of the sum to be paid because of the wear and tear or destruction of any of the machinery hereby leased.

Fourth. It is understood that the Lessors may at any time attach to said "machinery" or any part thereof an indicator, for the purpose of registering the number of boots or shoes in the manufacture of which said "machinery" is utilized, or the number of revolutions or movements of the same or any thereof; and the Lessee agrees that in case an indicator shall be attached to said "machinery" or any part thereof by the Lessors, it shall not be disturbed or interfered with by any person, and that prompt notice will be given to said Lessors in case the same shall be disturbed or inaccurate or out of repair. And the Lessee agrees to keep a full and accurate account independently of any indicators that may be placed upon the "machinery" of all boots and shoes in the manufacture of which said "machinery" is used; and the Lessee further agrees to require each of its operators upon the "machinery" hereby leased to keep upon blanks or blank books to be furnished by the Lessors, accurate daily records of the number of pairs of boots or shoes in the making of which said "machinery" shall have been used, and to require his operator to furnish any further information called for by said blanks or blank books and to sign such daily records and to deliver them to the Lessee; and the Lessee agrees to send to the office of the Lessors on or before the fifteenth day of each month, the original records for the preceding calendar month kept by his operators as above provided for. And the Lessee agrees to allow the Lessors or their agents to have access at all times to said records kept by his operators and to all accounts kept by him, of the shoes prepared or manufactured by him.

Fifth. The Lessee hereby agrees as an essential part of the consideration for this lease and license, that he will not in any way violate or infringe or contest the validity of any of the patents hereinbefore referred to as belonging to the Lessors or which may now or hereafter be owned by the Lessors, or any reissue or exten-

sion of the same, or the title of the Lessors to said patents or any of them.

Sixth. The "machinery" held under this lease cannot be transferred, and this lease and license is not assignable by the Lessee by his own act or by operation of law. The Lessee agrees at his own expense to pay all taxes levied on said "machinery" or on account of this lease and to insure against loss by fire and to keep so insured the "machinery" held by him at any time under this lease in a sum total equal to *Eleven Hundred* dollars, and in case of loss or damage, the Lessee agrees to pay the full amount of the insurance to the Lessors.

Seventh. The power conveyed by this lease and license is only the right to use the said "machinery" and not the right to make or sell any "machinery" embodying the inventions of any of the patents aforesaid or any patent hereafter owned by the Lessors. And a removal of the "machinery" or any portion thereof from the factory of the Lessee can only be made with the written consent of the Lessors, and on conditions satisfactory to the Lessors; and if the Lessee is or becomes at any time insolvent or bankrupt, or if a sale, transfer, removal or lease of said "machinery" or any portion thereof shall be made or attempted without the written consent of the Lessors, then this lease and license and all rights of the Lessee thereunder shall forthwith, at the option of the Lessors, cease and determine, and the possession of said "machinery" shall revest in the Lessors, and they may take possession of the same without the Lessee having any claim against the Lessors.

Eighth. This lease and license shall, unless cancelled by agreement of the parties hereto, continue, provided the Lessee faithfully keeps and performs the terms and conditions hereof, for seventeen years from the date hereof, and for such further time as may be covered by the term of any Letters Patent now or hereafter owned by the Lessors, and any inventions of which are contained in any of the "machinery" hereby leased or which shall be added to or embodied in said "machinery" or used in connection therewith. But inasmuch as the "machinery" has been delivered by the Lessors to the Lessee without any charge or payment representing its cost

(excepting such payments as have been made on account of moulds, dies, forms, clamps, lasts, and other parts or devices used in connection with said "machinery"), it is understood and agreed that the Lessors may at any time, in case the Lessee refuses or neglects to perform or violates any of the conditions of this lease and license, or provides himself with any other machine to do any part of the work which any of said Lessors' machines are capable of doing, terminate this lease upon giving written notice to the Lessee of their election so to do. And immediately upon such notice, this lease and license and all the rights of the Lessee thereunder shall be terminated and the title to and right of possession of said "machinery" and all said moulds, dies, forms, clamps, lasts and other parts or devices used in connection with said "machinery" shall at once vest in the Lessors free and discharged of this lease and license. And the Lessee agrees forthwith to deliver the "machinery" hereby leased and licensed, together with all moulds, dies, forms, clamps, lasts, and other parts or devices used in connection therewith to the lessors, and to pay to the Lessors the sum of fifty dollars for each individual machine then leased to the Lessee, and to pay in addition the expense of transporting the "machinery" to such place of business of the Lessors as the Lessors shall direct, and without prejudice to any other legal rights or remedies for violation of contract, use of "machinery" without right, or use of patents without license, which the Lessors may have; and the Lessors or their agents may forthwith enter the premises where said "machinery" or any part of it may be, and may take and remove the same, including all said moulds, dies, forms, clamps, lasts and other parts or devices used in connection therewith, and the Lessee shall have no claim whatever against the Lessors under this lease or otherwise.

In case this lease shall run for its full term, then immediately upon its expiration the Lessee shall deliver to the Lessors the "machinery" hereby leased, together with all moulds, dies, forms, clamps, lasts and other parts or devices used in connection with said "machinery", and the Lessee shall have no claim whatever to

said "machinery" or to a continuation of his possession or use thereof.

Ninth. In case any other machines, devices, or machinery than those now hereby leased and licensed, embracing or to be used in connection with the inventions of any of the Letters Patent under which a license is hereby granted, or any other patents under which the Lessee may hereafter become licensed by the terms of this agreement, shall hereafter come into the possession of the Lessee without a written lease or license from the Lessors, then, in case the Lessors shall so elect, all the covenants and agreements herein contained, including the obligation to pay a monthly rental or royalty, shall apply to the same and shall govern the parties respectively to the same extent as if the same had been expressly included in this lease and license. The Lessors may write the numbers of any such "machinery" as shall hereafter come into the possession of the Lessors into this lease after the same is executed.

Tenth. All the rights and interests which under this agreement and by reason of the ownership of said "machinery" and patents and patent rights belong to the Lessors shall be deemed to belong to and may be enforced in their name or otherwise by the Lessors' successors and assigns and their representatives and assigns. All of the stipulations and agreements binding on the Lessee shall be binding on his or their representatives and assigns.

Eleventh. It is agreed that this instrument may be used for Lessees of the female sex or for corporations, and that in that case the masculine pronoun denoting the Lessee shall, whenever it occurs, be instead of and indicate the feminine, or neuter, as the case may be; and also that this instrument may be used in cases where the Lessee shall consist of more than one person, and in that case the termination of the words relating to the Lessees shall be considered as plural or singular, as the sense may require; and that when the Lessees so consist of several persons and they sign this lease either individually or by the firm signature, such signature or signatures shall bind them both jointly and severally to the terms and agreements herein contained.

In Witness Whereof, the parties aforesaid have hereunto set their

hands and seals and to another instrument of even date and like tenor, the principal Trustee being authorized to sign for himself and his associate trustee, and to do all acts hereunder, and said Lessee or Lessees under this agreement binding itself, himself, or themselves to all the foregoing agreements, both jointly and severally.

JAMES W. BROOKS, Principal Trustee. [SEAL]
J. Brooks, Atty.

Special Examiner,

PLAINTIFF'S EXHIBIT 267.

[Put in Evidence, page 3511.]

Boston, Mass., November 26, 1910.

Mr. C. H. Willson, General Manager, United Shoe Machinery Company, Boston, Massachusetts.

Dear Sir:— In accordance with your instructions, we have made a thorough examination of all of the Plant shoe machinery. We have used as a basis the catalogue of the Wonder Worker Shoe Machinery, and have made our report to cover each machine as shown in this catalogue, and compared each one, as far as possible, with machines which we use in place of them.

We have had the help and cooperation of all the men in our Company that we thought could be of assistance to us, and have had the assistance of the men at the Plant Factory who were familiar with the machines and the reasons for making them as they did.

In addition to comparing each machine and advising in regard to each, we submit with this report four lists: one being a list of machines some of which we think it advisable to adopt exactly as they are now built, and others with such minor changes as lead us to consider them in the same class; another list comprising such machines as we would advise discarding altogether: the third list comprising various devices or attachments on the Plant machines which we think should be embodied in our commercial machines or worked into machines of improved design with which we are now experimenting, and the fourth list containing machines and devices that we think should be experimented with and tried out to determine if they have any value.

Yours truly,

B. F. Mayo.

Geo. E. Warren.

21 Insole Cloth Placer.

21 Canvas Cutter.

89 [1425] Heel Seat Dinker.

61-7 [1416-19] Welt Marking Snippers.

CLICKING PRESS.

This machine has a treadle for starting the cutting arm. The

cutting arm automatically swings to the left after it has struck the die, and it has a hand wheel below the cutting block for adjusting same.

The treadle starting device is not as good or safe as ours, which is mounted on the cutting arm.

Our cutting arm automatically swings just clear of the die from any position over the cutting board. This is better than the Plant machine, which swings so far that the operator has to stop it, which makes a pull on his left arm after each cutting operation. Our adjustment for the cutting block is above the cutting arm.

We advise not to build the Plant machine.

Sole Rounder.

In this machine the pattern turns and the knife is stationary, the same as the Smith Rounder. Stripped stock cannot be rounded with it. It can be used only on blocked stock. It is not as good as the Planet Rounder.

We advise not to build it.

Fair Stitch Welt Attachment.

This machine is for attaching McKay Welts to the sole and cutting them off. It is a good machine and we advise adopting it.

Outsole Marker.

This machine is for marking the outsole, so that the operator will know when to commence and end when skiving a shank. The machine also marks the size and width on the heel.

This machine is, of course, only adapted for use on welt work, when the sole is died out before laying.

The system used in nearly all the factories is to lay blocked stock and shape the sole on the Rough Rounder. When making shoes by this system, the machine would be of no value to us. Under these conditions the machine would be of no use to us at present. It might be of some value if the manufacturer were to make shoes without using the Rough Rounding System.

We understand that only one or two of these machines was ever built.

We would advise doing nothing with this machine at present.

Shank Piece Tacker.

This machine is used for tacking shanks to soles and other work on which the Boston Tacker and Innersole Tackers are used.

It is started by a foot that contacts with the upper surface of the work. This foot is moved up by a foot treadle, acting on a table below the work, which moves the table and work up. It has a very steep raceway and a simple and effective separator for forcing the tack that is to be driven, under the driver. These, with the exception of the angle of the raceway, have been embodied in our Innersole Tacker. The Innersole Tacker has also been improved by applying a rotary tack pot.

While the steep raceway seems to work very well on ½-oz. tacks, the consensus of opinion is that it will not work as well as long ones, owing to the point end of the tack being heavy enough to make the head bind in the raceway.

We do not advise building the Plant Shank Tacker.

Turn Shoe Moulder.

This is exactly like the old type of machine used by us, and we would advise that it be discarded. We have a new type, shown above, which has some improvements.

Outsole Flexer.

This machine is for operating on the outsole to make it more flexible at the ball.

It differs from our machine in so much as it does not operate on the toe or shank portion of the sole. This is a good feature, and we would advise the adoption of this machine in place of ours.

The Cloth Cement Pot & Drying Creel.

These devices are for cementing the canvas and exposing it to the air so that it will become nearly dry before using.

We think this would be a handy device to use whenever a manufacturer wishes to cement his own canvas, but the tendency lately among manufacturers has been to abandon this system and use the

coated canvas; so that now there is a very limited demand for a device of this kind.

We would recommend that this device be adapted to use with wide canvas, which is used for the Gem Insole, and furnished to the manufacturer whenever desired.

Plant Innersole.

This sole as shown by the cut has an inside channel cut similar to the channel on all leather innersoles. A piece of canvas slit at the forepart and heel is then forced into this channel, the canvas being trimmed off after it is placed so that it will be even with the top of the channel flap. The canvas extends way across the sole at the shank. The outer edge, or feather, of the sole is trimmed away so that it will be thin at the edge and thicker where the welt and upper are stitched to it.

While this sole has one commendable feature we are firmly of the opinion that it is not so good a commercial article as either the "Gem" or the "Economy" insole. We found the average number of soles to the inch being used to make this sole was eleven. This is a good thickness of sole, and we use very many soles in both the Gem and Economy systems which are much thinner, but even with this weight of sole, which we found in use, the depth of cut necessary when channeling, to give the proper amount of between-substance for sewing, made the sole weak at the root of the channel, so that the inside of the finished shoe had a hollow or gutter all around the shoe, directly over the channel. This is a bad feature and one that the manufacturers are continually trying to guard against, it being a sign of good shoemaking to have a smooth innersole in the finished shoe.

We also criticise the Plant innersole because, there being no upturned lip on the outer edge of the sole, there is no backing for the welt when sewed on. Without this backing the welt can be pried away from the sole, and the seam will not be as tight as when a sole is used with a lip turned up as a backing for the welt. This has been demonstrated many times in an all-leather innersole. Leather innersoles were made for a long time with a shoulder edge instead

of cutting a lip and turning it up, but it was never as successful as the sole with a turned up lip; simply for the reason that the turned up lip gave it a defined shoulder to sew to and a backing for the welt.

We feel certain that these two features — the depth of the cut necessary for the channel, and the absence of the turned up lip on the outer edge — would condemn this innersole as a commercial proposition.

The commendable feature which the sole has is the angle of the channel to the bottom of the sole. This is more like the angle of the channel in the all-leather insole and gives the operator on the Welt Machine a better hold or support for the channel guide. In this respect it would be superior to both the Gem and the Economy Innersole, as in both of these soles the angle of the sewing lip or channel is about at right angles with the bottom of the innersole.

The Gem Insole which has the lip turned up from the outside has the defect that the inside of the sole where the needle comes through is higher than the outside of the sole where the needle enters. This has a tendency to cause the welt operator to sew high on the outside, or make the needle dig on the inside.

The Gem Insole has the advantage that the inside of the shoe is perfectly smooth, even when using a thin sole, owing to the fact that there is no inside channel to weaken the sole.

The Economy innersole we believe to be a better insole than the so-called "Plant" innersole. In the Economy insole it is not necessary to cut the channel as deep as on the Plant, since we turn up from both sides and it gives us the additional advantage of having a defined shoulder to sew to, and a backing for the welt. We believe that an innersole made by the Economy system is the best innersole that we know of.

COST.

We find on investigation at the Plant factory that the innersole in use there costs more than the Economy insole owing to the extra operations necessary in its manufacture, and the high cost of canvas.

Below are given the detailed cost prices — assuming that the cost

of the leather, the dieing-out, marking and many other operations up to the time of channeling, are the same in both cases. The figures below are the prices for 100 pairs: —

Plant Innersole.		Economy Innersole.	
Channeling,	$.250	Channeling & Turning	$.250
Wetting	.023	Wetting	.023
Lip Turning	.040	Putting on canvas	.085
Putting on Canvas	.100	Reinforcing	.140
Forming	.350		
Tucking	.040		
Randing	.120		
Cementing canvas	.032		
Cutting	.050		
Canvas & Cement	1.260	Canvas (Coated)	$1.5000
	$2.265		$1.998

We have not taken into account the fact that there is ½c. per pair royalty charged the manufacturer when using the Economy Insole, as we assume that there would be a similar charge if the Plant innersole was used.

The Plant innersole, by the above figures, costs $.267 per hundred more than the Economy Insole. While the canvas used on the Plant innersole is only half as wide as that used on the Economy innersole, you will see by the above figures that it costs more than half as much as the Economy Canvas. This is owing to the fact that it costs a great deal more to use canvas coated in the factory with rubber cement than it does to use the prepared canvas.

We believe that the sole and canvas both coated with cement — as is done in the Plant factory — makes a better innersole, as the canvas and cement are more firmly united than by the process of using a coated canvas. They inform us at the Plant factory that the coated canvas had not been used successfully by them.

We admit that it is more difficult to apply the coated split canvas to the sole and make it stick than it would be to cement the sole and canvas and then put it on, but we think it could be done suc-

cessfully, and, if so, the relative price of the Plant and Economy Innersoles would be as follows: —

Plant Innersole.		Economy Innersole.	
Channeling	$.250	Channeling & Turning	$.250
Wetting	.023	Wetting	.023
Lip Turning	.040	Putting on canvas	.085
Putting on canvas	.100	Reinforcing	.140
Forming	.350		
Tucking	.040		
Randing	.120		
Cementing canvas	.032		
Cutting	.050		
Canvas and Cement	.750	Canvas (coated)	1.500
	$1.755		$1.998

This shows a saving of .243 per hundred pairs in using the Plant Insole with a coated canvas, over the Economy Insole; but, owing to the defects which we think the Plant Insole has, we believe it would be better to make an Economy Insole with the Plant canvas coated. In this way we would use all the Economy machinery and, with that system, the Plant Insole Cloth Placer.

In addition to this we would have to provide some way for the operator on the Insole Cloth Placer to heat the coated canvas before placing it on the sole as it is necessary to apply this coated canvas hot. If we could do this it would show us some saving over the Economy Insole.

The Economy Insole would then cost us as follows:

Channeling and Turning		$.250
Wetting		.023
Splitting Canvas		.050
Putting on and Forming Canvas		.400
Reinforcing & Trimming		.140
Canvas Coated		.750
	total	1.613

The different soles would then cost us as follows:

Plant Insole—Cement Canvas	$2.265
Plant Insole—Coated Canvas	1.755
Economy Insole—Coated Canvas	1.998
Economy Insole—Narrow Canvas Coated	1.613

This shows that the Plant Insole, as it is, costs .267 more than the Economy; the Plant Insole with coated canvas .243 less than the Economy. The Economy Insole with narrow canvas .385 less than the Economy Insole with wide canvas.

We do not feel sure that the slit canvas, as used in the Plant Insole, gives as strong a sole, and will stay in place as well, as the canvas that goes completely across the sole; but we have no doubt it could be used successfully on a great many soles and will satisfy some manufacturers.

We might not be able to make all of the saving as shown above, owing to the fact that it might be necessary to staple the soles to the last in a little firmer manner when using the split canvas than when using a whole piece, as with the split canvas there is not the support in the sewing that there is with the canvas going all the way across where one side helps the other.

In the Plant factory they stapled the soles to the last much more firmly than the manufacturers who use either the Gem or the Economy, and while we have had no opportunity to find out whether this is absolutely necessary we consider it a good thing to do.

In view of the fact that the figures show a saving of about $.385 per hundred pairs when using the Plant coated canvas on the Economy Insole, we would advise making a trial of the narrow canvas in connection with the Economy Insole method, and using the Insole Cloth Placer and the Canvas Cutter with our Economy machinery.

We show below a cut of the Plant Insole Cloth Placer.

The following machines used in making the Plant Innersole we can find no use for, and recommend that they be discarded, unless

it is found desirable to make the Plant Innersole exactly as it is made now.

Lip Cutter.

This machine is used for cutting the sole so that the channel can be turned up.

Single Lip Channel Opener & Edge Compressor.

This machine is used for turning up the channel flap, and is supposed to compress the edge of the leather, but we are unable to find that it does any compressing.

Innersole Lip Cutter & Marker.

This machine is for marking the size and width, and cuts off the surplus length at the heel of the sole, and also cuts the heel end of the channel lip at exactly the right point. We have made several machines to do this work, but could not use them on account of patents which we do not own, and we believe the same objections would hold true with this machine. If the patent situation is clear, perhaps this machine could be used to better advantage than the ones we have designed, but it would require further consideration to determine which machine to use.

Innersole Cloth Tucker & Lip Trimmer.

This machine is for pushing the canvas into the channel on the insole and trimming off the surplus canvas. We would have no use for this unless we adopted the Plant Innersole.

Innersole Flexor.

This machine cuts into the surface of the innersole forepart, between the channel lips, so that each cut overlaps the next preceding cut, the cuts being carried to the channel lips in every case, no matter what size the sole is. That is done automatically, and we think this method of slashing is superior to the method used by us on the Gem Innersole. We have not had occasion yet to flex any innersoles made by the Economy process. We would recommend the use of this Insole Flexor in place of the Goodyear Insole Flexor.

Double Lip Channel Opener.

This machine is for operating on an all-leather inner sole, and turns up both the outside lip and the inside channel. It has not been the practice of manufacturers to turn up the channel on an all-leather inner sole, and most of the operators prefer not to have it turned up, letting the channel guide turn it up as they feed the shoe along. As this machine is arranged, the outside lip is turned up only at right angles with the sole. We do more than this in our Lip Turner, turning the lip down on the sole. With the Plant machine, where the lip is only turned up at right angles to the sole, there is a tendency for it to fall back again, and, during the lasting operation, the lip may be turned down under the upper. This makes a difficult shoe to sew the welt on to. We do not see how this machine would be of any value to us.

Plant Insole Lip Wetter.

We would recommend using this machine in place of the one which we are now using for the Economy Insole, as shown by the cuts above. This is a more simple machine, will do the work as well, and costs less to manufacture than our own.

Staple Tacker.

This machine is different from our machines in principle and design; is much simpler and is better than either the Model B or C. But there are some parts, such as badly designed levers, driver bar in two parts, short bearings, etc., that should be redesigned.

We are now putting out a Model D Machine which is better than the Model B or C, but more complicated than the Plant Tacker.

As the Staple Machine is superseding to a large extent the Taper Nail Tacker for laying McKay soles; the Cable Tacker for tacking rands and shanks; the String Nail Tacker for tacking rands, cobbling toes on McKay work and nailing toes on women's McKay work, and the Grip Tacker for slip taps, tacking heel seats, spring heels, nailing taps and tacking rands, we advise building a simple Staple Machine, like the Plant machine, which has good principles. Embodying these principles in it, and constructing it on the gene-

ral plan of the Plant machine with this difference: — The wire-cutting mechanism will move for changing the length of the staple and the driver and wire-feeding mechanism will remain stationary, which will make it simpler than the Plant machine.

We do not advise building the Plant machine as it is.

Pulling-Over Machine.

The shoe is inserted in the machine in a reverse position to ours, which makes it harder to place the upper in the pincers. The pincers wipe the upper over the innersole and hold it until the tacks are drawn. This is a good feature if the uppers are large enough, but if they are small, which is often the case, it is impractical. It has a tip measuring device which is moved into place automatically. A tip measure has been applied to our machine.

There is a right and left adjustment on the Plant machine that allows the toe pincers to always pull at the centre of the toe. This is a good feature and has already been applied to our Pulling-Over and Toe Lasting Machines.

We advise putting it on our Pulling-Over Machine if it can be done.

The Plant machine is experimental and has never been finished. We advise not be build it.

Hand Laster.

This is a jack which is turned by a foot-treadle to present either side of the shoe to the operator in a position most convenient to work on. It has a universal joint which allows the jack to be set at any angle, and is equipped with a pneumatic hand tacker.

The jack which turns by a foot treadle is necessary where the pneumatic tacker is used, because the operator holds his pincers in one hand and the tacker in the other. It is used to last the sides of shoes before the toe and heel have been lasted in a bed machine.

Side lasting costs Plant from $1.50 to $1.85 per 100 pairs on his Hand Laster. This work is done in Lynn by hand for $1.50 to $2.50 and on the Consolidated Hand Method Machine for $1.25. In Brockton, the union price is $1.50 by hand and $1.00 on the Consolidated Hand Method.

Plant.	Lynn. By Hand.	Brockton. By Hand.
Per 100 pairs $1.50 to $1.85	Per 100 pairs $1.50 to $2.50 H. M. Machine $1.25	Per 100 pairs $1.50 H. M. Machine $1.00

The Consolidated Hand Method Machine will do good work, lasting sides of shoes, especially on women's. The sides of heavy men's shoes have not been successfully lasted on this machine, compared with hand work. In Brockton, practically all the manufacturers are paying $1.50 per 100 pairs for hand side lasting as against $1.00 by the Consolidated Hand Method Machine. This is because they get better work and a hand-pulled shank. The Consolidated Hand Method will do light shoes and is much cheaper than hand work, but we have no machine to last sides on heavy work that can compete with hand lasting.

This operation on shoes should be covered by a machine and, as the Plant Machine is a hand-pulling and a machine tack-driving proposition, we advise putting some of these machines in shoe factories and developing them to take the place of hand lasting, which is almost universal. One hundred and seventy-nine Consolidated Hand Method Machines are now being used for lasting sides in this country.

Side Laster.

This is practically the old straight-draw Consolidated Laster with the wiper movement in the arc of a circle, and a separate pincer attachment, which is closed by a foot treadle, for pulling over the shanks and sides.

We advise not to build it.

The pincer attachment operated by foot we already have.

We advise trying out the circular movable wiper on the Consolidated Hand Method.

Toe and Heel Laster.

This machine is the Ideal Laster with the following additional features:

The toe wire is inserted under the wipers and fastened to a pin before the shoe is put in the machine.

Wipers that can be used either for right or left by turning them over.

A hold-down for the shoe, that spreads to fit all sizes of innersoles.

A retarder for the toe, that pulls at the side and not at the end of the toe. In combination with the wipers, this retarder forms pincers which exert an inward pull when the wipers are moved to wipe over the toe.

A claw device at the heel which engages the upper and moves with the heel wipers to help pull the upper over the last, and

A hand lever in combination with the treadle to apply pressure to the wipers.

The coupling for the tacker raceway is good, inasmuch as it does not spill tacks.

We advise not to build this machine, as it is not so heavy as the #5 Laster and it is not strong enough for men's heavy work. The toe-wiring device is already on the #5 Laster.

We advise fitting the #5 Laster with the Plant toe head and pad, for McKay work; the spreading hold-down; the retarder for the toe; the claw device for pulling in the heel; the hand lever for putting pressure on the wipers; the coupling for the tacker raceway, and the separator in the hand tacker.

Turn Heel Laster.

This is the Ideal Lasting Machine and is used for lasting the heel seats of turn shoes. It has the toe head taken off, and has a hold-down for holding back the outersole while the heel seat is being lasted by hand, which is now on the #5 Laster and can be put on the Ideal, and by taking the toe head off, the Ideal will have the same thing Plant has.

We advise not to build the Plant machine.

Laster's Bench.

We advise building this, with modifications to meet the requirements of the various systems used.

McKay Toe Cutter.

This machine is an emery wheel with a rest. It is used for

grinding off the uppers on McKay toes. The toe cutting device is practically the same as ours.

We advise not to build it.

McKay Sewer.

This machine has the regular McKay head, the Stanley Horn, a new column and base and the Plant stop motion.

We advise not to build it in view of the Richardson and Model "B" Machines.

Tack Puller and Baster.

This is a machine for pulling the tacks in a lasted shoe and basting the upper to the sole wherever the operator desires.

The basting mechanism is the ordinary chainstitch method, similar to that used in the "Seaver" process. The shoe is presented to the machine and one stitch taken at a time, wherever the operator desires. The shoe is then pushed along and another stitch taken.

The tack pulling arrangement is such that, whenever the operator desires, he can put his foot on a treadle and pull one tack. It requires a treadle operation for every tack.

This is not a commercial machine and has not been used to any extent at the Plant factory, and we could not see it in operation. It was not claimed to be a finished machine, but in the experimental stage; and we would advise that the machine be developed further to find out whether or not it has any value.

Welt Slasher and Groover.

This machine grooves and bevels the welt and slashes it its entire length with the cuts about ¼" apart; also winds it on a reel in a condition to be placed in the welter.

We believe this to be a good machine, and would advise its adoption.

Probably a great many manufacturers would not think it advisable to slash the welt its entire length, but in this case the slashing knife could be removed.

Plant Welter.

This machine is similar to the Goodyear Welt and Turn Machine in regard to the stitch handling devices.

It differs from the old machine in a feeding welt guide and the addition of a back gauge which is necessitated by the feeding welt guide.

The machine, as far as quality of work goes, should do as good work as the old Goodyear Welt and Turn Machine, but we think it is inferior to either our Model G or Model K Welters.

The mechanisms of this machine are light, and not as well designed and constructed as the mechanisms of our two new welters; but there are several important additions to this machine which make it very valuable to the manufacturer, and, while we are of the opinion that the Plant Welter as it stands should not be adopted in place of our new welters, we believe that these important devices referred to should be incorporated in our latest machine.

The new devices are as follows: —

A Welt and Thread Holding and Cutting Device.

By this device the operator, after he has finished welting the shoe, pulls the shoe toward his left hand and presses the foot treadle, thereby cutting off the thread and welt, and holding the welt and thread in position to take the first stitch in the next shoe. This operation makes a considerable saving in time to the operator, and is much neater, owing to the fact that the operator does not handle the waxed thread. It also saves welting as the operator always starts with the same amount of welting through the welt guide. In our old type of machine the operator has a varying amount of welting through the welt guide and more than is necessary for the shoe in order to hold the end with the fingers while taking first stitch. Our later machines have a welt-holding device that obviates this difficulty, if the operator will use it.

The Welt Receptacle is another convenient device for holding the roll of welting so that it remains in temper while the operator is using it.

Another important device is the Stop Motion which stops the

machine in such a position that when the machine is reversed automatically, the loop of thread which is on the needle is released from the barb.

This is very important as in the methods now in use on all of our machines the operator stops and reverses the machine by hand in order to throw the loop from the barb on the needle.

This stop motion has the disadvantage that the machine is not capable of running at any speed but the maximum. While this appeared to be running very successfully at the Plant factory, we know that in a great many places it would be necessary to run the machine slower on some parts of the shoe than on others.

We find that considerable trouble was experienced with this stop motion when first put on the machine, owing to the breakage of various parts, but we find that now, at a speed of about 400 revolutions per minute, the machine is working very well, although the jar to the mechanisms of the machine must be quite severe, and we should think that the machine would need repairs in a comparatively short time, owing to the wear and tear on the parts caused by the stop motion.

We believe that we should have a stop motion on our latest machines, and we have several inventors now working on the problem, which appears to be no easy one.

Meantime, we are having the Plant stopping device applied to a Model G Welter to see what the results are.

This welter has one other feature which worked very well, but which we have no occasion to use. We refer to the wax pot which is of the old type, but has the addition of a stirring paddle to keep the wax in motion so that it will not boil over. With our modern types of wax pots this would be of no use, and we would not recommend its adoption.

The ball of thread on this machine is mounted on a reel so that the ball revolves when the thread is pulled off.

This is likely to jerk the ball ahead and tangle or kink the thread, and we consider the method of holding the ball stationary in a suitable holder on the machine or bench much better.

In conclusion, we would not advise adopting the Plant Welter,

but we would advise the adoption of the Plant Welt and Thread Holding and Cutting Device, the Welt Measurer and the Welt Receptacle, and apply them to our latest welters in such forms as will fit the design of our machines.

We do not advise using the stop motion as it is, but advise using a stop motion on our machine that will overcome the objections to the Plant device as stated above.

Welt Beater.

This machine is like several of the older types of welt beaters which have been discarded by us, and we think that our latest type of welt beater, which has the slashing attachment, is far superior to this machine; and we would advise that the Plant Welt Beater be discarded.

Turn Shoe Trimmer.

The head of this machine is exactly like the one now used by us, with the exception that it is provided with a belt shifter. The machine is mounted on a column, which has some advantage.

We would not advise its adoption as we are making an improved type to take the place of the one now in use.

Sole Layer.

This machine operates under the principle of a combination of direct pressure and rolling.

The work done on this machine is very satisfactory, but we do not think it is any better than the work done on our Improved Sole Layer, and the capacity of the machine is only about 50% of the capacity of our Improved Sole Layer.

On account of the cost of moulds to do the different styles of shoes, the wear and tear that would come on such a machine as this, and the liability of breaking lasts, we do not think such a machine would be as good commercially as the one we now use, and we do not think it would work as well on block stock as it does on soles which are died out to size.

We would not advise its adoption.

ROUGH ROUNDING SYSTEM.

At the Plant factory we find that the outer soles for their welt shoes are died out in the Sole Leather Room to the exact shape of the sole desired on the finished shoe, the sole being $\frac{1}{32}$" larger all-round than the size when the shoe is finished. After the welt has been sewed, the inseam trimmed, and the welt beaten out, the shoe is taken to the Welt Nicking Machine, which makes three cuts in the welt; one at the toe of the shoe, and two on the inside ball. These marks are made a certain distance from the edge of the last, indicating the distance required for the edge of the sole on the finished shoe. This machine has an adjusting dial to make the cuts different distances from the edge of the last, depending upon the amount of extension desired for any particular style. The operator adjusts this according to a chart which is furnished him.

The shoe now goes to the Sole Layer and the died-out sole is placed on the shoe, the edge of the sole at the toe and inside ball on a line with these cuts made in the welt. This is for placing the sole on the shoe in its proper position.

After the sole is laid, the shoe goes to the Welt Beater, so that the welt will be stuck to the sole all the way around. There is now some surplus welt extending beyond the died-out sole and the next operation is to trim off this surplus welt on a Forepart Trimmer, using the outer sole as a guide.

For correcting any errors there may be in the sole laying, or if there is any other reason that the sole does not show the proper shape when on the shoe, it is trimmed or shaped on a Forepart Trimmer until the desired shape is obtained.

The shoe then goes to the Outsole Channeling Machine, which cuts the channel in the outersole, using the outside edge of the sole as a guide.

The shoe is then taken to the Channel Opener and then to the Stitcher.

Under the Rough Rounding System (used in nearly all the factories) the stock is not died out to size in the Sole Leather Room,

but comes to the Sole Layer either as blocked stock or died-out soles larger than the sole will be when finished.

After the sole is laid, the shoe goes to the Rough Rounder & Channeler directly, the shape of the outer sole being determined by this operation by the operator using patterns or cams on the machine to obtain the desired shape.

The shoe is then ready to go to the Channel Opener, and from there to the stitcher.

The cost of doing the operations referred to above is as follows:

Nicking the welts	.12 per hundred pair.
Beating " "	.10 " " "
Trimming " "	.17 " " "
Shaping	1.15 " " "
Channeling	.30 " " "
Total	1.84

The average price for doing the same grade of work by Rough Rounding — which covers all the above operations — is .75 per hundred paire. This shows a saving (by the Rough Rounding System) of $1.09 per hundred pairs. To this should be added some saving in the sole laying, because an operator can lay more soles where the shoes are to be rough rounded afterwards than he can if the sole is the exact size before laying, as some care must be taken to lay this died-out sole accurately; also to this should be added something for dieing out or rounding out the outsole. It was impossible for us to find out just how much to add for these two operations, but, from the best information that we could obtain, it would surely bring the total cost of the labor $1.50 per hundred pairs more by the Plant process than by the Rough Rounding process.

At the Plant Factory, the claim is made that this additional labor cost is offset by the saving in leather. Theoretically, there would be some saving in the leather, as, undoubtedly, more soles could be died out of a certain number of feet of sole leather if they were died the finished size than could be obtained if they were died out large enough to allow the same to be trimmed off by the Rough

Rounding process; but if the manufacturer cuts his own soles from the sides he will have a lot of leather that he cannot use to advantage. This would quite likely bring the cost of the soles up to the price he would have to pay for blocked soles. On the other hand, if he buys blocked stock and is making a large quantity of shoes, it would be impossible for him to find, at all times, the right sizes. In other words, when he attempts to die his soles from the blocked stock there would be almost as much waste as there would be in using the Rough Rounding System. It would require constant supervision and inspection in the Sole Leather Room in order to save this leather when using the blocked stock.

While watching them die-out soles from the blocked stock we noticed, a great many times, as much waste of leather as there would be in rough rounding, and we do not believe that even at the Plant Factory — where the system and conditions are as perfect as at any factory that we know of — any substantial saving in leather is made; that is to say, not enough saving to off-set the increase in the labor cost. If it could be proved that there was a saving at the Plant Factory, we do not believe that there are many manufacturers that would establish a system good enough to find out whether or not there was an actual saving.

The system used at the Plant Factory was the only way that the manufacturer had to make the welted shoe before the Rough Rounding System came into use. There is no question but that a good shoe can be made by this process, and we noticed at the Plant factory very uniform shapes on the bottom. In fact, with a good man to shape the sole, it is impossible to make a shoe in a more perfect manner, but owing to the fact that men's shoes vary so much from one another — even the same size and style of last — the manufacturer found out long ago that it was necessary to make quite an allowance in dieing-out the sole so that the sole would be large enough for these differences in sizes of the shoes, and this extra leather that was necessary and the extra labor were incentives for the manufacturer to gladly change to the Rough Rounding System.

It requires an expert operator to make shoes by the Rough

Rounding System, but manufacturers are now obtaining good results when using the Rough Rounder, and we do not believe that many of them would be willing to go back to the method used before this system came into use, on account of the extra cost in labor, the additional space required in the factory and the additional handlings of the shoe.

The machines used in the Plant factory for this work show no advantages over the machines that were used before the Rough Rounding System was introduced, with the following exception:—

The machine referred to is the Welt Nicking Machine. We think this is a valuable machine when using the Plant process, and might be of some value when using the Rough Rounding process, which we will explain later.

His Channeling Machine is a well-designed machine for doing this work, but we could not see that it would do any better work than the old Arnold Channeler, which was always used before the Rough Rounder was introduced. It is a power machine, and if such a system were to be used for making shoes, we would recommend the use of this Channeler, as it is better than anything that we have.

The Welt Nicking Machine, referred to above, we think might be used to some advantage in connection with our Sole Layer, as even when using blocked stock, and the stock is small, the operator is undecided just how to place the sole on the shoe.

If the welt were nicked, there would be well-defined marks on the toe and one side of the shoe to guide the operator in laying the sole, and it would probably increase the production of our Sole Layer.

We would advise trying this machine in connection with our Improved Sole Layer.

The system, as a whole, to be used in place of the Rough-Rounder, we would not favor as we do not believe that there is enough difference in the quality of the work obtained to offset the additional cost when using the Plant system.

We do not advise using any of the machines which he uses for

this work with the exception of the Nicking Machine, which we advise trying with our system.

Plant Rough Rounder.

This machine is still in the experimental stage, and, while a few shoes have been rounded on it, it was not considered to be a commercial machine.

It was not used very much at the Plant factory owing to the fact that, under the system of shoemaking employed in that factory, they had no use for the Rough Rounder.

There was only one machine made and this has been sent to the Beverly factory. We are having it examined by inventors and designers of our type of Rough Rounder to see if there are any features in this machine we wish to incorporate in ours.

Outsole Wetter.

This machine is for wetting the bottoms of shoes before the channel flap is turned up. The design of the rest or shelf for the shoe is good, and the tank for keeping the water at a fixed height is an advantage. The machine performs the same work as that done on our Outsole Wetter, but is neater in design.

Our machine has the advantage that we use a brass shaft so that the water will not become discolored by rust, and the inside of the tank portion of the machine we cover with porcelain for the same purpose. We would advise the adoption of this machine, using our brass shaft and lining the inside with porcelain.

Channel Opener.

This machine is for opening the channels of the outersole, preparatory to stitching.

The machine is better designed than ours, and is provided with tight and loose pulleys and belt shifter.

We are making an improved machine with a tool spindle so arranged that we can use two different shaped tools on the same spindle.

This is an advantage on some kinds of work, but we do not think it will become universal.

We would advise using the Plant machine whenever the ordinary type of machine is needed, the same as we have supplied to the manufacturers so far.

The Plant machine can, of course, be fitted to use either our form of tools or the form used on the Plant machine.

Plant Stitcher.

The Plant Stitcher is identical with the Goodyear Rapid Stitcher in regard to its thread handling devices, with the following exception.

The oscillation of the shuttle is so timed that during the taking up of the thread there is no slack shuttle thread; but we do not consider this of any great advantage as we have not noticed that the Rapid Stitcher was defective in its thread handling on this account. We cannot see that it is harmful in any way. Our new stitcher is the same as the Plant machine in this respect, and while we were obliged to do this we have not found it harmful.

The fudge knife arrangement was somewhat different from the one on the Rapid Stitcher, having a feeding movement like the awl, so that the welt is cut while the awl is making its return feed.

In the Rapid Stitcher the fudge knife does not feed, the knife is held stationary and the shoe is fed against the knife.

Both of these methods work very well; they have both been used by us, and we are of the opinion that the feeding fudge knife which we now use on our new stitcher is a little better than the one in use on the old stitcher; so that in this respect we think the Plant Stitcher is better than the old stitcher; but is the same as the new stitcher.

This machine is equipped with the same stop motion as the welter, and all the good features and criticisms would apply to the device used on the stitcher as when used on the welter; and the experiments which we are performing with the stop motion would apply equally as well to the stitcher as to the welter.

The machine is also equipped with a support that rests on the bottom of the sole while the shoe is being operated upon so that the operator cannot tip the shoe more than a certain angle, fixed by

this stop. We do not think this would be of any use to an operator with much experience on the machine, but for teaching new operators we believe this might be of some assistance, and we would recommend that we try a device of this kind on the new stitcher.

There is also a Bobbin Winder attached to every stitcher. This is a well-known type, that has been used many times, whereby the operator places the bobbin upon the winder spindle, starts the thread on it, and gives it no further attention, the winder stopping automotically when the bobbin is full. By this system the operator has two bobbins only in the machine, one on the bobbin winder and one in the machine. When the bobbin in the machine is emptied he removes it, takes the full one from the winder, places it in the machine and places the empty one on the winder and leaves the winder in operation while he goes on with the stitching.

We believe this to be a good device in factories where there are a few machines; but in factories where there are more than six or eight machines, we believe that a separate bobbin winder used in common by all the machines, and quite often operated by a boy, will show some saving to the manufacturer.

We have adapted a bobbin winder to a Rapid Stitcher many times where only one or more machines were to be used, but believe the Plant design is better than any we have made and would advise that we adopt the Plant Bobbin Winder adapted to the new stitcher, to be put out whenever occasion requires.

The Plant Stitcher was not provided with any Baltimore Edge Attachment. This was probably not put on this machine on account of the patent situation, but it is very essential for a stitcher, and is universally used on all of our machines.

In conclusion, we would not advise the adoption of the Plant Stitcher as a whole, but would apply the sole support and bobbin winder to our new stitcher.

Channel Flap Layer.

This machine is for laying the channel flap after the shoe has been stitched.

The machine is supplied with a double roll, one running in the

reverse direction from the other, so that when the sole of the shoe is applied to the roll the flap on both edges of the shoe is turned down and outward. It also has a flange at the outer end of each roll to protect the edge.

This machine is superior to our single roll machine, and we would advise its adoption.

Plant Leveler.

This machine is for leveling the bottoms of welt shoes, and performs the same work as our Goodyear Automatic Leveling Machine.

This machine is a combination of two systems of leveling; that is, the direct or form principle and the rolling system.

The work done on this machine at the Plant factory is very satisfactory, but it seems to be almost impossible for us to form any opinion as to its value on men's work.

Of all the machines which we examined, this was the most difficult one to make a satisfactory decision on.

The only thing we can say is that we do not know whether this machine, or the principle upon which it is made, should be adopted, but we advise that several of them be tried on various kinds of work so that we can see the results before passing any opinion.

Heel Seat Nailer.

This machine is a copy of our Grip Clinch Machine with the following changes:

A back and forward adjustment on the awl bar.

A forward and back and sidewise adjustment on the driver bar.

A gear guard.

A shoe feeding device of different design, and a clutch mechanism for starting and stopping the machine.

The adjustment on the driving bar is an improvement but it will require considerable change in the construction of our machine if we adopt it. The other changes do not seem necessary.

The Metallic Department advise us that "it is our policy to try to influence a manufacturer, when ordering a Grip Clinch Machine, to substitute the Loose Nailer, but if he still insists we have always accepted the order. Our records show that our orders for this

machine are steadily decreasing. There is no work being done to-day on the Grip Clinch that could not be done on the Loose Nailer, and with just as satisfactory results, but some Lynn manufacturers have always nailed heel seats on the Grip Clinch Machine and feel that they must always do so.

One hundred and eighty Grip Clinch Machines out, domestic, up to September 1, 1910. Twenty machines shipped in 1909, and only seven so far, Oct., 1910.

Grip Clinch Machines used abroad are greatly changed and remodeled from our type and only used for heel building purposes."

We do not advise building the Plant Heel Seat Nailer and do not advise applying the changes to our machine on account of the expense of building over parts of same. Our Mr. F. D. Locke has submitted a very simple and inexpensive forward-and-back and sidewise adjustment for the driver bar, which was suggested by the Plant machine. It also contains a better means for holding the driver.

We advise adopting this and putting it on all machines as it does not change the construction of the machine. The only parts that are changed are a stud and the driver bar. The driver bar is continually wearing out.

LOOSE NAILER.

This machine is used for nailing heel seats and for other work where our New Loose Nailer is used. The head of the machine is similar to our New Loose Nailer.

The horn release has a final release to make room for putting on and taking the work off the horn. Speed of machine the same as ours, 350 revolutions per minute. The head is so constructed that a 7½–8 nail cannot be used. The horn release will not release every time to allow for the feeding of the work, and the mechanism is more complicated than our Loose Nailer #2 (Loose Nailer #2 is our latest type, double or single raceway machine).

We advise not to build it, in view of Loose Nailer #2.

HEEL SEAT DINKER.

This machine is used for cutting off the surplus stock around the heel seat of the outersole.

The knife in this machine consists of a thin blade which automatically closes about the shoe at the heel seat and a wooden block descending cuts off all the unnecessary leather around the heel seat.

The operator takes a shoe in each hand, thereby doing two shoes at once.

There are four cutters used, giving two sizes for the large and small sized shoes. We have a machine provided with only one cutter, which acts on precisely the same principle as this machine, with the exception that the shoe is held the other side up.

We did dot see this machine in operation, as they had no use for it with a died-out outersole. The knife which is in this machine is much shorter than ours and we should think would be inferior on this account, as the clamp holding the knife would be liable to damage the upper of the shoe. The machine also lacked a gauge to regulate the amount of leather to be left at the rear of the heel.

This machine is superior to ours in that it has four cutting dies where ours has but one and an operator could do two shoes in about the same time that he could do one on ours. A machine of this kind, or the one we have made, would not become universal for this purpose, as there are many shoes with such full lasts at the side of the heel that the machine is unable to cut the sole close enough. We found this to be so some time ago and are designing a different type of machine for this purpose, although it will not be as rapid as either the Plant machine or ours.

We think there is a field for a type like the Plant machine and would advise that we adopt it as the foundation and change the knife holder to overcome the objections as stated above. We would not advise adopting the Plant machine as it now is.

HEELING SYSTEM.

Plant is using the old McKay method of pricking and loading heels in one machine, then taking them to another machine to be

attached to the shoe. Woodward and other inventors have used the same system. We abandoned it for the following reasons:

The liability to damage heels by having the wrong pricking in the loaded heels, which makes it necessary to pull out all the nails and prick and set the nails over with a larger or smaller pricking; if the first pricking is too large, the heel shaver will run into the nail holes which spoils the heel. After the loaded heels have been laying awhile the nails become rusted and a large number of nails cripple when they are driven, spoiling the heels. The nails become bent by handling and bothers the operator of the heeler. Thousands of pairs of loaded heels of various sizes and heights have to be kept in stock, and if there are no heels of one size the heeler is obliged to wait for them to be loaded.

We do not advise using this system.

Toplift Compressor.

This machine has no mechanism for side pressure. The moulds slide sidewise to receive and eject the toplift and must be made in pairs, which makes it expensive to fit up. The lift-ejecting mechanism is not good. There is a spring to relieve the pressure when a predetermined amount has been reached. This would be good if it could be arranged to resist pressure enough to condense the leather. We have tried various devices designed for this purpose, but so far have not been able to make anything good enough to use.

We advise not to build the Plant Compressor.

Heel Loader.

This machine is complicated and liable to break down. We do not consider it a commercial machine, and do not advise building it.

It has a device for oiling the awls which is good, and a good nail loader for handling collar nails. We advise putting the oiling device on the new heeler and fitting up our Improved Rapid Nailer with the collar nail handling mechanism, in order to be in a position to give shoe manufacturers a machine fitted to handle collar nails.

Our McKay Heel Compressing and Loading Machine compresses

the heel and loads it with cut nails. This machine is not used to any extent. There are not half a dozen in use.

Heeling Machine.

The capacity of the Plant machine, with a man and a boy, is about 800 pairs per day off the last and 700 pairs on the wood last. It is complicated and poorly designed in parts, which makes it liable to excessive breakage. We do not consider it a commercial machine as it is, and do not advise building it. The following devices which are on it are good:

Guides for the sole to determine the swing of the shoe.

Right and left movement in the jack for placing the toplift.

Spring to move jack.

Lock on jack.

Gluing device for toplifts.

Gluing device for heel seats.

Split movable clamps for sides of shoe.

Spring finger to hold toplift in holder.

We advise putting all of the above on the new Heeler, and the gluing devices, the spring finger and the heel seat clamp on the Improved Rapid Nailer, unless it is decided to use them exclusively on the new Heeler to make it more of an object for the shoe manufacturers to use it.

Wire Grip Heel Slugger.

This machine is a copy of our Wire Grip Slugger (speed the same as ours) with the following changes:

A device for taking out the grippers when they get plugged with wire.

A steel wedge for adjusting the grippers in place of bits of paper that are used in our machine.

A mutilated screw for putting the gripper mechanism together.

An adjusting device for positioning the gripper mechanism in line with the foot plate.

A hinged foot plate.

A new form of driving spring and adjustment for same.

A new grinding device.

These are useful improvements. There is also a clutch mechanism for stopping the machine.

The Metallic Department advise us that "it has been our policy, for the past few years, not to accept orders for Grip Slugging Machines, always substituting Universals; in fact, the writer has only had occasion once to refuse such an order and this one proved to be an error on the part of the agent in so ordering. It is our intention to replace the Grip Slugging Machines in operation to-day with Universals when the conditions warrant such an exchange.

Sixty-nine Grip Slugging Machines out, domestic, up to September 1, 1910. Have not shipped any for three or four years.

We have not shipped any of these abroad for a number of years and those that are used in foreign countries are undoubtedly owned by the manufacturers, having been sold outright a number of years ago."

We advise not to build the Plant Wire Grip Heel Slugger, and not to fit up the machines that are now out with the improvements.

Sole Clincher.

This machine is used in place of our Corrugated Tacker.

Owing to its poor construction and the bad feature of being obliged to take the driver bar out of the machine when a new driver is inserted, we advise not to build it.

On it there is a guard that is used for three nail slugging which we advise adopting with modifications and apply it to our machines that are used for this work.

Heel Shaver.

The dust hood on this machine is large and in the way of the operator, especially on large shoes. It has no blower, which would exclude its use in factories without a blower system.

The cutter head is complicated and parts of it fill up with dust, which prevents setting the cutters.

It has a rubber-covered heel seat guard which we advise trying out on our machine.

We advise not to build the Plant Heel Shaver.

Heel Breaster.

This is a power machine which automatically measures the stroke of the breasting knife. It has the following features: —

The knife is guided on the sides the whole length of its movement.

The cutting is done by a spring.

The jack is locked in position before the knife descends.

The heel piece spreads to fill the heel of the shoe.

It has a blower attachment for taking care of the chips.

A preliminary pressure is applied to the heel before the cutting takes place.

It is complicated.

The knife has to be taken out of the machine before the nicks can be stoned out.

The spring-cutting mechanism is sensitive to adjust.

A constant friction is applied to the shaft to correct the action of the knife-actuating spring.

We advise not to build it.

We advise fitting our machine with the guide for the knife; the lock for the jack; the spreading heel piece; means for taking care of the chips, and the extra pressure on the heel.

Heel and Breast Knife Grinder.

This is an ordinary type of emery grinder, but mounted on a base of good design, with counter shaft and belt shifter.

We would advise the adoption of this machine fitted with holders to hold the various kinds of machine knives that are to be ground.

The small grinder, shown above, we have no use for, as the one on the column can be adapted to do the work this was designed for.

Heel Scourer.

This is a well-designed and effective machine when used with a blower system installed as in the Plant factory, but there are many factories where such a heel scourer could not be used, owing to the fact that it would not be allowable in many buildings to run the

dust pipe from the bottom of the machine through the floor to the main dust pipe below. Some of the Plant machines have been fitted with the dust pipe coming from the side of column. This type could be used where it was not allowable to go through floor. Also, many factories have no blower system at all, and heel scourers must be provided with an independent blower for each machine.

We make many widths and diameters of scouring wheels, so that if we used a machine like the Plant machine the dust hood which surrounds the wheel would have to be made adjustable, or new hoods made for the different sizes.

We like the design of the machine, but do not see how it would be possible for us to adopt this machine to take the place of any one of the several designs which we now use; and our latest heel scourer has the improvement of an auxiliary air-jet striking on the sandpaper, which is claimed to show a great saving in sandpaper.

A question arises with us whether we should make a universal heel scourer or more than one type. We are not prepared to pass an opinion on this; but, if it should finally be decided that it is advisable to make more than one type of heel scourer, undoubtedly the Plant machine would be an excellent machine to adopt in factories equipped with blower systems.

Some of the Plant machines were equipped with a device for finishing the corner of the breast of the heel consisting of a disk of sandpaper so mounted with a protecting guard that the operator did fine work without any damage to other parts of the shoe. We would advise the adoption of this device.

Top Lift Scalloper.

This machine is similar to ours, but not so effective in operation. It is used for scalloping or making a concave cut in the corner of the breast edge of the toplift, using a cone-shaped cutter. There is no means for adjusting the angle of the cut and no means for adjusting the guiding fingers vertically, both of which are important; these adjustments are on our machine.

There is a device on the Plant machine by which the heel plate and guiding fingers are moved toward the large diameter of the

cutter automatically by the opening of the guiding fingers as the heel is passed between them. This positions the breast edge of the toplift at the right place on the cutter to make the proper concave cut for each size of toplift. (This is adjusted by hand on our machine.)

The bad feature about the Plant automatic device is that the operator, in forcing the heel between the guiding fingers, presses in a direction at an angle to, and against the movement of, the guide plate which makes the machine harder to operate and slower than ours. This automatic feature is good if it could be made to work easy. The Plant machine is better designed than ours.

We advise putting our guiding devices on the Plant machine or the Model D Forepart Trimmer and redesign the Plant positioning devices, making the automatic feature more practical, for future use.

We do not advise building the Plant machine as it is.

Edge Trimmer.

This is a heavy machine and it runs with very little vibration. The belt is inclosed in the frame in such a way that it makes it unhandy for the operator to remove or put on cutters. The frame casting is in two pieces, which makes it more expensive to machine, and it is not as good in design as our Model D Trimmer. The belt shifter is connected with a damper in the blower pipe.

We advise connecting the belt shipper with a damper in the blower pipe on our machine. With it, the blower pipe is opened when the belt is put on the tight pulley. This should be applied to all machines that have blowers.

We advise building Plant's Grinder for Forepart Trimmers, making two types, a bench machine and one that can be attached to the Forepart Trimmer. This grinder is better than anything we have.

We advise not to build the Plant Edge Trimmer in view of our new Model D Trimmer.

Heel Burnisher.

This machine has a felt wheel soaked in hot wax for applying the wax to the heel. This wheel is surrounded with a steam-heated box, in the top of which is a small receptacle for keeping the wheel supplied with wax. This wheel turns slowly and stops when the heel comes in contact with it, and then turns with the heel as the heel is turned. A small box is provided to catch the surplus wax. A steam-heated box keeps the wheels that are not in use hot. It has a brush and pad and a blower. It is not as fast as the Xpedite. (The Xpedite will finish and bead seventy dozen pairs per day.)

The Plant machine is a pad and brush shaft with a hot pad for applying the wax to the heel. It does not burnish the same as the Xpedite hot iron and does not make as good a finish.

We advise not to build it.

We advise putting the blower and the steam-heated box, for keeping the irons hot, on the new Xpedite.

Heel Beader.

This is a well designed and a good separate heel beading machine. It has a flexible face plate for the tread face of the heel, which applies a uniform pressure to the rand crease of the heel. There is a strap which engages the heel and puts a uniform pressure on the heel in a direction at a right angle to its surface, which makes a good impression of the heel key. It has a brush for brushing the heel after beading.

The Heeling Department advise us as follows:

"Following is a list of the New Method Heel Seat Beaders, Model 'G' shipped during 1910, and also showing which factories are equipped with Xpedite Machines.

Sherwood Shoe Co.,	Rochester, N.Y.	339	2–11–10

Hillsdale Shoe Co.	Hillsdale, Mich.	318	10–20–10
Rindge, Kalmbach, Logie & Co.,	Grand Rapids,		Unfilled.

One hundred and fifty New Method Heel Seat Beaders out commercially to date, Nov. 10, 1910."

If the policy of the Company is to put out a separate beader, we advise building this machine in place of the New Method Heel Beader.

We advise putting it on the new Xpedite Heel Finisher if it can be done without too much complication.

Edge Setter.

We cannot see that this machine has any advantages over the machines which we now have. It is claimed that it is superior to others as the tool moves in a straight line instead of an arc of a circle, but we have machines working under both of these principles. The Plant machine has a device for moving the finger hook out of the way of a shoe whenever the operator desires. Our commercial machine does not have this device, but our latest model is provided with it.

We would not advise the adoption of this machine or any part of it.

Bottom Buffing Machine.

This machine is like our old type of buffer with small diameter buffing rolls, and, in addition, has two larger rolls for top-lifts.

The machines which we now make have a larger top roll than is used in the Plant machine, or our old type of machine, having the advantage that there is more paper on the roll, therefore lasting longer.

On our machine the top-lifts are done on the same roll that the bottoms are done on. This is claimed at the Plant factory to be a disadvantage as the grinding of the top pieces on the bottom roll

is supposed to leave the paper in a poor condition for doing bottoms, owing to the fact that the slugs tear and damage the paper.

We have put out from time to time various machines for doing top pieces alone, but the majority of manufacturers still do the top pieces on the bottom roll, and claim they do not get any injurious effect as the operator confines the operation on top pieces to the ends of the roll, while he does the bottoms on the middle of the roll.

There is no objection to having the additional roll for doing top pieces, except the additional complication to the machine.

The top piece roll, as located on the Plant Machine, appeared to us to be in an awkward position, it being necessary for the operator to stoop considerably while using it.

The Plant machine is not provided with any blower as it is directly connected with the blower system.

On our latest machines we oscillate our buffing roll, which the manufacturers think is a distinct advantage as it gives a smoother bottom.

We could not adopt the Plant Buffer as a universal machine as there is no provision for attaching a blower, which is necessary when the factory has no blower system.

The machine could, of course, be used just as it is in a good many factories, but with our universal machine with the oscillating roll we think we would be in a better position to meet all the requirements of the trade. Therefore we would not advise the adoption of the Plant machine.

Shoe Drier.

This is an excellent device to be used in connection with the bottom buffer, and we would advise its adoption, with the addition of shelves for the sandpaper.

Bottom Cleaner.

This machine does the same work as the Naumkeag Sole Cleaning Machine. It is a twin machine with upright spindles rotated in a manner similar to the spindles on the Naumkeag Machine.

One of the spindles had a flat disc of paper, instead of the

moulded pad, so that the operator could get close to the heel breast.

The pad consists of a saucer-shaped piece of rubber with inturned lip. A pad of sponge rubber is placed inside this rubber piece, and over the pad the emery cloth covering is secured. The emery cloth covering is moulded to the shape of the sponge rubber pad and is held in place by gripping its edge over the top of the pad.

So far as its principle of operation is concerned, this machine is the same as the Naumkeag Machine, except that the yielding effect is obtained in the latter by inflating the rubber pad with air, while in the Plant device the piece of sponge rubber gives the yielding effect.

So far as quality is concerned, the work appeared to be satisfactory at the Plant factory.

We are of the opinion that the pneumatic pad is more flexible and would conform to inequalities in the work better than any pad which we know, and give a better surface; so that, everything else being equal, we should be in favor of using the pneumatic pad.

The Naumkeag Machine is more costly to build and to keep in repair, owing to the pneumatic arrangement, and, with the small margin of emery paper necessary to hold it on the pad on the Plant machine, we can see there would be quite a saving in the cost of the emery cloth on the Plant machine.

The Naumkeag machine has the advantage of being equipped with a blower, which makes it a universal machine. The Plant machine has no blower, and, unless rebuilt to accommodate one, could be used only where a blower system is installed.

We were informed at the Plant factory that moulded pads for their machine cost about 2c each, and the flat discs about 85c per hundred.

We were also told that the cost for pads when using the Naumkeag system was 9c per hundred pairs of shoes, and when using their machine it was 2½c per hundred pairs.

On the Plant machine they used the flat disc for roughing-out the shank, and used the moulded pad for finishing the whole bottom.

By this method, when the shoe comes to this machine the forepart has already been buffed. The shoe is then presented to the flat disc and the grain taken off, from the heel to the ball, using for this purpose the flat disc, which costs 85c per hundred. The entire bottom is then finished with the moulded pad, which costs 2c apiece.

By this process, of course, there are not so many of the 2c pads used as those that cost 85c per hundred pieces; but we are unable to see, even by this process, how there is such a saving as stated above when using this machine, because by their figures their process costs $2\frac{1}{2}/9$, or $\frac{5}{18}$, as much as the Naumkeag process, and if they paid, as they said they did, 3c apiece for Naumkeag pads their paper would cost them only $\frac{5}{18}$ of 3c, which would amount to $83\frac{1}{3}$c per hundred pieces for their pads, and this is less than their flat disc paper cost; so that some of their figures must be incorrect, even if they did all their work on the 85c pad; but as they used with these some of the pads which cost 2c apiece the showing is still worse.

A great many of the manufacturers are using a flat disc, such as Plant used, on our bottom buffers, or on a machine of their own construction.

There are two prices for these discs — 45c and 60c per hundred.

With these they rough-out, and usually finish, the shank, although in some cases the shank is Naumkeaged after this operation.

If we should adopt the Plant machine we do not see how it would be as good, either for us or the manufacturers, as it would be to use discs on the buffing machine as stated above, as the flat disc on the Plant machine would give no better results than the flat disc as used on the buffer, and the sponge rubber pad on the Plant machine would not be as good as the Naumkeag pad; so that if the manufacturer is to use the flat disc it would be better to do it as it is now done, and furnish the Naumkeag machine whenever better work is desired than can be obtained with the flat disc.

When a manufacturer desires a fine class of work we should furnish him with a Naumkeag machine, but if he is satisfied with the work obtained from the discs, such as are used on the Plant ma-

chine, we have machines already equipped with them, and under these conditions are able to meet all the demands of the manufacturer, and would have no use for the Plant machine.

We would, therefore, not advise building this machine.

Finisher and Brush Cleaner.

This machine is superior in many ways to anything that we now furnish. Such a machine is much better mounted on a base like this one than mounting it on a wooden bench as has been the practice heretofore.

The device for washing the brushes is also good, and we would advise the adoption of this machine with changes in the size of the shaft to conform to our standard size brushes; and also the adoption of the clutch pulley, which we are now using on some other machines, in place of the tight and loose pulley.

Heel, Edge and Bottom Polisher.

This is superior to our bottom polishers mounted on a wooden bench, and we would advise its adoption, with the shaft made to conform to the size of the holes in the brushes which we have adopted as a standard. Also, we would adopt our clutch pulley in place of the tight and loose.

Shank and Forepart Burnisher.

This machine is superior to the machine which we now furnish mounted on a wooden bench, or the one on the stand as shown, and we would advise its adoption, with the size of shaft made to conform to the size of brushes now adopted by us; also, if feasible, to make it a little more convenient to remove the brushes from the shaft, and substitute clutch pulley for tight and loose.

Stitch Separator.

This machine is well adapted for doing heavy work and coarse stitching.

The principle upon which the indenting tool is moved to and from the work is superior to that used on our machine, and we think will produce better work than ours.

The correcting devices for locating the stitches are inferior to the method used on our machine. They are not as sensitive, and would not locate the stitches as accurately on fine work as those employed by us.

As they did not do any fine stitch separating at the Plant Factory, we did not have an opportunity to see this tried.

We are about to re-design our machine, and would advise, in re-designing, that the Plant machine be taken as a foundation.

We would not advise adopting the Plant machine as it is.

Stitch Indenter & Burnisher.

This machine is superior in every respect to the one now made by us. It will do better work and is smoother running. We would recommend its adoption with our standard tools in place of the ones now in use on the Plant machine.

Plant Treeing Machines and Plant Cleaning and Treeing Leg.

The Plant system of treeing shoes differs entirely in principle from the system in use in nearly all shoe factories. Under the Plant system the shoe is cleaned or treed on the last on which the shoe was made. Under the Miller system, which is almost universal, the original last is removed from the shoe and a tree foot inserted upon which the shoe is treed. This foot is so constructed that it is contracted while the shoe is being removed. We believe the Plant system, or treeing the shoe on the original last, to be entirely wrong in principle, as we think it is impossible to remove the last from a finished shoe without breaking or distorting the shoe.

Under the system of treeing the shoe on the last, there are, of necessity, several operations to be performed on the shoe, after it is treed, before it is ready to be packed. The heel lining must be put in, the lacing, or any other trimming about the shoe, must also be done, which means that the shoe is handled several times after it has been treed. This is objectionable, as the treeing process was performed to give a certain shape and finish to the shoe. It

has always been a desire of the manufacturer to handle the shoe as little as possible after treeing. Under the Miller system all these finishing operations are done after the original last is pulled and before the shoe is treed so that, when the shoe is finally treed, there is no work to be done but to rag up the edge and heel.

We also believe it is a much more costly equipment for the manufacturer, when treeing on the original last, owing to the fact that a great many more last are required where they are allowed to remain in the shoe during the treeing. As the tree feet are used over and over for the one operation, it would not require nearly so many tree feet as it would extra lasts. Although the tree feet cost $5.00 per pair and the lasts $1.00 per pair, we are of the opinion that it would cost four times as much for an equipment of lasts as it would for an equipment of tree feet.

In discussing the matter with the people at the Plant factory they all admitted that the shoe would look better if treed on a split foot than if treed on the original last; but the point made by them in favor of the original last was that the operator of the treeing machine would, for various reasons, put the wrong sized tree foot into the shoe, thereby changing the shape of the shoe from its original shape as made on the last.

Another objection was that lasts of the same size and style were not all alike, and that one tree foot would not fit them all.

These objections have some weight, but we believe that the manufacturer would rather strive to overcome these objections than try to retain the shape of the shoe by treeing it on the original last and then removing it.

It also requires more care and a higher price to remove the last from the finished shoe by the Plant process than to remove it by the Miller process.

We examined a great many shoes at the Plant factory, and are of the opinion that the shoes did not look so well after they were finished as they do when finished on the Miller machine. This is especially true of shoes made from light stock.

Assuming that a shoe can be treed properly by the last process, it costs more to do the work by the last process than by the Miller

process. This is because of the fact that, while the work on the shoe is the same in both cases, it is a slower process to put the shoe with the last into the Plant machine than it is to put the shoe on the tree in the Miller machine.

The system of treeing on the last has been tried many times, and outfits for doing this work have been furnished by the Brockton Last Company, Woodward & Wright, Clark Treeing Machine Company, and Fitz Brothers Last Company. All these attempts were failures because it was found impossible to remove a finished shoe from a last without changing or breaking the shape of the shoe. The outfit made by the Clark Treeing Machine Company was as good as, or better, mechanically, than the one used by Plant, but the shoe manufacturer was not in favor of the principle.

Treeing Machine.

The Treeing machine, as shown by the cut above, is used at the Plant factory for McKay work. It has a double jack, revolving in a vertical plane, so that the operator has a shoe on one jack while operating on another.

In regard to the method of treeing the shoe, we think it is much inferior to the Miller method. By the Plant method the shoe is placed over the tree foot, and a metal plate (the size of the bottom of the tree foot, which was held close to the bottom of the foot, while the shoe was put on) is moved bodily away from the bottom of the foot, thereby stretching the shoe away from the top of the last. This we believe to be entirely wrong, as it is impossible to get good lines around the shoe, where the upper meets the sole, because there is one line to iron the shoe to, made by the iron plate, and another line, caused by the edge of the last, which is away from the metal plate, more or less, according to the amount the shoe is stretched.

We do not see how it is possible to produce work by the Plant Treeing Machine that would compare at all favorably with work done on the Miller Machine for the reasons stated above. We are not in favor of adopting either the Plant Cleaning and Treeing

Leg, or the Plant Treeing Machine, and we do not see any features in either machine which we wish to adopt into our system.

The Miller Twin Machine has two jacks, but the Plant people claim that their machine will take less floor space. We do not think this point is well taken, because they must be placed far enough apart to allow the operators to work on the sides of the jack without interfering with one another, and the amount of space required has been found to be not less than that allowed in placing the Miller Machines.

We therefore believe that both of these machines should be discarded.

SHOE RACK.

We believe this shoe rack to be the most convenient and easiest one to handle of any rack we have ever seen.

This rack, as now constructed, is not, however, capable of being taken apart without considerable difficulty, so that it would be an inconvenient rack to ship about the country; but a rack designed like this so that it could be packed for shipment would be the best one ever placed upon the market. It would probably cost more than any other rack, but we think that a great many of them could be marketed, and we would advise making such a rack.

PLAINTIFF'S EXHIBIT 275.

[Put in Evidence, page 4649.]

Memorandum of Agreement, made this the twenty-first day of September, A. D. 1912, by and between The Keighley Company, Inc., a corporation duly organized and existing under the laws of the State of New Jersey, one of the United States of America, (hereinafter called the "Keighley Company"), and William Bottomley Keighley, Charles Percy Keighley, and Charles Keighley, all of Vineland, in the State of New Jersey, the said Keighleys being the officers and owners of all the capital stock of the "Keighley Company", parties of the first part, and the United Shoe Machinery Company, a corporation duly organized and existing under the laws of said State of New Jersey, (hereinafter called the "United Company"), party of the second part.

1. The parties of the first part hereby grant unto the United Company the exclusive right or license, during the continuance of this agreement, as provided in paragraph 11, to put out on lease, (but not to sell, the right to sell, subject to the conditions hereinafter contained, being expressly reserved to the parties of the first part), machines embodying inventions and improvements relating to or intended or adapted for use in or in connection with Inseam Trimming Machines which the parties of the first part, or any of them, now own or control, or which the said parties of the first part, or any of them, may hereafter make, own, acquire, or have any right, by agreement or otherwise, to acquire or take over. And the United Company hereby grants to the parties of the first part the right to manufacture and sell in the United States of America (but not to lease) Rapid Inseam Trimming Machines of the type now put out by the Keighley Company in so far as there are embodied in said machines inventions and improvements covered by Letters Patent of the United States of America No. 961,200 granted June 14, 1910, to Orrell Ashton, Assignor to United Shoe Machinery Company, for Vamp Trimming Machine, and No. 968,555 granted August 30, 1910, to John B. Hadaway, Assignor to United Shoe Machinery Company, for Vamp Trimming Machine.

2. The parties of the first part, and each of them, hereby covenant and agree to and with the United Company to fully and completely disclose to the United Company forthwith, and to such of its officers and patent solicitors as may be designated by the United Company therefor, all inventions and improvements, Letters Patent and applications for Letters Patent, interests and rights which are included within the terms of this agreement, and at any and all times hereafter, upon making, acquiring, owning or obtaining any right, by agreement or otherwise, to acquire or take over any invention, improvement, Letters Patent, application for Letters Patent, interest or right covered by this agreement, to promptly disclose the same to the United Company, its officers and patent solicitors, and to repeat such disclosures when and as often as the same may be requested, and at any time and all times, upon request, to execute or cause to be executed any and all licenses, powers of attorney, and other instruments, and to do or cause to be done any and all acts necessary or desired by the United Company to fully and completely vest and confirm in the United Company the right and license hereby granted, and to enable the United Company to enjoy the full benefits and advantages thereof.

3. The parties of the first part hereby agree, jointly and severally with the United Company that they will not, and that neither of them shall, during the period of this agreement, directly or indirectly, individually or in combination with others, enter into or be engaged or interested in, or financially or otherwise encourage or assist any other person, firm or corporation in entering into, developing or carrying on any business of manufacturing or dealing in Inseam Trimming Machines, except in accordance with the terms of this agreement.

4. The United Company agrees that no machine shall be put out by it or by its authority, in accordance with the right or license hereby granted, upon a lease which does nor reqûire the payment of a lease premium or installation fee, and that such lease premium, or installation fee, shall in no case exceed the sum of One Hundred Dollars ($100.) or be less than Fifty Dollars ($50.00) United States currency, or its equivalent in the currency of the country where

such machine is put out; and that in all such leases a minimum rent or royalty shall be provided for which shall not exceed One Hundred Dollars ($100.) or be less than Fifty Dollars ($50.) per annum in United States currency, or its equivalent in the currency of the country where such machine is put out. And the parties of the first part agree that they will not sell, or offer or expose for sale, or permit to be sold, offered or exposed for sale, any Rapid Inseam Trimming Machines of the type now manufactured by them, or of a type which may be hereafter put out on lease by the United Company in accordance with the right and license hereby granted, for a price less than Six Hundred and Fifty Dollars ($650.) United States currency, or its equivalent in the currency of the country where such machines is sold, offered or exposed for sale.

5. The United Company shall sem-annually on the thirtieth day of November and the thirty-first day of May in each year, render to the parties of the first part, or to any one of them as agent for the others, an account showing the number of machines, if any, put out by or by the authority of the United Company in accordance with the right and license hereby granted, during the period of six months ending with the last day of the preceding October or April and showing, also, the total amount received by the United Company by way of installation fee or lease premium and by way of rental or royalty for each such machine, and at the same time shall pay to the parties of the first part, or to any one of them as agent for the others, in respect to each such machine, an amount equal to forty per cent. (40%) of the amount so received for said machine, but the United Company shall not be required, under the provisions of this paragraph, to pay, in respect to any one machine, more than Two hundred and fifty Dollars ($250.) and when said amount has been paid in respect to any machine or machines all obligations of the United Company under this paragraph in respect to such machine or machines shall immediately cease and determine.

6. The parties of the first part shall semi-annually on the thirtieth day of November and the thirty-first day of May in each year render to the United Company an account, showing the number of Rapid Inseam Trimming Machines, of the type now put out by the

Keighley Company, or of the type which may hereafter be put out on lease by the United Company in accordance with the right and license hereby granted, sold by the parties of the first part, or by any of them, during the period of six months ending with the last day of the preceding October or April and at the same time shall pay to the United Company, in respect to each machine so sold, the sum of Two Hundred Dollars ($200.)

7. The United Company shall have the exclusive right to manufacture machines, to be put out upon lease in accordance with the right and license hereby granted, and the parties of the first part shall supply to the United Company, upon request and without expense other than the actual cost of making duplicates where duplicates are necessary, all blue prints, drawings, patterns and designs necessary or useful in such manufacture and in the possession or control of the parties of the first part, and the United Company will, upon request, manufacture for the parties of the first part, machines which the parties of the first part may desire for sale, under the terms of this agreement, at a reasonable price to cover the cost of such manufacture. But the United Company agrees that before putting out in the United States of America such machines of its own manufacture, it will purchase from the Keighley Company, for the purpose of leasing the same, thirty-four machines, which have already been manufactured by the Keighley Company or are in the process of manufacture for delivery under the terms of an agreement entered into by the Keighley Company with one Thomas G. Plant, dated January 26, 1910, the purchase price of each of said machines to be One Hundred Dollars ($100.) net cash f. o. b. Vineland, N. J., plus cost of shipping cases. And the Keighley Company agrees to manufacture such other machines as may be desired by the United Company to put out on lease, in accordance with the right and license hereby granted, at a reasonable price to cover the manufacturing cost thereof but not to exceed for the first seventy-five machines ordered (not including the thirty-four machines already mentioned) One Hundred Dollars ($100.) net cash f. o. b. Vineland, per machine, to which is to be added the actual cost of making cases for shipment. But the Keighley Com-

pany shall not be required under the provisions of this paragraph to furnish machines in excess of the capacity of its present plant which is understood to be not more than five machines per week.

8. The Keighley Company agrees that it will not enforce, or attempt to enforce, said agreement with said Thomas G. Plant, and that as soon as the thirty-four machines mentioned in the preceding paragraph have been taken by the United Company, it will execute or cause to be executed such a release or assignment to the United Company thereof as the United Company may desire.

9. The United Company agrees to withdraw forthwith three (3) suits for the infringement of its Letters Patent brought by it against the George H. Snow Company of Brockton, Massachusetts, on account of the use by the said Company of Inseam Trimming Machines heretofore put out by the Keighley Company, and proper entries are to be made in the record of the District Court of the United States for the District of Massachusetts where said suits are pending to effectually dispose of the same, without costs to either party.

10. The United Company agrees that it will faithfully endeavor to promote the business of leasing Inseam Trimming Machines embodying the inventions and improvements of the parties of the first part, but shall refer to the Keighley Company all requests for the purchase of such machines from persons who do not desire or are not willing to lease the same.

11. This agreement shall apply, territorially, to all countries of the world where the inventions and improvements of the parties of the first part, described in the first paragraph hereof, or any of them, are protected by Letters Patent except in so far as said inventions and improvements are covered by an agreement, dated October 13, 1911, between the Keighley Company and Gimson & Company of Leicester, England, and by an agency contract between the Keighley Company and D. Heinsohn, of Oberursel by Frankfort au Main, Germany, while said agreements remain in force and binding on the Keighley Company, the last named contract to be terminated immediately by the Keighley Company in accordance with the right of termination therein reserved, and shall

continue in each of such countries, during the continuance in force and apparent validity of Letters Patent of that country, covering said inventions and improvements of the parties of the first part, or any of them. The United Company expressly reserves the right to proceed against Gimson & Company and against users of Inseam Trimming Machines put out by Gimson & Company for infringement of Letters Patent owned by the United Company or any of its allied or subsidiary companies.

12. The Keighley Company hereby assigns, transfers and sets over unto the United Company all contracts of lease other than its "forty-nine year" lease contracts, so-called, covering Inseam Trimming Machines heretofore put out by the Keighley Company, the machines covered by said contracts and all benefits and advantages to be derived therefrom and the United Company agrees to assume and perform all the obligations of the Keighley Company under said leases and to pay the Keighley Company in respect to each such machine a sum equal to forty per cent (40%) of the total amount of the rental or royalty received by the United Company for the use thereof until the total amount so paid in respect to such machine is equal to One Hundred and Fifty Dollars ($150) United States currency, at which time all further payments in respect to such machine shall cease. Accounts shall be rendered and payments made under the provisions of this paragraph at the times and for the periods provided in paragraph 5 in respect to accounts and payments covering machines put out on lease by the United Company.

13. The Keighley Company hereby sells and delivers to the United Company four Inseam Trimming Machines now in the possession of the above mentioned D. Heinsohn, and also two machines in the possession of Gimson & Company at their agency in Paris, France, if said machines are not covered by the provisions of the preceding paragraph or have not been otherwise finally disposed of for the account of the Keighley Company, and the United Company agrees to pay to the Keighley Company for each of such machines the sum of One Hundred ($100.) in United States currency, plus the freight and duty which has heretofore been paid in respect to

the same by the Keighley Company, but such payment is not to be made in respect to any of said machines until the same has been put out on lease by the United Company in accordance with the right and license hereby granted. The Keighley Company agrees to supply gratis all necessary parts and attachments to complete said machines or alter them to the type of machine now being put out by the Keighley Company.

14. The Keighley Company shall continue to enjoy the benefits of all agreements for the sale or lease, under its "forty-nine year" lease contract, so-called, of Rapid Inseam Trimming Machines heretofore entered into by said company and shall have the exclusive privilege of furnishing duplicate parts, extras, mechanisms, devices and supplies for use in or in connection therewith. The parties of the first part shall also have the exclusive privilege of furnishing duplicate parts, extras, mechanisms, devices and supplies for use in or in connection with machines sold by the Keighley Company in accordance with this agreement, but they shall not, nor shall any of them, knowingly, furnish duplicate parts, extras, mechanisms, devices or supplies for use in or in connection with machines leased by the United Company in accordance with the right and license hereby granted. The United Company, however, agrees, upon the request of the parties of the first part, or any of them, to supply to old customers of the Keighley Company and to vendees of the parties of the first part, duplicate parts, extras, mechanisms, devices and supplies at the same prices charged to lessees of the United Company.

15. The payment of Two Hundred Dollars ($200.) required to be made by the parties of the first part under the provisions of Article 6 of this agreement in respect to machines sold by the parties of the first part or any of them, shall not be required to be made in respect to Inseam Trimming Machines of the type now put out by the Keighley Company, or of said type as the same may hereafter be altered or improved by reason of inventions of the said Keighleys, or any of them, while such machines are used solely in the manufacture of footwear made by or for the said

Keighleys, or a corporation controlled by them, at their factory at Vineland, N. J.

16. The expression "United Company" wherever herein used, shall include the United Shoe Machinery Company and its allied or subsidiary companies, and its and their respective successors, nominees and assigns, and all agreements binding upon the parties of the first part shall be binding upon and enforceable against their respective representatives and assigns.

Executed in duplicate the day and year first above written.

THE KEIGHLEY COMPANY, INC.
C. P. Keighley, Sec'y.
W. B. Keighley
Chas. Keighley
C. Percy Keighley.
UNITED SHOE MACHINERY COMPANY
Edwd. P. Hurd, Assistant Treasurer.

PLAINTIFF'S EXHIBIT 276.

[Put in Evidence, page 4865.]

THE COMMONWEALTH OF MASSACHUSETTS.
EXECUTIVE DEPARTMENT.

BOSTON, February 5, 1914.

I, David I. Walsh, Governor of the Commonwealth, do hereby certify that Frank J. Donahue, whose genuine signature appears to the annexed certificates of authentication, is now, and was at the date of said certificates, Secretary of the Commonwealth, duly elected and qualified; that as such he is the lawful custodian of the Great Seal of the Commonwealth; that all his official acts as such are entitled to full faith and credit; that his said certificates are in due form of law; and that the Great Seal thereto attached is the genuine Great Seal of the Commonwealth.

Given under my hand at Boston this fifth day of February in the year 1914.

DAVID I. WALSH,
Governor.

THE COMMONWEALTH OF MASSACHUSETTS.
OFFICE OF THE SECRETARY.

BOSTON, February 5, 1914.

I, Frank J. Donahue, Secretary of the Commonwealth, do hereby certify that David I. Walsh, whose genuine signature appears to the foregoing certificate of attestation, is now, and was at the date of said certificate, the Governor of The Commonwealth of Massachusetts, duly elected by lawful authority and legally qualified thereto.

In testimony of which I have hereunto affixed the Great Seal of the Commonwealth, in my official custody and possession.

FRANK J. DONAHUE,
[SEAL] *Secretary of the Commonwealth.*

Post-office address of Company in Massachusetts: United Shoe Machinery Company, 205 Lincoln Street, Boston, Mass.

[Acts of 1909, Chap. 490, Part III.]

Section 54. Every foreign corporation (of the classes enumerated in section 58, Chapter 437, Acts of 1903) shall annually, within thirty days after the date fixed for its annual meeting, or within thirty days after the final adjournment of said meeting, but not more than three months after the date so fixed for said meeting, prepare and file in the office of the secretary of the commonwealth, upon payment of the fee provided in section ninety-one of chapter four hundred and thirty-seven of the acts of the year nineteen hundred and three, a certificate signed and sworn to by its president, treasurer, and by a majority of its board of directors, showing the amount of its authorized capital stock, and its assets and liabilities as of a date not more than ninety days prior to said annual meeting, in such form as is required of domestic business corporations under the provisions of section forty-five of said chapter, and the change or changes, if any, in the other particulars included in the certificate required by section sixty of said chapter, made since the filing of said certificate or of the last annual report.

Section 55. A certificate which is required to be filed by the pre-

ceding section shall be accompanied by a written statement under oath by an auditor, as provided in section forty-seven of chapter four hundred and thirty-seven of the acts of the year nineteen hundred and three, except that such auditor shall in all cases be chosen by the board of directors. Before it is filed it shall be submitted to the commissioner of corporations, who shall examine said certificate and shall as tax commissioner assess upon the corporation an excise tax in accordance with the provisions of the following section. If he finds that the certificate is in compliance with the requirements of the preceding section, he shall indorse his approval thereon; but no certificate shall be filed until he has indorsed his approval thereon, and until the excise tax required by the following section has been paid to the treasurer and receiver general.

Section 56. Every foreign corporation shall, in each year, at the time of filing its annual certificate of condition, pay to the treasurer and receiver general, for the use of the commonwealth, an excise tax to be assessed by the tax commissioner of one fiftieth of one per cent of the par value of its authorized capital stock as stated in its annual certificate of condition; but the amount of such excise tax shall not in any one year exceed the sum of two thousand dollars.

Acts of 1903, Chap. 437, Section 90. The fee for filing this certificate is $5.00, and should accompany the certificate. Check should be made payable to the Secretary of the Commonwealth.

Payment of Excise Tax should also accompany this certificate. Check should be made payable to the Treasurer of the Commonwealth.

We, Sidney W. Winslow President, Louis A. Coolidge Treasurer, and Edward P. Hurd, Charles H. Willson, Elmer P. Howe, Charles G. Rice, Wallace F. Robinson, George W. Brown, William Barbour, Alfred R. Turner, Robert T. Paine, 2nd, being a majority of the Directors of United Shoe Machinery Company a Corporation organized under the laws of the State of New Jersey having a usual place of business in Boston in the Commonwealth of Massa-

chusetts, in compliance with the provisions of chapter 490, Part III, Sec. 54, of the Acts of 1909, do hereby certify, that the amount of its authorized capital stock on the twenty-eighth day of February 1910, was Twenty-five million (25,000,000) dollars.

That the amount thereof then paid in was 20,850,519 dollars.

That the assets and liabilities of the Corporation on the above date were as follows: —

Note. — This should be of a date not more than ninety days prior to the annual meeting.

Assets.		Liabilities.	
Real Estate,	1,901,666 95	Capital stock,	20,850,519 00

State here the change, or changes, if any, since the filing of the certificate required by section 60, chapter 437, Acts of 1903, or since the filing of the last annual report, in the following particulars:

The name of the corporation.

The location of its principal office.

The date of annual meeting for election of officers

The amount of capital stock authorized is dollars.

The amount of capital stock issued is dollars.

the amount paid in thereon to the treasurer is Preferred, dollars. Common, dollars.

the number of its authorized shares is Preferred, Common,

the par value of its shares is Preferred, dollars. Common, dollars.

the amount of such payment made otherwise than in money is as follows: —

Paid in property, viz.: [State here the number of shares issued on each item.]

	Preferred.	Common.
Real estate: location, area,		
Machinery,		
Merchandise,		
Bills receivable,		
Stocks and securities,		
Patent rights,		
Trade-marks,		
Copyrights,		
Good will,		
Services,		
Expenses,		

[State the nature of such services and expenses.]

The Board of Directors of this Corporation, which has an outstanding capital stock of $100,000 or more, at a meeting held at Boston on the eighth day of September, A. D. 1909, have employed Amos D. Albee of Boston, as Auditor, pursuant to the provisions of section 55, of chapter 490, Part III, of the Acts of 1909, and of chapter 326, Acts of 1909.

President, Treasurer and majority of Directors should sign in space below.

(This applies to every corporation, with or without auditor's appointment.)

In Witness Whereof, we have hereunto signed our names, this twenty-second day of July in the year 1910.

SIDNEY W. WINSLOW, President
LOUIS A. COOLIDGE, Treasurer
EDWARD P. HURD
CHARLES H. WILLSON
ELMER P. HOWE
CHARLES G. RICE
WALLACE F. ROBINSON
GEORGE W. BROWN
WILLIAM BARBOUR
ALFRED R. TURNER
ROBERT T. PAINE 2d

State of Massachusetts,

County of Suffolk, ss., Boston, August 15, 1910.

Then personally appeared the above-named Elmer P. Howe, and made oath that the foregoing certificate, by him subscribed, is true to the best of his knowledge and belief.

Before me,

(L S) Nelson B. Todd, Notary Public.

State of Massachusetts,

County of Suffolk, ss., Boston

On this twenty-second day of July, A. D. 1910, before me personally appeared the above named Louis A. Coolidge and on the twenty-sixth day of July, 1910, before me personally appeared the above named Sidney W. Winslow and Edward P. Hurd, and on the twenty-seventh day of July, 1910, before me personally appeared the above named Charles H. Willson, and on the fourth day of August, 1910, before me personally appeared the above named Charles G. Rice, and on the fifth day of August, 1910, before me personally appeared the above named Wallace F. Robinson, and on the eighth day of August before me personally appeared the above named George W. Brown, and on the sixteenth day of August, 1910, before me personally appeared the above named Robert T. [Put in Evidence, page 4865.]

Post-office address of Company in Massachusetts: United Shoe Machinery Company 205 Lincoln Street, Boston, Mass.

[Acts of 1909, Chap. 490, Part III.]

Section 54. Every foreign corporation (of the classes enumerated in section 58, Chapter 437, Acts of 1903) shall annually, within thirty days after the date fixed for its annual meeting, or within thirty days after the final adjournment of said meeting, but not more than three months after the date so fixed for said meeting, prepare and file in the office of the secretary of the commonwealth, upon payment of the fee provided in section ninety-one of chapter four hundred and thirty-seven of the acts of the year nineteen hundred and three, a certificate signed and sworn to by its president, treasurer, and by a majority of its board of directors, showing the amount of its authorized capital stock, and its assets and liabilities as of a date not more than ninety days prior to said annual meeting, in such form as is required of domestic business

corporations under the provisions of section forty-five of said chapter, and the change or changes, if any, in the other particulars included in the certificate required by section sixty of said chapter, made since the filing of said certificate or of the last annual report.

Section 55. A certificate which is required to be filed by the preceding section shall be accompanied by a written statement under oath by an auditor, as provided in section forty-seven of chapter four hundred and thirty-seven of the acts of the year nineteen hundred and three, except that such auditor shall in all cases be chosen by the board of directors. Before it is filed it shall be submitted to the commissioner of corporations, who shall examine said certificate and shall as tax commissioner assess upon the corporation an excise tax in accordance with the provisions of the following section. If he finds that the certificate is in compliance with the requirements of the preceding section, he shall indorse his approval thereon; but no certificate shall be filed until he has indorsed his approval thereon, and until the excise tax required by the following section has been paid to the treasurer and receiver general.

Section 56. Every foreign corporation shall, in each year, at the time of filing its annual certificate of condition, pay to the treasurer and receiver general, for the use of the commonwealth, an excise tax to be assessed by the tax commissioner of one fiftieth of one per cent of the par value of its authorized capital stock as stated in its annual certificate of condition; but the amount of such excise tax shall not in any one year exceed the sum of two thousand dollars.

Acts of 1903, Chap, 437, Section 90. The fee for filing this certificate is $5.00, and should accompany the certificate. Check should be made payable to the Secretary of the Commonwealth.

Payment of Excise Tax should also accompany this certificate. Check should be made payable to the Treasurer of the Commonwealth.

We, Sidney W. Winslow, President, Louis A. Coolidge, Treasurer, and Wallace F. Robinson, Edward P. Hurd, J. H. Connor, Elmer P. Howe, A. R. Turner, Joseph C. Kilham, Frank Wood,

John H. Hanan, William Woodward and C. G. Rice being a majority of the Directors of United Shoe Machinery Company a Corporation organized under the laws of the State of New Jersey, having a usual place of business in Boston in the Commonwealth of Massachusetts, in compliance with the provisions of chapter 490, Part III, Sec. 54, of the Acts of 1909, do hereby certify, that the amount of its authorized capital stock on the First day of March, 1911, was Twenty-five million 00/100 (25,000,000) dollars.

That the amount thereof then paid in was 20,850,519 dollars.

No. 301 (C. C. 911).

UNITED STATES OF AMERICA

v.

UNITED SHOE MACHINERY COMPANY, OF NEW JERSEY, ET AL.

EXHIBITS FOR DEFENDANTS.

DEFENDANTS' EXHIBIT 10.

[Put in Evidence, page 450.]

Heeling Machine Department. (1305)

Lease and License Number .

This Lease and Agreement made at Boston, in the State of Massachusetts, this day of 19 , between the United Shoe Machinery Company, a corporation organized under the laws of the State of New Jersey, having an office in said Boston, hereinafter referred to as the lessor, of the one part, and of in the State of , hereinafter referred to as the lessee, of the other part:

Witnesseth, that the lessor, in consideration of the covenants and agreements on the part of the lessee herein contained, does hereby lease to and license the lessee under any letters patent belonging to the lessor or under which the lessor has the right to grant such license affecting any inventions which are now or hereafter shall be embodied therein or employed in the operation thereof, to use the machine or machines of the Heeling Machine

Department of the lessor now or hereafter delivered to the lessee and designated by number or numbers in the following schedule, viz. : —

SCHEDULE OF MACHINES.

Automatic Heel Compressing Machine (No. 4, Model), No.
McKay Rapid Nailing Machine, No.
McKay Automatic Heel Loading and Attaching Machine, No.
American Lightning Nailing Machine, No.
Improved National Nailing Machine, No.
McKay Heel Trimming and Randing Machine, No.
McKay Knife Grinding Machine, No.
Smith Heel Trimming Machine, No.
Bussel Heel Trimming Machine, No.
Ultima Heel Trimming Machine, No.

and any duplicate parts, extras, mechanisms and devices relating thereto, or used in connection therewith, now attached to or delivered with the said designated machine or machines, or which may at any time hereafter be obtained from the lessor, or be added thereto by or with the consent of the lessor (the whole of which machine or machines, duplicate parts, extras, mechanisms and devices, held by the lessee under these presents, whether now or hereafter delivered to or in the possession of the lessee, is hereinafter referred to as the "leased machinery"), subject to the conditions hereinafter contained.

And that the following are agreed to as conditions of the lease and license of the leased machinery, all of which the lessee covenants and agrees to keep and perform : —

One. The leased machinery shall at all times remain and be the sole and exclusive property of the lessor, and the lessee shall have no right of property therein, but only the right to use the same, upon the conditions herein contained. The leased machinery shall be used only by the lessee himself or by operatives in his direct employ, and only in the factory now occupied by him at in the State of . The leased machinery shall not be transferred or delivered or sublet to any other person or corporation, and neither the lease nor the license hereby granted can be assigned by the

lessee by his own act or by operation of law. If the lessee becomes insolvent or bankrupt, or has a receiving order made against him, or makes or executes any bill of sale, deed of trust or assignment for the benefit of his creditors, or if a sale, mortgage, lease or removal of the leased machinery, or any part thereof, be made or attempted, or if any distress or execution or attachment be levied thereon, then and in each such case any or all leases of or licenses to use machinery then existing between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, shall at the option of the lessor cease and determine, and the possession of and full right to and control of all machinery the leases or licenses of which are so terminated shall thereupon revest in the lessor free from all claims or demands whatsoever. The lessor and its agents and employees shall at all times be given access to the leased machinery for the purpose of inspecting it or watching its use and operation, or of altering, repairing, improving, or adding to it, or determining the nature or extent of its use, and the lessee shall afford all reasonable facilities therefor.

Two. The lessee shall at all times and at his own expense keep the leased machinery in good and efficient working order and condition, and shall not permit any one to injure or deface or remove any plate, or dates, numbers, or other inscriptions now or hereafter impressed on or affixed to the leased machinery by the lessor. The lessee shall obtain from the lessor exclusively, and shall pay therefor at the regular prices from time to time established by the lessor, all the duplicate parts, extras, mechanisms and devices of every kind needed or used in operating, repairing, or renewing the leased machinery, and the same shall form part of the leased machinery, and the lessee shall not otherwise make or allow to be made any addition, subtraction or alteration to, from, or in the leased machinery without the consent in writing of the lessor, nor interfere with the proper operation of the same.

Three. The lessee shall pay all taxes and assessments which shall be assessed in respect to the leased machinery or other machinery of the lessor held by the lessee under lease or license upon whomsoever assessed. All taxes or assessments in respect to leases,

licenses or agreements covering machinery, or the rights to payments thereunder, shall be construed, for the purposes of this article, to be assessed in respect to the machinery itself. In case at any time any unapportioned tax or assessment shall be assessed to the lessor in respect in part but not wholly to machinery of the lessor in the possession of the lessee the lessee shall pay to the lessor such proportionate part of the total amount of said unapportioned tax or assessment as the fair valuation, to be determined by the lessor, of said machinery of the lessor in the possession of the lessee bears to the fair valuation, to be determined by the lessor, of all machinery (excepting machinery, if any, in the lessor's own possession) in respect to which the unapportioned tax or assessment has been assessed: provided, however, that if such unapportioned tax or assessment includes any tax or assessment in respect to tangible property in the lessor's own possession the amount thereof, based, at the established rate, upon the fair valuation, to be determined by the lessor, of such property, shall first be deducted and the lessee shall pay his proportionate part as aforesaid of the balance only of said unapportioned tax or assessment after such deduction has been made.

Four. The lessee shall use the leased machinery to its full capacity for doing all work in manufacturing, preparing and attaching all heels and top-lifts and in manufacturing and preparing all soles and taps made or prepared or attached in his factory in the manufacture or preparation or attaching of which it can be used, and the leased machinery shall be used for no other purpose.

Five. The lessee shall pay to the lessor immediately upon the execution hereof as a lease premium the sum of dollars and the lessee shall also pay to the lessor on the last day of each calendar month as rent or royalty the sum of one-half of one cent for each pair of heels manufactured or prepared or attached during the next preceding calendar month in any way, whether wholly or in part, by the aid of the leased machinery or any part thereof: **provided, however, that in all cases when the lessee shall pay to the lessor on or before the fifteenth day of the calendar month the rent or royalty due for the use of the leased machinery for**

the next preceding calendar month the lessor will in consideration of such prompt payment grant a discount of fifty per cent. from such rent or royalty due for such preceding calendar month.

Six. In case any Compressing Machine (or Machines) hereby leased shall be used for compressing or otherwise operating upon top-lifts, soles or taps the lessee shall pay to the lessor independently of and in addition to the rental or royalty provided for in Article Five hereof a rental or royalty of one-quarter of one cent for each pair of top-lifts, soles or taps so compressed or operated upon. Such royalty shall be paid at the same time and in the same manner as the royalty provided for in said Article Five and shall be subject to discount for prompt cash payment, as in said Article Five provided.

Seven. The lessee guarantees that the rent or royalty herein provided (less all abatements) shall amount to at least dollars during each year embraced by this lease and at the end of each year the lessee shall pay to the lessor the amount, if any, by which the rent or royalty paid for said year is less than such guaranteed rent or royalty; provided, however, that if in any year the factory of the lessee remains wholly idle for any entire calendar month, then the amount of rent or royalty guaranteed for that year shall be reduced by one-twelfth for each such month that the factory thus remains wholly idle.

Eight. The lessor may attach to the leased machinery, or any thereof, an indicator or indicators to register the number of revolutions or movements of any part or parts thereof, and the lessee shall not allow any person (other than the lessor or its agents) to disturb or interfere with such indicator or indicators. In case any indicator thus attached shall from any cause cease to correctly indicate or register, or shall be disturbed or out of repair, or if the glass covering any such indicator shall be removed or broken or injured, then and as often as the same shall happen the lessee shall immediately by writing notify the lessor and at the same time explain the circumstances under which the same has happened. In case any such indicator ceases to indicate, or becomes or remains inaccurate, or the glass covering becomes or remains removed,

broken, or injured, because of any fault of the lessee or any one in his employ, or because of the failure of the lessee to give promptly the notice hereinbefore provided for, then, without prejudice to any other rights of the lessor hereunder, the lessee shall pay the lessor as rent or royalty, without the right to any discount, one-half of one cent per pair for each pair of heels, top-lifts, soles or taps, in the manufacture or preparation or attaching of which the leased machinery or any part thereof shall have been used. The lessee shall keep full and accurate accounts, independently of any indicators that may be placed upon the leased machinery, showing the number of heels, top-lifts, soles and taps, in the manufacture or preparation or attaching of which the leased machinery or any part thereof shall have been used, and shall allow the lessor at all times, by its agents or attorneys, to examine and to take copies of such accounts and entries of the lessee as may serve to determine the total number of such heels, top-lifts, soles and taps, and the lessee shall produce all such accounts and entries upon request. The lessee shall require each of his operators upon the leased machinery or any part thereof to keep upon blanks or blank books to be furnished by the lessor accurate daily records of the number of heels, top-lifts, soles or taps, in the manufacture or preparation or attaching of which he has used the leased machinery or any part thereof, and shall require his operators to sign such records, and, if requested so to do by the lessor, shall verify the same under oath. The lessee shall send to the office of the lessor in Boston, on or before the fifth day of each calendar month, the original records for the next preceding calendar month kept by his operators as above provided for; and in case, in any calendar month, none of the leased machinery has been used, the lessee shall notify the lessor in writing of that fact, on or before the fifth day of the next succeeding calendar month. The lessee shall also furnish any further information which may be called for in relation to the leased machinery or the use thereof.

And that the following agreements, stipulations and provisions are agreed to: —

Nine. If at any time the lessee shall fail or cease to use exclu-

sively heel attaching machinery held by him under lease from the lessor, for attaching the heels of all boots, shoes and other footwear made by or for the lessee the heels of which are attached by the aid of machinery, the lessor, although it may have waived or ignored prior instances of such failure or cessation, may at its option terminate forthwith by notice in writing any or all leases of or licenses to use machinery of any or all the kinds mentioned by name in said schedule then existing between the lessor and the lessee (whether as the result of assignment to the lessor or otherwise) and the possession of and full right to and control of all machinery, the lease of which is so terminated, shall thereupon revest in the lessor, free from all claims and demands whatsoever.

Ten. This lease and license shall continue, unless sooner terminated by the lessor because of breach thereof on the part of the lessee, or otherwise as herein provided, for seventeen years from the date hereof. But if any breach or default shall be made in the observance of any one or more of the conditions herein contained or contained in any other lease or license agreement subsisting between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise and expressed to be obligatory upon the lessee, the lessor shall have the right by notice in writing to the lessee to terminate forthwith any or all leases of or licenses to use machinery then in force between the lessor and the lessee, whether as the result of assignment to the lessor or otherwise, and this notwithstanding that previous breaches or defaults may have been unnoticed, waived, or condoned by or on behalf of the lessor. If, upon the expiration of the full term of this lease, the lessor does not request the return of the leased machinery, then the leased machinery shall continue to be held and used under and in accordance with the conditions of this lease and license, which shall thereupon be extended indefinitely as to term; but thereafter either the lessee or the lessor, upon sixty days' notice in writing to the other, may terminate this lease and license, whereupon the leased machinery shall be delivered forthwith to the lessor, as herein provided. Upon the expiration of this lease and license or any extension thereof or its termination by notice or by reason of any default

on the part of the lessee as to the terms of this lease and license or any other lease and license from the lessor, or otherwise in any manner whatsoever, the lessee shall forthwith deliver the leased machinery to the lessor at Beverly, Massachusetts, in good order, reasonable wear and tear alone excepted; and without prejudice to any other rights or remedies of the lessor hereunder, shall pay to the lessor upon demand such sum as may be necessary to put the leased machinery in suitable order and condition to lease to another lessee; and the lessee for himself, his heirs, executors, and administrators, hereby grants to the lessor, its successors and assigns, full right, power and authority to enter upon the premises and into any factory, room, or any place where the leased machinery, or any part thereof, may be, and take possession thereof, and take away the same.

Eleven. A notice in writing, signed by the president, a vice-president, the treasurer or the assistant treasurer of the lessor, or by any assignee of the lessor's rights hereunder, and posted by prepaid letter, addressed to the lessee or delivered at his usual or last known place of abode or business, that the lease and license hereby granted is determined or shall be determined at the expiration of a certain period, shall be a sufficient determination of the lease and license from the time of posting or delivering such notice, or from the expiration of the period therein mentioned, as the case may be. Any termination of this lease and license shall not release the lessee from his obligation to pay rent or royalty for the period prior to such termination, and shall be without prejudice to any other rights or remedies which the lessor may have for violation of contract, use of machines without right, or use of patented inventions without license.

Twelve. The lessee admits the validity for the full term expressed in the grant thereof (and every extension and renewal thereof) of each and every of the Letters Patent of the United States of America, owned by the lessor or under which it is licensed, any of the inventions of which are or hereafter may be embodied in the leased machinery. The lessee also agrees that he will not directly or indirectly infringe or contest the validity for the full term expressed

in the grant thereof or of any extension or renewal thereof, of any of the Letters Patent referred to in the Schedule of Patents hereto annexed or the title of the lessor thereto. The expiration of this agreement or any extension thereof or the termination or cesser of the lease and license hereby granted shall not in any way affect the provisions of this clause, or release or discharge the lessee from the admissions and estoppels herein set forth.

Thirteen. None of the terms or conditions of this lease and license shall be held to have been waived by any act or knowledge of the lessor, its agents or employees, but only by an instrument in writing, signed by the president, a vice-president or the treasurer of the lessor.

Fourteen. The term "lessor" shall include the said United Shoe Machinery Company and its successors and assigns. All the conditions and agreements binding on the lessee shall be binding on and enforceable against his legal representatives. In the construction of this instrument, words relating to the number and gender of the parties shall be read according to their real number and gender.

In witness whereof, the parties hereto have duly executed this instrument in duplicate, the day and year first above written.

No. 517,947, dated April 10, 1894.

And, Whereas, the Lessee desires a license to use the inventions, or some of them, which are patented in and by the above-recited Letters Patent, and also desires a lease of the machines which are designated by their numbers in the schedule of machines following, viz. : —

SCHEDULE OF MACHINES.

Ideal Lasting Machines.	No. , No. , No. , No. , No.
Rapid Lasting Machines (foot power)	No. , No. , No. , No. , No.
Rapid Lasting Machines (foot power)	No. , No. , No. , No. , No.
3 Rapid Power Lasting Machines,	No. *51*, No. *55*, No. *56*, No. , No.
Rapid Loose Tackers, with Hoppers,	No. , No. , No. , No. , No.
6 Rapid Loose Tackers, with Hoppers, No. *411-412*.	No. *405*, No. *406*, No. *399*, No. *400*,
Nicking Machines,	No. , No. , No. , No. , No.

The said machines being the property of the Lessor.

Now, Therefore, the Lessor, in consideration of one dollar and other valuable consideration to it paid by the Lessee, in full for rental and royalty hereunder, the receipt of which is hereby acknowledged, and in further consideration of the agreements and conditions hereinafter contained, on the part of the Lessee to be kept and performed, doth lease unto the Lessee the machines designated by their numbers in the foregoing Schedule of Machines, and doth license the Lessee and the operatives in his employment to use the machines hereby leased, and also such of the inventions patented as aforesaid as are embodied in the said machines, or

either or any of them, but upon the agreements and conditions hereinafter set forth; and this lease and license is granted by the Lessor and accepted by the Lessee on the express condition that the Lessee shall faithfully keep and perform all the agreements and conditions herein contained on his part to be kept and performed, and upon breach of the same, or either or any of them, by the Lessee, the Lessor, notwithstanding any express or implied waiver of any prior breach, may at its option cancel and terminate this lease and license, and upon written notice thereof by the Lessor to the Lessee or to any one in the possession or apparent control of the machines hereby leased, or either or any of them, this lease and license shall terminate, and possession of the said machines shall thereupon re-vest in the Lessor;

And the Lessee hereby agrees to keep and perform all the following conditions of this lease and license: —

First. The Lessee hereby agrees to use, and is hereby licensed to use, the machines hereby leased and the inventions patented as aforesaid only in his factory in *Chicago*, in the State of *Illinois*, and agrees to keep the said machines in working order at his own expense, and to purchase of the Lessor or its agents all parts for repairing the machines hereby leased, and all tacks to be used in the loose tackers and hoppers hereby leased, and agrees not to add to or subtract from the said machines any part or mechanism whatever, now or hereafter organized or connected therewith by the Lessor, nor to make nor allow to be made any change or alteration in the same, except by an authorized agent or employee of the Lessor, nor to remove or deface any dates, numbers, or inscriptions now or hereafter impressed thereon or affixed thereto by the Lessor.

Second. The Lessee hereby agrees to permit the agents and inspectors of the Lessor, at all reasonable times, to have convenient access to the machines, to examine and inspect the same and the use thereof, and to add improvements to or alter the machines as the Lessor may see fit; and the agreements and conditions herein contained shall apply to all improvements which the Lessor shall hereafter add to the machines, and to all patented inventions here-

after embodied therein, with the same effect as if the patents therefor were included in the foregoing schedule of patents.

Third. The Lessee agrees that he will not use or permit the use of the machines hereby leased, or either or any of them, on boots or shoes which are to be partially or wholly completed by the aid of any sole- or welt-sewing machine not leased to him by the Lessor (except that they may be used in lasting boots and shoes known in the trade as "McKay Sewed"), and that he will not use or permit the use of any of the tackers hereby leased on boots or shoes which have been partially or wholly lasted by the aid of any lasting machine not leased to him by the Lessor.

Fourth. This lease and license is not assignable by the Lessee by his own act or by operation of law; and all the rights and interests which under this instrument, and by reason of the ownership of said machines and patents and patent rights belong to the Lessor, shall be deemed to belong to and may be enforced in the names of the successors and assigns of the Lessor, and all the agreements and conditions binding on the Lessee shall be binding on his executors or administrators.

Fifth. It is agreed that the numbers of the machines named in this lease may be entered herein by the Lessee after signing; and, in case the Lessee shall require more than one machine, it is agreed that the termination of words relating to the machines shall be construed and considered as written in the singular or plural as the number of machines entered in the lease and license may require; and also that this instrument may be used in cases where the party of the second part shall consist of more than one person, and in that case the termination of the words relating to the said party shall be considered as plural or singular as the sense may require; and that when the party of the second part so consists of several persons, and they sign this lease, either individually or by their firm signature, such signature or signatures shall bind them both jointly and severally to the terms and agreements herein contained.

Sixth. The Lessee agrees that he will not in any way violate or infringe or contest the validity of any of the patents under which he is hereby licensed, or the sufficiency of their specifications, or

the validity of the title of the Lessor to said patents, or any of them.

Seventh. The following are also agreed to by the parties as conditions of this lease and license: —

(a) That the power conveyed by this lease and license is only the right to use the said machines, and not the right to make or sell any machine embodying the inventions patented as aforesaid, or any of them; and that a transfer or removal of the machines hereby leased, or either or any of them, can only be made with the consent of the Lessor; and that if the Lessee is or becomes at any time insolvent or bankrupt, or shall make an assignment for the benefit of his creditors, or if a sale, lease, transfer, or removal of said machines, or any of them, shall be made or attempted by the Lessee, or by operation of law, or by any legal officer, representative, or assignee, as the property of the Lessee, without the written consent of the Lessor, this lease and license shall thereupon terminate and expire, and the Lessor may take possession of said machines without the Lessee having any claim for the repayment of any part of the sum or sums which he may have paid as consideration for the delivery of this lease and license, or for lease and royalty under this instrument.

(b) That in case the Lessee refuses or neglects to perform, or violates, any of the conditions in this lease and license contained, the Lessor, notwithstanding any express or implied waiver of any prior breach, shall have the right to terminate this lease and license by giving written notice as aforesaid that it has elected so to do; and upon the giving of such notice this lease and license shall be terminated, and the possession of said machines shall thereupon revest in the Lessor free and discharged of this lease and license; and the Lessor, or its authorized agent or agents, may thereupon enter any premises where said machines may be, and may take and remove them, and the Lessee shall have no claim whatever on account of any sum or sums he may have paid for or under this lease and license.

(c) That this lease and license shall continue (provided the Lessee complies with the agreements and conditions herein con-

tained) until the expiration of all and every the Letters Patent referred to in the foregoing Schedule of Patents, or any extensions or renewals of the same; and upon the expiration thereof the Lessee shall deliver to the Lessor, its successors or assigns, the machines hereby leased in good order, natural wear and tear alone excepted.

In witness whereof, the Lessor has caused these presents to be signed and its corporate seal to be affixed hereto by its *Treasurer*, and the Lessee has set his hand and seal hereto the day and year first above written.

[SEAL] GOODYEAR SHOE MACHINERY COMPANY,
by Geo. W. Randall, Treas.

Lessee will please sign here. ☞ FLORSHEIM & COMPANY [SEAL]
Milton J. Florsheim, Pres.

[Attached to Defendants' Exhibit 33.]

REQUEST.

To the Goodyear Shoe Machinery Company, No. 158 Summer Street, Boston, Mass.

The undersigned, Lessee under Lease No. *124*, granted by the Copeland Rapid Laster Manufacturing Company, dated *June 2*, 189*4*, hereby requests you to terminate said lease, and to grant him a new lease [Form 595] of the lasting and other machines referred to in said Copeland lease, upon the terms mentioned in your circular letter dated May, 1895.

And the undersigned herewith returns his said Copeland lease for cancellation, and sends a check for *$300.* as consideration for the grant of said new lease.

Dat this *seventh* day of *January*, 1897.

[Address] FLORSHEIM & COMPANY
Milton J. Florsheim, Pres.

DEFENDANTS' EXHIBIT 34.

[Put in Evidence, page 974.]

[Stamped :]
From Goodyear Shoe Mach'y Co.
51–53 Franklin St. Chicago,— Illinois.
George E. Milner.

[Duplicate Form 1291.] *Chicago, Ills.* Dated *June 25, 1894*

We hereby propose to take a lease of the machinery mentioned below, of the Copeland Rapid Laster Manufacturing Company, according to the form of lease adopted by the Company therefor, and *we* agree to pay upon delivery of the said machinery, the sum of *$300.* as consideration for the delivery of said lease, for the expenses of setting up said machinery, and for possession under the lease of said machinery.

One Power Lasting Machines. *#55 July 3/94*
Lasting Machines.
Two Loose Tackers. *#399, 400.* "

No title to the above mentioned machinery is acquired other than is given in the lease aforesaid.

A competent man is to be sent to set up said machinery at the expense of the said Company.

Freight and transportation charges on said machinery from Boston, Mass., shall be paid by the lessee.

How shall we ship, by freight or express? *"Blue Line".*

Applicant sign here. FLORSHEIM & Co.

Send us pattern of the innersole of the largest and widest of each style men's shoe you make. This is necessary before the machine can be shipped, as the toe wipers are made from these patterns.

We accept the above proposition, and promise to deliver the lease and machinery as specified therein.

Boston, July 2 1894

COPELAND RAPID LASTER MANUFACTURING COMPANY,
By S. V. A. Hunter Treasurer.

Two Loose Tackers. *405, 406.*
Hand Tackers.
Hand Pegger.
Nicking Machines.
Shank Pullers.

It being understood and agreed that we are to have a trial of the above machines for a period of sixty days from date of delivery of same to us; at the expiration of which time we hereby agree either to return the same to the Copeland Rapid Laster Mfg. Co. or send check to cover the above consideration. It is also understood and agreed that if we decide to return the machines we are to pay for the wipers furnished.

No title to the above mentioned machinery is acquired other than is given in the lease aforesaid.

A competent man is to be sent to set up said machinery at the expense of the said Company.

Freight and transportation charges on said machinery from Boston, Mass., shall be paid by the lessee.

How shall we ship, by freight or express? *Blue Line.*

Applicant sign here. FLORSHEIM & Co.

Send us pattern of innersole of the largest and widest of each style men's shoe you make. This is necessary before the machine can be shipped, as the toe wipers are made from these patterns.

We accept the above proposition, and promise to deliver the lease and machinery as specified therein.

Boston, May 26 1894.

COPELAND RAPID LASTER MANUFACTURING COMPANY,
By S. V. A. Hunter Treas.

Lease and License No. *124*.

Transfer from Lease No. [Form 1094.]

This Lease and License, made at Boston, Massachusetts, this *2nd* day of *June* A. D. 189*4*, by and between Copeland Rapid Laster Manufacturing Company, a corporation incorporated under the laws of the State of Maine, and having an office in said Boston, Lessor, and party hereto of the first part, and *Florsheim & Co.* doing business in *Chicago, Ill.* Lessee, and party hereto of the second part, witnesseth,

That, Whereas, the Lessor is the owner of or is licensed under the several Letters Patent of the United States, recited in the schedule following, viz. : —

SCHEDULE OF PATENTS.

No. 211,612, dated January 21, 1879.	No. 333,709, dated January 5, 1886.

And, Whereas, the Lessee desires a license to use the inventions, or some of them, which are patented in and by the above-recited Letters Patent, and also desires a lease of the machines which are designated by their numbers in the schedule of machines following, viz. : —

SCHEDULE OF MACHINES.

Rapid Lasting Machines,	No. , No. , No. , No. , No.
Rapid Power Lasting Machines,	No. *51*, No. *55*, No. *56*, No. , No.
Rapid Loose Tackers, with Hoppers,	No. , No. , No. , No. , No.
Rapid Loose Tackers, with Hoppers, No. *411–412*.	No. *405*, No. *406*, No. *399*, No. *400*,
Nicking Machines,	No. , No. , No. , No. , No.
Paper Strip Tackers,	No. , No. , No. , No. , No.

The said machines being the property of the Lessor.

Now, therefore, the Lessor, in consideration of one dollar and other valuable consideration to it paid by the Lessee, the receipt of which is hereby acknowledged, and in further consideration of the agreements and conditions hereinafter contained, on the part of the Lessee to be kept and performed, doth lease unto the Lessee the machines designated by their numbers in the foregoing Schedule of Machines, and doth license the Lessee and the operatives in his employment to use the machines hereby leased, and also such of the inventions patented as aforesaid as are embodied in the said machines, or either or any of them, but upon the agreements and conditions hereinafter set forth; and this lease and license is granted by the Lessor and accepted by the Lessee on the express condition that the Lessee shall faithfully keep and perform all the agreements and conditions herein contained on his part to be kept and performed, and upon breach of the same, or either or any of them, by the Lessee, the Lessor, notwithstanding any express or implied waiver of any prior breach, may at its option cancel and terminate this lease and license, and upon written notice thereof by the Lessor to the Lessee or to anyone in the possession or apparent control of the machines hereby leased, or either or any of them, this lease and license shall terminate, and possession of the said machines shall thereupon revest in the Lessor;

And the Lessee hereby agrees to keep and perform all the following conditions of this lease and license: —

First. The Lessee hereby agrees to use, and is hereby licensed to use, the machines hereby leased and the inventions patented as aforesaid only in his factory in *Chicago*, in the State of *Illinois*, and agrees to keep the said machines in working order at his own expense, and to purchase of the Lessor or its agents all parts for repairing the machines hereby leased, and all the tack strips to be

used in the hand tackers hereby leased, and all tacks to be used in the loose tackers and hoppers hereby leased, and agrees not to add to or subtract from the said machines any part or mechanism whatever, now or hereafter organized or connected therewith by the Lessor, nor to make nor allow to be made any change or alteration in the same, except by an authorized agent or employee of the Lessor, nor to remove or deface any dates, numbers, or inscriptions now or hereafter impressed thereon or affixed thereto by the Lessor.

Second. The Lessee hereby agrees to permit the agents and inspectors of the Lessor, at all reasonable times, to have convenient access to the machines, to examine and inspect the same and the use thereof, and to verify the operator's reports, and to add improvements to or alter the machines as the Lessor may see fit; and the agreements and conditions herein contained shall apply to all improvements which the Lessor shall hereafter add to the machines, and to all patented inventions hereafter embodied therein, with the same effect as if the patents therefor were included in the foregoing schedule of patents.

Third. The Lessee agrees to keep proper books of account and to make true and complete entries therein, showing the number of pairs of boots or shoes which are lasted, in whole or in part, upon or by the aid of the machines hereby leased, or either or any of them, or by the use of the inventions patented as aforesaid, or either or any of them, and to render an account thereof to the Lessor on or before the tenth day of each month, which account shall specify the number of pairs of boots and shoes so lasted, in whole or in part, as aforesaid; and the Lessee agrees to require each operator on said lasting machines to keep in duplicate in books or on printed forms to be furnished by the Lessor, a daily record of all the boots or shoes lasted, in whole or in part, upon or by the aid of the said machines, one copy of which, containing the record for the calendar month next preceding, the Lessee agrees to send, on or before the tenth day of each month, to the Lessor, and, whenever requested by the Lessor, to make oath to the correctness of said record, and to allow the Lessor, by its agents and attorneys,

to examine and take copies or extracts from the original book or books of account of the Lessee and the record kept by the operator or operators as aforesaid; and the Lessee hereby agrees to send to the Lessor, on or before the tenth day of each month, on a form to be furnished by the Lessor, the number of movements or revolutions of the shaft of each lasting machine hereby leased, as registered by the indicator thereon on the last day of the calendar month next preceding; and the Lessee heaeby agrees to send to the Lessor, on or before the tenth day of each month, in case the machines hereby leased have not been run during the month preceding one of the aforesaid books or forms furnished by the Lessor, marked across the face with the words, "not running", or "not in use".

Fourth. The Lessee agrees to pay unto the Lessor, as rent for the machines hereby leased and as royalty for the use of the inventions patented as aforesaid as hereby licensed, the sum of one cent for each and every pair of boots or shoes lasted, in whole or in part, upon or by the aid of the machines hereby leased, or either or any of them, or by the use of the said inventions, or either or any of them, the rents and royalties for all such boots and shoes lasted as aforesaid during one calendar month to be due and payable on the last day of the calendar month next following; but the Lessor hereby agrees that if the rents and royalties due on the last day of any month shall be paid on or before the fifteenth day of that month, it will, in consideration thereof, grant a discount of fifty per cent. from the rents and royalties above specified.

Fifth. The Lessee agrees that he will not in any way violate or infringe or contest the validity of any of the patents under which he is hereby licensed, or the sufficiency of their specifications, or the validity of the title of the Lessor to said patents, or any of them.

Sixth. The following are also agreed to by the parties as conditions of this lease and license: —

(a) That the power conveyed by this lease and license is only the right to use the said machines, and not the right to make or sell any machine embodying the inventions patented as aforesaid, or any of them; and that a transfer or removal of the machines hereby

leased, or either or any of them, can only be made with the consent of the Lessor; and that if the Lessee is or becomes at any time insolvent or bankrupt, or shall make an assignment for the benefit of his creditors, or if a sale, lease, transfer or removal of said machines, or any of them, shall be made or attempted by the Lessee, or by operation of law, or by any legal officer, representative, or assignee, as the property of the Lessee, without the written consent of the Lessor, this lease and license shall thereupon terminate and expire; and the Lessor may take possession of said machines without the Lessee having any claim for the repayment of any part of the sum or sums which he may have paid as consideration for the delivery of this lease and license, or for rent and royalty under this instrument.

(b) That in case the Lessee refuses or neglects to perform, or violates, any of the conditions in this lease and license contained, the Lessor, notwithstanding any express or implied waiver of any prior breach, shall have the right to terminate this lease and license by giving written notice as aforesaid that it has elected so to do; and upon the giving of such notice this lease and license shall be terminated, and the possession of said machines shall thereupon revest in the Lessor free and discharged of this lease and license; and the Lessor, or its authorized agent or agents, may thereupon enter any premises where said machines may be, and may take and remove them, and the Lessee shall have no claim whatever on account of any sum or sums he may have paid for or under this lease and license.

(c) That this lease and license shall continue (provided the Lessee complies with the agreements and conditions herein contained) until the expiration of all and every the Letters Patent referred to in the foregoing Schedule of Patents, or any extensions or renewals of the same; and upon the expiration thereof the Lessee shall deliver to the Lessor, its successors or assigns, the machines hereby leased in good order, natural wear and tear alone excepted.

Seventh. The Lessee hereby agrees that if the indicator attached to any lasting machine hereby leased shall cease to register or indi-

cate correctly the number of movements or revolutions of the shaft to which it is connected, or if the glass covering of the face of the indicator shall be broken, he will not use the said lasting machine, or allow it to be used, until the indicator thereon shall have been repaired or replaced by the Lessor; and agrees that if the glass covering of the indicator shall become broken, or if, for any reason, the indicator shall cease to indicate or register correctly, he will forthwith notify the Lessor in writing thereof; and the Lessee agrees that he will not, nor will he allow anyone, except an authorized agent or employee of the Lessor, to remove the indicator from the said lasting machine, or injure, alter, or in any way tamper therewith, or permit any such alteration, injury, or tampering to take place.

Eighth. This lease and license is not assignable by the Lessee by his own act or by operation of law; and all the rights and interests which under this instrument, and by reason of the ownership of said machines and patents and patent rights belong to the Lessor, shall be deemed to belong to and may be enforced in the names of the successors and assigns of the Lessor, and all the agreements and conditions binding on the Lessee shall be binding on his executors or administrators.

Ninth. It is agreed that the number of the machines named in this lease may be entered herein by the Lessor after signing; and, in case the Lessee shall require more than one machine, it is agreed that the termination of words relating to the machines shall be construed and considered as written in the singular or plural as the number of machines entered in the lease and license may require; and also that this instrument may be used in cases where the party of the second part shall consist of more than one person, and in that case the termination of the words relating to the said party shall be considered as plural or singular as the sense may require; and that when the party of the second part so consists of several persons, and they sign this lease, either individually or by their firm signature, such signature or signatures shall bind them both jointly and severally to the terms and agreements herein contained.

In witness whereof, the Lessor has caused these presents to be

signed and its corporate seal to be affixed hereto by its Treasurer, and the Lessee has set his hand and seal hereto the day and year first above written.

Executed in Duplicate.

DEFENDANTS' EXHIBIT 35.

[Put in Evidence. page 976.]

This Instrument Witnesseth that the United Shoe Machinery Company (hereinafter called the "United Company") the lessor or assignee of the lessor named in seventy-seven (77) several leases heretofore granted to Florsheim & Company, a corporation organized and existing under the laws of the State of Illinois, as lessee, covering certain machinery of the United Company all as set forth in the Schedule hereto attached and marked "Schedule A", said machinery being now in the possession of said Florsheim & Company as such lessee at its factory in Chicago, Illinois, does hereby consent and agree that said Florsheim & Company may permit The Florsheim Shoe Company, a corporation organized and existing under the laws of the State of West Virginia, to use in the factory above mentioned said machinery or any thereof; subject, however, to all the conditions, stipulations, provisions and agreements contained in said leases which shall be binding upon The Florsheim Shoe Company and during the continuance in force of this agreement shall have the same force and effect as if The Florsheim Shoe Company were named in said leases as a joint lessee thereunder with said Florsheim & Company; and that in consideration thereof the said Florsheim & Company and said The Florsheim Shoe Company do hereby jointly and severally covenant and agree to and with the United Company that said The Florsheim Shoe Company will faithfully observe and perform all said conditions, stipulations, provisions and agreements.

It is further agreed that during the continuance in force of this agreement or until the United Company has been notified that The Florsheim Shoe Company has ceased entirely the use of said machinery, all statements and accounts for moneys due or to become due to the United Company from either Florsheim & Company or The Florsheim Shoe Company in respect to said machinery, whether for rental or royalty for the use thereof or for parts or materials supplied for use in connection therewith or otherwise or by virtue of said leases may be rendered to The Florsheim Shoe Company.

Except as herein expressly set forth none of the conditions, stipulations, provisions or agreements contained in the leases above mentioned is hereby in any wise waived or modified, and this agreement may be cancelled and the consent hereby given withdrawn at any time by the United Company by notice in writing addressed to Florsheim & Company at Chicago, Illinois.

Executed in duplicate this 23rd day of April 1910.

THE FLORSHEIM SHOE COMPANY

The Florsheim Shoe Milton S. Florsheim, President.

Private Office Chicago, U. S. A. April 30, 1913

Attention of Mr. Chase:

United Shoe Machinery Co., Boston, Mass.

Gentlemen: Referring to your communication of the 28th inst., in regard to enclosed drafts which you state were apparently prepared by our attorney in Chicago, transferring to The Florsheim Shoe Company the right to use the Goodyear Shoe Machinery Company's machines.

Would kindly ask you to return them to us for our files as we would like to look them over.

We believe we originally sent you two copies executed by ourselves.

Under the three year bonus proposition has your company as yet made any allotment of the certificates? We understood said dis-

tribution was to be made in January but up to this writing we have heard nothing further in regard to the same.

Yours very respectfully,

THE FLORSHEIM SHOE COMPANY,

MSF)W By Milton S. Florsheim President

DEFENDANTS' EXHIBIT 37.

[Put in Evidence, page 977.]

Whereas by Lease and License Agreement L 149, dated January 7, 1897, the Goodyear Shoe Machinery Company, as lessor, did lease to Florsheim & Company, a corporation, as lessee, and did license the said Florsheim & Company to use, in accordance with the terms and conditions in said lease and license Agreement set forth, certain Lasting Machinery, in said Lease and License described, and

Whereas the said machinery, the said Lease and Agreement, and all title and rights of the said lessor therein and thereunder, have, since the said 7th of January, 1897, been transferred to and are now vested in the United Shoe Machinery Company, a corporation organized and existing under the laws of the State of Maine, and

Whereas the said corporation last above mentioned has requested that the rights of the said corporation, under said Lease and Agreement, to use the said machines, shall be transferred to The Florsheim Shoe Company, a corporation organized and existing under the laws of the State of Illinois.

Now, therefore, in compliance with said request the said United Shoe Machinery Company does hereby consent to the delivery of said machines to the said The Florsheim Shoe Company and does hereby transfer to the said The Florsheim Shoe Company the right to use in its factory at Chicago, Illinois, for the unexpired term of said Lease and Agreement the said machines designated by their numbers in the Schedule of machines contained in said Lease and Agreement, subject to all the conditions and agreements made incumbent upon the lessee by said Lease and Agreement, and does hereby accept the said The Florsheim Shoe Company as lessee of

said machines under said Lease and Agreement, in lieu of the said Florsheim & Company. The said The Florsheim Shoe Company, in consideration of the premises and the right hereby granted to it, does hereby covenant and agree with the United Shoe Machinery Company to keep and perform all of the conditions and agreements made incumbent upon the lessee in said Lease and Agreement contained.

In Witness Whereof the said United Shoe Machinery Company as lessor has caused its corporate seal to be hereto affixed and has caused these presents to be signed by its , and the said The Florsheim Shoe Company, as lessee, has caused its corporate seal to be hereto affixed and has caused these presents to be signed by its President, this 23rd day of April, 1908.

Chicago, June 27, 1899.

Goodyear Shoe Machinery Co. Boston, Mass.

Gentlemen: — We have had more or less correspondence with you regarding a royalty on your Company's machines. We have also had considerable difficulty in finding operators for these machines. If you will refer to previous correspondence, you will note that we have special arrangements with the Eppler Machinery Co., which entitle us to certain priviledges. Now we make this proposition, in order to adjust the matter; if you will agree to trade us Goodyear machines for the Eppler, that we now have, we will agree to sign all contracts, and also to pay you 4 cents per pair royalty. When your Mr. Lewis was here we spoke about the

matter to him, and he said he would advise us when he returned home.

We shall await your reply. Yours truly,

FLORSHEIM & COMPANY.

DEFENDANTS' EXHIBIT 40.

[Put in Evidence, page 1040.]

GOODYEAR WELT AND TURN SHOE MACHINE
AND
GOODYEAR OUTSOLE RAPID LOCKSTITCH MACHINE.

There is nothing in the leases of these machiness which requires the lessee to take from the Company any other machine or machines for any purpose whatsoever other than the welt sewing and outsole stitching of welt shoes and and the sole sewing of turn shoes, or which precludes the lessee from obtaining from any other source whatsoever any and all other machines which he may require for any and all operations whatsoever other than the welt sewing and outsole stitching of welt shoes and the sole sewing of turn shoes, or which precludes the lessee from using such other machines so obtained in conjunction with the leased Welt and Turn Sewing and Outsole Stitching Machines.

GOODYEAR AUXILIARY MACHINES.

There is nothing in any of the Company's leases which requires a lessee of any one or more of the Company's machines whatsoever to obtain from the Company any one or more of these Auxiliary Machines or which precludes a lessee of any one or more of the Company's machines from obtaining corresponding auxiliary machines from others or from using such machines so obtained in conjunction with any or all of the Company's machines, including the Company's Welting, Turn Sewing and Outsole Stitching Machines.

When obtained from the Company these machines are not in any way bound to or limited to use with Pulling Over, Lasting, Metallic, Heeling, General Department, or any other machinery obtained from the Company, excepting alone that they are limited to use on "Goodyear Welts and Turns" and in conjunction with the Good-

year Welt and Turn Shoe Machine and the Goodyear Stitcher, the two principal machines of the Goodyear System which together with the auxiliary machines form the system.

There is nothing in the leases of these auxiliary machines which requires the lessee to take from the Company or which precludes the lessee from obtaining from any other source whatsoever any and all auxiliary and other machines which he may require for any and all operations other than the welt sewing and outsole stitching of welt shoes and the sole sewing of turn shoes, or which precludes the lessee from using such other machines so obtained in conjunction with the leased Goodyear System Machines.

Rex Pulling Over Machine.

Rex Pulling Over Machines may be obtained from the Company on an Initial Payment form of lease under which the machines are not in any way bound to or limited to use with Pulling Over Auxiliary Machines, Welting, Stitching, Lasting, Metallic, Heeling, General Department or any other machinery obtained from the Company for any other operation upon the shoe; and there is nothing in this form of lease for these machines which requires the lessee to take from the Company, or which precludes the lessee from obtaining from any other source whatsoever any and all other kinds of machines which he may require for any and all operations whatsoever other than Pulling-over or from using such other machines so obtained in conjunction with the leased Pulling Over Machines held under this form of lease.

Rex Pulling Over System. — Auxiliary Machines.

If a lessee of the Company's Rex Pulling Over Machines under the above form of lease desires to obtain from the Company for use in conjunction with them one or more of the Auxiliary Machines of the Pulling Over System of the Company (which under this form of lease for the Pulling Over Machine he is under no obligation whatever to do) any or all of these Auxiliary Machines may be obtained by him on an Initial Payment form of lease under which the machines are not in any way bound to or limited to use with any other Pulling Over Auxiliary Machines, Welting, Stitching,

Lasting, Metallic, Heeling, General Department, or any other machinery, obtained from the Company for any other operation upon the shoe, excepting alone that such Pulling Over Auxiliary Machines leased on this form of lease are limited to use on shoes pulled over by the Rex Pulling Over Machine or machines held under lease from the Company under the above form of Initial Payment lease.

There is nothing in the above forms of lease for either the Pulling Over Machines or the Pulling Over Auxiliary Machines which requires the lessee to take from the Company or which precludes the lessee from obtaining from any other source whatsoever any and all Auxiliary and other machines which he may require for any and all operations other than Pulling Over, or which precludes the lessee from using such other machines so obtained in conjunction with the leased Pulling Over System Machines of the Company.

The royalty for Pulling Over System Machines held under the above form of lease is 1 cent (subject to 50% discount) for each pair of shoes operated upon by the Pulling Over Machines.

There is no additional royalty for the Auxiliary Machines.

CONSOLIDATED HAND METHOD LASTING MACHINE. — U. S. M. Co. LASTING MACHINE, No. 5.

Either or both of these machines may be obtained from the Company on an Initial Payment Lease under which the machines are not in any way bound to or limited to use with Welting, Stitching, Pulling Over, Metallic, Heeling, General Department, or any other machinery obtained from the Company for any purpose other than lasting, and there is nothing in this form of lease of these machines which requires the lessee to take from the Company any other machine or machines for any other purpose whatsoever or which precludes the lessee from obtaining from any other source whatsoever any and all other machines which he may require for any and all other operations, or from using such other machines so obtained in conjunction with the Company's lasting machines.

METALLIC MACHINES.

Any or all of these machines may be obtained from the Company on an initial payment lease under which the machines are not in

any way bound to or limited to use with Welting, Stitching, Pulling Over, Lasting, Heeling, General Department, or any other machinery obtained from the Company excepting Metallic machinery.

There is nothing in this form of lease for these machines which requires the lessee to take from the Company or which precludes the lessee from obtaining from any other source whatsoever any and all machines other than Metallic which he may require for any and all other operations or from using such other machines so obtained in conjunction with the Company's Metallic Machines.

HEELING MACHINES.

Any or all of these machines may be obtained from the Company on an Initial Payment Lease under which the machines are not in any way bound to or limited to use with Welting, Stitching, Pulling Over, Lasting, Metallic, General Department, or any other machinery obtained from the Company for any other operation upon the shoe, excepting alone those operations performed by the machines of the Heeling Department.

There is nothing in this form of lease for these machines which requires the lessee to take from the Company or which precludes the lessee from obtaining from any other source whatsoever any and all other machines which he may require for any and all operations whatsoever, other than the operations of the machines of the Heeling Department, or from using such other machines so obtained in conjuction with the Company's Heeling Machines.

CLICKING MACHINES.

There is nothing in any of the Company's leases for other machines which requires a lessee of any one or more of the other machines of the Company to obtain Clicking Machines from the Company, or which prevents a lessee of any one or more of the other machines of the Company from obtaining Clicking Machines from others or from using them in conjunction with any of the Company's other machines.

When obtained from the Company these machines are not bound to or limited to use with Welting, Stitching, Pulling Over, Lasting,

Metallic, Heeling, General Department, or any other machinery obtained from the Company, and there is nothing in the lease covering them which requires the lessee to take from the Company any other machine or machines for any other purpose whatsoever, or which precludes the lessee from obtaining from any other source whatsoever any and all other machines which he may require for any and all other operations or from using such other machines so obtained in conjunction with the Clicking Machines obtained from the Company.

GENERAL DEPARTMENT MACHINERY.

There is nothing in any of the Company's leases which requires a lessee of any one or more of the Company's machines whatsoever to obtain any of these machines from the Company, either by purchase or lease, or which requires a lessee having one or more of these machines to take others, or which prevents a lessee of any one or more of the machines of the Company from obtaining machines corresponding to these from others or from using such machines so obtained in conjunction with any of the Company's machines.

These machines are offered on outright sale to anyone desiring to use them.

The terms upon which they are put out on lease are available to those only who are users only of certain of the principal royalty machines of the Company and when leased they are limited to use with such principal royalty machines.
